## SUPPLEMENTS COVERED IN THIS INDEX

<i>Document</i>	<i>Page Range</i>	<i>Date</i>	<i>Coverage</i>
NASA SP-7037 (02)	1-59	February 1971	January 1971
NASA SP-7037 (03)	61-128	March 1971	February 1971
NASA SP-7037 (04)	129-180	April 1971	March 1971
NASA SP-7037 (05)	181-261	May 1971	April 1971
NASA SP-7037 (06)	263-337	June 1971	May 1971
NASA SP-7037 (07)	339-402	July 1971	June 1971
NASA SP-7037 (08)	403-477	August 1971	July 1971
NASA SP-7037 (09)	479-532	September 1971	August 1971
NASA SP-7037 (10)	533-593	October 1971	September 1971
NASA SP-7037 (11)	595-648	November 1971	October 1971
NASA SP-7037 (12)	649-689	December 1971	November 1971
NASA SP-7037 (13)	691-729	January 1971	December 1971

This bibliography was prepared by the NASA Scientific and Technical Information Facility operated for the National Aeronautics and Space Administration by Informatics Tisco, Inc.

Use of funds for printing this publication approved by the Director of the Office of Management and Budget June 23, 1971.

## SPECIAL NOTICE

The abstract sections of the monthly supplements of *Aeronautical Engineering* can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each entry, e.g., p0524 N71-28368. To assist the user in binding Supplements SP-7037 (02) through SP-7037 (13), a title page is included in the back of this Cumulative Index.

**A CUMULATIVE INDEX  
TO  
AERONAUTICAL ENGINEERING  
A Special Bibliography**

This Cumulative Index supersedes the indexes contained in supplements SP-7037 (02) through SP-7037 (13).

*Scientific and Technical Information Office*  
OFFICE OF INDUSTRY AFFAIRS AND TECHNOLOGY UTILIZATION 1972  
NATIONAL AERONAUTICS AND SPACE ADMINISTRATION  
*Washington, D.C.*

**This Supplement is available from the National Technical Information Service (NTIS), Springfield, Virginia 22151 for \$9.00**

**For copies mailed to addresses outside the United States, add \$2.50 per copy for handling and postage.**

# INTRODUCTION

## WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to the abstracts contained in NASA SP-7037 (02) through NASA SP-7037 (13) of *Aeronautical Engineering: A Special Bibliography*. NASA SP-7037 and its supplements have been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA) and the National Aeronautics and Space Administration (NASA).

Entries prepared by the two contributing organizations are identified as follows:

1. NASA entries by their STAR accession numbers (N71-10000 series).
2. AIAA entries by their IAA accession numbers (A71-10000 series).

## HOW THIS CUMULATIVE INDEX IS ORGANIZED

This Cumulative Index includes a subject index, a personal author index, a corporate source index, a contract number index, and a report/accession number index.

## HOW TO USE THE SUBJECT INDEX

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and the following term or terms are used instead. For example:

AIRCRAFT PROTUBERANCES  
U PROTUBERANCES  
FLIGHT PERFORMANCE  
U FLIGHT CHARACTERISTICS

2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found. For example:

FLOW RESISTANCE  
NT AERODYNAMIC DRAG  
NT FRICTION DRAG  
NT SUPERSONIC DRAG

In addition, a searcher may use the notations of content in the index to narrow further his quest for particular items. This is because subject terms can readily include more than one class of document. For example:

AIRLINE OPERATIONS  
All-weather operations, including  
pilot role, instrument landing  
systems and guidance aids.  
Airport congestion as constraint on  
air travel, considering runway  
capacity and adjusted demand.

illustrates a case where two references on different topics are listed under the same subject term.

## HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in transliteration schemes may require multiple searching of the index for variants of an author's name. For example:

EMELIANOV, M.D.  
and  
YEMELYANOV, M.D.

## HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

BOEING CO., SEATTLE, WASH. MILITARY AIRCRAFT SYSTEMS  
DIV. (Corporate source at citation)

BOEING CO., SEATTLE, WASH. (Corporate source index entry)

## HOW TO USE THE CONTRACT NUMBER INDEX

All contract numbers that are identified in the abstract-section citations in the individual Supplements appear in this index. Changes by agencies in the style in which contract numbers are presented may require multiple searching for variants. For example:

AF 33(615)-71-C-1758  
F33615-71-C-1758

## HOW TO USE THE REPORT/ACCESSION NUMBER INDEX

All report numbers that have been assigned by the corporate source, monitoring agency or cataloging activity appear in this index. Variations in initial cataloging may result in different report number series. For example:

TP-924  
ONERA-TP-924

## IDENTIFICATION OF DESIRED SUPPLEMENT

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The page-number range of each Supplement appears on the inside front cover of this index. Once the range of page numbers containing the selected accession number is located in the second column, the desired Supplement number will be found in the first column. For example:

Page 195 will be found in Supplement 05.

## AVAILABILITY OF DOCUMENTS

Information concerning the availability of documents announced in the *Aeronautical Engineering* supplements is found in the Introduction to the most currently issued monthly supplement.

# TABLE OF CONTENTS

<b>Subject Index. . . . .</b>	<b>A-1</b>
<b>Personal Author Index. . . . .</b>	<b>B-1</b>
<b>Corporate Source Index. . . . .</b>	<b>C-1</b>
<b>Contract Number Index. . . . .</b>	<b>D-1</b>
<b>Report/Accession Number Index. . . . .</b>	<b>E-1</b>

# SUBJECT INDEX

AERONAUTICAL ENGINEERING / A Special Bibliography

JANUARY 1972

1971 Cumulative Index

## Typical Subject Index Listing

The subject heading is a key to the subject content of the document. The Notation of Content (NOC), rather than the title of the document, is used to provide a more exact description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the Notation of Content, e.g., p0052 N71-11466. Under any one subject heading, the accession numbers are arranged in sequence with the /AA accession numbers appearing first.

## A

### A-4 AIRCRAFT

External store interference caused by rocket launcher pod positioning on aircraft wing  
p0306 N71-19387

### A-6 AIRCRAFT

Statistical analysis of gyrocompass mode of A-6A inertial navigation system  
[RM-511] p0578 N71-30315

### A-7 AIRCRAFT

A-7 low altitude tactical fighter spin evaluation program, discussing maneuvering capability, external stores and departure mode  
p0184 A71-19094

### A-300 AIRCRAFT

European air traffic employed in transportation of tourists, considering European Airbus A-300B super twin  
p0598 A71-37273

### ABBREVIATIONS

#### U SYMBOLS

#### ABLATION

Ablation performance of glasslike carbons, pyrolytic graphite, and artificial graphite in stagnation pressure range 0.035 to 15 atm  
[NASA-TN-D-7005] p0127 N71-14138

Hypersonic test facility for studying ablation in models under high pressure and high temperature  
[NASA-CASE-XLA-00378] p0172 N71-15925

Design of hypersonic test facility for ablation tests and performance tests of vehicles under conditions of high temperature and pressure  
[NASA-CASE-XLA-05378] p0334 N71-21475

#### ABLATIVE MATERIALS

Mathematical model for predicting erosion of charring ablator in aerodynamic environment  
p0324 N71-20248

#### ABNORMALITIES

##### NT MAGNETIC ANOMALIES

#### ABORT TRAJECTORIES

Mathematical modeling of F-8 aircraft wave off trajectories for aircraft carrier approaches  
[AD-727121] p0711 N71-36439

#### ABSCISSAS

##### U COORDINATES

#### ABSORBERS (MATERIALS)

Absorbent materials for sound attenuation in turboreactor ducts, examining flow velocity, absorbent structure and cladding effects  
p0436 A71-30518

Sound absorptive materials selection for jet aircraft noise control

Corrosion inhibitor effects on water coalescing characteristics of DOD type filter/coalescer elements  
[AD-712999] p0116 N71-13070

#### ABSORPTION BANDS

##### U ABSORPTION SPECTRA

##### ABSORPTION COEFFICIENT

##### U ABSORPTIVITY

#### ABSORPTION SPECTRA

Aircraft noise measurements, noting ground absorption effects  
p0491 A71-32127

#### ABSORPTIVE INDEX

##### U ABSORPTIVITY

#### ABSORPTIVITY

Aircraft flyover noise samples, obtaining atmospheric absorption coefficients  
p0210 A71-21425

#### AC (CURRENT)

##### U ALTERNATING CURRENT

#### AC GENERATORS

Integrated drive AC generator for aircraft, discussing design improvements in power-weight ratio  
p0186 A71-19494

Dual magneto ignition system for business and small military aircraft, describing development, design and test program  
[SAE PAPER 710382] p0285 A71-24247

Windage tests of cylindrical and Lundell-conical rotors in ambient air producing Reynolds numbers up to 100,000 for high speed alternators  
[NASA-TN-X-67809] p0388 N71-23116

#### AC-1 AIRCRAFT

##### U DHC 4 AIRCRAFT

#### ACCELERATED LIFE TESTS

Turboprop aircraft engine service life extension, correcting deficiencies via accelerated tests based on relation between failure rate and usage  
p0266 A71-22633

Accelerated testing of jet fuel containment sealant, using reduced pressure and hybrid fluorocarbon silicone  
p0282 A71-24083

Passenger aircraft structures accelerated testing for safety and fatigue durability under operational conditions, describing tests, planning and evaluation  
p0358 A71-26946

Theory, calculation, and design of centrifugal compressor machines  
[AD-717878] p0392 N71-23297

#### ACCELERATION (PHYSICS)

##### NT ANGULAR ACCELERATION

##### NT DECELERATION

##### NT IMPACT ACCELERATION

Finite supercavitating wings numerical calculation using acceleration potential method  
p0089 A71-15210

Airfoils accelerating near sound velocity, calculating acoustic radiation by linear theory  
p0294 A71-24816

F-8D aircraft transonic flight and wing tunnel tests for buffet onset prediction, considering effects of q level and fluctuation amplitude and frequency  
[AIAA PAPER 70-341] p0296 A71-24863

Initially spherical liquid droplet transient response under surface tension accelerated by external gas flow  
[AIAA PAPER 71-393] p0344 A71-25355

Sound radiation from time varying point force in accelerative motion, applying to fan or helicopter rotor noise at subsonic tip speeds  
p0357 A71-26702

- Normal accelerations experienced by transport aircraft fleet from fatigue load meter data analysis, discussing counting rates seasonal variations  
p0428 A71-29788
- Aircraft accelerate-stop factors and regulations, pilot reaction times and accidents during takeoff  
p0693 A71-43380
- Cockpit and center of gravity acceleration during takeoff of Boeing 707 aircraft  
[ARC-CP-1120] p0171 N71-15721
- Center of gravity vertical acceleration and wing stresses of Boeing 720-B aircraft  
[TB-87-1970] p0229 N71-17119
- Analysis of normal accelerations through center of gravity of aircraft due to landing impacts and ground operations associated with taxi, takeoff, and landing  
[NASA-TN-D-6124] p0384 N71-22620
- ACCELERATION TOLERANCE**  
Pilot subjective evaluation of XB-70 aircraft response to atmospheric turbulence in comparison with measured accelerations  
p0426 A71-29774
- ACCELEROMETERS**  
Linear damping in piston type liquid damped accelerometers, using porous glass materials  
p0273 A71-23173
- Modal characteristic pick-up system for vibration tests of rockets or aircraft on ground using small size accelerometers with individual electronic circuit  
p0369 A71-27719
- Free flight measurements of aerodynamic lateral force and moment coefficients using gyroscopes and accelerometers  
[HSA-TN-164] p0045 N71-11001
- ACCIDENT INVESTIGATION**  
NT AIRCRAFT ACCIDENT INVESTIGATION  
Systems approach to accident investigation in civil aviation and homes  
p0033 N71-10115
- Aviation and surface transportation safety for 1970 with related accident investigations and recommendations  
[AR-4] p0464 N71-24925
- ACCIDENT PREVENTION**  
Aircraft aquaplaning skidding prevention by runway resurfacing and water depth sensor warning indicators  
p0280 A71-23946
- Air safety standards and objectives, discussing human factors as accident causes, piloting aids and management  
p0614 A71-39395
- Military pilot handling characteristics, discussing combat operations, accident prevention and blind landing  
p0669 A71-42239
- Aircraft wake turbulence and trailing vortices, investigating physical characteristics, hazard potential and avoidance techniques  
p0692 A71-43234
- Computer programs and predictor displays for solving air traffic control problems  
[NASA-CR-111372] p0052 N71-11466
- Aviation and surface transportation safety for 1970 with related accident investigations and recommendations  
[AR-4] p0464 N71-24925
- ACCIDENTS**  
NT AIRCRAFT ACCIDENTS  
NT AUTOMOBILE ACCIDENTS
- ACCRETION**  
U DEPOSITION
- ACCUMULATORS**  
NT DUST COLLECTORS  
NT SOLAR REFLECTORS
- ACCURACY**  
SAGE/Buic vs Kalman filters for aircraft tracking, determining accuracy by radar model  
[AIAA PAPER 71-58] p0152 A71-18517
- Technique for improving calibration accuracy standards from boundary layer calculations  
[IC/71/23] p0724 N71-37851
- ACIDITY**  
Aircraft turbine oils acid number potentiometric determination, discussing automatic titration procedure and apparatus and solvents influence on titration curve and inflection point  
p0560 A71-36680
- ACOUSTIC ATTENUATION**  
NT SHOCK WAVE ATTENUATION  
Plane sound waves incident on flat plate airfoils lattice, obtaining transmitted and reflected pressure amplitudes  
[AIAA PAPER 71-181] p0155 A71-18620
- Turbofan engine noise reduction, using acoustic liners in inlet and exhaust ducts  
[AIAA PAPER 71-183] p0155 A71-18622
- Engine inlet noise prediction from static test and flyover data as function of time at various observer locations, examining suppression effects on total spectra  
[SAE PAPER 710386] p0286 A71-24250
- Absorbent materials for sound attenuation in turboreactor ducts, examining flow velocity, absorbent structure and cladding effects  
p0436 A71-30518
- Noise attenuation prediction in absorbing ducts adaptable to bypass jet engines, using Morse theory  
p0437 A71-30522
- Acoustic linings for attenuation of fan generated noise in turbofan engines, considering interaction between analytical lining performance prediction and flow duct testing  
[AIAA PAPER 71-731] p0443 A71-30778
- Soundproofing of air inlets and fan exhausts with reference to absorbent systems with resonant cavities, technologies, environmental conditions and material fatigue  
p0488 A71-31880
- Aircraft noise measurements, noting ground absorption effects  
p0491 A71-32127
- Sound absorptive materials selection for jet aircraft noise control  
p0615 A71-39451
- Noise reduction of Boeing 707 during landing approach by modifying turbofan nacelle with polyimide fiber glass acoustic sandwich materials  
[NASA-CR-1713] p0173 N71-15964
- Acoustic attenuation determined experimentally during engine ground tests of XB-70 airplane and comparison with predictions  
[NASA-TN-X-2223] p0244 N71-17951
- Sonic boom in interaction of conical field and plane shock wave  
p0523 N71-28366
- ACOUSTIC COMBUSTION**  
U COMBUSTION STABILITY
- ACOUSTIC DUCTS**  
Aircraft engine double-reverberant chamber duct lining test facility, discussing noise fields, air flow, layout, performance, insertion and transmission losses, etc  
p0143 A71-17619
- Noise attenuation prediction in absorbing ducts adaptable to bypass jet engines, using Morse theory  
p0437 A71-30522
- Flow-duct test facility data on acoustic behavior of lined ducts and duct-lining materials for turbojet engine applications  
[NASA-CR-111887] p0476 N71-26417
- ACOUSTIC EXCITATION**  
Aerodynamic sound generation by turbulent circular free jets, presenting solution to inhomogeneous acoustical wave equation by Lighthill  
p0142 A71-17421
- Turbulence properties in supersonic flow, considering modes with vorticity, entropy and acoustic aspects  
p0277 A71-23603
- Vortex shedding from blunt trailing edge of flat plate spanning wind tunnel under oscillating flap and acoustic resonance excitations  
p0699 A71-44558
- Acoustic resonance excited by vortex shedding from circular cylinders and thin plates in wind tunnels noting pressure gradients  
[ARC-CP-1141] p0519 N71-27716
- ACOUSTIC FATIGUE**  
Aircraft structures sonic fatigue due to high frequency noise from turbofan engines, discussing case histories, failure diagnosis and precautionary design measures

- Flight test measurements of shock cell noise loading of aircraft tail planes, noting alleviation by nozzle and mirror structural modifications p0603 A71-37843
- ACOUSTIC GENERATORS
- U SOUND GENERATORS
- ACOUSTIC IMPEDANCE
- Free wave reflection measurements of normal acoustic impedance of ground surfaces in relation to shock waves from large supersonic commercial aircraft p0609 A71-38467
- Inlet noise suppressors having perforated plate over honeycomb wall construction evaluated over range of passage heights and engine speeds using turbojet engine as noise source [NASA-TN-D-6395] p0068 A71-13278
- ACOUSTIC MEASUREMENTS
- Fan/compressor noise research covering vane/blade ratio and geometry effects on transmission through blade rows [ASME PAPER 70-WA/GT-12] p0587 N71-31096
- UH-1B helicopter flight test noise measurements data reduction and analysis, presenting sound pressure vs frequency and time plots p0076 A71-14120
- Helicopter in-flight noise radiation pattern and spectra measurements for various operating parameters p0092 A71-15405
- Aircraft flyover noise samples, obtaining atmospheric absorption coefficients p0093 A71-15406
- Aircraft noise abatement control on international basis by setting acoustic technological capability compulsory standards of quietness p0210 A71-21425
- Axial flow fan noise, investigating louvers effects on sound field p0215 A71-21826
- Noise production during aerodynamic tests on helicopter rotor in wind tunnel p0357 A71-26704
- Sound fields of flying aircraft from noise measurements, discussing engine operating conditions, speed and attitude p0436 A71-30519
- Jet aircraft sound spectrum on ground and in air, comparing calculation with experiment p0437 A71-30521
- Noise measurement data on various types of blown flap configurations for STOL aircraft, discussing integration effects between jet and flap assembly [AIAA PAPER 71-745] p0437 A71-30524
- Fan induced low speed jet noise from turbofan engines, discussing results of far field sound measurements for simulated nacelle configurations with and without acoustic liners p0443 A71-30785
- Aircraft noise reduction criteria, examining noise measurements relation to human behavior and physical measures connection to subjective judgments [AIAA PAPER 71-586] p0482 A71-31533
- Aircraft noise in-flight measurement and analysis, including engine parameters, synchronous recordings, flight paths and coded analog bands p0488 A71-31879
- Aircraft engine noise test methods for acoustic certification, investigating jet and compressor silencing, absorbent materials, rotor and propeller noise and psychoacoustic tests p0489 A71-31890
- Aircraft noise measurements, noting ground absorption effects p0491 A71-32127
- Aircraft flyby effective noise duration calculations, examining observation points and analysis methods p0495 A71-32519
- Helicopter rotor noise due to blade-vortex interaction, using linear gust model p0562 A71-36934
- Jet aircraft flyover noise measurement, determining average intrusion level in residential communities under approach and departure corridors p0600 A71-37497
- Near field noise measurement on quarter-scale model to estimate fuselage pressure in VTOL aircraft for conventional, short and vertical takeoff configurations p0603 A71-37843
- Propeller vortex noise analysis by on-line 1/3 octave band resolution, discussing characteristic results from noise measurements on various propeller configurations p0609 A71-38467
- Acoustic noise output from round interfering subsonic jets, considering suppressor nozzle attenuation p0659 A71-40868
- Air and land transportation noise sources and measurement, noise level scales, and individual and community responses - conference [PB-191117] p0037 N71-10349
- Measurement of noise levels during OV-10 aircraft operations [AD-712667] p0106 N71-12230
- Measurement of engine exhaust noise during ground operation of XB-70 aircraft [NASA-TN-D-7043] p0172 N71-15820
- Measurement of variability of aircraft noise during level flight flyovers [NASA-CR-1752] p0256 N71-18865
- Noise measurement evaluation of takeoff and approach profiles optimized for noise abatement [NASA-TN-D-6246] p0257 N71-18929
- Sources and characteristics of aircraft noise for conventional and V/STOL aircraft p0308 N71-19457
- Acoustic measurements of deflected jet VTOL aircraft [AD-715939] p0310 N71-19549
- Determining types of acoustical measurements suitable for test section of NASA Langley wind tunnel [NASA-CR-111868] p0311 N71-19630
- Inlet plenum chamber noise measurement comparison of 20 inch diameter fan rotors with aspect ratios of 3.6 and 6.6 [NASA-TN-X-2191] p0312 N71-19707
- Sound pressure levels produced by C-5A during ground tests [AD-716814] p0330 N71-20824
- Urban air and surface vehicle noise levels and abatement potential [OST-ONA-71-1-VOL-2] p0332 N71-21085
- Identification and control of aeromedical factors associated with aircraft noise and acoustic measurements during C-141 operational missions [AD-718097] p0399 N71-23748
- Climb and landing approach noise measurements for three engine turbofan transport aircraft [NASA-TN-D-6137] p0460 N71-24582
- Interior sound pressure measurements in C-5A aircraft [AD-719746] p0466 N71-25060

- Human role in Aerospace Defense Command navigation, discussing Airborne Warning And Control System and navigational aspects of ADC mission p0201 A71-20346
- Automatic Carrier Landing System with linear adaptive Aircraft Navigation Computer, investigating effectiveness in reducing system errors due to nonlinearities and noise effects p0202 A71-20405
- Aircraft radio compass navigation errors due to loop antenna inclinations during maneuvering p0205 A71-20787
- VOR/DME ground station oriented aircraft area navigation horizontal guidance capability, discussing digital input/output flight control p0207 A71-21166
- Commercial V/STOL aircraft area navigation system requirements, discussing airborne computer, flight plan data storage and control subsystems and horizontal orientation display p0283 A71-24150
- Area navigation facility, discussing control and display and navigation standards p0358 A71-26879
- Airport geodetic control stations, discussing obstruction charting program p0365 A71-27537
- Onboard area navigation systems in ATC environment, discussing route structure and flight instruments [SAE PAPER 710455] p0408 A71-28332
- Area navigation system based on radio aids by airborne receivers and sensors for aircraft movement improvement, noting advantages of pilot displays [SAE PAPER 710457] p0438 A71-30533
- Inertial navigation systems improvements for commercial air transportation, noting digital computer program revision and increased functional capability [SAE PAPER 710458] p0438 A71-30534
- Combined inertial and instrument landing aircraft navigation systems with reduced cross runway position and velocity errors, using optimal linear estimation p0439 A71-30606
- Air navigation techniques history, considering radio, radar, loran Doppler and inertial navigation p0440 A71-30712
- Probabilistic methods for solving ATC and navigation problems, considering stochastic processes theory p0482 A71-31463
- Concorde flight simulator at Toulouse, discussing flight control system, air navigation and certification p0488 A71-31881
- Carousel IV inertial navigation system of Boeing 747 aircraft, discussing informational capabilities, accuracy and reliability p0509 A71-34079
- Electronically scanned cruciform slot-array aircraft antenna for satellite controlled navigation aid, discussing circularly polarized wave radiation p0509 A71-34123
- Navigation and communication satellites development for civil aviation and shipping, examining technical, organizational, operational and cost

- problems p0533 A71-34240
- ATC system improvement, presenting data acquisition upgrading and ground automation- aircraft navigation systems interface p0536 A71-34614
- Precision area navigation system, considering position and velocity continuous measurement in three dimensional space, system components and simulation program p0536 A71-34616
- Dioscures communication satellite system for air traffic control and navigation, discussing aircraft antenna beam electronic scanning by computerized control p0537 A71-34681
- Air navigation, surveillance and traffic control technology effects on land and airspace uses at airports p0542 A71-35371
- ATC system safety problems from user standpoint, considering requirements by pupil, test and airline pilots and light, private, business, taxi and military aircraft p0542 A71-35372
- ATC system improvement by area navigation, discussing benefits in services, safety and cost effectiveness p0542 A71-35373
- Military and civil aircraft navigation systems development, emphasizing self contained airborne equipment p0542 A71-35374
- Airborne communications with AN/ARC-154 transceiver in single radio, discussing extended frequency coverage, multimode operation, navigation and input/output provisions p0548 A71-35758
- Omega navigation application to general aviation aircraft, presenting diurnal course shift to overcome deficiencies p0548 A71-35767
- Air navigation and traffic control systems with application to Western Europe and Atlantic area, noting requirements for ILS successor p0553 A71-35998
- Satellite based position fixing data by ranging techniques, discussing application to navigation and ATC p0558 A71-36493
- Aircraft onboard equipment tests in air navigation aid satellite project, estimating tracking random errors p0559 A71-36509
- Navigational accuracy improvement by combining VOR/DME information with airspeed and heading data via maximum likelihood filter, using small airborne computer [AIAA PAPER 71-928] p0597 A71-37174
- Radio and radar air navigation for civil aviation, discussing Doppler effect, inertia and satellite systems p0599 A71-37344
- Concorde aircraft navigation system comprising triple inertial systems, dual VOR/DME, dual ILS and dual ADF [CASI PAPER 72/9] p0601 A71-37599
- Time and frequency synchronization for EROS airborne collision avoidance system, considering impact on aeronautical communication, navigation and surveillance [CASI PAPER 72/17] p0602 A71-37604
- Aircraft lateral dynamics effect on positioning accuracy along straight flight path, using Loran C data p0610 A71-38864
- One man Jaguar aircraft navigation, weapon aiming system and pilot operational tasks, noting inertial platform alignment, displays and target attack modes p0617 A71-39825
- Avionics combined display system for area navigation, discussing design, color map projection, overlays, CRT unit and viewability p0650 A71-40137
- Satellite navigation system for aviation and marine use, examining operational requirements, economic viability and technical solutions p0662 A71-41509
- Navigation role in airways systems development - Conference, Saddle Brook, New Jersey, April 1971 p0666 A71-42077
- Combined inertial navigation and VOR/DME systems contribution to area navigation accuracy and efficiency p0666 A71-42080
- Unaided, integrated and differential OMEGA radio navigation configurations, comparing accuracy and suitability for airways system operations p0667 A71-42082
- Analytical model for air navigation and ATC system design, demonstrating system parameters effects on lateral separation standards for parallel flight lanes p0667 A71-42083
- Navigation and surveillance interdependence in ATC p0667 A71-42085
- Air traffic control integrated communication, navigation and identification system, discussing design, economics, technology and flexibility p0667 A71-42086
- VOR/DME air navigation equipment using Kalman-Bucy filter and airborne air data system /ADS/ p0669 A71-42289
- Corporate aircraft operations in Latin America, discussing communication and navigation, fuel, paper work, food, vaccinations and weather p0694 A71-43391
- Mobile LP air navigation AN/MRN-13 equipment, operation and maintenance p0696 A71-43878
- Computerized solution of nonlinear differential equations for inertial navigation systems [AD-717058] p0329 N71-20765
- Monte Carlo general purpose shielding computer program in FORTRAN 4 for IBM 7094 computer [PNSI-TR-70-0301-1-VOL-1] p0379 N71-22379
- Simulation, analysis, and recommendations for flight profile of Concorde aircraft to predict and achieve improvements in aircraft operation - Vol. 2 [PNSI-TR-70-0301-2-VOL-2] p0380 N71-22380
- Bibliography on radar and radio navigation [DLR-MITT-70-21] p0513 N71-26970
- Evaluation of flight plan position information display for ocean flying control [FAA-WA-71-21] p0628 N71-32084
- Operating instructions of Decca Mark 19 navigation system p0634 N71-32861
- Synthesis of aircraft across track errors using mathematical models with statistical parameters [REPT-E/C-2] p0635 N71-32885
- Operating instructions for Decca Mark 25 navigation system p0635 N71-32917
- Navigational accuracy resulting from sidetone signals relayed by two synchronous ATS-1 and ATS-3 satellites and application to aircraft navigation [NASA-CR-121977] p0686 N71-35770
- Development and testing of VHF omnirange transmitter for aircraft azimuth guidance [FAA-RD-71-65] p0687 N71-35779
- Automatic computation of navigation coordinates using analog and digital computers [AD-726603] p0687 N71-35782
- Aircraft takeoff, navigation, and landing aids, aerodynamics characteristics, and crew rescue equipment [AD-727860] p0721 N71-37618
- Airline view of air navigation problems p0724 N71-37896
- Air traffic control, communications, navigation, frequency management, systems analysis, and aircraft SBDS program developments p0726 N71-38214
- AIR PIRACY**
- Airline liability and insurance in relation to aircraft hijacking, sabotage, etc p0003 A71-10359
- Hijacking and acts of violence against civil aircraft, concerning draft convention by legal committee of International Civil Aviation Organization p0087 A71-14997
- Rumanian air law of 1953 and penal codes of 1969, discussing statutes concerning in flight committed crimes against persons and property or air piracy

- p0142 A71-17425  
Air piracy /hijacking/ bibliography, considering national and international law, extradition, punishment, prevention and safety ensurance for passengers and crews
- p0663 A71-41617  
Senate hearings on Federal anti-skyjacking program
- p0592 N71-31511  
Air piracy resolutions presented to Congress and US and worldwide air piracy statistics
- p0633 N71-32689  
Convention for suppression of unlawful aircraft seizure and article by article analysis
- p0717 N71-37590
- AIR POLLUTION**
- Gas turbines air pollution control, discussing exhaust composition, combustion chamber design, engine efficiency, etc
- p0009 A71-10820  
Combustor design for minimum exhaust smoke emission from aircraft gas turbine jet engines, considering air pollution
- p0206 A71-20867  
Commercial supersonic flight, investigating air pollution and alleged climate and weather modification effects due to principal exhaust products
- p0214 A71-21821  
Air pollution emissions at Heathrow Airport, London, from aircraft operations, heating installations and road traffic
- p0214 A71-21823  
Airport pollution dispersion modeling, simulating effect on surrounding areas for abatement strategies calculation
- p0215 A71-21824  
National Air Pollution Control Administration control of aircraft engine pollutant emissions covering measurement, test instrumentation, research, standards and regulations
- p0216 A71-21831  
Aircraft engine smoke emission control, discussing Ringelmann chart assessment for various commercial jet aircraft and airport gaseous pollutants
- p0216 A71-21832  
Air polluting nitric oxide and soot production by jet aircraft, discussing mixing process and atmospheric dispersion
- [AIAA PAPER 70-115] p0366 A71-27560  
Modular concept mathematical model for combustion and pollution formation processes in jet engine combustors, including turbulent mixing and reaction kinetics
- [AIAA PAPER 71-714] p0442 A71-30766  
SAE/DOT conference on aircraft and environments covering noise pollution, airport noise, sonic booms, regulatory/legal aspects and air pollution
- [AIAA PAPER 71-729] p0443 A71-30776  
Aircraft and airports as air pollution sources, stressing industries understanding of applicable control technology
- p0492 A71-32243  
Dispersal of jet aircraft exhaust emissions near airports and of smoke trails in upper atmosphere, assessing pollutant levels near large urban airports
- p0492 A71-32244  
Aircraft pollutant emission regulation, discussing low smoke combustors and fuel dumping problem
- p0492 A71-32246  
Jet engines nitric oxide air pollutant emission formation, developing gas turbine combustor models
- [AIAA PAPER 71-712] p0493 A71-32289  
Turbine propulsion system smoking and exhaust gas emission, discussing aircraft and automobile pollution emission
- p0615 A71-39452  
VTOL air system for automobile travel replacement noting noise, cost, pollution and traffic congestion reduction
- p0669 A71-42527  
Operating variables effect on pollutant exhaust from jet aircraft turbine engines, discussing combustor design techniques for emissions reduction
- p0695 A71-43600  
SST operation climatic impact assessment program, considering carbon dioxide, water vapor, contrails, particulates, nitrogen oxides and carbon monoxide
- p0703 A71-44982  
Bibliography on urban economics and planning
- [AD-714500] p0180 N71-16874  
Economic analysis of aeronautical R and D efforts in US and aeronautical contributions to noise and air pollution, including technology assessment and data analysis techniques
- [NASA-CR-1809] p0514 N71-27011  
Control equipment and engine development for air pollution control from jet aircraft engine emissions
- p0591 N71-31403  
Exhaust emission from reciprocating aircraft engines, and afterburning of exhaust gases on contact with ambient air - air pollution study
- [PB-197627] p0592 N71-31569  
Impact of jet aircraft emissions on air quality in vicinity of Los Angeles International Airport
- [PB-198699] p0621 N71-31779  
Deficiencies in combustion technology, and 5 year research and development plan for air pollution control by combustion process modification
- [PB-198066] p0624 N71-31900  
Operational methods for control of air pollution emissions from aircraft turbine engine combustor
- [NASA-TM-X-67887] p0631 N71-32484  
Types of measurement, and solutions to air pollution problems caused by transportation vehicles
- [DHO-RRL69] p0686 N71-35485  
Air pollution by gas turbine aircraft engines
- p0689 N71-36387
- AIR PURIFICATION**
- Cabin air conditioning for passenger aircraft noting air purification and recirculation, odor control, and pressurization requirements
- [ARC-CP-1136] p0331 N71-20849
- AIR TRAFFIC**
- V/STOL services integration into UK air traffic system
- p0070 A71-13567  
Air transport development, examining capital investment, traffic volume and facilities
- p0079 A71-14246  
Large capacity aircraft reception and servicing problems consideration for facilitating traffic
- p0143 A71-17588  
Airport adaptation to large capacity aircraft, considering terminal installations, infrastructures, runways, roads and traffic areas
- p0143 A71-17589  
Urban transit and ATC vehicle identification and position determination system, considering surface and airborne traffic real time information communication
- p0208 A71-21169  
Jurisdiction of air traffic and space law, noting applicability to start and landing phases of spacecraft
- p0272 A71-23000  
Supersonic transport air traffic meteorology, considering high altitude and flight velocities, applications technology satellites for lower stratosphere thunderstorms, clear air turbulence, etc
- p0272 A71-23070  
Motion sequential analysis of airways utilization, using mathematical-statistical methods
- p0360 A71-27143  
Roissy-en-France airport, describing construction, passenger handling, terminal facilities, traffic volume and runway system
- p0419 A71-29309  
Book on air law and civil air policy covering international regulation, air traffic market, passenger and cargo services, etc
- p0430 A71-29938  
Long haul international air transport, analyzing traffic growth rates
- p0431 A71-30161  
Long term prospects of air traffic development in competition with other modes, estimating VTOL service demand
- p0431 A71-30164  
Finnish air traffic law based on international civil aviation convention, discussing regulations relative to aircraft, personnel and airports
- p0562 A71-36919  
Warsaw air traffic convection agreements as amended at The Hague and Guatemala, presenting air

# SUBJECT INDEX

# AIR TRAFFIC CONTROL

- transport regulations in present form p0562 A71-36920
- European air traffic employed in transportation of tourists, considering European Airbus A-300B super twin p0598 A71-37273
- Air traffic congestion and delay Monte Carlo digital simulation in FORTRAN, exemplifying two-runway airport operation under instrument flight rules p0605 A71-38024
- Airport congestion as constraint on air travel, considering runway capacity and adjusted demand p0606 A71-38028
- Aircraft anticollision flashing lights, discussing current practices within national and international air traffic regulations regarding flash frequency, color and light sources p0661 A71-41499
- Canadian STOL program, discussing Quebec-Windsor corridor passenger traffic [AIAA PAPER 71-982] p0700 A71-44578
- STOL aircraft system, discussing ground installations, runways, three dimensional area navigational aids, noise reduction, air traffic and short haul productivity [AIAA PAPER 71-983] p0700 A71-44579
- Air traffic pattern prediction for 1980 peak summer periods in London, England terminal area p0034 N71-10163
- Analysis of airport travel demands at Lambert-St. Louis Municipal Airport [PB-192057] p0123 N71-13695
- Survey of Huntsville pattern of commercial air traffic [NASA-CR-115880] p0169 N71-15553
- Survey of rapid transit railway impact on airport passenger traffic [PB-195045] p0226 N71-16990
- Tabulations for rapid transit system effect on airport traffic [PB-195049] p0226 N71-16991
- Rapid transit railway effect on airport passenger traffic [PB-195046] p0226 N71-16992
- Research and development aspects of air transportation system for state of Texas [PB-196933] p0336 N71-21628
- Compilation of references on various aspects of air transportation for Texas [PB-196936] p0336 N71-21630
- Proceedings and recommendations of conference on sonic booms [IGIA-17/4.8] p0372 N71-21976
- Predicted civilian air travel increase and airport use in United States of America for 1980 [AD-720732] p0515 N71-27155
- Trends in air transportation and airline industry operations from 1970 to 1980 p0592 N71-31512
- Graphs and tables of aircraft traffic over North America - 1966 through 1969 [RAE-LIB-TRANS-1580] p0726 N71-38210
- AIR TRAFFIC CONTROL**
- NT RADAR APPROACH CONTROL**
- Traffic radar generated weather contours for air traffic controller in helping aircraft avoid thunderstorms p0007 A71-10587
- Air traffic control by satellite, discussing CNES-SGAC and ESRO experiments within Dioscures project test program p0008 A71-10748
- ATC communication environment simulation via mathematical model based on ATC statistics p0011 A71-10979
- ATC automation, using conflict prediction algorithm based on airspace assignment to aircraft entering system p0018 A71-11698
- ATC system improvement by procedural changes, applying probability concepts to flight safety p0018 A71-11699
- Helicopter operations integration into civil air traffic system, noting special requirements for mixed fixed and rotary wing terminal environments p0029 A71-12892
- Maximum throughput-rate capacity for runway and final approach path airspace involving multiple IFR landings p0029 A71-12893
- Time-synchronized approach control combining aircraft precision navigation and guidance with ATC equipment p0029 A71-12894
- Intercity V/STOL aircraft transport system, solving congestion problems through all weather superiority, low noise level and separate ATC p0070 A71-13571
- Short haul STOL concepts including stolport potentials, onboard avionics, vehicle characteristics, tradeoffs and current nonproductive flying due to traffic congestion p0072 A71-13620
- Spacecraft and aircraft automatic control man machine interface, bionics and traffic control systems p0081 A71-14393
- Statistical connection strategies for automatic multiradar air traffic surveillance using track computer p0081 A71-14395
- Navigation and traffic control of VTOL commercial transport aircraft, discussing noise, G forces, turbulent wakes, approach profiles and V-ports p0096 A71-15429
- Air traffic control using collision risk equations, noting data handling automation, airborne collision avoidance devices and geostationary satellites p0100 A71-15646
- Air traffic control radar separation by pulse repetition frequency discrimination for double and triple stagger configurations p0133 A71-16347
- General aviation safety and effectiveness enhancement through electronic technology applications, discussing airspace control systems based on beacon transponder, LF-VLF area navigation and vertical radar p0141 A71-17228
- Omega for aircraft navigation and traffic control, discussing reliability, resolution and prediction errors p0146 A71-17924
- SAGE/Buic vs Kalman filters for aircraft tracking, determining accuracy by radar model [AIAA PAPER 71-58] p0152 A71-18517
- Computer aided automatic fault data logging, classification, analysis and reporting methods in integrated ATC system p0186 A71-19556
- Three-phase time-ordered functional organization for ground based collision avoidance, discussing information flow, display capability and dynamic simulation model [AIAA PAPER 71-240] p0188 A71-19716
- System automation evolutionary process in terminal Air Traffic Control environment [AIAA PAPER 71-242] p0188 A71-19717
- ATC automated systems, discussing National Airspace System En Route Stage A and Advanced Radar Terminal System [AIAA PAPER 71-244] p0188 A71-19719
- Computer display channel for en route air traffic control flexible real time data processing and display subsystem [AIAA PAPER 71-247] p0189 A71-19721
- Associative digital processor with associative memory for high speed ATC data processing, discussing design and operation p0195 A71-19997
- U.S. domestic ATC airspace enroute and terminal area navigation system effects on pilot workload, projecting future FAA requirements p0201 A71-20347
- Optimal air traffic control coordinating flow and holding patterns of aircraft landing in single runway using linear-quadratic technique p0209 A71-21335
- ATC automation program for en route and terminal centers, discussing combined nationwide system features, IFR volume and video digitizer data links p0210 A71-21659
- ATC system analysis, discussing airport and airspace utilization, area navigation, midair collisions and traffic mix p0266 A71-22470

- Air traffic controllers legal responsibility and disciplinary procedure, considering clearances, flight crew instructions and aircraft accidents  
p0269 A71-22891
- Radar analog simulators for Polish air traffic controllers training, describing optical and electronic equipment  
p0270 A71-22950
- Aircraft industry ATC techniques and equipment contribution to aircraft control and safety  
p0270 A71-22951
- ATC services training and operations methods adopted by International Aeradio Ltd  
p0270 A71-22952
- ATC electronic automation systems development for air safety improvements  
p0271 A71-22953
- Digital simulator for training ATC officers, considering authenticity and working and geographical environments  
p0271 A71-22954
- Secondary surveillance radar in ATC systems, discussing advantages and implications for controllers  
p0271 A71-22955
- Aircraft motion and traffic control at air corridors intersections for minimum flight schedule deviation under random disturbance due to weather, using statistical simulation  
p0283 A71-24158
- ATC station ground to air communication via VHF tropospheric scatter, discussing high power radio transmitters and low noise over the horizon receivers combination  
p0284 A71-24175
- ATC automation system design, considering controllers decision time savings  
p0288 A71-24271
- Digital simulation facility for airborne collision avoidance system effects on ATC terminal automation, discussing operation, hardware and software equipment  
p0293 A71-24774
- ATC regulations considered for Concorde introduction to passenger service, discussing landing and takeoff characteristics  
p0340 A71-25232
- Area navigation facility, discussing control and display and navigation standards  
p0358 A71-26879
- Airport geodetic control stations, discussing obstruction charting program  
p0365 A71-27537
- Midair collisions analysis for civil-military integrated ATC air space, discussing near miss volume, random heading aircraft density and pilots evasive action vs avoidance percentages  
p0367 A71-27599
- Onboard area navigation systems in ATC environment, discussing route structure and flight instruments [SAE PAPER 710455]  
p0408 A71-28332
- Optimum functional integration and performance requirements of navigation aids and ATC in terminal area [SAE PAPER 710456]  
p0408 A71-28333
- Feasibility of VHF aeronautical satellite system frequency sharing band used by ATC service, employing spatial separation, antenna directivity and frequency offset  
p0412 A71-28873
- En route turbojet aircraft flight speed control, assessing impact on ATC procedures  
p0413 A71-28884
- ATC radar display systems mapping techniques using vectors and optical projections  
p0430 A71-30014
- French ATC, discussing automatic coordinator systems, computer utilization and flight plan data processing  
p0435 A71-30382
- Maastricht Automatic Data Processing and Display ATC system with digital computers for aiding controllers in issuing instructions and making decisions  
p0435 A71-30383
- ATS 1 and 3 satellite VHF transponders for ships and aircraft location, communication and remote sensing, discussing performance test results  
p0445 A71-30898
- Aircraft phased arrays for L-band ATC satellite system application, alleviating problems of power budget and vulnerability to multipath and interference  
p0447 A71-31054
- Probabilistic methods for solving ATC and navigation problems, considering stochastic processes theory  
p0482 A71-31463
- Associative processor for ATC with fast arithmetic processing, equality search and input/output operations  
p0482 A71-31517
- Three dimensional ATC radar supplying simultaneous range, azimuth and elevation information for indefinite number of targets by continuous searching  
p0491 A71-32167
- ATC data automation, discussing flight plan processing system /PPPS/, radar data processing system /RDPS/ and signal automatic control system /SATCO/  
p0495 A71-32523
- ATC satellites providing communications channels between aircraft and ground control stations and aircraft localization  
p0498 A71-32849
- ATC system models, covering surface movement, runway utilization, terminal areas and enroute traffic  
p0535 A71-34523
- ATC system improvement, presenting data acquisition upgrading and ground automation-aircraft navigation systems interface  
p0536 A71-34614
- ATC avionics equipment, discussing inertial area navigation, autopilots, airborne data acquisition, altitude reporting, collision avoidance, CAT, satellite communications, etc  
p0536 A71-34615
- Time division multiplexing system for ATS, discussing surveillance geostationary satellite feasibility, delta modulation for data transmission and aircraft equipment  
p0537 A71-34680
- Dioscures communication satellite system for air traffic control and navigation, discussing aircraft antenna beam electronic scanning by computerized control  
p0537 A71-34681
- Queueing theory approach to communication satellite network design, applying to ocean air traffic control and worldwide military broadcast systems  
p0539 A71-35106
- Soviet book on air transportation covering ATC, automatic landing and information display systems  
p0540 A71-35194
- Air navigation, surveillance and traffic control technology effects on land and airspace uses at airports  
p0542 A71-35371
- ATC system safety problems from user standpoint, considering requirements by pupil, test and airline pilots and light, private, business, taxi and military aircraft  
p0542 A71-35372
- ATC system improvement by area navigation, discussing benefits in services, safety and cost effectiveness  
p0542 A71-35373
- Aircraft accident litigation related to wake turbulence concerning pilot or air traffic controller faults  
p0543 A71-35387
- Soviet book on radio control of various flight vehicles covering closed loop synthesis, missile guidance, spacecraft trajectory correction and air traffic control  
p0543 A71-35403
- Air navigation and traffic control systems with application to Western Europe and Atlantic area, noting requirements for ILS successor  
p0553 A71-35998
- Satellite based position fixing data by ranging techniques, discussing application to navigation and ATC  
p0558 A71-36493
- ESRO part of joint ATC communication experiment for L band satellite use, giving voice and data transmission and distance measurement techniques tests results

## SUBJECT INDEX

## AIR TRAFFIC CONTROL CONTD

- Bit and scanning field synchronizations of time  
multiplex for air traffic control p0559 A71-36510
- Computer-based aircraft tracking with aid of twin  
radar air traffic control system, discussing  
components and operation p0559 A71-36513
- Computerized automatic estimation techniques  
application to real time aircraft tracking in ATC  
system design p0562 A71-36993  
[AIAA PAPER 71-926] p0596 A71-37172
- Aircraft position errors computation for ATC  
mathematical surveillance models, estimating  
collision risk p0597 A71-37173  
[AIAA PAPER 71-927]
- Airborne traffic situation display for use with  
national airspace/automatic radar control terminal  
system, using computer selected message, map and  
heading data p0597 A71-37175  
[AIAA PAPER 71-929]
- Airport system utilization, discussing aircraft

## AIR TRAFFIC CONTROL CONTD

## SUBJECT INDEX

- [FAA-NA-70-31] p0158 N71-14567  
Capacity measurement methodology for air traffic control system with long range objectives
- [FAA-RD-70-70] p0163 N71-14835  
Optimization techniques for aircraft multiple flight paths
- [AD-713136] p0168 N71-15392  
Investigation of transponder reply fadeout in vicinity of O'Hare Airport, Chicago, Illinois
- [FAA-RD-70-75] p0169 N71-15498  
Methodology for evaluating capacity of air traffic control systems
- [FAA-RD-70-69] p0169 N71-15558  
Description of Air Force tactical air control and communications system
- [AD-714292] p0176 N71-16492  
European aerospace and electronic equipment industrial cooperation for air traffic control and communication satellites
- p0230 N71-17181  
Proposed STOL operations in Northeast Corridor with respect to air traffic control
- p0244 N71-17963  
Systems analysis summary on New York metropolitan area air traffic capacity
- p0245 N71-18040  
Surveying air traffic controller occupation and development of performance objectives
- p0247 N71-18105  
Establishing minimum operational requirements for airborne air traffic control transponder systems
- [DO-144] p0247 N71-18109  
Survey of air traffic control radar beacon system operational problems
- p0247 N71-18116  
System description of field test model of ARTS 2 modular alphanumeric nontracking ATC system
- p0255 N71-18815  
Traffic control system for supersonic transports using synchronous satellite for data relay between vehicles and ground station
- [NASA-CASE-GSC-10087-1] p0260 N71-19287  
Design, construction, operation, and management of military airports
- [AD-716603] p0312 N71-19702  
Cockpit display of automatic radar control systems data
- [AD-716425] p0315 N71-19848  
Development of improved surveillance and communication subsystems for automated air traffic control system
- [AD-716816] p0330 N71-20774  
Aircraft safety and aircraft reliability, noting pilot performance, landing approach and takeoff, and clear air turbulence
- p0377 N71-22197  
Satellite applications to aircraft communications, navigation, and surveillance over US including synthesized satellite network and aircraft equipment for air traffic control
- [NASA-CR-117760] p0379 N71-22339  
Location/identification transmitter and equipment for use in satellite applications in aircraft communication, navigation, and surveillance for US air traffic control
- [NASA-CR-117759] p0379 N71-22340  
Market forecasts and traffic control technologies of Boeing 747 aircraft and supersonic aircraft operations
- p0380 N71-22383  
US cooperation with ESRO UHF satellite system development for air traffic control in Europe
- [NASA-TT-P-13651] p0401 N71-23967  
Terminal air traffic control facility for approach systems tests
- [AD-719104] p0457 N71-24451  
Evaluation of dual input transponder with upper and lower aircraft antennas as resolution for problems with air traffic control radar beacon system limitations
- [FAA-NA-71-39] p0464 N71-24882  
Tropospheric and ionospheric absorption at VHF for North Atlantic aeronautical satellite system
- [NASA-TM-X-65507] p0464 N71-24914  
Satellite aided aircraft collision avoidance system effective for large number of aircraft
- [NASA-CASE-ERC-10090] p0464 N71-24948  
General aviation traffic implied densities and interaction frequencies computed with model using southern California to judge difficulty for naval air traffic
- [AD-719906] p0469 N71-25621  
Improved surveillance and communication capability of air traffic control
- [AD-721463] p0530 N71-28685  
Analysis of aircraft accidents and establishment of rational, quantitative air traffic safety control goals
- [FAA-RD-71-36] p0566 N71-29309  
Third order-two signal intermodulation products for 242 frequencies between 225 and 400 MHz as used in FAA frequency assignment processes
- [ECAC-PR-70-018] p0571 N71-29551  
Third order-two signal intermodulation products for 360 frequencies between 118 and 136 MHz when 50 kHz channel spacing is used as in FAA frequency assignment processes
- [ECAC-PR-70-016] p0571 N71-29552  
Third order-two signal intermodulation products within 118-136 MHz band with 50 kHz spacing
- [ECAC-PR-70-015] p0571 N71-29554  
Fundamental characteristics of analog and digital modulation used in ATC communication system
- [ESSA-TM-ERL-ITS-232] p0571 N71-29555  
Evaluation of airborne transponders used for air traffic control facilities
- [AD-723028] p0577 N71-30253  
Holographic imagery for aviation and space flight
- [JPERS-53420] p0579 N71-30361  
Systems analysis approach to airport planning and predicting terminal facility and aircraft demands in year 2000 for air traffic control systems
- [NASA-CR-119287] p0585 N71-30800  
Systems maintenance program evaluation conducted in central region of US
- p0619 N71-31623  
Mathematical simulation and queuing models for air traffic control systems
- [AD-721726] p0627 N71-32065  
Evaluation of flight plan position information display for ocean flying control
- [FAA-NA-71-21] p0628 N71-32084  
Analysis of two plans for assigning identity codes to aircraft by digital computer simulation of peak IPR traffic conditions
- [NBS-TN-568] p0631 N71-32456  
NASA balloon-aircraft ranging, data and voice experiment for determining best approach for using ATS in air traffic control
- [NASA-TM-X-65649] p0632 N71-32527  
Coordination of traffic flow and holding patterns of aircraft landing on same runway
- [NASA-CR-121466] p0646 N71-33747  
Operational evaluation of capability of bright radar microwave remote sensing system to provide useful radar data in satellite control tower
- [FAA-RD-71-48] p0646 N71-33788  
Evaluation of air traffic control parameters and relationship to future of aeronautics
- [NASA-CR-1833] p0675 N71-34025  
Summary of instrument flight rule off-airway routes for commercial and military aviation in US and overseas areas
- p0678 N71-34592  
Development of analysis techniques for determining causes for airport congestion and interaction of various causes
- [FAA-RD-71-55] p0684 N71-35393  
Range and azimuth resolution characteristics and aircraft separation measurement capability of radar beacon-digitizer subsystem
- [FAA-NA-71-16] p0715 N71-37038  
Attitudes and motivational factors in job performance of terminal area air traffic control personnel
- [FAA-AH-71-30] p0715 N71-37041  
Airborne traffic situation display system for use with radar control terminal system
- [AD-727769] p0716 N71-37042  
Alternate air traffic control co-channel separation criteria based on probability-of-interference considerations
- [IST-101] p0721 N71-37712  
Automatic data processing systems for air traffic control, health services, operations research, management planning, information systems, and reading machines
- p0722 N71-37742

- Computerized real time data processing and display system for air traffic control in airspace over Belgium, Luxemburg, the Netherlands, and Germany  
p0722 N71-37744
- Evaluation of design concept and operational feasibility of 11-sided control tower cab  
[FAA-NA-71-37] p0723 N71-37826
- Effectiveness of control towers in reducing aircraft accidents and approach time  
p0726 N71-38213
- Air traffic control, communications, navigation, frequency management, systems analysis, and aircraft SRDS program developments  
p0726 N71-38214
- Performance evaluation of automatic flight progress strip cutter and loader used in air traffic control facility  
[ACTEU-330] p0726 N71-38215
- ### AIR TRANSPORTATION
- Economic contributions of U.S. domestic airline industry in 1970s regarding air transportation constraints and impact on short haul  
[AIAA PAPER 70-1309] p0005 A71-10486
- Noise reduction relationship to air transportation progress, considering cost/technology balance, quiet engine, research and development programs, etc  
p0009 A71-10819
- Short haul air transportation in U.S., interagency cooperation and federal involvement  
[AIAA PAPER 70-1286] p0010 A71-10875
- Airport system planning from environmental viewpoint, discussing travel market, airport accessibility, airspace utilization and control and land use  
p0017 A71-11642
- Short haul air transportation technological factors for VTOL, STOL, CTOL and light aircraft, considering operating costs, passenger service and environment impact  
[AIAA PAPER 70-1287] p0018 A71-11700
- Air transportation reliability through turbojet engine performance monitoring  
p0023 A71-12368
- Concorde role in air traffic market, discussing operating costs and profit potential  
p0029 A71-12746
- Intercity V/STOL aircraft transport system, solving congestion problems through all weather superiority, low noise level and separate ATC  
p0070 A71-13571
- VTOL systems for commercial short haul air transportation, discussing large helicopters and compound aircraft applications for system capacity profitability and efficiency increases  
p0071 A71-13575
- V/STOL aircraft in civil air transportation, discussing safety, reliability, maintainability and propulsion system concepts  
p0071 A71-13576
- Short haul STOL aircraft transport system, discussing neighborhood stolport ownership, technical feasibility and economic, emotional, ecological and sociological viability  
p0071 A71-13618
- Compound and VTOL aircraft and prototype compact downtown V-ports for short haul air transportation improvement and expansion  
p0071 A71-13619
- Air transport development, examining capital investment, traffic volume and facilities  
p0079 A71-14246
- Economic trends of international air transport in 1970s  
p0086 A71-14991
- German monograph on socioeconomic evaluation of air transportation systems for developing nations, using cost-benefit analysis  
p0088 A71-15125
- Strapdown inertial guidance and software technologies for cosmic speed aerospace vehicles and low speed air, marine and ground transport  
p0089 A71-15301
- Air transportation systems ride vibration environments in relation to human comfort  
p0095 A71-15421
- Public-use ground level and rooftop helicopter and STOL aircraft landing facilities for city and suburban traffic  
p0098 A71-15442
- Air charter flights legal status, considering public, private and international laws and civil responsibility  
p0142 A71-17422
- Aircraft nationality legal problems concerning regional cooperation and registration  
p0142 A71-17423
- Air transport popularization possibilities, considering group rates and fare adjustments  
p0143 A71-17586
- French statistical system for civil air transport operations from airport viewpoint  
p0143 A71-17587
- Large capacity aircraft reception and servicing problems consideration for facilitating traffic  
p0143 A71-17588
- Airships and balloons potential commercial use in Canada, discussing cargo, passenger and military applications  
p0192 A71-19916
- Federal assistance to air transportation, considering airport development-environment conflicts  
p0216 A71-21834
- European view on liability and compensation limitation for death and injury in international commercial air transport  
p0271 A71-22989
- U.S. view on legal liability and compensation for death and injury in international air transport  
p0272 A71-22990
- Uncertainty factors in management decisions and operations optimization in international air transportation industry  
p0287 A71-24265
- V/STOL component of unified transportation system, discussing transportation modes, airport locations, noise reduction, cost factors, etc  
p0288 A71-24274
- Hypersonic air transportation future prospects, discussing technical problems and feasibility in view of space shuttle development  
p0288 A71-24285
- U.S. General Aviation safety record, discussing National Transportation Safety Board and accident/injury prevention  
[SAE PAPER 710397] p0300 A71-25132
- Air and cosmic space common law, discussing boundaries, sovereignty over state territories and jurisprudence related to travel development  
p0355 A71-26325
- European airbus, considering flight trials of first A.300B high capacity transport aircraft  
p0358 A71-26921
- Air transport propulsion systems, discussing aircraft operating economics with reference to weight, size, powerplant efficiency, noise and air pollution  
p0365 A71-27542
- Turbofan STOL transport application to air transportation congestion, discussing conditioning landing field length, navigational/control problems and jet flap concepts  
p0367 A71-27602
- STOL aircraft/engine integrated systems for medium distance air transportation, discussing tradeoff factors involving performance, noise, weight and cost  
[SAE PAPER 710469] p0408 A71-28337
- SST in relation to U.S. world leadership in air transportation, discussing federal funding needs for technological capability insurance  
p0420 A71-29387
- Integrated short-haul interurban transportation system, considering combination of conventional jet aircraft, STOL aircraft and high-speed ground transportation  
[AIAA PAPER 71-508] p0422 A71-29550
- Aviation within total transport system - Conference, London, May 1971  
p0430 A71-30158
- Air transport and travel expansion rate, discussing motivations and cost  
p0430 A71-30159
- Circumstances inducing growth in different air transport sectors, discussing transportation cost, aviation capital requirement and business and leisure air travel

- p0431 A71-30160  
 Aviation within total transport system, discussing decision making and management planning
- p0431 A71-30165  
 Air transport development trends, considering increased speed and capacity, STOL aircraft, urban service, and European cooperation for manufacturing
- p0432 A71-30302  
 STOL vehicle and systems air transportation expansion by reducing trip time, congestion, noise exposures and pollution for DOT, DOD and NASA roles  
 [SAE PAPER 710464]
- p0438 A71-30535  
 French contribution to air transportation, discussing international cooperation on supersonic Concorde, medium range airbus and short range Mercure
- p0496 A71-32688  
 Air transport propulsion systems economics, considering first cost, specific weight, fuel consumption and maintenance effect on direct operating cost
- p0503 A71-33469  
 Soviet book on air transportation covering ATC, automatic landing and information display systems
- p0540 A71-35194  
 Aircraft for international long haul transportation, discussing criteria for selection based on environmental, operational, budgetary and policy considerations
- p0540 A71-35208  
 Air transportation safety review covering weather knowledge, aircraft structures, instrumentation, radio aids and power plants
- p0554 A71-36175  
 Passenger travel demand model for STOL transportation in underdeveloped areas
- p0557 A71-36348  
 Future air transportation concepts, discussing short haul travel market, economic, environmental, safety, convenience and reliability aspects
- p0560 A71-36671  
 New IATA passenger and baggage international air transport conditions, discussing passenger/carrier legal relationships, with emphasis on differences between new and old regulations
- p0561 A71-36918  
 Hypersonic air transportation based on supersonic combustion ramjet development, discussing economic feasibility
- p0595 A71-37124  
 European air traffic employed in transportation of tourists, considering European Airbus A-300B super twin
- p0598 A71-37273  
 Costs/benefits strategy for investment in STOL fleets reducing delay and airport congestion, using heuristic computer model
- p0606 A71-38029  
 Seasonal distribution of air transportation requirements and utilization rate of transport capacity in passenger traffic
- p0606 A71-38221  
 Oxygen supply to air transported patients by chemical compounds, suggesting use of permanganates and chlorates
- p0662 A71-41571  
 Sick and injured transportation aboard regular airliners, considering pathological and psychological contraindications
- p0662 A71-41572  
 In-flight study of work/rest cycle effects on double crew performance and fatigue in flying transport missions
- p0664 A71-41829  
 Wrongful death liability in aviation and admiralty, considering U.S. Congress refusal to enact legislation
- p0665 A71-42068  
 Judicial Panel on Multidistrict Litigation of federal district and court of appeals judges with power to transfer cases to single district
- p0665 A71-42069  
 Short haul air transportation, discussing performance requirements, community acceptance and navigation and landing aids
- p0665 A71-42073
- VTOL air system for automobile travel replacement noting noise, cost, pollution and traffic congestion reduction
- p0669 A71-42527  
 Future transportation technology impact, considering system design evaluation criteria and civil aviation and urban mass transit systems contributions  
 [AIAA PAPER 71-1010]
- p0701 A71-44594  
 Commercial air transportation industry trends and optimal planning requirements, discussing airline economic viability, industry regulation, public service and environmental compatibility  
 [AIAA PAPER 71-1022]
- p0701 A71-44600  
 Weather interruption effects on air transportation operations and economics, considering fog, snow, freezing rain, thunderstorms, winds, CAT and runway conditions
- p0703 A71-44983  
 Systems maintenance program evaluation of Eastern Region air transportation facilities
- p0033 N71-10114  
 Traveler service problems in domestic intercity air, bus, and rail transportation  
 [PB-193300]
- p0034 N71-10116  
 Demonstration plan for Western Region Short Haul Air Transportation Program  
 [ATR-71-7190/-1-VOL-1]
- p0036 N71-10279  
 Technical studies for Western Region Short Haul Air Transportation Program  
 [ATR-71-7190/-1-VOL-2]
- p0036 N71-10280  
 High speed access system evaluation for transportation from jetport to Miami with cost estimates and network descriptions  
 [PB-192842]
- p0039 N71-10417  
 Status of federal involvement in short haul air transportation
- p0049 N71-11026  
 Various vertical takeoff and landing and short takeoff modal configurations for air transportation  
 [PB-190940]
- p0049 N71-11027  
 Air mode service analysis in Northeast Corridor  
 [PB-190935]
- p0049 N71-11029  
 Legal aspects of air and surface carrier interactions in freight transportation
- p0058 N71-12119  
 Possible benefits of local and trunk air carrier mergers
- p0058 N71-12120  
 Conceptual framework and example analysis to determine feasibility of V/STOL air transportation system in Appalachian region
- p0107 N71-12237  
 Analysis of New York air transportation system and recommended improvements  
 [PR-3]

 Meteorological effects on air transportation, including atmospheric and runway conditions
- p0247 N71-18117

Statistical analysis of origin-destination survey at Philadelphia International Airport

Visual factors in air and surface transportation systems

Survey of passenger volume and destinations at Theodore F. Green State Airport in R.I.

Economic analysis of intercity short-haul business passenger travel

Research and development aspects of air transportation system for state of Texas

Compilation of references on various aspects of air transportation for Texas

Air transportation system noise propagation and reduction

Air transportation system and Civil Aeronautics Board decisions

Aviation and surface transportation safety for 1970 with related accident investigations and recommendations

Analysis of current status and future outlook of US commuter airline industry

Congressional hearings on chartered airline travel

Trends in air transportation and airline industry operations from 1970 to 1980

Investigation of air charter operations utilizing large airplanes to fulfill demands of aircraft capacity and speed, cargo type and size, as well as frequency of operation

Analysis of equipment, crew training, and operations involved in use of fixed wing aircraft for aeromedical transportation

Measurement and analysis of atmospheric turbulence along Pacific Coast air route in Japan

Noise reduction laws for air, rail, and highway transportation including legal liability in US

Conclusions of studies by French Committee for Air Transport to prepare proposals and recommended directions in air transport field for next five years

Design, development, and performance requirements for large rigid airships for freight and cargo transportation

AIRBORNE EQUIPMENT

NT AIRBORNE/SPACEBORNE COMPUTERS

Aircraft electric systems control by solid state switching, discussing reliability, service life, versatility and compatibility

Reverse flow temperature probe design and calibration for vertical soundings from aircraft, comparing to radiosonde method

Short haul STOL concepts including stolport potentials, onboard avionics, vehicle characteristics, tradeoffs and current nonproductive flying due to traffic congestion

Airborne radar as helicopter approach aid

Aircraft midair collision avoidance, discussing Elimination Range Zero system operation procedures and cost

Airborne surveillance for environmental management, discussing earth resources program, aerial sensors for thermal water pollution, crop disease, salinity and geological structure

Draw-through cooling of electronic equipment in subsonic and supersonic commercial jet transports, discussing internal circulation system design

[SAE-AIR-64A]

Avionics growth, discussing use of digital computers, solid state transducers, integrated circuits, electronic flight instruments, area navigation and collision avoidance systems

Terrain following radar for airborne guidance of low flying military aircraft

Airborne Doppler radar receiver transmitter failure testing by Versatile Avionics Shop Test computer controlled system

Self contained lightweight airborne data acquisition system for atmospheric and meteorological research, using analog recorder and telemetry system

Integrated flight test data system combining digital airborne data acquisition/recording system with telemetry/microwave link to computerized ground station

Onboard weighing system for gross weight determination and center of gravity location of Alouette helicopter, using load sensors, electrical circuits and visual indicators

High speed airborne scanning navigational radar antenna with matched patterns, using offset horn fed reflector and polarization modes for improved visual display

Helicopter aerial design problems, considering antenna multiplicity use of nonmetallic structures and complexity of airborne radio systems

Airborne ECM receiver, determining conditions for detecting victim radar signal before signal reflection from aircraft

Book on fluidic systems design covering analog and digital control, application to aircraft, spacecraft, computers, tracking devices and equivalent circuits

Category II operations at various airports, considering all-weather landing requirements of airborne equipment, maintenance standards, pilot training, etc

Airborne display and electric management system, discussing weight reduction, protective function coordination, power quality, onboard maintenance, data processing and reliability

Comet 4 installation and experimental program, investigating avionics systems integration techniques

Radio controlled small aircraft as measurement platform for meteorological sensors, discussing development and performance from field tests

Military and civil aircraft navigation systems development, emphasizing self contained airborne equipment

Airborne communications with AN/ARC-154 transceiver in single radio, discussing extended frequency coverage, multimode operation, navigation and input/output provisions

Real time reconnaissance cockpit display system for airborne sensor systems, providing night combat imagery

Aircraft onboard equipment tests in air navigation aid satellite project, estimating tracking random errors

Time and frequency synchronization for EROS airborne collision avoidance system, considering impact on aeronautical communication, navigation and surveillance

[CASI PAPER 72/17]

Complex airborne electronic system design for interference minimization, considering electromagnetic compatibility

 Radio tracking of aircraft by two geostationary  
 satellites, discussing measurement, navigation and  
 position errors p0559 A71-36508  
 Aircraft onboard equipment tests in air navigation  
 aid satellite project, estimating tracking random  
 errors p0559 A71-36509  
 Computer-based aircraft tracking with aid of twin  
 radar air traffic control system, discussing  
 components and operation p0562 A71-36993  
 Computerized automatic estimation techniques  
 application to real time aircraft tracking in ATC  
 system design p0596 A71-37172  
 [ATAA PAPER 71-926]  
 Aircraft position errors computation for ATC  
 mathematical surveillance models, estimating  
 collision risk p0597 A71-37173  
 [ATAA PAPER 71-927]  
**AIRCRAFT ENGINES**  
**NT HELICOPTER ENGINES**  
 Air cooled opposed 4, 6 and 8 cylinder light  
 aircraft engines with or without  
 turbosupercharging, considering horsepower  
 improvement and torsional vibration control  
 [SAE PAPER 700205] p0002 A71-10129  
 Aircraft turbine engine development, considering  
 mismatch reduction between engine and airframe in  
 flight tests p0013 A71-11180  
 Jet engine evolution, considering thrust, combustion  
 chamber, fans, high-pressure-ratio compressors and  
 turbine inlet temperature p0013 A71-11181  
 Electrochemical machining for aircraft engine metal  
 components, discussing cost, time comparisons,  
 tooling techniques and applications p0013 A71-11252  
 [SME PAPER MR-70-206]  
 Electrochemical machining role in jet engine  
 industry, discussing drilling, contouring,  
 electrolyte handling, etc p0013 A71-11253  
 [SME PAPER MR-70-193]  
 Electrohydraulic thrust control system for  
 supersonic transport aircraft engines, considering  
 reliability, performance and weight

- [SAE PAPER 700819] p0016 A71-11546  
Soviet book on aircraft power plant systems and devices covering layout, engine attachment, propellers, control, fuel and oil systems, fire fighting, monitoring, etc
- p0028 A71-12722  
Engine vibration high temperature transducer, discussing piezoelectric materials properties and design considerations relative to temperature, pressure, acoustic noise, humidity environment
- p0030 A71-12911  
Twin jet aircraft engine installation effects and exhaust nozzle integration, noting closely spaced inlet interference
- [ICAS PAPER 70-47] p0067 A71-13148  
Thrustmeter for direct in-flight measurement of aircraft engine jet thrust
- p0068 A71-13332  
Soviet papers on working processes in aircraft engines covering gas flow, liquid injection, nozzles, gas turbines and supersonic flow
- p0079 A71-14251  
Influence coefficients for aircraft engine gas/air ducts parameter deviations, using statistical analysis
- p0080 A71-14257  
Aircraft propulsion, discussing piston, turbojet, turboprop and turboprop engines in terms of thrust to weight ratio, specific fuel consumption and propulsive efficiency
- p0085 A71-14977  
Soviet book on aviation automation covering automatic control systems in piston, turbojet and turboprop engines, navigation, air temperature and pressure
- p0089 A71-15223  
VTOL aircraft engine air particle separator development, examining airframe and engine design
- p0096 A71-15433  
Soviet book on aircraft gas turbine engine assembly covering organization, specified accuracy, automatic systems, mechanization problems, quality control, etc
- p0098 A71-15449  
Aircraft turbine engines with elevated gas inlet temperatures
- p0101 A71-15670  
Aircraft gas turbine engine components equivalent testing by shortening testing time required to increase service life
- p0136 A71-16761  
Book on fixed and rotary winged aircraft air cooled piston engine design, performance and maintenance in business and military operators manual terminology
- p0138 A71-17125  
Aircraft engine double-reverberant chamber duct lining test facility, discussing noise fields, air flow, layout, performance, insertion and transmission losses, etc
- p0143 A71-17619  
Nuclear powered long distance aircraft engines, discussing high burnup fuel, weight factors and safety problems
- p0145 A71-17694  
Gas turbine aircraft engine compressor blades foreign object ingestion control by inlet vortex flow suppression jets, indicating wind tunnel air intake applications
- p0145 A71-17696  
Small gas turbines for helicopters and fixed wing aircraft, discussing designs, materials, lubrication, etc
- p0148 A71-18052  
Aircraft gas turbine engines nitric oxide emission model, describing flow behavior and chemical processes
- [AIAA PAPER 71-123] p0155 A71-18659  
High performance fighter aircraft engine pressure ratio and turbine inlet temperature measurement, using fluidic sensors
- p0203 A71-20586  
Fluidic pressure ratio control for vertical takeoff aircraft lift engine fuel system, describing breadboard circuit, test bed and flight standard
- p0203 A71-20587  
Soviet book on aircraft gas turbine and internal combustion engines covering structural design schemes, inlet devices, combustion chambers, materials, compressors, etc
- p0203 A71-20674  
Equivalent test results, studying damaging factors in aircraft engine compared with regular tests
- p0207 A71-21115  
Microelectronic circuits reliability in aircraft engine control applications, discussing testing and selection for severe temperature and vibration environments
- [SAE PAPER 700822] p0209 A71-21369  
Book on aircraft gas turbine engine technology covering combustion chambers, exhaust systems, lubricating oils, thrust augmentation, inlet ducts and overhaul procedures
- p0210 A71-21625  
Aircraft turbine engines strength and gas dynamic characteristics improved by vibration decrease using elastic elements
- p0212 A71-21710  
National Air Pollution Control Administration control of aircraft engine pollutant emissions covering measurement, test instrumentation, research, standards and regulations
- p0216 A71-21831  
Aircraft engine smoke emission control, discussing Ringelmann chart assessment for various commercial jet aircraft and airport gaseous pollutants
- p0216 A71-21832  
Probabilistic estimate of aerodynamic imbalance of aircraft gas turbine rotors due to production errors in compressor blade angle
- p0222 A71-22045  
Shrouded aircraft engine turbine blades vibration stresses found minimum by setting up paired blades with fixed tension along shroud
- p0266 A71-22595  
Turboprop aircraft engine service life extension, correcting deficiencies via accelerated tests based on relation between failure rate and usage
- p0266 A71-22633  
Cost reduction concepts in gas turbine engine design and fabrication for general aviation aircraft
- p0268 A71-22811  
Hawker Siddeley Trident 3B flight test program, booster engine, structural features, power plants, systems and landing gear
- p0269 A71-22890  
D-30 bypass engine hydraulic control system for Tu-134 aircraft, discussing fuel flow regulator assembly and operation
- p0270 A71-22947  
High thrust aircraft engines test facility design
- p0271 A71-22956  
Fan propulsion power plants with mechanical and gas dynamical energy distribution systems for commercial VTOL aircraft
- p0271 A71-22964  
Composite materials for compressor blades in aircraft engines, considering boron and carbon fiber reinforced materials
- p0274 A71-23286  
High temperature corrosion in aircraft engine components and gas turbines by sulfur in fuels, vanadium pentoxide and NaCl
- p0274 A71-23288  
Aircraft engines and stationary gas turbines high precision components, discussing die forging and machining combined with joining processes
- p0274 A71-23299  
Concorde environmental testing, considering endurance tests, thermal shock rigs and plant for simulating air supply from compressor stages of aircraft gas turbine engines
- p0276 A71-23583  
Light aircraft standard fuel flight evaluation, discussing compatibility with grades 80/87 and 100/130 certified engines and comparative operational fuel consumption
- [SAE PAPER 710369] p0284 A71-24239  
Dual magneto ignition system for business and small military aircraft, describing development, design and test program
- [SAE PAPER 710382] p0285 A71-24247  
Light aircraft engine lubricating oil filter types and model specification, noting dirt holding ratings
- [SAE PAPER 710363] p0285 A71-24248  
VTOL heat engine and propulsion system design and performance, citing Pegasus jet lift engine as

- compromise between takeoff and cruise function  
p0293 A71-24751
- VTOL propulsion systems safety requirements,  
considering single and double breakdowns  
p0293 A71-24752
- Boron-glass-epoxy lightweight composite gear case  
for aircraft engine reduction gearbox, describing  
design, molding, machining and testing  
[ASME PAPER 71-GT-85] p0353 A71-25993
- Aircraft gas turbine condition analysis  
instrumentation used for status diagnosis of naval  
turbine engines, discussing sensor and electronic  
data interpretation progress  
[ASME PAPER 71-GT-86] p0353 A71-25994
- Military aircraft flight test establishments,  
discussing airframe, engine, flight control and  
weapons delivery systems tests work flow  
integration requirements  
p0355 A71-26315
- Soviet book on theory of aircraft bladed machines  
covering axial flow, centrifugal and composite  
turbines and compressors, thermodynamic  
efficiency, control turbocompressor matching, etc  
p0355 A71-26401
- Soviet book on aircraft and rocket engines control  
automation, discussing nuclear power plant/fuel  
systems design and control simulation methods  
p0355 A71-26403
- Thrust measurement of aircraft and rocket propulsion  
systems, comparing cost and characteristics of  
mechanical, electrical and hydraulic systems  
p0359 A71-26991
- Air transport propulsion systems, discussing  
aircraft operating economics with reference to  
weight, size, powerplant efficiency, noise and air  
pollution  
p0365 A71-27542
- Aircraft power plants sealing materials, emphasizing  
porous cermet seals heat resistance under thermal  
cyclic loads  
p0368 A71-27688
- VTOL propulsion, discussing gas turbine pressure  
ratio inlet temperature and lifting and high  
bypass fans  
p0403 A71-27838
- Visible exhaust smoke trails from aircraft jet  
engines, measuring optical density by photographic  
photometry  
[SAE PAPER 710428] p0406 A71-28314
- Reduction gearbox reliability problems from  
development and service experience with PT6A  
turboprop engine  
[SAE PAPER 710433] p0406 A71-28318
- Commercial aircraft powerplant development,  
discussing engine and components test programs and  
techniques  
[SAE PAPER 710449] p0407 A71-28327
- Aircraft propulsion system testing, stressing noise  
reduction and inlet-engine exhaust system  
compatibility  
[SAE PAPER 710450] p0407 A71-28328
- Airline engine performance testing from operator  
perspective, using automated test cell data  
acquisition system  
[SAE PAPER 710451] p0407 A71-28329
- High temperature aircraft gas turbine engine design,  
discussing developments in manufacturing  
processes, materials, cooling techniques,  
aerodynamic and mechanical design improvements  
[SAE PAPER 710462] p0408 A71-28335
- Gas temperature measurement in aircraft combustion  
chambers, using calorimetric probe  
p0411 A71-28757
- Aircraft engine production components and alloys  
mechanical properties evaluation for improved  
reliability of mass produced products  
p0414 A71-28944
- Subsonic and supersonic turbojet aircraft engines  
development, discussing design, operation,  
reliability, weight, fuel consumption and cost  
p0428 A71-29811
- Thrust measurement of aircraft propulsion systems,  
considering hydraulic piston device, edge  
clearance, oil quantity and calibration  
p0428 A71-29860
- Concorde power plant fire protection system,  
describing prototype engine bay overheat detection  
system and additional UV optical fire detection  
system  
p0432 A71-30300
- Aircraft jet engines technological progress review  
over past 25 years, emphasizing industry economics  
considerations  
p0432 A71-30303
- HF rake probes with high temperature integrated  
sensor for inflight aircraft engine intake air  
flow distortion measurements  
p0433 A71-30321
- Low cost go/no-go portable aircraft engine tester  
connected to engine mounted sensors  
p0434 A71-30327
- Sound fields of flying aircraft from noise  
measurements, discussing engine operating  
conditions, speed and attitude  
p0437 A71-30521
- Transport aircraft JT9D high bypass ratio engine  
development, noting maintainability and stability  
improvements  
[SAE PAPER 710419] p0437 A71-30527
- Aircraft JT9D engine development for airline  
operation, discussing construction, condition  
monitoring, maintenance, noise and smoke reduction  
[SAE PAPER 710434] p0437 A71-30528
- Design interface requirements for optimal aircraft  
engine condition monitoring system, using  
parameter, vibration, oil, borescope and  
radiography analysis  
[SAE PAPER 710447] p0438 A71-30531
- V/STOL propulsion units lift ratings based on  
aircraft system requirements  
[SAE PAPER 710471] p0439 A71-30537
- Onboard computer for aircraft engine testing,  
monitoring and data reduction, emphasizing  
automatic in-flight recording for post-flight  
displays  
[AIAA PAPER 71-651] p0440 A71-30727
- Engine condition monitoring systems, discussing  
engineering design requirements with respect to  
accessibility, accuracy, economics, effectiveness,  
reliability and maintainability  
[AIAA PAPER 71-652] p0440 A71-30728
- VTOL turboshaft engine powered propulsion system  
development, detailing design requirements,  
program planning, component research and system  
integration  
[AHS PREPRINT 562] p0452 A71-31109
- Analytical model of oscillatory combustion in  
aircraft engine augmentors  
[AIAA PAPER 71-700] p0480 A71-31324
- Air cooling methods for aircraft engine turbine  
rotor blades, considering heat distribution in  
rotor disk  
p0481 A71-31461
- Aircraft engine in-flight thrust determination,  
discussing indirect and direct measurement methods  
p0497 A71-32720
- Flight mission severity in cumulative damage /low  
cycle fatigue and creep stress rupture/ not  
detected by usual nondestructive testing in  
aircraft gas turbine industry  
p0501 A71-33298
- Dynamic stress on rotor blades of aircraft engine  
axial compressor stages with low hub/diameter  
ratio  
p0502 A71-33345
- Air transport propulsion systems economics,  
considering first cost, specific weight, fuel  
consumption and maintenance effect on direct  
operating cost  
p0503 A71-33469
- Soviet book on subsonic gas turbine passenger planes  
power supply systems covering Boeing 747, short  
haul aircraft, DC-10, L-1011, etc  
p0534 A71-34472
- Maximum temperature engine concept, definition and  
application to future aircraft propulsion system  
performance  
[SAE PAPER 710461] p0535 A71-34498
- Linear radial loads effect on stress and strain of  
hyperboloidal rotor disk applied to aircraft  
engine compressors with two stream flow of working  
medium  
p0535 A71-34597
- Aircraft gas turbine engine components equivalent  
testing by shortening testing time required to  
increase service life  
p0544 A71-35460

- Three micron absolute main oil filter for aircraft gas turbine lubrication system, discussing indicator system and bench and engine tests p0544 A71-35488
- Propulsion systems trends for 1980s, discussing environmental noise levels, stoichiometric gas turbine engines for military aircraft, high bypass ratio engines for V/STOL aircraft, etc p0546 A71-35625

[AD-727860] p0721 N71-37618
- AIRCRAFT EXHAUST**
- U EXHAUST GASES**
- AIRCRAFT FUEL SYSTEMS**
- Soviet book on aircraft power plant systems and devices covering layout, engine attachment, propellers, control, fuel and oil systems, fire fighting, monitoring, etc  
p0028 A71-12722
- Quick connect/disconnect dry break couplings for aircraft fueling, describing design and operation  
p0148 A71-18215
- Aircraft fuel and air conditioning systems vortex valves and diodes, examining flow patterns into and out of chambers  
p0202 A71-20556
- Concorde aircraft fuel system and fuel pumps, considering center of gravity and center of pressure relationship to maintain trim  
p0276 A71-23581
- Aircraft self sealing fuel tank and fuel cell systems damage control, considering chemical, precompressed foam and swellable elastomer seal concepts  
p0282 A71-24079
- Fluorosilicone sealants for aircraft fuel containment, discussing resistance to heat, jet fuel, moisture and heat aging  
p0282 A71-24080
- Polyurethane foam effects on fuel contamination during installation for fuel system fire and explosion protection  
[ASME PAPER 71-GT-54] p0351 A71-25981
- Airport jet fuel delivery system salt driers for reducing water content below saturation, lengthening filter life and improving downstream system components performance  
[SAE PAPER 710440] p0406 A71-28322

- Influence of Concorde powerplant operating conditions on design of Olympus 593 fuel and oil system p0055 N71-11653
- Gasoline icing inhibitors for aircraft carburetors and fuel systems [LR-536] p0121 N71-13414
- Effectiveness of nitrogen inerting of aircraft fuel tanks under conditions of fuel sloshing [AD-721675] p0529 N71-28576
- Determination and evaluation of safety parameters of jet fuels in aircraft fuel tanks when using nitrogen as inerting agent [FAA-NA-71-26] p0629 N71-32305
- AIRCRAFT FUELS**
- Turbojet engine design for methane element of liquefied natural gas as aircraft fuel, discussing supersonic transport applications p0005 A71-10485
- Soviet book on aviation fuels, lubrication materials and special fluids covering compositions, physicochemical properties, filtration, etc p0014 A71-11320
- Static dissipator additives in aviation fuels for eliminating electrostatic charging hazards p0023 A71-12300
- Book on aviation fuels covering gasoline and turbine fuel properties, handling problems and future fuels p0081 A71-14298
- Soviet book on automotive and jet aircraft engine fuel chemical stabilizers under storage, transit and operational conditions, examining additives in relation to stability ratings p0142 A71-17433
- Light aircraft standard fuel flight evaluation, discussing compatibility with grades 80/87 and 100/130 certified engines and comparative operational fuel consumption [SAE PAPER 710369] p0284 A71-24239
- Aircraft fuel tank nitrogen inerting, fire and explosion suppression for foreign particle contamination, sludge and lacquering reduction [ASME PAPER 71-GT-45] p0351 A71-25978
- Kerosene type fuels for aircraft gas turbine engines, discussing combustion problems, smoke emission reduction and bacterial or fungal contamination p0411 A71-28754
- Energy state approximation and supersonic aircraft minimum fuel fixed range trajectory optimization, noting not convex velocity set p0439 A71-30609
- Aircraft pollutant emission regulation, discussing low smoke combustors and fuel dumping problem p0492 A71-32246
- Jet engine advent impact on aviation fuels safety, discussing gasoline hazards in prejet aircraft p0692 A71-43231
- Liquid hydrogen as future replacement for hydrocarbon fuels in surface and air transportation, noting advantages in energy per unit weight and pollution-free combustion p0699 A71-44365
- Jet aircraft fuel additives covering functions and applications p0704 A71-45325
- Aviation fuels lubricating characteristics, discussing refining methods, viscosity, service performance and load testing p0705 A71-45383
- Suction and pressure head and temperature effects on cavitation flow in aircraft fuel pumps [ARC-CP-1128] p0226 N71-17044
- Proceedings of conference on aircraft propulsion [NASA-SP-259] p0307 N71-19451
- Heat flux distributions in pools of burning aircraft fuels for design of protective clothing for firefighting personnel [AD-722774] p0591 N71-31376
- Chemical and physical properties of aircraft fuels gelled with hydrocarbon resins [FAA-NA-71-17] p0627 N71-32078
- Small scale impact tests of aircraft type fuels for gas turbines to determine burning, misting, and splatter characteristics [FAA-NA-71-12] p0628 N71-32087
- Development of procedures for conducting service tests of aircraft refueling and defueling systems [AD-726872] p0683 N71-35227
- Determination of physical and chemical properties of fuels gelled with carbohydrate resins to evaluate effectiveness in reducing aircraft fire hazards [FAA-NA-71-18] p0716 N71-37369
- Control and chemical composition of aircraft fuels, lubricants, and special liquids [AD-727199] p0727 N71-38531
- AIRCRAFT GUIDANCE**
- Time-synchronized approach control combining aircraft precision navigation and guidance with ATC equipment p0029 A71-12894
- Cockpit simulator motion effects on ILS approach pilot guidance errors, using Erdmann model [DGLR-70-071] p0129 A71-15956
- Inertial aircraft lateral guidance system limitations in stochastic gust environment, comparing configurations using aileron or differential spoilers [AIAA PAPER 71-22] p0151 A71-18489
- Aircraft navigation system requiring computer and display for approach guidance to circular orbit over fixed ground area [AIAA PAPER 69-986] p0200 A71-20305
- Optimum automatic flight control techniques in horizontal guidance of aircraft at terminal p0200 A71-20306
- VOR/DME ground station oriented aircraft area navigation horizontal guidance capability, discussing digital input/output flight control p0207 A71-21166
- Strapdown inertial navigator alignment by digital filtering techniques, discussing application to aircraft and spacecraft p0208 A71-21170
- Report on guidance system for approach and landing, discussing airports, aircraft, approach and landing paths, service classes, failure protection and weather penetration p0347 A71-25534
- Terrain following radar for airborne guidance of low flying military aircraft p0358 A71-26881
- Helicopter automatic flight control equipment, discussing autopilot stabilizer, localization system, ground approach guidance coupler and flight director p0490 A71-31916
- STOL aircraft guidance capability with onboard digital computer, maintaining time of arrival envelope at way points along complex flight paths [AIAA PAPER 71-770] p0545 A71-35528
- Interceptor aircraft optimal nonlinear command guidance scheme for reduction of airborne computation load with forward prediction of interceptor and target state vectors [AIAA PAPER 71-916] p0596 A71-37166
- All-weather operations, including pilot role, instrument landing systems and guidance aids [CASI PAPER 72/14] p0601 A71-37601
- Air traffic controller height and plan position indicator composite picture display system design and operation, combining functions of primary and secondary surveillance radars p0650 A71-40128
- Aerospace guidance technology evolution at MIT with emphasis on inertial systems p0665 A71-41993
- Modular step scan microwave aircraft landing system /TALAR/ design and operation, noting short takeoff and landing p0667 A71-42088
- Doppler scanning landing microwave system for air-derived azimuth and elevation angle aircraft guidance by frequency coding and reference carrier transmission p0667 A71-42089
- Scanning microwave landing guidance system coordinates choice, discussing signal format, antennas planar or conical beams and V/STOL application p0667 A71-42090
- Microwave scanning beam guidance receiver design for aircraft landing aid, discussing time sharing and flight control p0668 A71-42091
- Operational requirements of microwave guidance systems, comparing guidance and position

- measurement applied to aircraft approach and landing  
p0668 A71-42092
- Guidance software package for digital flight control and landing system of CH-46C helicopter  
[NASA-CR-111025] p0036 N71-10284
- Systems analysis of flight control and guidance of CH-46C helicopter  
[NASA-CR-111024] p0037 N71-10297
- Visual aids for secondary airports  
[FAA-NA-70-51] p0053 N71-11474
- Guidance developments for all-weather landing  
p0110 N71-12433
- Post-1970 scanning beam guidance for approach and landing  
p0111 N71-12435
- Investigating tasks of data processing equipment in advanced navigation systems for aircraft  
p0113 N71-12604
- Microwave landing guidance systems initial concept validation tests in RTCA signal format  
[AD-717183] p0334 N71-21368
- Microwave scanning guidance system for aircraft approach and landing  
[DO-148-VOL-1] p0511 N71-26804
- Systems analysis of aircraft, aircraft guidance and control systems, and atmospheric turbulence for low visibility instrument landing system requirements  
[AD-722773] p0576 N71-30173
- Application of linear control of systems with random inputs to gust response control of aircraft guidance in atmospheric turbulence  
[ONERA-P-131] p0578 N71-30324
- Vertical situation display concept for alleviating problems of inadequate guidance and display information for making steep approaches  
p0582 N71-30770
- Evaluation of automatic guidance modes and software for V/STOL aircraft flight control  
[NASA-CR-121768] p0674 N71-34016
- Aircraft tracking and guidance facility using PPS-16 radar supplemented by laser tracker permanently mounted on antenna  
[NASA-CR-111931] p0677 N71-34240
- All weather landing system design, development, and field and flight testing  
p0686 N71-35777
- AIRCRAFT HAZARDS**
- Aircraft fire hazard reduction, discussing early detection, extinguishing equipment and emergency landing survival  
p0004 A71-10399
- Static dissipator additives in aviation fuels for eliminating electrostatic charging hazards  
p0023 A71-12300
- Atmospheric turbulence at cruise altitudes of supersonic transport aircraft, considering gusts probability, thunderstorms and mountain waves  
p0065 A71-13137
- Bird strikes incidence and prevention, discussing velocity effects, migration role and uses of distress calls, falconry and radar  
p0156 A71-18664
- Static discharge hazards for aircraft, discussing causes for static charge build-up, dangers and precautionary methods during refueling operations  
p0186 A71-19424
- Statistical information on lightning and static hazards relative to airworthiness  
p0193 A71-19929
- Composite plastic aircraft structures lightning protection, considering hazard to composite materials and use of metal filled or plasma sprayed coatings and metal foil coverings  
p0195 A71-19943
- Aircraft collision avoidance dynamical system, determining barriers between possible capture regions by optimal control problem solution  
p0209 A71-21322
- Commercial supersonic flight, investigating air pollution and alleged climate and weather modification effects due to principal exhaust products  
p0214 A71-21821
- Bird impact hazard to general aircraft, discussing structural damage, flight safety and testing procedures  
p0299 A71-24997
- Aircraft hazards due to frequent low cloud occurrences at Kenya airport, forecasting weather with statistical analysis and radiosounding  
p0415 A71-29106
- Aircraft ice protection problems, considering one dimensional Stefan method for cyclic deicing system  
p0537 A71-34850
- Case histories of aircraft damage due to wind acting on airport surfaces, discussing wind and hail protection  
p0543 A71-35442
- Aircraft vortex wake turbulence including formation, disintegration, hazards reduction, instability and interactions with following vehicles  
p0547 A71-35753
- Aircraft wake turbulence /trailing vortex systems/ avoidance during flight, describing procedures for pilots and tower operators  
[CASI PAPER 72/6] p0601 A71-37596
- Aircraft fuselage design with marine type bulkhead construction, discussing advantages in cabin decompression and fire hazards reduction  
p0610 A71-38752
- Flight tests for hazard evaluation to other aircraft from wake turbulence generated by large jet transport airplanes  
p0656 A71-40506
- Simulated airline pilot cerebral incapacitation etiology, incidence and detection, noting unimpaired crew members conduct and reaction times during approach for landing  
p0664 A71-41824
- Aircraft wake turbulence and trailing vortices, investigating physical characteristics, hazard potential and avoidance techniques  
p0692 A71-43234
- Aircraft generated vortex wakes and core air motions hazards for encountering light airplane  
p0693 A71-43381
- Severe thunderstorm radar tracking and related weather events hazardous to aviation operations  
[ESSA-TM-ERLTH-NSSL-46] p0042 N71-10720
- Synoptic meteorological conditions for clear air turbulence and turbulence effects on aircraft flight characteristics  
[DLR-FB-70-29] p0230 N71-17145
- Measurements and analysis of lightning-induced voltages in aircraft electrical circuits  
[NASA-CR-1744] p0259 N71-19122
- Survey conducted to develop minimum requirements for airport fire fighting and rescue services  
[FAA-AS-71-1] p0307 N71-19426
- Fuel tank vapor space characteristics for simulated helicopter fuel tank and evaluation of existing potential hazard from vibration environment  
[AD-875901] p0329 N71-20702
- Investigation of midair collision between Boeing 707 and Cessna 150 at Edison, New Jersey, on January 9, 1971  
[SB-71-28] p0332 N71-21169
- Safety measures to eliminate aircraft trailing vortex hazards  
[NASA-TM-X-67125] p0394 N71-23418
- Annotated bibliography on bird aircraft hazards and accidents from Oct. 1967 to Jan. 1971  
[TDCK-56961] p0576 N71-30128
- Synoptic meteorological conditions for clear air turbulence and turbulence effects on aircraft flight characteristics  
[BHWG-FBWT-70-9] p0622 N71-31781
- Synoptic meteorological conditions for clear air turbulence and turbulence effects on aircraft flight characteristics  
p0623 N71-31885
- Analysis of general aviation during year 1969 noting growth of aircraft operating, accident data, analysis of accidents, and injuries resulting from accidents  
p0634 N71-32854
- Computer simulation of aircraft collision-hazard warning radar techniques in terminal area  
p0677 N71-34170
- Aircraft hazards and accidents due to birds  
[AD-727881] p0720 N71-37617
- AIRCRAFT HYDRAULIC SYSTEMS**
- Hydraulic systems in Boeing 747 aircraft, considering piston design  
p0131 A71-16131

## AIRCRAFT MAINTENANCE

## SUBJECT INDEX

- Aircraft flash light designs, discussing tandem oscillating lights, fixed lamp rotating reflectors and lamps, xenon flashtube, quartz-iodine lamp and flash frequencies  
p0661 A71-41494
- Aircraft anticollision flashing lights, discussing current practices within national and international air traffic regulations regarding flash frequency, color and light sources  
p0661 A71-41499
- Functional suitability of internal/external lighting systems for military aircraft  
[AD-723034] p0574 N71-29797
- AIRCRAFT MAINTENANCE**
- German monograph on commercial jet aircraft maintenance systems covering changes and adaptations for performance improvement  
p0002 A71-10114
- Commercial transport aircraft maintenance simulation Monte Carlo Modeling techniques, considering application to airline operations  
[SAE PAPER 700345] p0002 A71-10128
- Digital simulation program in GPSS language for airline operations including aircraft maintenance, flight scheduling, terminal space, equipment, work forces utilization, etc  
p0020 A71-11809
- Nondestructive testing techniques for airline maintenance inspection, describing ultrasonic, eddy current, magnetic particles, and X ray methods  
p0024 A71-12449
- Civil aircraft accident and maintenance recording regulations and systems, discussing airborne equipment  
p0073 A71-13735
- Technical resources pooling among airlines for investment and maintenance cost cut of aircraft fleets  
p0086 A71-14992
- Reliability and maintenance problems of U.S. Army operational environment, noting inadequate design and test criteria during development  
p0092 A71-15402
- Helicopter gas turbine engine health indication using instrument panel for correcting gas temperature and producer speed  
p0144 A71-17690
- Civil aviation aircraft mean flight time overhaul schedules, considering statistical evaluation of relationship between operational characteristics and time between overhauls  
p0205 A71-20797
- Light aircraft piston engines design and maintenance, discussing engine design features, materials, lubrication, controlled flight operation and maintenance techniques  
[SAE PAPER 710381] p0285 A71-24246
- Soviet book on aircraft ground support and onboard radio equipment operation and reliability increase by redundancy and rational methods, discussing preventive maintenance  
p0292 A71-24670
- Representative Thornel fiber aircraft fuselage component nondestructive testing and repair, and Thornel fiber, polysulfone and polyamide-imide composites fabrication and evaluation  
p0344 A71-25427
- Jet aircraft airworthiness standards, discussing airline fleet maintenance resources, inspection systems and future requirements  
p0354 A71-26308
- Pan American reliability program effect on airline maintenance, considering cost effectiveness, aircraft performance, data collection and analysis  
p0356 A71-26671
- Methods for engine condition monitoring application to airline operation  
p0404 A71-28177
- MAC malfunction detection, analysis and recording system applications in commercial airlines, emphasizing real time response for maintenance function  
[SAE PAPER 710425] p0405 A71-28311
- FAA aircraft design appraisal for maintainability, considering maintenance concepts and adverse airworthiness situations  
[SAE PAPER 710431] p0406 A71-28316
- Airline operator evaluation of maintainability, considering costs and investment return  
[SAE PAPER 710432] p0406 A71-28317
- Microbiological contamination of jet aircraft fuel tanks in tropical regions, considering maintenance  
[SAE PAPER 710438] p0406 A71-28320
- Transport aircraft JT9D high bypass ratio engine development, noting maintainability and stability improvements  
[SAE PAPER 710419] p0437 A71-30527
- Aircraft quantitative maintenance cost requirements translation into design criteria, considering airline operations influence on manufacturer  
[SAE PAPER 710437] p0437 A71-30529
- Boeing 747 aircraft integrated data system program for reducing engine maintenance and operating costs  
[AIAA PAPER 71-648] p0440 A71-30725
- Army aircraft automatic inspection and maintenance monitoring system, considering feasibility, technology approach and effectiveness  
[AIAA PAPER 71-649] p0440 A71-30726
- Onboard computer for aircraft engine testing, monitoring and data reduction, emphasizing automatic in-flight recording for post-flight displays  
[AIAA PAPER 71-651] p0440 A71-30727
- Engine performance monitoring for jet engine troubleshooting, noting analyzable malfunctions  
p0495 A71-32524
- Multilevel supply system operationally ready aircraft number evaluator based on item stock levels, demand rates and repair/resupply times  
p0496 A71-32700
- Aircraft reliability and maintenance cost reduction via allocation of effort and money, considering R and M optimization in airline support cycle  
p0500 A71-33286
- Lynx military helicopter design high reliability and low maintenance demands  
p0503 A71-33457
- Air transport propulsion systems economics, considering first cost, specific weight, fuel consumption and maintenance effect on direct operating cost  
p0503 A71-33469
- Integrated logistics support program for F-14 aircraft maximum maintainability, reliability and operational readiness at optimum cost  
p0510 A71-34154
- Category II operations at various airports, considering all-weather landing requirements of airborne equipment, maintenance standards, pilot training, etc  
[SAE PAPER 710442] p0535 A71-34499
- Aircraft weighing in place during maintenance operations, describing load cell equipped jacks design for time saving weight determination  
[SAE PAPER 898] p0551 A71-35814
- Lockheed L-1011 passenger jumbo jet layout, ground handling and servicing  
p0553 A71-35995
- Maintenance control system/MCS/, management information system encompassing subsystems supporting scheduling, forecasting, performance evaluation, modifications and improvement functions  
p0557 A71-36448
- Vacuum brazing for nozzle guide vanes repair in aircraft gas turbine engines, noting economic advantages  
p0607 A71-38313
- Computer controlled modular automatic test equipment for DC-10 aircraft maintenance, discussing system block diagram  
p0662 A71-41518
- Nonreversible hydraulic control design and emergency maintenance for Tu 154 aircraft subsonic cruising at 11 km altitude  
p0691 A71-42927
- Aircraft part repair-throwaway decisions for minimizing costs over life cycle by economic graphic screening techniques  
p0692 A71-43197
- Civil transport aircraft and equipment maintenance and reliability problems solutions with best time, cost and weight compromises  
p0702 A71-44765

Army aircraft modification program management review and recommendations p0036 N71-10287

Maintenance programs, evaluation, acceptance, and monitoring procedures for transport aircraft p0048 N71-11020

Computerized simulation of alternate logistics for overhaul and expensive parts inventory procedures of commercial airlines p0248 N71-18118

Evaluating adequacy of tool sets for aircraft maintenance [AD-719103] p0455 N71-24379

Procedures for evaluating compatibility of aviation materiel with related equipment [AD-719107] p0457 N71-24457

Aircraft maintenance for civil aviation [AD-720366] p0471 N71-25955

Lubrication by boundary, elasto-hydrodynamic, and fluid films, wear due to fretting, erosion, scuffing, and pitting, and friction in aircraft [NASA-TM-X-67872] p0588 N71-31134

Maintenance, management planning, and requirements for single seat attack/fighter aircraft [AD-723227] p0623 N71-31805

Handbook for airframe and powerplant mechanics preparing for mechanic certification for FAA aircraft and engine mechanic examinations [FAA-AC-65-9] p0646 N71-33678

Fabrication and field testing of lightweight, recoverable, air-transportable hangar [AD-727051] p0684 N71-35396

Fabrication and field testing of aircraft maintenance hangars and general purpose shelters [AD-727047] p0685 N71-35397

Performance test and evaluation of hand tools used in support of military aircraft maintenance [AD-726893] p0686 N71-35558

Basic engineering technology for Automatic Inspection Diagnostic And Prognostic Systems (AIDAPS) for Army aircraft [AD-726951] p0711 N71-36432

Technical aviation handbook covering aircraft maintenance, navigation aids, airframes, lubricants, piston and gas turbine engines, and checkout procedures [AD-727195] p0720 N71-37613

Analysis of seaplane impact on planing deadrise in smooth and rough water [AD-727753] p0720 N71-37614

Comparison of logistics problems and cost aspects in selection of aircraft for earth resources surveys [NASA-TM-X-2418] p0725 N71-37928

**AIRCRAFT MODELS**

Aluminum reinforced epoxy model making, testing and stress analysis for aircraft structures, including creep, photoelastic coating and strain gage effects p0132 A71-16346

Mathematical model of small scale versatile aircraft component production process, developing computer production optimization algorithm p0156 A71-18715

Integrated project information and simulation system for management of aerospace vehicle development, discussing simulation models application [AIAA PAPER 71-238] p0188 A71-19714

Ground boundary layer effects of fixed ground plane for powered STOL wind tunnel model, discussing flow breakdown criteria, contraction lag, strut fairing interference, etc [AIAA PAPER 71-266] p0218 A71-21992

Static aerodynamic data correlation for high subsonic speed transport aircraft model in transonic wind tunnels, including relative buoyancy and turbulence effects [AIAA PAPER 71-291] p0275 A71-23423

Wing models development by tangent milling on jig-borer, approximating cross section by hand finish smoothed polygon p0481 A71-31439

Skin friction, trailing edge boundary profiles and tuft flow patterns on model F-4D aircraft in transonic flow [AIAA PAPER 71-762] p0505 A71-34001

Nonlinear flight dynamic simulation using wind tunnel and aircraft model as analog function generator and computer for motion equation processing and command orientation

Free flight suspension system for use with aircraft models in wind tunnel tests [NASA-CASE-XLA-00939] p0172 N71-15926

Dynamic characteristics and linear control theory for aircraft simulation p0174 N71-16061

Evacuation tests from 280-passenger SST mock-up through different type exits [PAA-AM-70-19] p0313 N71-19812

Roll-control effectiveness of spoiler configurations on aircraft model with variable sweep wings at supersonic speeds [NASA-TM-X-2165] p0321 N71-20126

Low speed wind tunnel model assessment of porous boundary layer control by suction at civil aircraft leading edge flaps [ARC-R/M-3640] p0330 N71-20847

Model design for vertical takeoff aircraft cockpit noting navigation aids, visual displays, and console configuration p0377 N71-22196

Steady tailplane lift effect on subcritical response of subsonic T tail flutter aircraft model in low speed wind tunnels [ARC-R/M-3652] p0515 N71-27096

Evaluating analytical models of turbulence having non-Gaussian gusts distributions and effects of wind shear on aircraft operations p0584 N71-30778

Examining model theory for static and dynamic aeroelastic phenomena p0647 N71-33805

**AIRCRAFT NOISE****NT JET AIRCRAFT NOISE****NT SONIC BOOMS**

Human subjective responses to approaching and receding aircraft sounds during flight over stationary observer p0003 A71-10345

Noise reduction relationship to air transportation progress, considering cost/technology balance, quiet engine, research and development programs, etc p0009 A71-10819

V/STOL aircraft operations, considering terminals, landing and approach aids, air traffic, noise and pollution control, performance, airworthiness regulations and licensing p0071 A71-13572

Aircraft fuselage internal noise and structural frequency response due to random excitation, using transfer matrix analysis [ASME PAPER 70-WA/DE-9] p0077 A71-14143

Helicopter in-flight noise radiation pattern and spectra measurements for various operating parameters p0093 A71-15406

Helicopter wake impulsive noise calculation based on rotor tip vortex interaction p0093 A71-15407

Helicopter noise minimization by various piloting maneuvers, discussing takeoff and landing, transition to forward flight, route selection, etc p0093 A71-15408

Helicopter and V/STOL aircraft external noise and downwash measurements during simulated jungle rescue mission p0093 A71-15409

Helicopter design for cabin noise level reduction p0095 A71-15423

Lyons-Satolas /France/ International Airport project, discussing layout, facilities and noise control problem p0143 A71-17590

Noise nuisance value index /noise pollution level/, considering aircraft and motor vehicle noise surveys and tradeoff of intensity against duration p0205 A71-20802

Helicopter noise minimization by various piloting maneuvers, discussing takeoff and landing, transition to forward flight, route selection, etc p0207 A71-21049

Sound field interaction with sinusoidally corrugated surface, considering aircraft noise measurement implications p0207 A71-21162

Aircraft flyover noise samples, obtaining atmospheric absorption coefficients

- Rotorcraft and VTOL aircraft noise characteristics, noting implications of reduction to acceptable levels p0503 A71-33419
- Experimental research at Building Research Station on outdoor sound propagation for building design in relation to aircraft and road traffic noise p0540 A71-35237
- Gulfstream 2 acoustics program for cabin noise level reduction, compliance with FAA takeoff and landing noise certification and structure qualification against sonic fatigue [AIAA PAPER 71-783] p0545 A71-35527
- Flight dynamics for aircraft noise reduction, gust effects decrease and dynamic stability of parachute load systems p0561 A71-36752
- German aircraft noise protection law of 30 March 1971, discussing objectives and applicability p0562 A71-36921
- Helicopter rotor noise due to blade-vortex interaction, using linear gust model p0562 A71-36934
- Airport system utilization, discussing aircraft noise, ATC, STOL development and passenger handling capacity problems [CASI PAPER 72/3] p0600 A71-37594
- Civil aircraft future propulsion requirements, considering larger engine sizes, higher takeoff thrusts and lower noise levels [CASI PAPER 72/10] p0601 A71-37600
- Near field noise measurement on quarter-scale model to estimate fuselage pressure in VTOL aircraft for conventional, short and vertical takeoff configurations p0603 A71-37844
- Super CTOL airport planning, discussing location of runway pairs, aircraft operations, noise reduction, community relations and efficiency p0605 A71-38023
- Flight test measurements of shock cell noise loading of aircraft tail planes, noting alleviation by nozzle and mirror structural modifications p0609 A71-38467
- Aircraft noise propagation in city streets due to intertown V/STOL and helicopter ports, using small scale models p0613 A71-39264
- Convertible rotor transport aircraft, considering ATC, mass transportation systems, safety, noise and socio-economics p0613 A71-39387
- Airport operation costs affected by runway utilization, parking bays alignment, baggage handling and aircraft noise p0614 A71-39390
- Air traffic control delays, airport airspace congestion, flyover noise reduction and performance requirements effect on airline operations economics p0614 A71-39391
- Aircraft noise reduction in takeoffs/operational procedures and by land use planning p0614 A71-39392
- Speech intelligibility prediction in time varying aircraft noise based on test score relationship to articulation index for steady state noise p0616 A71-39766
- Aircraft noise effects on hearing acuity and perceptual and intellectual judgment tasks p0651 A71-40351
- Time varying aircraft noise effect on speech intelligibility, discussing test for relation to articulation index p0658 A71-40709
- Prediction methods for human aircraft noise perception, assessing weighted sound pressure level or complex loudness-noisiness computation

# SUBJECT INDEX

# AIRCRAFT PARTS

- scales p0659 A71-40866
- Aeronautics future, discussing aircraft noise reduction, computer techniques and aircraft design p0668 A71-42237
- Civil aviation research and development policy review covering aircraft noise, congestion, ATC, runway capacity and airport development problems [AIAA PAPER 71-1024] p0701 A71-44602
- Flight dynamics of noise optimal flight profiles for V/STOL aircraft, minimization of gust effects on aircraft and nonlinear dynamic stability of parachute-load systems p0702 A71-44761
- Prop rotor and lift fan VTOL aircraft ground noise level reduction, using flight trajectory management [AIAA PAPER 71-991] p0704 A71-45295
- Research and developments in aircraft noise reduction p0035 N71-10171
- Air and land transportation noise sources and measurement, noise level scales, and individual and community responses - conference [PB-191117] p0037 N71-10349
- Response of, and acoustic radiation from panels excited by turbulent boundary layers [AD-710696] p0038 N71-10386
- Airspeed contribution to noise level within fixed and rotary wing aircraft [AD-711359] p0042 N71-10705
- Community physical, psychological, and social reactions to aircraft noise around 7 US international airports [NASA-CR-111316] p0050 N71-11032
- Low noise turbofan engine without aerodynamic blade loading [NASA-TN-D-6080] p0056 N71-11882
- Flight acoustical and performance evaluations of DC 8 nacelle modifications to reduce fan-compressor noise in airport communities [NASA-CR-1708] p0179 N71-16627
- Development of acoustic lining for turbofan nacelle modification to minimize fan compressor noise radiation [NASA-CR-1712] p0239 N71-17591
- Flightworthy nacelle development to minimize fan compressor noise radiation - Vol. 4 [NASA-CR-1714] p0240 N71-17668
- Measurement of variability of aircraft noise during level flight flyovers [NASA-CR-1752] p0256 N71-18865
- Noise measurement evaluation of takeoff and approach profiles optimized for noise abatement [NASA-TN-D-6246] p0257 N71-18929
- Sources and characteristics of aircraft noise for conventional and V/STOL aircraft p0308 N71-19457
- Sound pressure levels produced by C-5A during ground tests [AD-716814] p0330 N71-20824
- Urban air and surface vehicle noise levels and abatement potential [OST-ONA-71-1-VOL-2] p0332 N71-21085
- Aircraft noise generation, propagation, and reduction and noise effects on environment [PB-196392] p0337 N71-21796
- Routine unprotected exposure to acoustic noise within cockpits of trainer aircraft presenting potential hazardous stress [AD-717852] p0381 N71-22426
- Methods for predicting speech interference within cockpits of fixed wing and rotary wing aircraft [AD-718098] p0397 N71-23528
- Interior sound pressure measurements in C-5A aircraft [AD-719746] p0466 N71-25060
- Proceedings of conference to train personnel in conducting aircraft noise certification tests [HRC-TR-300-SUPPL-1] p0474 N71-26303
- Familiarization of Federal Aviation Administration personnel in acoustic measurement techniques and procedures involved in noise certification of aircraft [HRC-TR-300] p0475 N71-26304
- Techniques and procedures for measuring effective perceived noise level during aircraft noise type certifications [HRC-TR-300-SUPPL-2] p0475 N71-26305
- Economic analysis of aeronautical R and D efforts in US and aeronautical contributions to noise and air pollution, including technology assessment and data analysis techniques [NASA-CR-1809] p0514 N71-27011
- Noise data with models of both internally and externally blown jet flaps designed for STOL aircraft [NASA-TN-X-67850] p0518 N71-27673
- Acoustic measurements of helicopter rotor noise at hover [AD-721312] p0522 N71-28275
- Slotted blades and vanes and rotor tip design for highly loaded, low speed fan stage applicable to low noise aircraft engines [NASA-CR-72895] p0523 N71-28315
- Analysis of aircraft noise recordings to determine experimental values of atmospheric sound absorption [NASA-CR-1751] p0531 N71-28883
- Community reactions to aircraft and airport noise from physical, psychological, and social aspects [NASA-CR-1761] p0532 N71-29023
- Development of noise measurement units for airport and aircraft noise reduction and psychoacoustic studies p0585 N71-30786
- Comparison test to evaluate perceived noise level for STOL and other aircraft sounds [WR-70-9] p0587 N71-31075
- Inlet noise suppressors having perforated plate over honeycomb wall construction evaluated over range of passage heights and engine speeds using turbojet engine as noise source [NASA-TN-D-6395] p0587 N71-31096
- Analysis of factors creating aircraft noise problems and efforts to reduce level of aircraft noise p0628 N71-32086
- Effects of aircraft system noise and signal fading on pilot performance during IFR approach based on computerized simulation of XV-5 aircraft and UH-1 helicopter [AD-724336] p0638 N71-33076
- Airport/aircraft system noise reduction including land use and noise forecasting [OST-ONA-71-1-VOL-3] p0648 N71-33937
- Relations between aircraft and road traffic noise and noise tolerance in communities [TR-7102] p0675 N71-34019
- Aircraft noise problems in vicinity of Kennedy International Airport, New York and recommendations for noise reduction [PB-199723] p0677 N71-34032
- Legal aspects of compulsory soundproofing for structures next to John F. Kennedy International Airport [PB-199725] p0677 N71-34033
- Noise characteristics of model STOL wing with externally blown flaps in vicinity of aircraft propulsor [NASA-CR-111956] p0727 N71-38283
- ## AIRCRAFT PARTS
- Small gas turbines for aircraft auxiliary power unit, considering compressor and combustor design, noise, fuel consumption and specific weight problems p0008 A71-10751
- Peen forming of large complex parts from sheet and plate, illustrating dihedral break in airplane wing skin p0016 A71-11550
- Soviet book on bolting and coupling elements threads used in aircraft industry covering configurations selection, cutting, tolerance requirements and quality control p0028 A71-12723
- Approximate determination of complex geometry aircraft surfaces in form of discrete points, comparing efficiency to other methods p0156 A71-18714
- Mathematical model of small scale versatile aircraft component production process, developing computer production optimization algorithm p0156 A71-18715
- VTOL aircraft gear systems, discussing bearings, shaft connection, Ti alloy components, etc p0271 A71-22963
- Powder metallurgy parts application in aircraft, illustrating flareless-sleeve coupling nut of

- pressed and sintered Ti-6Al-4V alloy  
p0293 A71-24762
- Advanced composite vs conventional material components in cost comparison for aircraft parts  
p0424 A71-29656
- Complex structural aircraft components manufacture, using group technology principle based on subdivision of parts classes  
p0432 A71-30267
- Aircraft steering system design, considering oversteering effects in nose wheels, torque for reaction moment balance and tire behavior  
p0500 A71-33225
- Aircraft parts testing by NDT methods, considering ultrasonic system for valve defects and fluorescent particle system for crack detection  
p0563 A71-37056
- Aircraft parts lubrication friction and wear problems, discussing failure modes, solid and liquid lubricants, component damage and lubrication systems  
p0660 A71-40902
- Aircraft parts damage by corrosive friction forces, hot gases and intercrystalline attack, noting worn universal joint and blade grain boundary damage  
p0700 A71-44574
- Electron fractography for high strength steel to determine fatigue life of military aircraft parts [NLR-TR-69043-U]  
p0119 N71-13364
- AIRCRAFT PERFORMANCE**
- NT HELICOPTER PERFORMANCE**
- Inertial navigation system augmented by digital distance measuring equipment in FAA flight inspection aircraft for performance evaluation  
p0006 A71-10507
- SST program relation to airline operations, comparing production configuration, performance, economics and operation with subsonics  
[AIAA PAPER 70-1217] p0013 A71-11248
- Flight control systems influence on military aircraft design and performance, discussing static stability, ride quality, flutter margin and maneuver load controls  
[AIAA PAPER 69-767] p0027 A71-12683
- Acrostar acrobatic aircraft design and performance  
p0062 A71-13016
- Standard-Cirrus glider flight test performance, noting cockpit design and instrumentation  
p0062 A71-13019
- Trailing edge flap automatic control for glider performance improvement  
p0063 A71-13020
- STOL future performance and safety level, considering current jet aircraft fatal accident record and proportional perpetuation, airworthiness and operational considerations  
p0070 A71-13568
- DC-10 aircraft test program effectiveness, discussing performance, operational envelope, airworthiness, noise measurements, etc  
[SAE PAPER 700830] p0073 A71-13726
- Ground and airborne aircraft flight simulation methods, discussing simulator layouts and application to Concorde project  
p0088 A71-15206
- VTOL handling qualities criteria for civil IPR qualifications, taking into account pilot abilities  
p0096 A71-15427
- Metro commuter aircraft specifications, performance and CAB certification problems  
p0142 A71-17573
- Kalman filter simulation for estimating aircraft position and velocity from airborne digital computer data in zero-zero landing system  
[AIAA PAPER 69-944] p0145 A71-17697
- P-15 air superiority fighter, describing military requirements, program management and procedures in terms of speed, maneuverability, acceleration and weaponry  
p0183 A71-19078
- Boeing 737 aircraft takeoff and landing performance, emphasizing high lift systems and stopping capability  
p0184 A71-19083
- DC-10 flight test program, discussing handling, takeoff and landing, and flutter, stall and stability characteristics  
p0184 A71-19085
- Alternate reduced order particle dynamics model in aircraft mission analysis featuring instantaneously variable speed by time scale separation  
p0192 A71-19913
- Transavia Airtruk agricultural aircraft, discussing efficiency, work capacity, economics, configuration and performance  
p0208 A71-21224
- Flight time, path and fuel consumption in climb at constant radius turn, variable or constant velocity and constant engine power, deriving approximate simple formulas  
p0223 A71-22050
- Cessna Citation twin turboprop business aircraft design, performance characteristics, communications, navigation and automatic flight control equipment and flight evaluation  
p0265 A71-22112
- Space shuttle flight test instrumentation for launcher, spacecraft and airplane triple operational and maintenance system requirements, discussing digital data bus monitoring concept [AIAA PAPER 71-313] p0281 A71-23974
- Soviet book on aircraft preliminary design specifications as function of performance, aerodynamic and structural parameters, discussing tradeoffs in operational requirements for specific configurations  
p0281 A71-24012
- Variable geometry external fuel tanks for high performance aircraft with drag reduction upon fuel transfer  
[AIAA PAPER 71-395] p0341 A71-25271
- Flight test completed on onboard real time engine performance monitoring system, discussing thermodynamic analysis technique  
[ASME PAPER 71-GT-77] p0352 A71-25991
- Modal characteristic pick-up system for vibration tests of rockets or aircraft on ground using small size accelerometers with individual electronic circuit  
p0369 A71-27719
- Supersonic staggered gutter colander combustion system for plenum chamber burning on high bypass Pegasus turboprop engine of Harrier VTOL aircraft, noting performance improvement  
p0410 A71-28743
- German monograph on game theory and planning techniques for aircraft evaluation  
p0412 A71-28880
- Aircraft flight characteristics dependence on angle of attack, roll and pitch  
p0415 A71-29043
- Ejection system performance in relation to aircraft performance dependent extreme flight conditions, examining ejection seat design features and trajectories  
p0420 A71-29385
- Atmospheric turbulence effects on handling qualities and structural loads on aircraft  
p0427 A71-29787
- Aladin II four-jet engined STOL intercity transport aircraft, noting low noise characteristics and passenger capacity  
p0481 A71-31412
- Aircraft-simulating cockpit procedure trainer statistical data and development problems concerning safety, economy and efficiency performance  
p0489 A71-31883
- Concorde flight characteristics, discussing performance flight test data relationship to design  
p0496 A71-32690
- Propeller driven VTOL aircraft performance improvement, comparing variable camber/diameter counterrotating and blowing device equipped propellers  
[DGLB-71-023] p0498 A71-32786
- Aircraft angle of attack limiter parameters, describing automatic warning system for impending stall  
p0505 A71-33621
- Naval Air Rework Facility, discussing primary mission, technical disciplines and operational performance feedback  
[AIAA PAPER 71-765] p0506 A71-34003

- ST stability augmentation system, discussing performance, operational safety and reliability benefits  
[AIAA PAPER 71-785] p0507 A71-34015  
Maximum temperature engine concept, definition and application to future aircraft propulsion system performance  
[SAE PAPER 710461] p0535 A71-34498  
1011 flight test program, describing aircraft design and performance  
[AIAA PAPER 71-789] p0545 A71-35531  
STOL aircraft with vectored thrust propulsion systems, noting weight and center of gravity-lift-thrust relationship changes effect on performance  
[SAE PAPER 894] p0551 A71-35817  
Composite materials effect on supersonic aircraft weight, design and performance  
[SAE PAPER 888] p0551 A71-35818  
Light investigation of turbulence effects on aircraft longitudinal flying qualities, evaluating pilot ratings for ILS approach task  
[AIAA PAPER 71-905] p0595 A71-37156  
Variable geometry B-1A bomber aircraft, discussing size, payloads, speed, altitude range and runway takeoff  
p0600 A71-37516  
Aircraft performance and optimal energy flight path control in combat environment  
p0602 A71-37724  
Soviet book on practical aerodynamics of aircraft with turboprop engines covering piloting, forces and moments, stability, controllability, takeoff, landing, etc  
p0609 A71-38534  
Air traffic control delays, airport airspace congestion, flyover noise reduction and performance requirements effect on airline operations economics  
p0614 A71-39391  
Aerodynamic aspect ratio effects on drag and aircraft performance, noting span loading as major force on wing lifting function  
p0661 A71-41246  
Aircraft response to pilot or autopilot command during altitude control maneuver, calculating lag magnitudes  
p0663 A71-41691  
Port haul air transportation, discussing performance requirements, community acceptance and navigation and landing aids  
p0665 A71-42073  
European airbus design and performance, covering electrical system, air conditioning, engines and flying control circuits  
p0668 A71-42236  
Rotor performance and design for hover and cruise VTOL flights  
p0668 A71-42238  
Takeoff and landing performance evaluation for commercial STOL aircraft, noting high bypass ratio turbofans and high lift systems use  
p0669 A71-42286  
Flight handling qualities, takeoff speeds and performance evaluation on six degree of freedom flight simulator  
p0691 A71-42922  
High lift device application to high performance competition gliders, considering merit of design for conflicting climb/cruise requirements  
p0691 A71-43089  
Role of attack instrumentation for evaluating aircraft lift performance and phugoid oscillations  
p0693 A71-43382  
Plane circling cross-country speed increase by variable geometry in high lift flap form for better compromise between cruise and climb performance  
p0698 A71-44342  
Performance prediction and evaluation of propulsion-augmented high lift systems for STOL aircraft, considering weight, thrust and wing loading  
[AIAA PAPER 71-990] p0700 A71-44585  
Unsteady dynamic characteristics of aircraft under unsteady flight, using Laplace-Carson integral transforms  
p0703 A71-45016  
Aircraft fuselage antisymmetric loading strain effects on small aspect delta wing performance  
p0704 A71-45018  
Fighter aircraft design with consideration to armament, detection capability, thrust, speed, and load factor performance tradeoffs  
[AD-710497] p0035 N71-10183  
Application of weight and balance principles for aircraft operation  
[FAA-AC-91-23] p0107 N71-12241  
Performance and handling qualities criteria for V/STOL aircraft  
[AGARD-R-577-70] p0109 N71-12248  
Automatic pilot TAPIR  
p0112 N71-12444  
Aircraft handling characteristics during aircraft carrier approach  
[AD-713125] p0158 N71-14558  
Investigation of engine-exhaust-airframe interference on cruise vehicle at Mach 6  
[NASA-TN-D-6060] p0161 N71-14635  
Flight test methods for determining aircraft dynamic stability  
[AGARD-R-573-70] p0173 N71-16039  
Quadratic performance index for VTOL aircraft model reference attitude control system  
[NASA-TN-D-6231] p0255 N71-18836  
Optimal control of rotational and transversal motions of flight vehicles based on torsional and flexural deformations  
[AD-716517] p0312 N71-19696  
Flight simulator and airframe test stand for evaluating operational performance of aircraft flight control system  
p0393 N71-23413  
Operational performance and handling safety requirements for single engine boundary layer controlled aircraft in STOL mode  
p0394 N71-23419  
Investigation of longitudinal and lateral stability and controllability of supersonic aircraft  
[AD-718285] p0400 N71-23818  
Low wing loading STOL transport ride smoothing using Boeing aircraft  
[NASA-CR-111819] p0460 N71-24586  
Alleviation of lateral and longitudinal gust effects on aircraft  
p0463 N71-24709  
Jet vertical takeoff aircraft piloted cockpit simulator for controlling aircraft flight performance  
[ARC-R/M-3647] p0466 N71-25065  
Computer program for optimum flight path defined by flight test investigation of performance characteristics /excess thrust, fuel flow, and climb potential/ of P-104G aircraft  
[NASA-TN-D-6398] p0513 N71-27002  
Flight simulator evaluation of aircraft instrument departure procedure  
[FAA-FS-600-2] p0572 N71-29635  
Runway and taxiway profile and airplane response measurements to determine runway roughness  
p0582 N71-30766  
Applications of supercritical airfoils to transport aircraft designs  
p0582 N71-30769  
Analysis of 79,000 hours data obtained from NASA V-G/VGH flight recorders installed on 734 general aircraft engaged in eight types of operations  
p0584 N71-30782  
Estimation of lateral and longitudinal rigid body responses of aircraft structures continuous and random atmospheric turbulence  
[NASA-TN-D-6273] p0590 N71-31242  
Prediction method for performance of total pilot-vehicle system in turbulence with application to tracking tasks  
[AD-722855] p0590 N71-31288  
Commercial aircraft performance and cost analysis data for 1968 and 1969 in US  
p0619 N71-31611  
Full scale tests on tilted propeller and tilting rotor models in transonic wind tunnel of Modane-Avrieux, France, for aircraft performance prediction  
[ONERA-NT-161] p0623 N71-31813  
Aerodynamic design manual considering internal air flow system effects on aircraft performance  
[AD-723824] p0627 N71-32060  
Summary of flight test methods used for performance measurement of Concorde aircraft

[NASA-TT-F-13728] p0631 N71-32455  
 Analysis of coupled roll-spiral-mode, pilot induced oscillation occurring with M-2F2 lifting body  
 [NASA-TN-D-6496] p0642 N71-33307  
 Effect of turbulence and aircraft performance on ILS approach task and longitudinal stability  
 [NASA-CR-1821] p0642 N71-33325  
 Development of method for determining angle of pitch, flight path angle, and angle of attack for aircraft during steady or nonsteady flight  
 [VTH-156] p0647 N71-33926  
 Correlation studies based on wind tunnel test data and flight tests to determine performance, stability and control of XB-70-1 aircraft  
 [NASA-CR-114335] p0673 N71-34001  
 FA-200XS experimental aircraft for investigating operational problems of STOL type aircraft  
 [NAL-TR-229] p0673 N71-34005  
 Analysis of influence of wind shear on longitudinal motion of aircraft during approach and landing  
 [NASA-TN-D-6430] p0675 N71-34022  
 Compilation of responses to questionnaire on engine-airframe interference in transonic tests  
 p0707 N71-36402  
 Wall corrections for airplanes with interference lift in transonic wind tunnel tests  
 p0707 N71-36403  
 wind tunnel performance characteristics of single-engine fighter model fitted with in-flight thrust reverser  
 [NASA-TN-D-6460] p0716 N71-37384  
 Computer program for analyzing and simulating attack of low flying aircraft by antiaircraft missiles and probability of aircraft survival  
 [RAE-LIB-TRANS-1578] p0722 N71-37774  
 Performance and costs of nuclear aircraft used in transoceanic commerce  
 [NASA-TN-X-2386] p0726 N71-38277

**AIRCRAFT PILOTS**  
**NT TEST PILOTS**  
 Aircraft pilot direct lift control for aircraft landing and reducing gust load effects  
 [ARC-R/M-3629] p0228 N71-17102  
 Fixed wing aircraft employing free fall and circling-line techniques in rescue of personnel and retrieval of equipment  
 [AD-727007] p0683 N71-35228  
 Aircraft accident briefs for 1969 including date, location, aircraft data, injuries, flight purpose, and pilot data  
 [NTSB-BA-71-2] p0711 N71-36433  
 Guide to private and commercial multiengine aircraft pilot certification  
 [FAA-AC-61-4C] p0711 N71-36438

**AIRCRAFT POWER SOURCES**  
**U AIRCRAFT ENGINES**  
**AIRCRAFT PRODUCTION**  
 F-14A twin engine variable geometry carrier based jet fighter aircraft, discussing design, development program and manufacturing techniques  
 p0021 A71-12050  
 Light Sprite aircraft design and construction for building at home by nonprofessionals  
 p0101 A71-15674  
 Mathematical model of small scale versatile aircraft component production process, developing computer production optimization algorithm  
 p0156 A71-18715  
 Low cost short life gas turbine design based on parametric performance and component selection, outlining turbojet production  
 [ASME PAPER 71-GT-69] p0352 A71-25984  
 Traversing Infrared Inspection System for C-5 aircraft fail-safe strap panels of bonded Ti-Al laminates, discussing design and application  
 [ASME PAPER 71-DE-37] p0361 A71-27327  
 Aircraft engine production components and alloys mechanical properties evaluation for improved reliability of mass produced products  
 p0414 A71-28944  
 Complex structural aircraft components manufacture, using group technology principle based on subdivision of parts classes  
 p0432 A71-30267  
 Air transport development trends, considering increased speed and capacity, STOL aircraft, urban service, and European cooperation for manufacturing  
 p0432 A71-30302

Aircraft manufacturing techniques, discussing structural components fabrication, economics, lightweight, high strength and heat resistance  
 [SME PAPER HR-71-725] p0494 A71-32436  
 Aircraft industrial cleaning agents, processes and techniques applied to components in course of manufacturing and assembly phases, emphasizing emulsion and alkaline methods  
 [ASM PAPER C70-4.3] p0504 A71-33542  
 Future aviation development constraints on manufacturer and purchaser, design, test costs, noise, airport location and multinational operation  
 [AIAA PAPER 71-799] p0508 A71-34024  
 Titanium and composite fabrication for F-14 aircraft, discussing hot forming, chemical milling and electron beam welding  
 p0510 A71-34156  
 Modular manufacturing for F-14 aircraft at low cost using end product configuration reducing final assembly  
 p0510 A71-34157  
 Aircraft jet engine application of electric discharge machining for repetitive continuous production, considering automated closed cycle equipment  
 [SME PAPER HR-71-143] p0560 A71-36658

**AIRCRAFT RELIABILITY**  
 Airline experience with dual inertial systems as sole means of navigation, considering equipment reliability, cockpit design, training, etc  
 p0007 A71-10509  
 Aviation products liability and warranty law, noting reliability trends and quality control methods  
 p0061 A71-12971  
 DC-10 aircraft test program effectiveness, discussing performance, operational envelope, airworthiness, noise measurements, etc  
 [SAE PAPER 700830] p0073 A71-13726  
 Airworthiness and Air Registration Board, discussing aims, objectives, technical changes and national and international control  
 p0073 A71-13734  
 Reliability and maintenance problems of U.S. Army operational environment, noting inadequate design and test criteria during development  
 p0092 A71-15402  
 VTOL aircraft IFR airworthiness, noting necessity of higher safety levels for metropolitan air transit systems  
 p0095 A71-15426  
 Concorde progress toward certification, discussing SST airworthiness requirements, flight test program, takeoff and landing operational experience and stability problems at high incidence  
 p0133 A71-16487  
 Statistical information on lightning and static hazards relative to airworthiness  
 p0193 A71-19929  
 Automatic Carrier Landing System with linear adaptive aircraft Navigation Computer, investigating effectiveness in reducing system errors due to nonlinearities and noise effects  
 p0202 A71-20405  
 Concorde airworthiness requirements and Air Registration Board participation in flight test program, considering supersonic flight characteristics  
 p0276 A71-23579  
 FAA aircraft design appraisal for maintainability, considering maintenance concepts and adverse airworthiness situations  
 [SAE PAPER 710431] p0406 A71-28316  
 Costs-reliability relationships in helicopter development testing and demonstration, emphasizing decision making in program management  
 [SAE PAPER 710452] p0407 A71-28330  
 Yak 40 aircraft flight test program, discussing airworthiness requirements, static structural, vibration and wind tunnel tests  
 p0429 A71-29911  
 Fail-safe helicopter rotor control design, discussing damage tolerant components, redundant system, failure warning and maintenance  
 [AMS PREPRINT 550] p0452 A71-31102  
 Aircraft ILS signal reception system, obtaining category III reliability performance by circuit redundancy and automatic incoming information

## SUBJECT INDEX

## AIRCRAFT SAFETY

- surveillance p0490 A71-31912
- Concorde aircraft automatic landing and flight control system objective, design, reliability and certification tests p0490 A71-31915
- Aircraft reliability and maintenance cost reduction via allocation of effort and money, considering R and M optimization in airline support cycle p0500 A71-33286
- Reliability and maintainability as concepts in life cycle costs applied to airline operations p0500 A71-33287
- DC 10 dispatch reliability, discussing failure mode/analysis and flight officers training/evaluation standardization lists for abnormal operation identification p0500 A71-33297
- Lynx military helicopter design high reliability and low maintenance demands p0503 A71-33457
- Combat aircraft vulnerability to projectile impact predicted by model giving target penetration, damage size and structural response [AIAA PAPER 71-777] p0507 A71-34013
- SST stability augmentation system, discussing performance, operational safety and reliability benefits [AIAA PAPER 71-785] p0507 A71-34015
- Integrated logistics support program for F-14 aircraft maximum maintainability, reliability and operational readiness at optimum cost p0510 A71-34154
- Computerized automatic control of aircraft electrical system using remote power controllers and multiplexed data bus for wiring reduction and reliability improvement p0537 A71-34700
- British civil aircraft airworthiness requirements, discussing aircraft industry management philosophy ensuring quality standards in design, development, production, inspection and product support p0560 A71-36673
- V/STOL airworthiness certification, considering standards developed by FAA in cooperation with industry [CASI PAPER 72/21] p0602 A71-37607
- Civil transport aircraft and equipment maintenance and reliability problems solutions with best time, cost and weight compromises p0702 A71-44765
- Tentative airworthiness standards for powered lift transport category aircraft p0239 N71-17553
- Aircraft safety and aircraft reliability, noting pilot performance, landing approach and takeoff, and clear air turbulence p0377 N71-22197
- Determination of inspection intervals and nature of inspections for safe and economical operation of aircraft structures [FFA-120] p0382 N71-22431
- Actions and recommendations of Ninth Meeting of Airworthiness Committee [DOC-8925] p0675 N71-34020
- CRAFT SAFETY**
- American ATA prototype aircraft collision avoidance equipment and proposed noncooperative system p0008 A71-10753
- ATA Collision Avoidance System based on time and frequency synchronization via ground stations or other aircraft p0030 A71-12895
- On-site aviation accidents investigation and prevention, noting National Transportation Safety Board procedures p0060 A71-12963
- Aircraft accident hearings for discovering facts, causes and preventive measures p0060 A71-12964
- Aircraft flight aerodynamics from accident prevention viewpoint, discussing angle of attack, turbulence effects, weather factors, etc p0062 A71-13017
- STOL future performance and safety level, considering current jet aircraft fatal accident record and proportional perpetuation, airworthiness and operational considerations p0070 A71-13568
- V/STOL aircraft in civil air transportation, discussing safety, reliability, maintainability and propulsion system concepts p0071 A71-13576
- Civil aviation safety - Conference, Beirut, September-October 1970 p0086 A71-14990
- Aircraft accident trends and preventive practices, considering fatal landing statistics p0087 A71-14995
- Helicopters safe antitorque control, describing Penestron ducted fan design p0094 A71-15417
- VTOL aircraft IFR airworthiness, noting necessity of higher safety levels for metropolitan air transit systems p0095 A71-15426
- Military helicopter design and weaknesses correction, considering man/machine combat survivability and operational accidents reduction p0098 A71-15447
- Aircraft equipment failures detection and warning systems p0101 A71-15901
- All-weather aircraft operations, discussing takeoff, landing, safety and forecasting p0146 A71-17923
- Bird strikes incidence and prevention, discussing velocity effects, migration role and uses of distress calls, falconry and radar p0156 A71-18664
- Cargo aircraft crew safety and survival, describing restraint, escape, flight deck interior doors, fire and smoke hazards and personnel environmental protection [SAE-ARP-1139] p0187 A71-19643
- Materials and construction techniques in lightning protection for aircraft and helicopters p0193 A71-19930
- Lightning current transfer tests of p-static discharger for aircraft installations p0194 A71-19935
- Lightning and surge protection devices for survivability of aircraft electrical systems p0194 A71-19941
- Aircraft industry ATC techniques and equipment contribution to aircraft control and safety p0270 A71-22951
- ATC electronic automation systems development for air safety improvements p0271 A71-22953
- Commercial business and utility aircraft chemical oxygen generators to satisfy FAA requirements, discussing weight, size and maintenance savings and increased safety [SAE PAPER 710390] p0286 A71-24254
- VTOL propulsion systems safety requirements, considering single and double breakdowns p0293 A71-24752
- Bird impact hazard to general aircraft, discussing structural damage, flight safety and testing procedures p0299 A71-24997
- U.S. General Aviation safety record, discussing National Transportation Safety Board and accident/injury prevention [SAE PAPER 710397] p0300 A71-25132
- Aircraft wing fatigue test procedures for gust, maneuver, ground-air-ground, taxi and landing impact loads [SAE PAPER 710403] p0300 A71-25133
- Polyurethane foam effects on fuel contamination during installation for fuel system fire and explosion protection [ASME PAPER 71-GT-54] p0351 A71-25981
- SST problems, including adequate instrumentation and fuel tank immunization to explosion p0358 A71-26883
- Passenger aircraft structures accelerated testing for safety and fatigue durability under operational conditions, describing tests, planning and evaluation p0358 A71-26946
- Weather minimum standards for civil aircraft, considering cloud ceilings, visibility, wind velocity and direction, onboard and ground-based flight control equipment and aircraft characteristics p0360 A71-27141

Midair collisions analysis for civil-military integrated ATC air space, discussing near miss volume, random heading aircraft density and pilots evasive action vs avoidance percentages  
p0367 A71-27599

Airport certification and safety inspection procedures and minimum safety standards  
[SAE PAPER 710413] p0404 A71-28305

Plug-in relay hazards and minimization for aircraft flight safety applications  
p0412 A71-28841

Jet transport aircraft design for safety under air turbulence conditions, considering cruise altitude limitations and pitch and g excursion reduction by special autopilot mode  
p0427 A71-29777

Time-frequency anticollision system for dangerous aircraft detection and avoidance using stable atomic clocks  
[ONERA-TP-938] p0488 A71-31875

Aircraft-simulating cockpit procedure trainer statistical data and development problems concerning safety, economy and efficiency performance  
p0489 A71-31883

Civil aircraft arresting on runway overshoots, describing safe deceleration method by use of soft ground arresters  
p0540 A71-35210

ATC system safety problems from user standpoint, considering requirements by pupil, test and airline pilots and light, private, business, taxi and military aircraft  
p0542 A71-35372

ATC system improvement by area navigation, discussing benefits in services, safety and cost effectiveness  
p0542 A71-35373

Air transportation safety review covering weather knowledge, aircraft structures, instrumentation, radio aids and power plants  
p0554 A71-36175

International airport planning, considering runways, hangars, second level loading, cargo handling and safety  
p0614 A71-39388

Air safety standards and objectives, discussing human factors as accident causes, piloting aids and management  
p0614 A71-39395

Trailing vortex pair behind aircraft, presenting equilibrium characteristics and effects on safety  
p0656 A71-40504

Aircraft wake turbulence relation to CAT, discussing flight control loss, jumbo jets trailing vortex wakes breakup and detection and safe aircraft spacing  
p0658 A71-40704

Unassisted aircraft parking system /Accu-Park/, discussing equipment design safety and accuracy  
p0661 A71-41247

Strobe lighting for aircraft midair collision hazard reduction, comparing Collision Avoidance System and Pilot Warning Indicator effectiveness  
p0661 A71-41493

Inertial navigation impact on aircraft safety, discussing error sources and midair collision risks  
p0666 A71-42079

U.S. Army ATC cost-effective system developments for high density low altitude helicopter tactical operations to avoid enemy radar under near-all weather conditions  
p0667 A71-42084

Corporate aircraft safety - Conference, Washington, D.C. April 1971  
p0692 A71-43226

Jet engine advent impact on aviation fuels safety, discussing gasoline hazards in prejet aircraft  
p0692 A71-43231

Corporate aircraft safety - Conference, San Antonio, May 1970  
p0693 A71-43379

Feasibility of using flexible rotor blades for ejection systems  
[AD-711642] p0048 N71-11022

Radar observations of bird migrations to reduce risk of bird-aircraft collisions  
[AD-712720] p0106 N71-12232

Application of weight and balance principles for aircraft operation  
[FAA-AC-91-23] p0107 N71-12241

Capacity measurement methodology for air traffic control system with long range objectives  
[FAA-RD-70-70] p0163 N71-14835

Airplane interior materials ignition and fire extinguishing foam  
[FAA-RD-70-81] p0179 N71-16818

Establishment of take-off and landing safety margin for Breguet 941  
[NASA-TT-P-13453] p0237 N71-17441

Aircraft safety and aircraft reliability, noting pilot performance, landing approach and takeoff, and clear air turbulence  
p0377 N71-22197

Determination of inspection intervals and nature of inspections for safe and economical operation of aircraft structures  
[PFA-120] p0382 N71-22431

Proceedings of Air Line Pilots Association annual safety forum  
p0391 N71-23234

Accident investigations, flight control systems, and operational recordings for improved aircraft flight mechanics  
[AGARD-CP-76-71] p0393 N71-23410

Operational flight data analysis for improved aviation safety levels  
p0393 N71-23411

Onboard data acquisition for improved aircraft design and operational flight safety  
p0393 N71-23412

Operational performance and handling safety requirements for single engine boundary layer controlled aircraft in STOL mode  
p0394 N71-23419

Human factors and safety requirements in aircraft design  
p0395 N71-23423

High intensity xenon flashtube lights for high intensity xenon flashtube lights for during daytime and nighttime flights  
[AD-718639] p0462 N71-24669

Potential feasibility of safe, practical, and economical air breathing nuclear propulsion systems for aircraft and air cushion vehicles  
[NASA-TN-X-67837] p0468 N71-25524

Calculating and testing antiicing systems of aircraft and helicopters  
[AD-719922] p0469 N71-25622

Development and application of heads up aircraft instrument display for improvement in aircraft safety during adverse weather  
[FAA-NA-71-9] p0565 N71-29305

Analysis of aircraft accidents and establishment of rational, quantitative air traffic safety control goals  
[FAA-RD-71-36] p0566 N71-29309

Conference on NASA research in aircraft safety and operating problems  
[NASA-SP-270] p0580 N71-30756

Ditching behavior of dynamic C-5A model  
p0581 N71-30757

Magnitude of induced voltages and their relation to characteristics of lightning discharge and electrical properties of aircraft electrical systems  
p0581 N71-30761

Safety characteristics for powered lift of commercial STOL aircraft  
p0583 N71-30773

Safety tests for aircraft equipment  
[AD-723033] p0625 N71-31940

Determination and evaluation of safety parameters jet fuels in aircraft fuel tanks when using nitrogen as inerting agent  
[FAA-NA-71-26] p0629 N71-32301

Design criteria for crashworthy aircraft fuel systems for military aircraft  
[AD-723988] p0637 N71-32991

Analysis of flight crew duties and operations during flight of Dc-8 aircraft with recommended changes to improve safety  
[NAL-TR-215] p0645 N71-3358

Evaluation of air traffic control parameters and relationship to future of aeronautics  
[NASA-CR-1833] p0675 N71-3402

- Development of numerical rating for correlating safety-of-flight factors with aircraft speed and visibility restrictions  
[FAA-RD-70-48] p0686 N71-35735
- Determination of physical and chemical properties of fuels gelled with carbohydrate resins to evaluate effectiveness in reducing aircraft fire hazards  
[FAA-NA-71-18] p0716 N71-37369
- AIRCRAFT SPECIFICATIONS**
- STOL aircraft for tactical support, discussing USAF intertheater requirements p0087 A71-15024
- Metro commuter aircraft specifications, performance and CAB certification problems p0142 A71-17573
- Cessna Citation twin turboprop business aircraft design, performance characteristics, communications, navigation and automatic flight control equipment and flight evaluation p0265 A71-22112
- Soviet book on aircraft preliminary design specifications as function of performance, aerodynamic and structural parameters, discussing tradeoffs in operational requirements for specific configurations p0281 A71-24012
- DC 10 specifications for airport planning, including ground clearances, payload-range characteristics and jet engine exhaust velocities p0432 A71-30239
- Computer aided design program for civil transport aircraft configuration, performance, propulsion, weight and costs to meet given specifications p0435 A71-30398
- Flying qualities military specification, discussing longitudinal static stability, transonic flight relaxation, control forces in maneuvering flight, lateral-directional oscillations, etc  
[AIAA PAPER 71-766] p0506 A71-34004
- AIRCRAFT STABILITY**
- NT HOVERING STABILITY**
- Rapid hybrid frequency response method for aircraft flight flutter testing based on hybrid computing system p0003 A71-10228
- LAMS flight control systems for gust load alleviation and structural mode stabilization on large flexible aircraft, using aerodynamic surfaces p0017 A71-11659
- C-5 military transport stability augmentation for pitch and yaw inertia at low speed, using pilot evaluation on cockpit simulator p0028 A71-12684
- Statistical prediction of atmospheric turbulence effects on aeronautical systems p0065 A71-13135
- Clear air turbulence effects on flight and structural response of aircraft, using gust loads model p0065 A71-13136
- Heavy supersonic aircraft controllability, noting irreversible boost control system and stability p0067 A71-13195
- Jet interference effects on aircraft static stability with ejector afterbody, noting wind tunnel methods of drag minimization and measurement  
[DGLR-70-048] p0129 A71-15953
- Single rotor helicopter directional stability in rectilinear flight with constant angle of side slip p0149 A71-18307
- Aft vs canard horizontal tail locations for fighter/attack configuration at sub and supersonic speeds, observing lift coefficient, L/D and longitudinal stability  
[AIAA PAPER 71-8] p0150 A71-18482
- DC-10 flight test program, discussing handling, takeoff and landing, and flutter, stall and stability characteristics p0184 A71-19085
- Airliner acceptance checks characteristics for official licensing prerequisites, investigating takeoff, landing, ascent, stability and control p0196 A71-20065
- Aircraft elastic mode control for turbulence/gust/alleviation, noting riding quality, structural fatigue life and peak loads p0199 A71-20301
- Soviet book on aircraft flight with incomplete and asymmetrical thrust covering probabilistic characteristics, stability, landing and takeoff with partial engine failures, etc p0281 A71-24013
- Inclined engine cold circular jet effects on tail control surfaces aerodynamic characteristics, considering aircraft longitudinal stability p0291 A71-24593
- Optimal control stabilization under continuous small disturbances applied to aircraft stability in horizontal flight under vertical gust loads p0292 A71-24726
- Propulsion system and fuel regulator design effect on thrust change during air ejection for VTOL aircraft stabilization in hovering flight p0293 A71-24753
- Wind tunnel evaluation of analytical method for predicting longitudinal stability and aerodynamic characteristics of large flexible aircraft applied to supersonic transport configuration  
[AIAA PAPER 71-343] p0343 A71-25322
- Longitudinal stability of ground effect airplane, discussing influence on aerodynamic characteristics of height, ground surface roughness and wing aspect ratio p0418 A71-29228
- Jet transport aircraft stability and controllability under atmospheric turbulence conditions, discussing longitudinal and lateral-directional characteristics with particular attention to unstable spiral mode p0426 A71-29772
- Pilot subjective evaluation of XB-70 aircraft response to atmospheric turbulence in comparison with measured accelerations p0426 A71-29774
- Helicopter rotor system vibratory and mechanical stability characteristics, investigating anisotropically mounted flexible swash plate and blade out of track effects  
[AHS PREPRINT 511] p0449 A71-31082
- Hingeless rotor helicopter stability and control characteristics, considering induced flow field, flapwise bending modes and blade-fuselage dynamic coupling  
[AHS PREPRINT 541] p0451 A71-31098
- Stratospheric turbulence induced aircraft buffeting dependence on vertical wind shear, Richardson number and thermal stability change from underlying to overlying layer p0480 A71-31365
- Stratospheric turbulence induced aircraft buffeting dependence on horizontal temperature and wind distribution p0481 A71-31366
- Aircraft spin tests preparation and evaluation, describing pilot errors p0482 A71-31462
- Helicopter stability, using Lockheed rotor system with gyro coupled to cantilevered blades p0486 A71-31599
- Aspect ratio influence on instability and nonminimum phase effects of longitudinal motion of aircraft relative to negative lift-drag expression transfer functions p0502 A71-33405
- SST stability augmentation system, discussing performance, operational safety and reliability benefits  
[AIAA PAPER 71-785] p0507 A71-34015
- Twin turboprop STOL aircraft lateral directional oscillation traced to rudder vibration due to aerodynamic hinge moments interaction with friction  
[AIAA PAPER 71-792] p0508 A71-34019
- Total in-flight simulator /TIFS/ in variable stability C-131 aircraft, describing potential as design tool  
[AIAA PAPER 71-794] p0545 A71-35529
- STAN/MASS system aircraft weight and balance determination, discussing basic concepts, design requirements and applications  
[SAWE PAPER 896] p0551 A71-35816
- Dynamic positioning stationkeeping and stability criteria for formation flight systems extended to helicopter and V/STOL transports p0552 A71-35923

- High speed aircraft maneuvers stability determination by constant angular pitching/rotation velocity, angle of attack and flight speed, using Liapunov method p0555 A71-36176
- Soviet book on practical aerodynamics of aircraft with turboprop engines covering piloting, forces and moments, stability, controllability, takeoff, landing, etc p0609 A71-38534
- Large crane heavy lift helicopter stability and controllability, considering effects of slung loads, performance improvement, automatic flight control and physical size p0609 A71-38651
- Tilt-fold-propotor VTOL aircraft stability and control, emphasizing pylon tilt and rotor stop-fold effects on flying qualities p0610 A71-38652
- Aircraft lateral dynamics effect on positioning accuracy along straight flight path, using Loran C data p0610 A71-38864
- Phugoid motion at constant angle of attack without thrust line displacement from aircraft center of gravity, noting longitudinal stability p0650 A71-40168
- Atmospheric and wake turbulence effects on aircraft from discrete gust and spectral interpretations, discussing load production and uncontrollable rolling moments p0656 A71-40507
- Parametric and autoparametric instability of aircraft structures p0669 A71-42240
- Variable stability aircraft lateral directional flying qualities, investigating turbulence effects p0670 A71-42833
- Stability augmentation system for aircraft elastic modes control, discussing active flutter suppression technology p0697 A71-44107
- Flexible ram air inflated keel and leading edge parawing design optimization for increased stability and reliability, introducing semirigid member concept [AIAA PAPER 71-986] p0700 A71-44582
- STOL aircraft flight control problems, discussing Mach trim, artificial feel, stability, feedback system responses and lateral/directional laws [AIAA PAPER 71-993] p0704 A71-45297
- Application of weight and balance principles for aircraft operation [FAA-AC-91-23] p0107 N71-12241
- Mechanical stabilization system for VTOL aircraft [NASA-CASE-XLA-06339] p0122 N71-13422
- Vibration stability of basic airplane structures [JPRS-51966] p0127 N71-14144
- Turbulence measurements in and near thunderstorms correlated with aircraft stability measurements from ground based radar [NRC-11703] p0165 N71-15152
- Wind tunnel studies of external store induced flow field instability effects on longitudinal stability of arrow wing aircraft p0305 N71-19382
- Investigation of longitudinal and lateral stability and controllability of supersonic aircraft [AD-718285] p0400 N71-23818
- Wind tunnel investigation of static longitudinal and lateral characteristics of full scale mockup of light twin engine aircraft [NASA-TN-D-6238] p0400 N71-23860
- Stability, control, and handling quality characteristics of STOL and V/STOL airplanes p0463 N71-24702
- Aeroelasticity and unsteady flow problems of aircraft p0463 N71-24706
- Investigation of stability and controllability parameters for supersonic aircraft under varying aerodynamic load conditions [AD-719804] p0465 N71-25032
- Stability and controllability of supersonic swept wing aircraft [AD-719803] p0465 N71-25049
- Equations of motion for time vector calculus for aircraft lateral stability [ARC-R/M-3631] p0515 N71-27097
- Approximation method for turbulence effects on aircraft aerodynamic stability with B-52 examples p0516 N71-27320
- Complexity of supersonic aircraft systems for stability and controllability [AD-721027] p0517 N71-27354
- Engine dynamics requirements implied by thrust modulation control for VTOL aircraft [NASA-TT-P-13755] p0591 N71-31455
- Conference papers on low level turbulence models to determine influence on aircraft stability and missile trajectories [DLR-MITT-70-12] p0623 N71-31882
- Horizontal and vertical gust load frequency and power spectra influence on longitudinal aircraft stability p0624 N71-31890
- Atmospheric turbulence models showing gust load influence on aircraft yaw motion p0624 N71-31891
- Characteristics of air motion with respect to ground and analysis of dynamics of aircraft in turbulent air [NASA-TT-P-600] p0633 N71-32719
- First order motion of cable towed and tethered bodies for predicting aircraft dynamic stability performance [VKI-TN-68] p0639 N71-33116
- Application of least squares method for determining longitudinal aerodynamic derivatives of aircraft from flight test data [Z-12] p0641 N71-33305
- Analysis of coupled roll-spiral-mode, pilot induced oscillation occurring with M-2F2 lifting body [NASA-TN-D-6496] p0642 N71-33307
- Correlation studies based on wind tunnel test data and flight tests to determine performance, stability and control of XB-70-1 aircraft [NASA-CR-114335] p0673 N71-34001
- Analysis of influence of wind shear on longitudinal motion of aircraft during approach and landing [NASA-TN-D-6430] p0675 N71-34022
- Relation between turbulence in stratosphere causing aircraft buffeting, and vertical distribution of meteorological parameters calculated from radiosonde data [NASA-TT-P-13981] p0707 N71-36398
- Horizontal temperature and wind distribution effect on aircraft buffeting in stratosphere [NASA-TT-P-13978] p0718 N71-37600
- Spin tunnel tests to determine effectiveness of deployable, flexible ventral fins for spin recovery device on fighter aircraft [NASA-TN-D-6509] p0719 N71-37603
- AIRCRAFT STRUCTURES**
- NT AIRFRAMES**
- NT FUSELAGES**
- NT PLASTIC AIRCRAFT STRUCTURES**
- Aircraft structure fatigue life improvement via material stress coining inside and around holes and slots p0003 A71-10170
- Aircraft structures fatigue testing device using programmed control of electrical inputs to electrodynamic vibration stand, noting load cycle effects and damage accumulation p0004 A71-10409
- High velocity metal working, discussing airfoil forging, ausforming of bearing race blanks, tooling, etc [SME PAPER MP-70-228] p0014 A71-11267

- Sound radiation from finite span airfoil in three dimensional turbulent flow, considering lift function effect  
 p0068 A71-13280  
 Optimal firing temperature schedule during gas turbine loading for minimal thermal fatigue of hot gas path components, considering hollow stationary airfoils  
 [ASME PAPER 70-WA/GT-2] p0076 A71-14116  
 Linear airfoil theory applicability for wings aerodynamic characteristics, considering high lift, ground effect, angle of attack and aspect ratio  
 p0084 A71-14593  
 Shock wave bisector rule improvement, applying to asymptotic behavior of bow shock attached to airfoil in two dimensional supersonic flow  
 p0142 A71-17420  
 Performance characteristics of horizontal and vertical stabilizers at medium Reynolds number from wind tunnel measurements, considering air foil and flap effects  
 p0149 A71-18249  
 High lift nose slats generation for arbitrary airfoil, using conformal transformations and computer program  
 [AIAA PAPER 71-11] p0150 A71-18485  
 Airfoils in two dimensional nonuniformly sheared slipstreams, predicting pressure distribution from mathematical model for comparison with measurement  
 [AIAA PAPER 71-94] p0152 A71-18549  
 Viscous gas flow interaction on delta wing and oblique airfoil at Mach number of infinity  
 p0189 A71-19739  
 Computerized transonic airfoil design from predetermined supercritical velocity distribution, obtaining equivalent incompressible flow through streamline and potential line network transformation  
 p0199 A71-20304  
 Two dimensional test facility in blowdown wind tunnel transonic section, discussing porous sidewall boundary layer control effects on airfoils geometric characteristics  
 [AIAA PAPER 71-293] p0271 A71-22957  
 Symmetrical airfoil in stratified fluid flow determining camber and incidence effects  
 p0291 A71-24589  
 Nonuniform transonic shear compressible flow past symmetric airfoil, using linearized small disturbance theory  
 p0293 A71-24761  
 Plane rigid airfoil with fixed center of gravity, discussing motion in turbulent air and gust loads  
 p0298 A71-24947  
 Resin matrix composite airfoils in gas turbine engines, considering performance, fabrication and cost  
 [ASME PAPER 71-GT-47] p0351 A71-25980

- Approximation of flow around jet flapped airfoil, discussing ground effect on lift coefficient increments p0355 A71-26314
- Hele-Shaw flow viscous tails from airfoil, observing high Reynolds number trailing edge flow for separation and initiation of Kutta condition p0356 A71-26447
- Airfoils unsteady stall by testing two dimensional model in harmonic pitching oscillation for helicopter rotor blades characteristics p0368 A71-27609
- Compressible transonic flow about two dimensional airfoils, developing inviscid nonlinear potential equations by relaxation procedures [AIAA PAPER 71-569] p0484 A71-31562
- Airfoils broadband noise generation mechanism in turbulent flow in anechoic chamber [AIAA PAPER 71-587] p0485 A71-31573
- Shearing flows in steady vortex around airfoil in perturbed velocity, considering aerodynamic forces torque p0489 A71-31903
- Two dimensional wind tunnel tests on airfoil fastened between tunnel walls, investigating variable chord concept applicability in sailplane design p0494 A71-32294
- Airfoils with turbulent boundary layers, calculating acoustic radiation from surface distribution of pressure fluctuations p0495 A71-32520
- Unsteady compressible flow measurement, determining local lift coefficient from pressure distribution along airfoil p0501 A71-33342
- Subcritical nonlinear potential flows over two dimensional subsonic airfoils by multistrip method of integral relations p0556 A71-36330
- Unsteady pressure gradient reduction effect on airfoil dynamic stall delay p0671 A71-42841
- Transonic flows about two dimensional airfoils, calculating far field boundary conditions with coordinate transformation p0702 A71-44620
- Subcritical flows over two dimensional airfoils by multistrip method of integral relations [RE-393J] p0042 N71-10581

# SUBJECT INDEX

# AIRSPPEED

Data recordings and computer codes for airport rapid transit access system study  
[PB-195048] p0226 N71-16989

Survey of rapid transit railway impact on airport passenger traffic  
[PB-195045] p0226 N71-16990

Tabulations for rapid transit system effect on airport traffic  
[PB-195049] p0226 N71-16991

Rapid transit railway effect on airport passenger traffic  
[PB-195046] p0226 N71-16992

Economic analysis of airport construction in north central Texas region, emphasizing employment and dollar value of purchases  
p0246 N71-18099

Public transportation in airport access systems  
p0257 N71-18951

Mass transport systems for airport access  
p0257 N71-18952

Problems in mass transportation systems for access to Tokyo airport  
p0257 N71-18953

Public transportation requirements for Heathrow Airport  
p0257 N71-18954

Providing ground access to Kansas City Airport  
p0258 N71-18955

Existing access systems for Logan International Airport, and plans for improvement  
p0258 N71-18957

Survey conducted to develop minimum requirements for airport fire fighting and rescue services  
[FAA-AS-71-1] p0307 N71-19426

Feasibility of rail access to Friendship International Airport from Wash., D.C. and Baltimore, Md.  
[PB-196023] p0307 N71-19434

Airline passenger survey to determine future requirements for state airport system  
[PB-195939] p0311 N71-19611

Design, construction, operation, and management of military airports  
[AD-716603] p0312 N71-19702

Survey of passenger volume and destinations at Theodore F. Green State Airport in R.I.  
[PB-195940] p0316 N71-19865

Fog modification over airports using helicopters  
[AD-716818] p0330 N71-20806

Airfield tests of specially formulated marking paints for asphalt pavements  
[AD-716755] p0335 N71-21523

Inventory of private and public airports and air facilities in state of Texas  
[PB-196935] p0336 N71-21629

Ten year forecast for eight major traffic categories at Washington National and Dulles International airports for period 1971 through 1982  
p0372 N71-21979

Development and description of basic descriptors used to analyze jet engine noise, aircraft noise, and noise level of airports  
p0372 N71-21980

Tables and maps of selected landing airfields for shuttle orbiters with various crossranges  
[NASA-TM-X-67080] p0373 N71-21996

Survey of civil airports to determine status of crash fire and rescue equipment available for use following accidents involving scheduled or local service air carrier aircraft  
p0476 N71-26466

Noise data with models of both internally and externally blown jet flaps designed for STOL aircraft  
[NASA-TM-X-67850] p0518 N71-27673

Synoptic meteorology for airports in Spain, Austria, France, Switzerland, and Alps  
[AD-720708] p0519 N71-27807

Community reactions to aircraft and airport noise from physical, psychological, and social aspects  
[NASA-CR-1761] p0532 N71-29023

Probable impact of future supersonic transport aircraft operations on noise environment around seven airports in US  
[AD-722365] p0574 N71-29777

Extension of New York Waterfront Commission to area airports and establishment of security measures to combat air cargo theft  
[REPT-91-1262] p0576 N71-30164

Wind pressure and cross flow velocity profiles for short takeoff aircraft building roof airports  
p0583 N71-30776

Analysis of transit access to Oakland International Airport, Oakland, California, and recommendations for improved service  
[PB-197837] p0592 N71-31463

Intrusion detector for parked aircraft using sensing technique to detect human touch  
p0619 N71-31651

Impact of jet aircraft emissions on air quality in vicinity of Los Angeles International Airport  
[PB-198699] p0621 N71-31779

Systems approach in design, construction, operation, and maintenance of airport runways  
[AD-724132] p0635 N71-32890

Airport/aircraft system noise reduction including land use and noise forecasting  
[OST-ONA-71-1-VOL-3] p0648 N71-33937

Legal aspects of compulsory soundproofing for structures next to John F. Kennedy International Airport  
[PB-199725] p0677 N71-34033

Reduction of jet exhaust noise at airports  
p0689 N71-36388

Computing dispersal of atmospheric pollutants near airports by use of mean wind and temperature profiles  
[NASA-CR-111962] p0713 N71-36720

## AIRSHIPS

Airships and balloons potential commercial use in Canada, discussing cargo, passenger and military applications  
p0192 A71-19916

Cargo airship standard atmosphere operation modes, discussing long range gas capacity and short range applications for large compact loads  
p0354 A71-26309

Investigating economic and engineering aspects of using dirigibles in construction  
p0161 N71-14629

Design and characteristics of double hull dirigible airship  
[JPRS-52330] p0260 N71-19217

Aerodynamic characteristics of captive balloons and other lighter than air devices  
[AD-717015] p0332 N71-21166

Design, development, and performance requirements for large rigid airships for freight and cargo transportation  
[REPT-5] p0710 N71-36425

## AIRSPACE

ATC automation, using conflict prediction algorithm based on airspace assignment to aircraft entering system  
p0018 A71-11698

ATC automated systems, discussing National Airspace System En Route Stage A and Advanced Radar Terminal System  
[AIAA PAPER 71-244] p0188 A71-19719

Aircraft motion and traffic control at air corridors intersections for minimum flight schedule deviation under random disturbance due to weather, using statistical simulation  
p0283 A71-24158

Motion sequential analysis of airways utilization, using mathematical-statistical methods  
p0360 A71-27143

Third London airport, discussing interface problems, economic factors, airspace utilization and compatibility with other countries  
p0614 A71-39389

Systems analysis summary on New York metropolitan area air traffic capacity  
p0245 N71-18040

## AIRSPPEED

Forward horizontal speed influence on aerodynamic characteristics of air cushion vehicle with circular nozzles and cylindrically or conically shaped curtains  
p0025 A71-12551

Planetary boundary layer air velocity and temperature measurements from airplane  
p0134 A71-16666

Altimeter-airspeed and Mach number pressure transducer with diaphragm free of temperature and vibration effects  
p0433 A71-30322

- Minimal time climb velocity optimization for stratospheric and tropospheric jet aircraft flights  
p0664 A71-41972
- Pressure altimeter, airspeed and vertical velocity instruments, discussing selection, installation, pilot verification, error identification, repair and use  
p0694 A71-43385
- Sailplane circling cross-country speed increase by variable geometry in high lift flap form for better compromise between cruise and climb performance  
p0698 A71-44342
- Airspeed contribution to noise level within fixed and rotary wing aircraft  
[AD-711359] p0042 N71-10705
- Mass flow, velocity, and in-flight thrust measurements by ion deflection  
[AD-713587] p0160 N71-14604
- Jet transport aircraft airspeed control and controllability data obtained by flight recorders  
[ARC-CP-1135] p0331 N71-20902
- Airspeeds, rotor speeds, engine rigging, and gross weight effects on UH-1 C helicopter during autorotation  
[AD-717047] p0334 N71-21363

**AMIDES**  
NT POLYIMIDES

**AMMONIA**  
Vortex flow over helicopter rotor square tips, using visualization technique with ammonia vapor

## SUBJECT INDEX

## ANGLE OF ATTACK

- boundary layer flow over diazonium salt solution  
p0650 A71-40169
- AMMUNITION**  
Fluid amplifiers theory and use as temperature and pressure sensors, discussing applications in chemical and ammunition industries and jet aircraft control  
[IEEE PAPER 70-TP-120-IGA] p0691 A71-42921
- AMPERAGE**  
U ELECTRIC CURRENT
- AMPHIBIOUS AIRCRAFT**  
NT SEAPLANES  
Light amphibian passenger STOL P-300 Equator aircraft, using single turbosupercharged engine driving two blade propeller at tail assembly  
p0131 A71-16132
- AMPHIBIOUS VEHICLES**  
NT AMPHIBIOUS AIRCRAFT
- AMPLIFICATION**  
Kalman filter application as observer of observable signals derivatives, using gain matrix to minimize variance estimate for instrument landing systems  
p0209 A71-21343
- AMPLIFICATION FACTOR**  
U AMPLIFICATION
- AMPLIFIERS**  
NT FLUID AMPLIFIERS  
NT PHOTOMULTIPLIER TUBES  
NT SERVOAMPLIFIERS  
NT TRANSISTOR AMPLIFIERS
- AMPLITUDE DISTRIBUTION ANALYSIS**  
Nose bluntness, angle of attack and oscillation amplitude effect on hypersonic unsteady aerodynamics of slender cones  
[AIAA PAPER 70-216] p0192 A71-19895  
Jet turbulence orderly structure enhancement, control and relation to noise, studying response to periodic surging of frequency and amplitude  
p0606 A71-38204
- AMPLITUDE PROBABILITY ANALYSIS**  
U AMPLITUDE DISTRIBUTION ANALYSIS
- AN-24 AIRCRAFT**  
Construction and operation of AN-24 airplane including airframe description  
[AD-716499] p0310 N71-19515
- ANALOG COMPUTERS**  
Real time remote test site computation and display of complex engine inlet distortion parameters from dynamic pressure signal, using analog computer  
p0267 A71-22726  
Analog recursive computer with serial digital program for arithmetic unit and storage system control  
p0360 A71-27150  
Automatic computation of navigation coordinates using analog and digital computers  
[AD-726603] p0687 N71-35782
- ANALOG SIMULATION**  
Critical flutter of wing with rigid aileron studied by analog computer modeling  
p0007 A71-10606  
Analog and digital methods for interactions between aircraft lifting elements in steady or unsteady supersonic flow  
[ONERA-TP-850] p0090 A71-15358  
Radar analog simulators for Polish air traffic controllers training, describing optical and electronic equipment  
p0270 A71-22950  
Electrical analog for sonic boom indoor pressure wave effect on structural members  
[UTIAS-TN-158] p0648 N71-33964
- ANALOG TO DIGITAL CONVERTERS**  
ATC automation program for en route and terminal centers, discussing combined nationwide system features, IFR volume and video digitizer data links  
p0210 A71-21659  
Large scale MOS IC digital VOR navigation converter, comparing accuracy, size, weight and cost with standard design  
p0550 A71-35789

NT HUMAN BODY
- ANEMOMETERS**  
NT HOT-WIRE ANEMOMETERS  
Velocity and density measurements in hypervelocity ballistic projectile turbulent wakes, using hot film anemometers  
[AIAA PAPER 68-701] p0191 A71-19891  
Anemometer measurement optimum averaging time of wind speed for conventional aircraft landings  
p0435 A71-30394  
Single anemometer wind measurement required for aircraft landing, comparing data from different sampling periods  
p0435 A71-30395  
Fan-produced sound pressure fluctuation in very low speed subsonic wind tunnel test stream, noting resulting anemometer calibration errors  
p0437 A71-30526  
Miniature wind tunnel velocity field calibration for testing anemometers, using null method with spherical probe  
p0661 A71-41380  
Anemometer with braking mechanism to prevent rotation of wind driven elements  
[NASA-CASE-XMF-05224] p0399 N71-23726
- ANEMOMETRY**  
U VELOCITY MEASUREMENT
- ANGLE OF ATTACK**  
NT ZERO ANGLE OF ATTACK  
Three dimensional attached compressible laminar boundary layer on slender cones in hypersonic flight at high angles of attack derived by numerical integration  
p0010 A71-10926  
Pressure distributions prediction on blunt bodies at angle of attack, considering bodies of revolution and large angle cones  
[AIAA PAPER 70-208] p0016 A71-11580  
Aircraft propulsive thrust moment effect on phugoid motion, examining angle of attack and flight path variations with resulting instability  
p0068 A71-13340  
Reentry vehicle angle of attack control by mechanically varying center of mass for axial loads  
p0131 A71-16039  
Supersonic flow field around flat plate at various angles of attack, comparing Brieden and Lighthill approximations  
p0135 A71-16713  
Flight range and optimum angle of attack under wind conditions of constant velocity and direction,

considering fuel consumption for given distance  
p0149 A71-18325

Turbulent heat transfer measurements on blunt cone  
in nitrogen flow at high Mach number under various  
angles of attack  
[AIAA PAPER 71-38] p0151 A71-18499

Three dimensional inviscid compressible flow past  
sharp shouldered blunt bodies at angle of attack,  
presenting time dependent finite difference  
technique  
[AIAA PAPER 71-56] p0151 A71-18515

USAF F-4E Stall/Near Stall Investigation, discussing  
testing requirements, fighter aircraft  
improvement, spin avoidance and high angle of  
attack limitations p0184 A71-19095

Nose bluntness, angle of attack and oscillation  
amplitude effect on hypersonic unsteady  
aerodynamics of slender cones  
[AIAA PAPER 70-216] p0192 A71-19895

Shock wave shape attached to cone moving in ideal  
gas studied by Pade-Shanks approximation method,  
considering angle of attack p0266 A71-22405

Plenum chamber with nozzle wind tunnel model, noting  
jet flow phenomena at various angles of attack  
p0296 A71-24865

T tail flutter analysis, considering dihedral, angle  
of attack and aerodynamic force effects  
p0340 A71-25188

Lifting surfaces supersonic-hypersonic flutter at  
angle of attack determined by shock expansion,  
Newtonian flow and local flow piston theory  
[AIAA PAPER 71-327] p0342 A71-25307

Unsteady flow measurement around wing sections  
during rapid angle of attack variations,  
emphasizing helicopter rotor blades  
p0363 A71-27468

Air flow about low aspect ratio delta wing at large  
angles of attack, deriving lift coefficient  
p0404 A71-28282

Aircraft flight characteristics dependence on angle  
of attack, roll and pitch p0415 A71-29043

Quasi-stationary gliding trajectories of aircraft in  
planetary atmosphere during constant control of  
attack and bank angles p0416 A71-29185

Hypersonic flow around delta wing at small angles of  
attack, using pressure sources method and Fredholm  
integral equation p0416 A71-29189

Elliptical cones at large angle of attack,  
calculating three-component real gas properties  
effects on aerodynamic characteristics  
p0417 A71-29191

Spacecraft optimal atmospheric reentry trajectory  
for minimum flight distance, investigating angle  
of attack control with allowance for load  
constraints p0418 A71-29229

Air flow past small aspect ratio thick-section wing  
at small angles of attack, investigating vortex  
system effect on flow characteristics in absence  
of lift p0418 A71-29234

Slender cone boundary layer transition under angle  
of attack at Mach 21 with promoted leeward and  
fixed windward ray p0429 A71-29887

Supersonic mass flux probe description, discussing  
inlet geometry, angle of attack and Reynolds and  
Mach numbers effects on performance p0429 A71-29925

Supersonic potential flow at large distance from  
slender body of revolution at angle of attack,  
deriving nonlinear partial differential equations  
system p0479 A71-31170

Multicomponent nonequilibrium air flow past  
axisymmetric blunt body, calculating flow  
distribution at various attack angles with time  
dependent technique  
[AIAA PAPER 71-595] p0485 A71-31575

Low speed testing of VTOL models in wind tunnels,  
describing method for estimating free air approach  
velocity and angle of attack p0498 A71-32724

Rarefaction and angle of attack effects on delta  
wing in hypersonic flow in wind tunnel  
p0502 A71-33376

Aircraft optimum control synthesis for powered  
flight phase, determining angle of attack for  
transfer to maximum velocity by Cauchy problem  
p0503 A71-33442

Aircraft angle of attack limiter parameters,  
describing automatic warning system for impending  
stall p0505 A71-33621

F-4E stall/spin development and flight tests,  
relating mass distribution and angle of attack  
aerodynamic design  
[AIAA PAPER 71-772] p0506 A71-34008

High speed aircraft maneuvers stability  
determination by constant angular  
pitching/rotation velocity, angle of attack and  
flight speed, using Liapunov method p0555 A71-36176

Dynamic parameters of supersonic flow incident on  
conical bodies at large angles of attack,  
considering flow field and entropy distribution  
p0556 A71-36328

Windward injection into supersonic stream at angle  
of attack, minimizing vortex disruption  
p0670 A71-42787

Angle of attack instrumentation for evaluating  
aircraft lift performance and phugoid oscillations  
p0693 A71-43382

Lifting rectangular thin airfoil in symmetrical  
incompressible steady uniform orthogonal flow at  
small angle of attack, deriving Weissinger  
integral equation p0695 A71-43487

Dynamic stability derivatives of twin-jet fighter  
model for angles of attack from -10 deg to 110 deg  
[NASA-TN-D-6091] p0161 N71-14634

Examining three-dimensional motion of flying vehicle  
entering atmosphere at low angles of attack  
p0225 N71-16901

Measuring value of entropy on surface of body of  
revolution at nonzero angle of attack  
p0225 N71-16903

Investigation of angle of attack information display  
for pilots to increase efficiency of general  
aviation aircraft operation  
[NASA-TN-D-6210] p0250 N71-18442

Angle of attack effects on induced rolling moment of  
low aspect ratio missile at transonic speed  
p0302 N71-19363

Accelerated supersonic motion of plane at finite  
angle of attack  
[NASA-TT-F-13525] p0391 N71-23278

Measurement of oscillatory pitching moment  
derivatives on sharp-edged delta wing at vortex  
breakdown angle of attack p0460 N71-24572

Jet penetration into Mach 2 airstream using  
sweptback injectors at angle of attack

Aircraft automatic landing improvement through use of space diversity ILS receiving system  
p0181 A71-18830

ATC automation program for en route and terminal centers, discussing combined nationwide system features, IPR volume and video digitizer data links  
p0210 A71-21659

ATC electronic automation systems development for air safety improvements  
p0271 A71-22953

Automated fueling for Kennedy jet airport, using computer controlled underground bulk storage-satellite tank pipeline system  
p0288 A71-24300

Aircraft with automatic thrust controller, calculating transfer functions characterizing speed and attitude control modes  
p0297 A71-24910

Soviet book on aircraft and rocket engines control automation, discussing nuclear power plant/fuel systems design and control simulation methods  
p0355 A71-26403

Fluidic cabin pressure automatic control systems for military and civil aircraft, discussing design, operation and performance  
p0432 A71-30308

French ATC, discussing automatic coordinator systems, computer utilization and flight plan data processing  
p0435 A71-30382

Maastricht Automatic Data Processing and Display ATC system with digital computers for aiding controllers in issuing instructions and making decisions  
p0435 A71-30383

Potential benefits accruing to air superiority fighters by integrating automatic feedback control system technology into design, using F-4 as baseline configuration  
[AIAA PAPER 71-764] p0505 A71-34002

Computerized automatic control of aircraft electrical system using remote power controllers and multiplexed data bus for wiring reduction and reliability improvement  
p0537 A71-34700

Avionic and missile computer control systems, describing universal function unit design and digital processing requirements  
p0549 A71-35775

Remote power controller as static circuit protection device for aircraft and spacecraft automatically controlled electrical wiring system, discussing performance improvement  
p0550 A71-35782

Computerized automatic estimation techniques application to real time aircraft tracking in ATC system design  
[AIAA PAPER 71-926] p0596 A71-37172

Flight test experiment to evaluate mechanized automatic control system to minimize wake turbulence effects on aircraft  
p0657 A71-40509

Mathematical models for computerized ATC automatic aircraft flight tracking logics without tracks smoothing  
p0669 A71-42396

IBM 9020 multiprocessing computer application to ATC, discussing control sectors for inflight control at air route traffic control centers in U.S.  
p0696 A71-43888

Trends in automatic control field in last two decades, emphasizing optimal control and performance criteria selection  
[AIAA PAPER 71-1001] p0701 A71-44591

Computerized radar plot extractor module for automatic air traffic control  
p0125 N71-13936

Control problems in airline operations particularly air cargo handling  
p0128 N71-14430

Investigating computer program functions and test procedures for failure analysis of NAS En Route Stage A Model 1 System  
[FAA-NA-70-31] p0158 N71-14567

System description of field test model of ARTS 2 modular alphanumeric nontracking ATC system  
p0255 N71-18815

Approach power compensator system for manual and automatic Navy carrier landing system  
[AD-722025] p0522 N71-28241

In-flight F-111 data on total and static pressure from left inlet during automatically scheduled and manually controlled off-schedule positioning of spike at Mach 0.68 to 2.18  
[NASA-TN-D-6490] p0640 N71-33211

Evaluation of automatic guidance modes and software for V/STOL aircraft flight control  
[NASA-CR-121768] p0674 N71-34016

Computerized real time data processing and display system for air traffic control in airspace over Belgium, Luxembourg, the Netherlands, and Germany  
p0722 N71-37744

## AUTOMATIC CONTROL VALVES

## NT PRESSURE REGULATORS

## AUTOMATIC DATA PROCESSING

## U DATA PROCESSING

## AUTOMATIC FLIGHT CONTROL

## NT AUTOMATIC LANDING CONTROL

Concorde automatic flight control, noting reduced weight and speed accuracy limit at Mach 2  
p0132 A71-16325

VTOL aircraft avionics systems, discussing automatic flight control and navigation systems integration  
p0146 A71-17925

Variable camber flap automatic control equipment for glider, considering combinations of mechanical, electrical and electronic approaches  
p0149 A71-18250

Optimum automatic flight control techniques in horizontal guidance of aircraft at terminal  
p0200 A71-20306

V/STOL aircraft automatic flight controls and electronic head down displays, discussing handling qualities, lift effectiveness and autostabilization  
p0280 A71-23944

Automatic control system for fighter aircraft sideslip correction, using rudder position sensor, transverse accelerometer and high pass filter for anticipatory sideslip reduction  
p0288 A71-24288

Soviet papers on automatic control for flight vehicles, Part 1, covering dynamics of linearized systems, deterministic and random inputs, stability, oscillations, thrust control, etc  
p0297 A71-24897

V/STOL aircraft instruments, deck display and automatic flight controls for takeoff and landing operation  
p0415 A71-29132

Controlled aircraft motion under strict kinematic constraints in terms of simple subsystems, noting pilots role in Newark theory  
p0445 A71-31024

European Airbus automatic pilot and flight control system, including computers in electromechanical subassemblies  
p0490 A71-31914

Concorde aircraft automatic landing and flight control system objective, design, reliability and certification tests  
p0490 A71-31915

Helicopter automatic flight control equipment, discussing autopilot stabilizer, localization system, ground approach guidance coupler and flight director  
p0490 A71-31916

Soviet book on aircraft automatic control systems covering linear theory, design, autopilot, man machine performance, operation modes, etc  
p0534 A71-34473

Automatic flight control accommodation to dynamic characteristics variations of airframe, providing uniform response for all flight conditions  
p0599 A71-37296

Automation in third generation ATC requiring distributed management and spacing functions delegation to pilot  
[CASI PAPER 72/15] p0602 A71-37602

Automatic ATC display systems, discussing electronic flight progress strip for telemetry reproduction  
p0607 A71-38300

Large crane heavy lift helicopter stability and controllability, considering effects of slung loads, performance improvement, automatic flight control and physical size

p0609 A71-38651  
Automatic flight control systems, discussing pilot as systems manager or retained in control loop

p0699 A71-44454  
American development in automatic flight control, noting FAA requirements, pilot involvement and visibility enhancement

p0699 A71-44455  
Considering design of digital computers for guidance and control of aerospace vehicles

[AGARD-CP-68-70] p0113 N71-12601  
Investigating tasks of data processing equipment in advanced navigation systems for aircraft

p0113 N71-12604  
Evaluating use of airborne digital computers for guidance and control of X-15 and F-104 aircraft

[NASA-TN-X-66491] p0113 N71-12610  
Developing high integrity digital flight control of variations in performance of complex systems

p0114 N71-12614  
Digital data processing for designing automatic flight control systems

p0114 N71-12616  
Dynamic response of vehicle and its automatic flight control system

p0325 N71-20334  
Operational performance of Hawker Siddeley aircraft automatic flight approach and landing control system

p0393 N71-23414  
Operational performance of automatic V/STOL flight control systems using jet thrust or air bleed

p0394 N71-23415  
Human factors and control system failures in jet upsets during turbulence encounters

p0395 N71-23424  
Helicopter gyro displacement measurements at differing flying conditions

[FOA-2-C-2356-49-72/] p0477 N71-26567  
Preliminary study of airplane-autopilot response to atmospheric turbulence while operating in altitude-hold and attitude-hold modes

p0584 N71-30780

## AUTOMATIC LANDING CONTROL

Aircraft all weather automatic landing system, discussing component weights and reliability connected with problem area

p0023 A71-12274  
All-weather automatic landing electronic technology, describing flight automation landing system for VC 10 BAC 111 and Concorde aircraft

p0023 A71-12275  
Helicopter automatic and manual low visibility landing systems evaluation by hybrid computer simulation

p0149 A71-18423  
Two dimensional aircraft automatic landing motions control processes by simulation without use of moving cockpit simulator

p0196 A71-20066  
Transport aircraft all weather automatic landing operation, examining guidance system and independent monitors

[SAE PAPER 710441] p0407 A71-28323  
Automatic landing systems independent monitor for L-1011 aircraft, providing pilot confidence under reduced visibilities

[SAE PAPER 710443] p0407 A71-28324  
Trident aircraft autopilot for automatic landings in blind conditions, discussing operational problems

p0418 A71-29261  
Automatic aircraft landing system modification for improvement of response to air turbulence effects

p0426 A71-29773  
Caravelle aircraft all-weather Sud Lear automatic landing system operation and performance

p0490 A71-31913  
Concorde aircraft automatic landing and flight control system objective, design, reliability and certification tests

p0490 A71-31915  
Automatic landing systems using inertial navigation derived translational state information, discussing evaluation by simulation of transport aircraft operating with conventional instrument landing system

[AIAA PAPER 71-795] p0508 A71-34020  
Soviet book on air transportation covering ATC, automatic landing and information display systems

p0540 A71-35194  
Lockheed L-1011 development, discussing flying stabilizer design, direct lift control and autoland system

[AIAA PAPER 71-782] p0545 A71-35532  
Cost effective high speed projectile trajectory plotting system for gunnery range instrumentation, applying to aircraft path recording during automatic landing control

p0560 A71-36613  
L-1011 aircraft automatic landing safety and performance improvement through direct lift control, discussing flight control system integration

[AIAA PAPER 71-906] p0596 A71-37157  
Performance limitation of simplified radio- inertial lateral control guidance system subject to stochastic gusts for automatic landing

[AIAA PAPER 71-957] p0597 A71-37198  
Performance monitor for aircraft automatic landing systems safety control

[AIAA PAPER 71-958] p0597 A71-37199  
European automatic flight control systems for landing in category IIIA conditions, discussing triplex system in Trident and simplex in Caravelle

p0699 A71-44456  
Using automatic control theory with simple pilot model for synthesizing helicopter landing approach

flight director control laws

[NASA-TN-X-66492] p0106 N71-12224  
Developing mathematical model for tandem rotor helicopter for analysis of automatic approach and landing system

[NASA-TN-X-66493] p0106 N71-12225  
Advanced ILS and automatic landing systems for conventional and V/STOL aircraft - conference

[AGARD-CP-59-70] p0109 N71-12426  
All-weather automatic landing systems and problem areas

p0110 N71-12427  
Importance of aircraft speed control relative to longitudinal touchdown dispersion

p0110 N71-12432  
All-weather automatic landing systems for use on aircraft carriers and training ashore

p0111 N71-12438  
Automatic pilot system for landing commercial aircraft

p0111 N71-12440  
Autopilot landing system for VC-10 aircraft

p0111 N71-12441  
Direct lift control system for producing lift without pitching moments during aircraft approach and landing

p0111 N71-12443  
Flight control systems for VTOL automatic landing

p0112 N71-12445  
Automatic landing system of Concorde

p0112 N71-12448  
Minimizing performance criterion to analyze ability of automatically controlled aircraft to maintain accurate flight path control during landing approach

[NASA-TN-D-6230] p0255 N71-18761  
Fixed base simulation evaluation of one fully automatic and six manual low visibility landing systems for helicopters

[NASA-TN-D-5913] p0325 N71-20305  
Radio frequency interference monitoring for instrument landing system in automatic landing

[RAE-TR-70076] p0393 N71-23356  
Operational performance of Hawker Siddeley aircraft automatic flight approach and landing control system

p0393 N71-23414  
Automatic approach and landing system with flash warning signal for Caravelle aircraft control

p0396 N71-23429

## AUTOMATIC PICTURE TRANSMISSION

Frequency memories application to earth-satellite-aircraft UHF communications, repeater apparatus and multiple access transmission of half tone images in worldwide satellite communication

p0560 A71-36553

## AUTOMATIC PILOTS

Digital computers in aviation electronics, discussing automatic control loop in automatic pilot

p0072 A71-13687

- Eigen proportional control method for second order system with time varying parameters, applying to aircraft autopilot systems  
p0149 A71-18308
- Automatic Carrier Landing System with linear adaptive aircraft Navigation Computer, investigating effectiveness in reducing system errors due to nonlinearities and noise effects  
p0202 A71-20405
- Trident aircraft autopilot for automatic landings in blind conditions, discussing operational problems  
p0418 A71-29261
- European Airbus automatic pilot and flight control system, including computers in electromechanical subassemblies  
p0490 A71-31914
- Helicopter automatic flight control equipment, discussing autopilot stabilizer, localization system, ground approach guidance coupler and flight director  
p0490 A71-31916
- Soviet book on aircraft automatic control systems covering linear theory, design, autopilot, man machine performance, operation modes, etc  
p0534 A71-34473
- ATC avionics equipment, discussing inertial area navigation, autopilots, airborne data acquisition, altitude reporting, collision avoidance, CAT, satellite communications, etc  
p0536 A71-34615
- BAC 111 autopilot development, discussing computer compatible system for digital representation of airborne flight test data and direct transmission to ground-based computers  
p0560 A71-36672
- Sight line autopilot /SLAP/ for side-firing aircraft pointing accuracy improvement, using optimal regulator theory to generate control gains  
[AIAA PAPER 71-960] p0598 A71-37201
- German VAK 191B combat VTOL aircraft development program, describing prototype ground tests, autopilot preoptimization and hover flight tests  
p0662 A71-41517
- Automatic pilot and associated airborne equipment developments for automatic landing systems  
p0110 N71-12434
- Automatic pilot system for landing commercial aircraft  
p0111 N71-12440
- Autopilot landing system for VC-10 aircraft  
p0111 N71-12441
- Autopilot for C-141 all-weather landing system  
p0111 N71-12442
- Automatic pilot TAPIR  
p0112 N71-12444
- Preliminary study of airplane-autopilot response to atmospheric turbulence while operating in altitude-hold and attitude-hold modes  
p0584 N71-30780
- Automatic pilots for control of rotary and fixed wing aircraft  
[AD-727789] p0720 N71-37611
- AUTOMATIC ROCKET IMPACT PREDICTORS**  
U COMPUTERIZED SIMULATION  
U IMPACT PREDICTION
- AUTOMATIC TEST EQUIPMENT**  
Aircraft structures fatigue testing device using programmed control of electrical inputs to electrodynamic vibration stand, noting load cycle effects and damage accumulation  
p0004 A71-10409
- Multiple dialect automatic test language for avionics industry, considering software design  
p0063 A71-13077
- Automatic RF and microwave test equipment for communication, navigation, radar and tactical systems  
p0063 A71-13083
- Automatic digital test unit for avionics systems  
p0063 A71-13085
- Software cost estimates for automatic test equipment for avionic support analysis  
p0063 A71-13086
- User requirements of Versatile Avionic Shop Test /VAST/ computer controlled automatic test equipment, including documentation, compatibility, assurance plan, etc  
p0064 A71-13087
- Long range goals for avionics automatic test equipment /ATE/ involving complex computer  
p0064 A71-13088
- Automatic excitation forces generation for aircraft structure ground vibration tests using digital computer  
[ONERA-TP-870] p0090 A71-15352
- Airborne Doppler radar receiver transmitter failure testing by Versatile Avionics Shop Test computer controlled system  
p0412 A71-28778
- Gas turbine engine condition analysis by digital computer and fault isolation techniques  
[SAE PAPER 710448] p0438 A71-30532
- Army aircraft automatic inspection and maintenance monitoring system, considering feasibility, technology approach and effectiveness  
[AIAA PAPER 71-649] p0440 A71-30726
- Onboard computer for aircraft engine testing, monitoring and data reduction, emphasizing automatic in-flight recording for post-flight displays  
[AIAA PAPER 71-651] p0440 A71-30727
- Automated ultrasonic inspection system for L-1011 adhesive bonded fuselage panels using through transmission technique  
[SME PAPER IQ-71-746] p0495 A71-32437
- Abbreviated test language for avionic systems, discussing program organization, statement formats, vocabulary and syntax diagrams  
p0659 A71-40812
- Computer controlled modular automatic test equipment for DC-10 aircraft maintenance, discussing system block diagram  
p0662 A71-41518
- Digital algorithm for automatic aircraft engine monitoring system, using Boolean algebra and events/states theory  
p0696 A71-43897
- AUTOMATION**  
System automation evolutionary process in terminal Air Traffic Control environment  
[AIAA PAPER 71-242] p0188 A71-19717
- ATC automation system design, considering controllers decision time savings  
p0288 A71-24271
- Automated orifice drilling optimal treatment routines, including proper timing and adequate total depth allowance  
p0413 A71-28941
- ATC data automation, discussing flight plant processing system /PPPS/, radar data processing system /RDPS/ and signal automatic control system /SATCO/  
p0495 A71-32523
- Automation of technological processes in aircraft engine production  
[AD-714858] p0242 N71-17832
- AUTOMOBILE ACCIDENTS**  
Digital computer simulation of automobile impacting flexible safety barrier, and multiple source schlieren system for NAE trisonic wind tunnel  
[DME/NAE-1970/3/] p0306 N71-19401
- AUTOMOBILE ENGINES**  
Soviet book on automotive and jet aircraft engine fuel chemical stabilizers under storage, transit and operational conditions, examining additives in relation to stability ratings  
p0142 A71-17433
- Chemical kinetic calculation of nitric oxide formation in spark ignition automobile engines and gas turbine combustors  
p0436 A71-30454
- Turbine propulsion system smoking and exhaust gas emission, discussing aircraft and automobile pollution emission  
p0615 A71-39452
- Technology review on electric automobiles, and modified T-33 aircraft system for pyrotechnic hail suppression seeding  
[DME/NAE-1970/4/] p0378 N71-22198
- AUTOMOBILES**  
VTOL air system for automobile travel replacement noting noise, cost, pollution and traffic congestion reduction  
p0669 A71-42527
- Air and land transportation noise sources and measurement, noise level scales, and individual and community responses - conference

- [PB-191117] p0037 N71-10349  
Research projects in automotive engineering for  
ground and air transportation p0327 N71-20548  
Safety standards development analysis for passenger  
vehicles and aircraft p0392 N71-23333  
[AD-718397]
- AUTOPILOTS**  
U AUTOMATIC PILOTS  
**AUTOROTATION**  
Helicopter optimal autorotation landing parameters  
for touchdown at zero speed, including rotor rpm  
drop due to flow separation on blades p0692 A71-43090  
Experimental aerodynamic performance characteristics  
of rotor entry vehicle configuration - transonic  
[NASA-TN-D-7047] p0177 N71-16534  
Airspeeds, rotor speeds, engine rigging, and gross  
weight effects on UH-1 C helicopter during  
autorotation p0334 N71-21363  
[AD-717047]

# AVOIDANCE

# SUBJECT INDEX

communications and built-in self testing  
p0510 A71-34155

ATC avionics equipment, discussing inertial area navigation, autopilots, airborne data acquisition, altitude reporting, collision avoidance, CAT, satellite communications, etc  
p0536 A71-34615

Comet 4 installation and experimental program, investigating avionics systems integration techniques  
p0538 A71-35070

Avionic and missile computer control systems, describing universal function unit design and digital processing requirements  
p0549 A71-35775

Space shuttle avionics system redundancy, calculating costs for individual line replaceable units  
p0558 A71-36479

Streamer discharges effects on integrated aircraft antenna and associated avionics, emphasizing RF interference and component damage  
p0608 A71-38462

Complex airborne electronic system design for interference minimization, considering electromagnetic compatibility  
p0608 A71-38464

Reliability controlled maintenance plan for avionics equipment based on mean time between failures  
p0611 A71-39087

Avionics combined display system for area navigation, discussing design, color map projection, overlays, CRT unit and viewability  
p0650 A71-40137

Abbreviated test language for avionic systems, discussing program organization, statement formats, vocabulary and syntax diagrams  
p0659 A71-40812

Lightning induced voltages in aircraft electrical circuits  
[NASA-TM-X-52906] p0039 A71-10391

Considering design of digital computers for guidance and control of aerospace vehicles  
[AGARD-CP-68-70] p0113 A71-12601

Investigating system requirements of airborne data processors  
p0113 A71-12608

Investigating small digital processors as interface between computer and sensor in airborne systems  
p0113 A71-12609

Developing self-organizing control systems for application in aeronautics  
p0114 A71-12613

Data handling equipment for aerospace and ground support applications - conference  
[AGARD-CP-67-70] p0124 A71-13826

Simulation model for advanced avionics digital computers  
[AD-714140] p0176 A71-16295

Advanced aircraft for flight testing of integrated electronics system for reusable space shuttle  
[NASA-CR-114832] p0179 A71-16713

Development and characteristics of frequency separated display devices for aircraft control  
[AD-715458] p0255 A71-18739

Interference prediction model for evaluating expected interactions between avionics equipment on aircraft  
[AD-718997] p0455 A71-24357

Development and characteristics of electronic equipment for digital processing of stochastic signals for military aircraft avionics systems  
[AD-719822] p0465 A71-24954

Test methods and testing techniques for determining technical performance and safety characteristics of ground support service aviation equipment  
[AD-723036] p0577 A71-30258

Magnitude of induced voltages and their relation to characteristics of lightning discharge and electrical properties of aircraft electrical systems  
p0581 A71-30761

Simulation and modeling of advanced avionic digital computer system operation for optimum hardware configurations  
[AD-723521] p0629 A71-32330

Cost effectiveness, failure analysis, and design techniques for measuring reliability of avionics systems

[AGARD-LS-47-71] p0714 A71-36776

Reliability estimation, including failure effect analysis of avionic systems  
p0714 A71-36777

Effectiveness of reliability programs for avionic equipment  
p0714 A71-36779

Cost ownership analysis of avionic equipment  
p0714 A71-36784

**AVOIDANCE**

**NT COLLISION AVOIDANCE**

**AVRO WHITWORTH HS-748 AIRCRAFT**

**U HS-748 AIRCRAFT**

**AVRO 707 AIRCRAFT**

Boundary layer separation and longitudinal and lateral stability of Avro 707 aircraft during flight tests  
[ARC-CP-1107-PT-4] p0227 A71-17082

Low speed lateral stability and control flight tests on Avro 707 aircraft  
[ARC-CP-1106-PT-3] p0227 A71-17083

**AXES (COORDINATES)**

**U COORDINATES**

**AXIAL COMPRESSION LOADS**

Eccentrically stiffened thin cylindrical panels instability under uniform axial compression, uniform hoop compression and uniform shear  
p0509 A71-34150

Determining feasibility of increasing stator blade loading of single stage compressor rig by bleeding or blowing suction surface boundary layer  
[NASA-CR-54573] p0255 A71-18749

**AXIAL COMPRESSORS**

**U TURBOCOMPRESSORS**

**AXIAL FLOW**

Boundary layer development on slender rod in axial shear flow for different profiles  
p0135 A71-16711

Axial and swirling mean flow effects on sound transmission and generation in hard walled ducts  
p0143 A71-17620

Velocity and static pressure redistribution in distorted flow field upstream of axial flow compressors  
[ATAA PAPER 69-485] p0295 A71-24856

Axial flow fan noise, investigating louvers effects on sound field  
p0357 A71-26704

Large axial compressor flow straightening stator blades unsteady pressure measurements with short response time detectors  
p0363 A71-27469

Aerofoil cascades with axial velocity change in incompressible flow, determining turbine blade force dependence on circulation  
p0409 A71-28467

Multistage axial flow compressors on digital computer, testing gas dynamic design in final adjustment phase  
p0409 A71-28584

Monograph on potential flow interaction between blade rows in axial flow compressors covering mathematical model, numerical analysis and experiment  
p0413 A71-28883

Aerodynamics of axial and axial tangential blade swirler twisted jet near nozzle, testing effectiveness of equivalent problem of heat conduction theory  
p0482 A71-31522

Mach number effects on axial flow transonic compressor characteristics, using empirical corrections based on measured three dimensional grid characteristics  
p0497 A71-32715

Axial flow compressors stable operation, using rotating guide vanes regulation  
p0695 A71-43554

Simulating downstream flow blockage doors in bypass air duct of turbofan engine with axial flow fan rotor  
[NASA-TN-D-6071] p0041 A71-10537

Enthalpy and wall heat flux calculations for stagnation region aft of blunt axisymmetric bodies in hypersonic axial flow  
[AD-717418] p0374 A71-22087

Effects of wave inlet distortion at high and low flow rate on performance of axial flow compressor  
[CUBED/A-TURBO/TR-20] p0381 A71-22428

## AXIAL FLOW COMPRESSORS

## U TURBOCOMPRESSORS

## AXIAL FLOW PUMPS

## NT TURBINE PUMPS

Design and performance of 0.9-hub-tip-ratio axial flow pump rotor with blade-tip diffusion factor of 0.63

[NASA-TM-X-2235]

p0324 N71-20288

## AXIAL FLOW TURBINES

Turbulence level effects on aerodynamic losses of axial flow turbomachines, discussing boundary layer of blades

p0066 A71-13143

Axial turbomachines boundary layer flow, describing two dimensional cascade calculation methods

p0067 A71-13146

Axial turbomachine three dimensional cascade flow calculation from dynamics vector equations

p0276 A71-23601

Soviet book on theory of aircraft bladed machines covering axial flow, centrifugal and composite turbines and compressors, thermodynamic efficiency, control turbocompressor matching, etc

p0355 A71-26401

Quasi-axisymmetric and superposed fine fluctuating structure of ideal incompressible vortex flows in axial flow turbines, assuming infinite mutual blade proximity

p0369 A71-27714

Nonlinear limit rotation velocity and circulation induced by wheel in axial flow turbomachine for incompressible ideal fluid, using iterative numerical algorithm

p0369 A71-27715

Measurement errors in testing single stage air driven axial flow compressors and turbines

p0409 A71-28582

Axial flow turbines comparative performance tests under steady and pulse flow conditions for turbocharger application

p0428 A71-29819

End play influence on dynamic bending vibration stresses induced by aerodynamic forces in axial flow turbine rotor blades in case of resonant vibrations

p0494 A71-32298

German monograph on accelerating grids in wind tunnel and axial flow turbine, covering plane/secondary flows past cascades and stator/rotor blading

p0494 A71-32303

Axial flow gas turbines blade cascades forming arrays with convergent channels, discussing contours design

p0505 A71-33615

Siren wail in turbine axial stage due to nonuniform pressure fields behind blade cascades

p0555 A71-36180

Noise sources in axial flow fans, considering radiation from turbulent boundary layers, scattering of incident turbulence and secondary flow influence

p0658 A71-40710

Streamline curvature analysis of compressible subsonic, transonic and supersonic cascade flows in axial turbine blades

p0698 A71-44347

Flutter analysis on axial turbomachine blading [AD-710794]

p0041 N71-10562

Cold air tests on axial flow turbine with transpiration cooled discrete hole stator blades to determine coolant flow ejection effect on turbine aerodynamic performance

[NASA-TM-X-2133]

p0046 N71-11010

Computer program to generate turbine aerodynamic requirements, approximate external blade geometries, and coolant flow requirements for two stage axial flow turbine

[NASA-TM-X-2229]

p0384 N71-22568

Cold-air tests to determine performance characteristics of single-stage turbine with stator blades employing transpiration coolant ejection through wire mesh shell

[NASA-TM-X-2176]

p0401 N71-23980

Unsteady flow characteristics of turbocompressors and axial flow turbines including blade vibration and damping

[ONERA-TP-971]

p0646 N71-33760

## AXIAL LOADS

## NT AXIAL COMPRESSION LOADS

Coupling characteristic effects on dynamic response of axially coupled turborotors with digital computer program based on transfer matrix techniques

p0387 N71-22712

## AXISYMMETRIC BODIES

Axisymmetric body rapid rotation under center of gravity velocity vector conditions, solving for plane gliding motion stability in air

p0185 A71-19354

Reacting and nonreacting gases laminar boundary layer flows over two dimensional and axisymmetric bodies at zero lift, comparing numerical methods

p0190 A71-19860

Circular stagnation line position on axisymmetrical blunt bodies with circular sharp edge

p0278 A71-23672

Numerical solution of axisymmetric minimum drag bodies in hypersonic viscous gas flow, obtaining coefficient of friction by local variations method

p0289 A71-24370

Multicomponent nonequilibrium air flow past axisymmetric blunt body, calculating flow distribution at various attack angles with time dependent technique

[AIAA PAPER 71-595]

p0485 A71-31575

Blunt and hemispherical base axisymmetric bodies in Mach 4 free stream, investigating turbulent near wakes generation

p0660 A71-40999

Flare induced laminar boundary layer/shock wave interactions on axisymmetric bodies at zero incidence in supersonic flow under adiabatic conditions

p0701 A71-44604

Ideal weight of axisymmetric fuselage shells, taking into account load distribution and cabin pressurization

p0704 A71-45180

Turbulent boundary layer and skin friction on axisymmetric bodies in subsonic and supersonic flow

[ARC-R/M-3633]

p0171 N71-15804

Dependence of aerodynamic coefficients on maximum thickness and length of axisymmetric bodies in supersonic flow

[DLR-FB-70-54]

p0250 N71-18444

Singularity method for calculation of potential flow around axisymmetric rings

p0251 N71-18469

Subsonic near wake of blunt-based axisymmetric body in uniform steady flow wind tunnel

p0647 N71-33811

## AXISYMMETRIC FLOW

## NT ANNULAR FLOW

Axisymmetric supersonic overexpanded ideal gas jet calculation, using finite difference method based on buildup principle

p0083 A71-14573

Started supersonic axisymmetric parallel diffuser, examining wall static pressure and heat transfer

p0099 A71-15489

Nonstationary isentropic low density flows with axial or central symmetry, suggesting characteristics with flow rate and sound speed variation as in stationary source flow

p0189 A71-19729

Turbulent flow in initial section of convergent axisymmetric nozzle based on logarithmic velocity law

p0266 A71-22409

Vortex layer near circular cone surface in supersonic axisymmetric steady flow of homogeneous inviscid gas

p0289 A71-24372

Linear theory of weakly perturbed supersonic plane axisymmetric flows of gas-particles mixture, deriving partial differential equation for perturbation potential

p0289 A71-24373

Numerical solution of nonuniform enthalpy mixed axisymmetric gas flow in curvilinear regions with upper boundary and discontinuity using build-up method

p0290 A71-24376

Steady three dimensional subsonic nonviscous flow through turbomachine with arbitrary hub and shroud

shapes and finite blade number, using iterative blade to blade procedure  
[ASME PAPER 71-GT-2] p0348 A71-25948

Axisymmetrical three component flow equations for incompressible viscous fluid in cylinder with rotating disk p0444 A71-30855

Binary laminar boundary layer in hypersonic axisymmetric stagnation point flow with temperature dependent material properties, presenting exact and approximate calculation methods p0543 A71-35422

Supersonic jet interaction with turbulent wake, calculating plane and axisymmetric flow behind body butt face p0546 A71-35630

Measuring distortion characteristics at engine face station of axisymmetric inlet [NASA-CR-1644] p0104 N71-12211

Near-continuum axisymmetric hypersonic flow past very slender bodies [AD-715901] p0252 N71-18556

**AXLES**  
U SHAFTS (MACHINE ELEMENTS)

**AZIMUTH**  
Gyrocompass strapdown three coil synchro sensor magnetometer in conjunction with vertical gyro, eliminating azimuth detector inertial platforms p0201 A71-20340

Development and testing of VHF omnirange transmitter for aircraft azimuth guidance [FAA-RD-71-65] p0687 N71-35779

Range and azimuth resolution characteristics and aircraft separation measurement capability of radar beacon-digitizer subsystem [FAA-NA-71-16] p0715 N71-37038

**A2F AIRCRAFT**  
U A-6 AIRCRAFT

**A4D AIRCRAFT**  
U A-4 AIRCRAFT

## B

**B-52 AIRCRAFT**  
Papers on LAMS technology for aircraft structural mode control covering B-52 and C-5A aircraft p0017 A71-11658

LAMS flight control systems for turbulence induced fatigue damage reduction in B-52 and C-5A aircraft, using mathematical models p0017 A71-11660

B-52 LAMS test vehicle structural modification and instrumentation in flight phase p0018 A71-11661

Optimal bomb release intervals from B-52 aircraft bombing system p0305 N71-19383

Approximation method for turbulence effects on aircraft aerodynamic stability with B-52 examples p0516 N71-27320

**B-57 AIRCRAFT**  
Stratospheric turbulence and horizontal temperature measured at supersonic transport altitudes by B-57P aircraft [LR-542] p0333 N71-21284

**B-70 AIRCRAFT**  
Pilot subjective evaluation of XB-70 aircraft response to atmospheric turbulence in comparison with measured accelerations p0426 A71-29774

Measurement of engine exhaust noise during ground operation of XB-70 aircraft [NASA-TN-D-7043] p0172 N71-15820

Base pressure measurements on XB-70 aircraft at Mach numbers from 0.4 to 3.0 [NASA-TN-X-1612] p0229 N71-17132

Acoustic attenuation determined experimentally during engine ground tests of XB-70 airplane and comparison with predictions [NASA-TN-X-2223] p0244 N71-17951

Evaluating effects of high altitude turbulence encounters on XB-70 airplane [NASA-TN-D-6457] p0580 N71-30718

XB-70 aircraft for investigating and predicting XB-70 aircraft for investigating and predicting mountain waves [NASA-CR-1878] p0591 N71-31351

**B-103 AIRCRAFT**  
U BUCCANEER AIRCRAFT

**BAC AIRCRAFT**  
NT BAC 111 AIRCRAFT  
NT H-126 AIRCRAFT  
NT TSR-2 AIRCRAFT  
NT VC-10 AIRCRAFT

Aerial land rover for special needs of developing countries as passenger and freight aircraft, crop spraying and dusting, aerial survey and fire fighting p0658 A71-40701

Aerodynamic interference caused by rear fuselage mounted power plants on BAC aircraft p0304 N71-19375

Low speed wind tunnel and flight stability tests of BAC 221 aircraft longitudinal balance, noting airframe difficulties [ARC-CP-1134] p0333 N71-21205

**BAC TSR 2 AIRCRAFT**  
U TSR-2 AIRCRAFT

**BAC 111 AIRCRAFT**  
BAC 111 autopilot development, discussing computer compatible system for digital representation of airborne flight test data and direct transmission to ground-based computers p0560 A71-36672

**BACKINGS**  
U BACKUPS

**BACKSCATTERING**  
Effect of decreasing altitude on statistics of radar backscatter from random rough surface [NASA-CR-114803] p0162 N71-14755

**BACKUPS**  
Third Chance flight control system, discussing aircraft control capability with backup hydraulic system after loss of dual main hydraulic systems due to combat damage p0420 A71-29382

**BACTERIA**  
Microbiological fuel corrosion by bacteria and fungi in fuel tanks [AD-712103] p0056 N71-11848

Decontamination of petroleum products with honey [NASA-CASE-XNP-03835] p0397 N71-23499

**BAFFLES**  
Vertical motion of static loads over baffles during loading operations using ground effect machines [NPL-HOVERCRAFT-TM-31] p0230 N71-17160

**BAGGAGE**  
Frankfurt terminal baggage conveyor system, describing passenger capacity and luggage handling equipment p0419 A71-29312

Baggage handling network, describing automobile luggage check, inbound, connecting, customs claim and recheck systems p0605 A71-38025

Airport design for passenger and baggage handling efficiency, considering choice between continuous and batching type intra-airport transit system p0665 A71-42072

**BAGS**  
NT GAS BAGS

**BALANCING**  
Subsonic static characteristics of slender wing configurations using magnetic suspension and balance system [NASA-CR-1796] p0574 N71-29775

**BALL BEARINGS**  
High temperature ball bearing design for turbojet engines [NASA-TN-X-52958] p0178 N71-16554

**BALLISTIC RANGES**  
Conference on ballistic range techniques and equipment [AGARDOGRAPH-138] p0123 N71-13576

Aerodynamic characteristics of free flight bodies in ballistic ranges [NASA-TN-X-66536] p0123 N71-13583

**BALLISTIC TRAJECTORIES**  
Roll moment of inertia to static margin ratio effect on yaw of repose angle magnitude in ballistic match of projectiles p0429 A71-29890

Bessel function solutions for low angle of attack approach of flying vehicle to atmospheric boundary and transition into vibrational motion p0225 N71-16983

## BALLISTICS

## NT TERMINAL BALLISTICS

Ballistic data reduction for drag coefficient of spherical projectiles, using time distance relation for constant coefficient

p0070 A71-13467

ONERA hypersonic wind tunnels used for ballistic and aerodynamic research kinetic heating problems and control surface efficiency

p0147 A71-18025

## BALLOON FLIGHT

Inflation of initially spherical balloon of elastic rubber-like material, discussing tensile instability

p0345 A71-25445

Aerodynamic characteristics of captive balloons and other lighter than air devices

p0332 N71-21166

## BALLOON SOUNDING

Mountainous region vertical air flow research, describing superpressure balloon and precise pressure radiosonde system

p0024 A71-12420

Sounding system constant level superpressure balloons for atmospheric circulation global description at all levels and latitudes in conjunction with satellite observations

p0213 A71-21742

Alcyon project PTA 1, considering balloon stabilization efficiency during night-day transition and system reliability

p0669 A71-42400

Nonexpanding reflecting balloon for radar measurement of stratospheric circulation

p0401 N71-23934

## BALLOONS

## NT HIGH ALTITUDE BALLOONS

## NT METEOROLOGICAL BALLOONS

Numerical stress-strain calculation for design of high pressure fiberglass-reinforced plastic balloons

p0012 A71-11048

Inflatable restraint collar for large balloons with heavy loads using winch driven cable launching

p0020 A71-11821

Balloon and glider vertical speed indicators, considering barometric devices and electric variometer

p0148 A71-18248

Airships and balloons potential commercial use in Canada, discussing cargo, passenger and military applications

p0192 A71-19916

Development and characteristics of hot air balloon deceleration and recovery system

p0050 N71-11037

Design and testing of stabilized balloon gondola for astronomical gamma ray spectrometer

p0108 N71-12242

Aerodynamic characteristics of captive balloons and other lighter than air devices

p0332 N71-21166

## BALLUTES

Expandable structures for midair pilot rescue device with hot air filled BALLUTE, discussing BALLUTE material development

p0341 A71-25278

Mach 8 variable-density tunnel used for determination of aerodynamic heating of attached inflatable decelerator configurations

p0728 N71-38758

## BANDWIDTH

## NT BROADBAND

## BANKING FLIGHT

## U TURNING FLIGHT

## BARDEEN APPROXIMATION

## U ELECTRICAL PROPERTIES

## U SURFACE PROPERTIES

## BAROMETERS

Balloon and glider vertical speed indicators, considering barometric devices and electric variometer

p0148 A71-18248

Barometric altimetry system inadequacies and approach/landing accidents, noting pitot static components blocking hazards

p0694 A71-43384

## BAROMETRIC PRESSURE

## U ATMOSPHERIC PRESSURE

## BAROTROPIC FLOW

Two phase supersonic barotropic flow with solid particles around thin profile with allowance for elastic particle collisions

p0362 A71-27450

## BARS

## NT ELASTIC BARS

## BARYCENTER

## U CENTER OF GRAVITY

## BARYONS

## NT XH-51 HELICOPTER

## BASE FLOW

Inclined wedges in rarefied hypersonic flow conditions, investigating base and wake pattern geometrical and aerodynamic characteristics

p0561 A71-36756

Heat transfer in base type supersonic laminar and transitional separated flows

p0035 N71-10249

## BASE PRESSURE

Turbulent base pressure on conical afterbodies in supersonic axisymmetric flow, including initial direction effect

p0082 A71-14450

Hypersonic flight test base pressure results at high Reynolds numbers for slender cone in turbulent flow, noting implications for ground test simulation

p0153 A71-18578

Wind tunnel testing of base pressure model attached to long cylindrical body extended and supported far upstream

p0218 A71-21994

Low thrust jet effect on base pressures on boat-tailed afterbodies in Mach number 0.8-1.2 flow

p0429 A71-29889

Base pressure measurements on XB-70 aircraft at Mach numbers from 0.4 to 3.0

p0229 N71-17132

Flight-measured base pressures from sharp leading edge upper vertical fin of X-15 aircraft compared with wind tunnel data for turbulent flow at Mach numbers from 1.5 to 5.0

p0401 N71-23922

## BATTERY SEPARATORS

## U SEPARATORS

## BEACHES

Design of computer assisted information system to provide seacoast data for military purposes

p0572 N71-29660

## BEACONS

## NT RADAR BEACONS

## NT RADIO BEACONS

## NT RADIO DIRECTION FINDERS

Low profile optical system producing annular cone of radiation from point source for high speed aircraft beacon

p0185 A71-19203

## BEAGLE AIRCRAFT

Beagle B125 training aircraft handling tests

p0397 N71-23498

## BEAM COLUMNS

## U BEAMS (SUPPORTS)

## BEAMS (RADIATION)

## NT ELECTRON BEAMS

## NT LIGHT BEAMS

## NT MOLECULAR BEAMS

## BEAMS (SUPPORTS)

## NT BOX BEAMS

## NT CANTILEVER BEAMS

Nonlinear partial differential equation solution for natural free-free vibrations of beam structures

p0078 A71-14172

Beams torsional rigidity under thermal stress due to arbitrary temperature distribution

STOL and boundary layer control aircraft takeoff and landing distance, considering jet suction action influence on lift and drag coefficients

p0084 A71-14595

Phantom and Buccaneer aircraft boundary layer control, examining lift from trailing and leading edges

p0146 A71-17953

Potential flow past cylinder with sources and sinks singularities, deriving formulas for aerodynamic characteristics of infinite span wings with boundary layer control

p0204 A71-20777

Optimization of slot angle, slot positioning and flow quantity affecting boundary layer control in energy transfer over airfoil profiles

p0273 A71-23201

Separation control of two dimensional air flow with turbulent boundary layer along circular cylindrical wall by jets or suction

p0420 A71-29433

High entrainment constant area multiple nozzle ejectors with two mixing tube lengths for boundary layer control, estimating performance with analytical model

p0421 A71-29469

Plane laminar incompressible jet flow along parabola with no external stream, using second order boundary layer theory

p0555 A71-36268

Feasibility study of counter insurgency aircraft with suction boundary layer control

p0121 N71-13415

Lift and pressure distribution on leading edge slats and trailing-edge flaps of wing profile with boundary layer control

p0171 N71-15706

High lift wing characteristics - wing with plain hinged flaps and boundary layer control, and wing with drag and high lift devices extended

p0320 N71-20065

Low speed wind tunnel tests of ground proximity effects on static longitudinal characteristics and boundary layer control of short takeoff aircraft

p0321 N71-20106

Operational performance and handling safety requirements for single engine boundary layer controlled aircraft in STOL mode

p0394 N71-23419

Blowing effect on static efficiency of two dimensional air intakes with momentum injection in boundary layer control form

p0515 N71-27149

Unsteady airfoil stall characteristics using static data input for predicting stall flutter boundaries of space shuttle wing

p0565 N71-29221

Velocity profile control tests of diffuser wall bleed to control combustor inlet airflow distribution

p0586 N71-30817

Determination of aircraft longitudinal motion during takeoff and landing after loss of lift from boundary layer control system

p0644 N71-33545

Feasibility study of combined laminar and turbulent boundary layer control system using distributed suction with application to low-speed research aircraft of glass reinforced plastic

p0719 N71-37609

## BOUNDARY LAYER FLOW

## NT BOUNDARY LAYER SEPARATION

## NT REATTACHED FLOW

## NT SECONDARY FLOW

## NT SEPARATED FLOW

Flow characteristics in turbomachine blade cascades with transonic regime, emphasizing shock- boundary layer interaction phenomena

p0066 A71-13140

Turbulence level effects on aerodynamic losses of axial flow turbomachines, discussing boundary layer of blades

p0066 A71-13143

Axial turbomachines boundary layer flow, describing two dimensional cascade calculation methods

p0067 A71-13146

Turbulent boundary layer structure and prediction, considering various turbulence onset theories

p0067 A71-13147

Air flow turbulence effect on heat transfer and boundary layer growth around flat plate, aerodynamic profile and cylinder

p0099 A71-15483

Incompressible turbulent boundary layer flow over steadily rotating flat plate blade, discussing centrifugal pumping and shear stress

p0134 A71-16581

Interaction theory for supersonic separated and reattaching turbulent boundary layers, comparing to real flow past compression ramp

p0153 A71-18572

Reacting and nonreacting gases laminar boundary layer flows over two dimensional and axisymmetric bodies at zero lift, comparing numerical methods

p0190 A71-19860

Unsteady boundary layers on sphere or cone moving along axis, determining skin friction angular response

p0198 A71-20098

Wind tunnel boundary interference on V/STOL model calculated in test section with solid vertical and slotted horizontal walls, using image method and Fourier transforms

p0221 A71-22029

Boundary layer flow with large mass injection rate, presenting numerical method with rapid convergence for increasing blowing parameter

p0265 A71-22108

Hypersonic strong interaction flow over inclined surface, using asymptotic expansion in powers of hypersonic interaction parameter for boundary layer equations reduction

p0265 A71-22109

Incompressible viscous fluid nonsteady three dimensional flow, obtaining velocity field and pressure distribution in boundary layer

p0272 A71-23092

Asymptotic far field velocity component in Prandtl boundary layer equations for steady laminar two dimensional flow past rigid body

p0276 A71-23578

In-flight profile drag measurement of gliders with total and static pressure sensors in boundary layer wake, using moments method

p0278 A71-23667

Laminar incompressible boundary layer flow over thin Joukowski, parabolic and slender wedge airfoils, using small perturbation and quasi-similar theories

p0281 A71-23957

Numerical solution of nonuniform enthalpy mixed axisymmetric gas flow in curvilinear regions with upper boundary and discontinuity using build-up method

p0290 A71-24376

Blowing and suction effects on laminar boundary layer flow of quiet fluid over permeable rotating cone, discussing skin friction and heat transfer

p0290 A71-24406

Flat plate trailing edge problem solution consistent with second order boundary layer theory, establishing laminar wake evolution nature and upstream influence

p0345 A71-25469

Interaction theory for supersonic separated and reattaching turbulent boundary layers, comparing to real flow past compression ramp

p0346 A71-25476

Prandtl first order boundary layer equations for two dimensional laminar incompressible flow past circulation controlled circular lifting rotor

p0346 A71-25494

Three dimensional boundary layer flow and velocity profiles in mixed diffuser with equal angle walls

p0350 A71-25973

Hele-Shaw flow viscous tails from airfoil, observing high Reynolds number trailing edge flow for

## CAVITY RESONATORS

Heat transfer within resonant cavities at subsonic and supersonic flow, discussing wind tunnels, test procedures and data reduction

[ASME PAPER 71-PE-9] p0421 A71-29450

Pressure measurements of flow induced cavity resonance and effects of resonance suppressing devices

[NASA-TN-D-6205] p0243 N71-17877

Cavity resonance effects on dynamic and thermal characteristics of resonant cavities in low speed, turbulent, shear flow

p0327 N71-20539

Resonant cavity heat transfer in turbulent, subsonic and supersonic speeds including resonance effects

p0327 N71-20540

## CELLINGS (METEOROLOGY)

Development and evaluation of dual baseline transmissometer used to measure and record visibilities in range of nine to fifty kilometers

[NBS-10339] p0382 N71-22455

## CELESTIAL BODIES

## MARS (PLANET)

## CELLULOSE

Utilization of aerospace nonflammable cellulosic elastomeric, fibrous, and composite materials in commercial aircraft refurbishment

p0581 N71-30759

## CEMENTS

Cement and asphaltic materials evaluation for use as grout under landing mats

[AD-710962] p0042 N71-10681

Weighted defect densities of asphaltic and cement concrete pavement in airfield pavement condition survey, USNAS Willow Grove, Pennsylvania

[AD-721324] p0528 N71-28423

Laboratory tests of polymeric latex modified fast-fix C-1 cement for repair of damaged runway pavements

[AD-727728] p0725 N71-38132

## CENTER OF GRAVITY

Reentry vehicle angle of attack control by mechanically varying center of mass for axial loads

p0131 A71-16039

Axisymmetric body rapid rotation under center of gravity velocity vector conditions, solving for plane gliding motion stability in air

p0185 A71-19354

Concorde aircraft fuel system and fuel pumps, considering center of gravity and center of pressure relationship to maintain trim

p0276 A71-23581

Plane rigid airfoil with fixed center of gravity, discussing motion in turbulent air and gust loads

p0298 A71-24947

Onboard weighing system for gross weight

determination and center of gravity location of Alouette helicopter, using load sensors, electrical circuits and visual indicators

p0433 A71-30320

V/STOL aircraft with vectored thrust propulsion systems, noting weight and center of gravity-lift-thrust relationship changes effect on performance

[SAWE PAPER 894] p0551 A71-35817

Mass and center of gravity determining system model, describing equipment, operation principle, calibration data and techniques accuracy and errors

[SAWE PAPER 879] p0551 A71-35824

Phugoid motion at constant angle of attack without thrust line displacement from aircraft center of gravity, noting longitudinal stability

p0650 A71-40168

Cockpit and center of gravity acceleration during takeoff of Boeing 707 aircraft

[ARC-CP-1120] p0171 N71-15721

Center of gravity vertical acceleration and wing stresses of Boeing 720-B aircraft

[TB-87-1970] p0229 N71-17119

## CENTER OF PRESSURE

Concorde aircraft fuel system and fuel pumps, considering center of gravity and center of pressure relationship to maintain trim

p0276 A71-23581

## CENTRIFUGAL COMPRESSORS

Centrifugal compressor impeller exit flow velocity distribution distortion based on equations of motion involving entropy gradient terms

p0075 A71-13831

Two stage compressors with subsonic and supersonic air velocity and high camber rotor blades, discussing strength against centrifugal force

p0134 A71-16647

Turbocharged diesel engine precompressed inlet air cooling by evaporation cooling, considering water injection effects on centrifugal compressor

p0204 A71-20781

Centrifugal compressor vaneless diffuser, estimating energy losses with hydrodynamic model

p0208 A71-21266

Axial-radial and radial compressor stage optimum exit blade angle, considering flow rate control by variable pitch nozzle guide vanes

p0222 A71-22049

Papers on centrifugal compressors covering fluid dynamics and small high pressure ratio radial compressors design and performance

p0284 A71-24215

Centrifugal compressor fluid dynamics, discussing unresolved problems governing design and performance prediction

p0284 A71-24216

High pressure ratio radial outflow compressor analysis, design, construction and testing

p0284 A71-24217

High pressure ratio centrifugal compressors for small gas turbine engines, investigating power and specific fuel consumption variation with pressure and temperature

p0284 A71-24218

Small high pressure ratio single-stage centrifugal compressor design, testing and efficiency

p0284 A71-24219

Reynolds number effects on centrifugal compressor performance characteristics, discussing power losses in compressor, impeller and diffuser stages and compressor adiabatic efficiency

[ASME PAPER 71-GT-25] p0350 A71-25967

Soviet book on theory of aircraft bladed machines covering axial flow, centrifugal and composite turbines and compressors, thermodynamic efficiency, control turbocompressor matching, etc

p0355 A71-26401

Centrifugal blowers optimum blade number for maximum efficiency, discussing design measures for shock and friction loss minimization

p0610 A71-38750

Inlet conditions for centrifugal compressor impeller covering pressure, temperature and velocity measurements on quasi-three dimensional model

p0665 A71-42035

Compressors and turbines centripetal stages operational characteristics, investigating airflow rate and pressure ratio effects on power

p0705 A71-45380

Cooling water system for compressor of supersonic wind tunnel

[AD-710971] p0042 N71-10679

Overall performance of 6-inch radial-bladed centrifugal compressor with various diffuser vane setting angles

[NASA-TM-X-2107] p0104 N71-12208

Sweptback-bladed centrifugal compressor overall performance in argon

[NASA-TM-X-2129] p0104 N71-12209

Flow distribution and performance of supersonic vane diffusers for centrifugal compressors

[NASA-TT-F-13428] p0112 N71-12541

Mechanical feasibility and aerodynamic effectiveness of rotating vaneless diffuser

[AD-716370] p0310 N71-19558

Theory, calculation, and design of centrifugal compressor machines

[AD-717878] p0392 N71-23297

Aerodynamic performance of sweptback-bladed centrifugal compressor in argon as function of equivalent weight flow

[NASA-TM-X-2269] p0398 N71-23659

Visualized flow patterns of airflow in centrifugal rotors with thin plate blading and with thick airfoil blades

[ME-238] p0708 N71-36410

Swept-back vane impeller tested on low speed centrifugal compressor rig

[NRC-12020] p0718 N71-37596

## CENTRIFUGAL FORCE

Jet flaps application to autogyro rotor, using

pressure jump for air centrifugation  
p0661 A71-41399

**CENTRIFUGAL PUMPS**  
Centrifugal pump channels flow velocity measurement  
by optical method, noting flow separation near  
blade exits  
p0222 A71-22048

**CERAMAL PROTECTIVE COATINGS**  
U CERMENTS  
U PROTECTIVE COATINGS

**CERAMALS**  
U CERMENTS

**CEREBRAL VASCULAR ACCIDENTS**  
Simulated airline pilot cerebral incapacitation  
etiology, incidence and detection, noting  
unimpaired crew members conduct and reaction times  
during approach for landing  
p0664 A71-41824

**CERMENTS**  
Aircraft power plants sealing materials, emphasizing  
porous cermet seals heat resistance under thermal  
cyclic loads  
p0368 A71-27688

**CERTIFICATION**  
Airworthiness and Air Registration Board, discussing  
aims, objectives, technical changes and national  
and international control  
p0073 A71-13734  
Concorde progress toward certification, discussing  
SST airworthiness requirements, flight test  
program, takeoff and landing operational  
experience and stability problems at high  
incidence  
p0133 A71-16487  
Business jet aircraft noise certification,  
discussing test programs and cost reduction  
[SAE PAPER 710384]  
p0286 A71-24249  
Light aircraft steel landing gear springs structural  
design at Cessna, considering certification  
requirements  
[SAE PAPER 710400]  
p0287 A71-24262  
Airport certification and safety inspection  
procedures and minimum safety standards  
[SAE PAPER 710413]  
p0404 A71-28305  
Concorde flight simulator at Toulouse, discussing  
flight control system, air navigation and  
certification  
p0488 A71-31881  
Aircraft engine noise test methods for acoustic  
certification, investigating jet and compressor  
silencing, absorbent materials, rotor and  
propeller noise and psychoacoustic tests  
p0489 A71-31890  
Concorde aircraft automatic landing and flight  
control system objective, design, reliability and  
certification tests  
p0490 A71-31915  
French flight test center role in development and  
certification of Concorde aircraft, considering  
cooperation with industry  
[AIAA PAPER 71-784]  
p0544 A71-35526  
V/STOL airworthiness certification, considering  
standards developed by FAA in cooperation with  
industry  
[CASI PAPER 72/21]  
p0602 A71-37607  
Airport certification and safety inspection program  
mandated by Airport and Airway Development Act of  
1971  
p0693 A71-43235  
Proceedings of conference to train personnel in  
conducting aircraft noise certification tests  
[HRC-TR-300-SUPPL-1]  
p0474 A71-26303  
Guide to private and commercial multiengine aircraft  
pilot certification  
[FAA-AC-61-4C]

**COLD WEATHER TESTS**  
Cold weather tests to determine effectiveness of resonant combustor as power source for starting aircraft engines  
[AD-724125] p0634 N71-32804

**COLLISION AVOIDANCE**  
American ATA prototype aircraft collision avoidance equipment and proposed noncooperative system  
p0008 A71-10753  
ATC automation, using conflict prediction algorithm based on airspace assignment to aircraft entering system  
p0018 A71-11698  
ATA Collision Avoidance System based on time and frequency synchronization via ground stations or other aircraft  
p0030 A71-12895  
Collision avoidance system flight test and evaluation program for airline industry CAS specification  
p0030 A71-12896  
Air traffic control using collision risk equations, noting data handling automation, airborne collision avoidance devices and geostationary satellites  
p0100 A71-15646  
Bird strikes incidence and prevention, discussing velocity effects, migration role and uses of distress calls, falconry and radar  
p0156 A71-18664  
Aircraft midair collision avoidance, discussing Elimination Range Zero system operation procedures and cost  
p0183 A71-19079  
Three-phase time-ordered functional organization for ground based collision avoidance, discussing information flow, display capability and dynamic simulation model  
[AIAA PAPER 71-240] p0188 A71-19716  
Airline collision avoidance system test and evaluation program, considering range, rate and altitude accuracy, communications reliability, synchronization and system integration with air traffic control  
p0208 A71-21167  
Aircraft collision avoidance dynamical system, determining barriers between possible capture regions by optimal control problem solution  
p0209 A71-21322  
Digital simulation facility for airborne collision avoidance system effects on ATC terminal automation, discussing operation, hardware and software equipment  
p0293 A71-24774  
Midair collisions analysis for civil-military integrated ATC air space, discussing near miss volume, random heading aircraft density and pilots evasive action vs avoidance percentages  
p0367 A71-27599  
Radar avoidance action logic for converging aircraft safe passage, discussing near miss and collision situations  
p0367 A71-27600  
Time-frequency anticollision system for dangerous aircraft detection and avoidance using stable atomic clocks  
[ONERA-TP-938] p0488 A71-31875  
Helicopter radar equipment for obstacle avoidance in all-weather low altitude flight, describing components installation, cockpit display and controls  
p0491 A71-31919  
Time and frequency synchronization for EROS airborne collision avoidance system, considering impact on aeronautical communication, navigation and

surveillance  
[CASI PAPER 72/17] p0602 A71-37604  
Canadian Forces experiments on aircraft flashing lights covering warning signals, navigation and anticollision displays and autokinetic phenomenon  
p0661 A71-41491  
Strobe lighting for aircraft midair collision hazard reduction, comparing Collision Avoidance System and Pilot Warning Indicator effectiveness  
p0661 A71-41493  
Aircraft anticollision flashing lights, discussing current practices within national and international air traffic regulations regarding flash frequency, color and light sources  
p0661 A71-41499  
Cooperative Doppler radar system for avoiding midair collisions  
[NASA-CASE-LAR-10403] p0056 N71-11766  
Radar observations of bird migrations to reduce risk of bird-aircraft collisions  
[AD-712720] p0106 N71-12232  
Surveillance radar installed on helicopter for obstacle avoidance  
p0125 N71-13938  
Proceedings and recommendations of conference on prevention of midair collisions  
[NTSB-AAS-70-2] p0259 N71-19043  
Satellite aided aircraft collision avoidance system effective for large number of aircraft

**COMMUNICATION SATELLITES**  
 Skynet communication systems, describing long distance strategic communication links between ground and mobile air/helicopter stations via wide and narrow band pathways p0024 A71-12439

Passive airborne computer augmented aircraft antenna pointing control system for communication satellites tracking [AIAA PAPER 71-233] p0188 A71-19710

Feasibility of VHF aeronautical satellite system frequency sharing band used by ATC service, employing spatial separation, antenna directivity and frequency offset p0412 A71-28873

ATC satellites providing communications channels between aircraft and ground control stations and aircraft localization p0498 A71-32849

Navigation and communication satellites development for civil aviation and shipping, examining technical, organizational, operational and cost problems p0533 A71-34240

Time division multiplexing system for ATS, discussing surveillance geostationary satellite feasibility, delta modulation for data transmission and aircraft equipment p0537 A71-34680

Dioscures communication satellite system for air traffic control and navigation, discussing aircraft antenna beam electronic scanning by computerized control p0537 A71-34681

Satellite-to-aircraft links propagation characteristics, considering specular reflected

# SUBJECT INDEX

# COMPOSITE MATERIALS

- signals, diffuse scattering and scattering function
  - p0538 A71-35097
- Queueing theory approach to communication satellite network design, applying to ocean air traffic control and worldwide military broadcast systems
  - p0539 A71-35106
- Civil aviation and merchant marine satellites, considering aircraft and surface vessel antenna characteristics and modulation techniques for optimum communication channel frequencies
  - p0546 A71-35582
- Radio tracking of aircraft by two geostationary satellites, discussing measurement, navigation and position errors
  - p0559 A71-36508
- ESRO part of joint ATC communication experiment for L band satellite use, giving voice and data transmission and distance measurement techniques tests results
  - p0559 A71-36510
- Frequency memories application to earth-satellite-aircraft UHF communications, repeater apparatus and multiple access transmission of half tone images in worldwide satellite communication
  - p0560 A71-36553
- Cost analysis of joint NASA-European space program involving navigation and communication satellites for civil air traffic control
  - [ESRO-SP-61] p0115 N71-12756
- European aerospace and electronic equipment industrial cooperation for air traffic control and communication satellites
  - p0230 N71-17181
- Survey of very high and ultrahigh frequency utilization in US aeronautics for communication satellite frequency assignment
  - [NASA-TN-X-65527] p0471 N71-25920
- COMMUNICATION SYSTEMS
- U TELECOMMUNICATION
- COMMUNICATION THEORY
- Atmospheric turbulence effects on sonic boom rise times by statistical theory
  - p0294 A71-24817
- COMMUNITIES
- Community physical, psychological, and social reactions to aircraft noise around 7 US international airports
  - [NASA-CR-111316] p0050 N71-11032
- Problems of local airlines in providing service to rural communities
  - p0167 N71-15390
- Community values and social problems associated with construction of air and surface transportation facilities

  - [AD-722571] p0591 N71-31400
- COMPOSITE MATERIALS
- NT CERMETES
- NT LAMINATES
- NT METAL MATRIX COMPOSITES
- NT REINFORCED PLASTICS
- Fiber reinforced composites application in aerospace and aircraft, discussing boron and graphite and cost effectiveness
  - p0014 A71-11277

- Composite materials structure cost effectiveness demonstrated in aircraft relief crew compartment panels  
p0014 A71-11281
- Carbon fiber reinforced plastics and metals structural components design, discussing properties, processing and applications  
p0030 A71-12910
- Sandwich metal construction with welded Norsial corrugated core for light weight and strength, discussing fabrication and application to hypersonic research vehicles  
p0089 A71-15207
- Lightning protection for dielectric composites, analyzing damage from shock waves, vaporization pressure, magnetic forces and burning  
p0195 A71-19942
- Cost aspects of carbon fiber reinforced composites in aircraft structures, suggesting increased aviation market for carbon fiber [PLASTICS INST. PAPER 46]  
p0206 A71-20929
- Tetra-Core structural composite material, discussing fabrication techniques, test results, potential and applications  
p0208 A71-21225
- Composite materials for compressor blades in aircraft engines, considering boron and carbon fiber reinforced materials  
p0274 A71-23286
- Metallic and nonmetallic composite materials in jet engine component design, discussing integral blade/disk, reinforcement hoop, rotors and airfoils  
p0275 A71-23307
- Variable weight composite materials for aircraft optimal adhesive bonding structural designs, discussing C-5A tow weight saving Ti honeycomb applications  
p0282 A71-24084
- Representative Thornel fiber aircraft fuselage component nondestructive testing and repair, and Thornel fiber, polysulfone and polyamide-imide composites fabrication and evaluation  
p0344 A71-25427
- Prototype graphite fiber/plastic fuselage component design, test and performance prediction, using structural analysis methods  
p0344 A71-25428
- Resin matrix composite airfoils in gas turbine engines, considering performance, fabrication and cost [ASME PAPER 71-GT-47]  
p0351 A71-25980
- Boron-glass-epoxy lightweight composite gear case for aircraft engine reduction gearbox, describing design, molding, machining and testing [ASME PAPER 71-GT-85]  
p0353 A71-25993
- Air Force development programs with graphite reinforced composites, discussing matrix materials and cost and weight savings [ASME PAPER 71-DE-13]  
p0361 A71-27323
- Ti, B and graphite fiber composites application to aircraft design, discussing mechanical properties and market competition  
p0368 A71-27676
- Filamentary composite reinforced metal aircraft structures, considering boron/epoxy in combination with aluminum  
p0404 A71-28168
- Advanced composite vs conventional material components in cost comparison for aircraft parts  
p0424 A71-29656
- Composite materials application to V/STOL prop/rotors, determining material properties parametric effect on frequencies and weight by Southwell coefficients [AHS PREPRINT 554]  
p0452 A71-31106
- Advanced composites as future aircraft structural materials, discussing design concepts, service experience, manufacturing methods and quality assurance [AIAA PAPER 71-779]  
p0507 A71-34014
- Titanium and composite fabrication for F-14 aircraft, discussing hot forming, chemical milling and electron beam welding  
p0510 A71-34156
- High modulus graphite composites application for structural weight reduction and stiffness requirement without strength loss  
p0540 A71-35202
- Composite materials effect on supersonic aircraft weight, design and performance [SAWE PAPER 888]  
p0551 A71-35818
- Weight reduction potential of composite materials in aerospace structures, proposing weight estimation technique [SAWE PAPER 887]  
p0551 A71-35819
- Design, analysis and testing of F-111 complex fuselage full scale section of composite materials, noting weight savings [SAWE PAPER 889]  
p0552 A71-35825
- Design and materials engineering for aircraft turbine engines [NASA-TT-P-13398]  
p0127 N71-14188
- Method for arranging filamentary, load bearing material to approximate stress condition in gas envelope of free floating balloon for maximizing structural efficiency [AD-713188]  
p0163 N71-14811
- Flow characteristics of wire-form and laminate-form porous materials [NASA-TM-X-2111]  
p0229 N71-17130
- Material specifications, flammability, safety considerations, and design criteria for materials used in construction of commercial aircraft interiors  
p0391 N71-23232
- Abstracts of papers presented at US Air Force materials symposium held at Miami Beach, Florida in May, 1970 [AD-718432]  
p0398 N71-23625
- Properties and selective applications of high strength steels, aluminum and titanium alloys, polymeric materials, ceramic materials, and composite materials in aerospace engineering [AGARD-LS-51-71]  
p0514 N71-27038
- Feasibility of boron-epoxy reinforced aluminum alloy for horizontal stabilizer structure of DC 8 aircraft and recommendations for demonstration program [NASA-CR-111913]  
p0517 N71-27664
- Utilization of aerospace nonflammable cellulosic elastomeric, fibrous, and composite materials in commercial aircraft refurbishment  
p0581 N71-30759
- Strength of adhesive of carbon fiber composite material bonds [DLR-FB-71-31]  
p0639 N71-33100
- Design, fabrication and tests of boron/epoxy reinforced stringers for CR-54B tail cone [NASA-CR-111929]  
p0674 N71-34013
- COMPOSITE STRUCTURES**  
**NT LAMINATES**  
High modulus boron-epoxy composite aircraft structures adhesive bonding, discussing mechanical properties, manufacturing techniques and quality control [SAE PAPER 710110]  
p0143 A71-17624
- Composite plastic aircraft structures lightning protection, considering hazard to composite materials and use of metal filled or plasma sprayed coatings and metal foil coverings  
p0195 A71-19943
- Graphite-epoxy composite skins for commercial aircraft flight spoiler, discussing multiangle ply design and fabrication  
p0362 A71-27413
- Composite structures development, discussing wing, fuselage, aeropropulsion and missile development, weight savings of hardware and fighter empennage applications [AIAA PAPER 71-367]  
p0555 A71-36275
- COMPOSITES**  
**U COMPOSITE MATERIALS**  
**COMPOSITION (PROPERTY)**  
**NT ATMOSPHERIC COMPOSITION**  
**NT ATMOSPHERIC MOISTURE**  
**NT CHEMICAL COMPOSITION**  
**NT MOISTURE CONTENT**  
**COMPOUND HELICOPTERS**  
Compound and VTOL aircraft and prototype compact downtown V-ports for short haul air transportation improvement and expansion  
p0071 A71-13619
- AH-56A Cheyenne compound helicopter icing spray rig tests, discussing ice protection systems design and operating performance  
p0097 A71-15438

- Electromechanical control system synthesis for compound hingeless rotor helicopter, using root locus method with transfer functions from airframe motion linear model  
[AHS PREPRINT 536] p0451 A71-31096
- High performance UH-1 compound helicopter high speed flight research, considering rotor loads, stability, control and flying qualities  
[AHS PREPRINT 570] p0453 A71-31111
- AH-56A compound helicopter rigid rotor stability and handling qualities, using flight, whirl tower and wind tunnel tests  
[AHS PREPRINT 574] p0453 A71-31115
- Normal and compound helicopters to be used as short haul aircraft in view of burden on today's air traffic control p0377 N71-22189
- COMPRESSED GAS**  
Development history and application of free piston engine p0632 N71-32621
- Some aspects of propulsion for augmentor wind concept  
[NASA-TT-P-14005] p0727 N71-38535
- COMPRESSIBILITY EFFECTS**  
Fredholm method for reversible transonic flow in computing aircraft wing and turbomachine or helicopter blade airfoils for compressibility law p0012 A71-11022
- Compressibility correction for subsonic flows past bluff bodies, considering boundary distortion and pressure distribution shift p0339 A71-25149
- Army rotorcraft performance data, discussing hovering and forward flight performance out of ground and level flight power requirements and drag and compressibility effects  
[AHS PREPRINT 500] p0448 A71-31076
- COMPRESSIBLE BOUNDARY LAYER**  
Compressible turbulent boundary layer skin friction measurements on adiabatic flat plate, discussing drag balance calibration  
[ASME PAPER 70-WA/FE-26] p0077 A71-14134
- Cross flow profiles for compressible turbulent boundary layers with and without flow reversal via hodograph models family p0221 A71-22033
- Mechanics of free piston engine, aspects of human factors engineering, and compressible boundary layer studies at high Reynolds numbers  
[DME/NAE-1971/1/] p0632 N71-32620
- COMPRESSIBLE FLOW**  
**NT TRANSONIC FLOW**  
Compressible flow similarity parameters, establishing dimensionless relations for radial turbomachines design p0075 A71-13830
- Three dimensional inviscid compressible flow past sharp shouldered blunt bodies at angle of attack, presenting time dependent finite difference technique  
[AIAA PAPER 71-56] p0151 A71-18515
- Prandtl-Glauert pressure distribution rule improvement subsonic planar flow p0201 A71-20312
- Critical speeds for inviscid compressible potential flow past thin elastic cylindrical shells, using long wave approximation p0291 A71-24565
- Nonuniform transonic shear compressible flow past symmetric airfoil, using linearized small disturbance theory p0293 A71-24761
- Loads induced on infinite aspect ratio wing by straight infinite free vortex in subsonic compressible freestream, using planar lifting surface theory p0345 A71-25474
- Steady supersonic isoenergetic flow of thermally and calorically perfect gas past circular cones at zero angle of attack, using dimensional perturbation method p0358 A71-26939
- Discrete tone noise generation by high speed fans and compressor blades, using McCune analysis for linearized three dimensional compressible flow in infinite annulus  
[AIAA PAPER 71-617] p0483 A71-31555
- Compressible transonic flow about two dimensional airfoils, developing inviscid nonlinear potential equations by relaxation procedures  
[AIAA PAPER 71-569] p0484 A71-31562
- Unsteady compressible flow measurement, determining local lift coefficient from pressure distribution along airfoil p0501 A71-33342
- Gust loading on two dimensional thin airfoil in compressible flow, deriving closed-form lift expression p0541 A71-35285
- Laminar compressible wakes instability behind planar and axisymmetric slender bodies, solving integral conservation equations for fluctuation amplitude variations p0604 A71-37879
- Compressible viscous gas supersonic flow, observing near wake region behind perpendicular trailing face of rectangular plate with motion, state, energy and continuity equations p0649 A71-40081
- Compressible flow across shaft face seals and narrow slots, examining fluid inertia, viscous friction and entrance losses p0695 A71-43592
- Streamline curvature analysis of compressible subsonic, transonic and supersonic cascade flows in axial turbine blades p0698 A71-44347
- Turbulent boundary layers in compressible flow and their interactions with normal shock waves in zero and adverse pressure gradients  
[ARI/ME-321] p0517 N71-27602
- Hodographs applied to calculation of compressible flow on turbomachine blades and use of visualization terminal display  
[ONERA-NT-176] p0620 N71-31706
- COMPRESSIBLE FLUIDS**  
Dirichlet problem in hodograph plane of compressible fluid flow from aircraft, helicopter blades or turbine blade airfoils p0544 A71-35470
- Compressible circular jet instabilities with respect to spatially growing disturbances  
[DLR-FB-70-51] p0251 N71-18471
- System of nonlinear equations of motion for isentropic, compressible fluid solved by cyclic relaxation method for subsonic and transonic regimes p0530 N71-28688
- COMPRESSION BUCKLING**  
**U BUCKLING**  
**COMPRESSION LOADS**  
**NT AXIAL COMPRESSION LOADS**  
**NT IMPACT LOADS**  
Pisa University Aeronautical Institute activities /1960-1970/, considering supersonic and subsonic flow research, thin stiffened shells fatigue under compressive or tensile loads, etc p0444 A71-30822
- COMPRESSION TESTERS**  
**U COMPRESSION TESTS**  
**COMPRESSION WAVES**  
Plane compression waves propagation into constant state nonviscous fluid, considering shock formation of pressure pulses and overpressure as function of time p0195 A71-19961
- COMPRESSOR BLADES**  
Axial flow compressors radiated sound reduction by segmented stator blades p0068 A71-13283
- Cascade flow test data, considering blade section performance in transonic and supersonic axial flow compressors p0075 A71-13829
- Low aspect ratio compressor blade cascade performance at blade span center, discussing pressure loss, angle of attack and staggering p0203 A71-20624
- Axial compressor blades surface finish and fatigue strength restoration by vibrational tumbling p0206 A71-20843
- Probabilistic estimate of aerodynamic imbalance of aircraft gas turbine rotors due to production errors in compressor blade angle p0222 A71-22045

- Axial-radial and radial compressor stage optimum exit blade angle, considering flow rate control by variable pitch nozzle guide vanes p0222 A71-22049
- Composite materials for compressor blades in aircraft engines, considering boron and carbon fiber reinforced materials p0274 A71-23286
- Axial compressor subsonic stages theoretical and experimental investigation, discussing blade design, calculation and experimental methods and results p0298 A71-24958
- Cascade and single stage rotating rig data comparison with aerodynamic predictions based on intrablade analysis, including wall boundary layer model [ASME PAPER 71-GT-13] p0349 A71-25959
- Impeller blade loading vorticity on stream surface of revolution for mixed flow compressor, using annular cascade theory [ASME PAPER 71-GT-17] p0349 A71-25962
- Quasi-three dimensional method for radial flow compressor blade loadings computation, presenting combined meridional plane and blade to blade solutions for adaptation to computer [ASME PAPER 71-GT-60] p0351 A71-25982
- Large axial compressor flow straightening stator blades unsteady pressure measurements with short response time detectors p0363 A71-27469
- Monograph on potential flow interaction between blade rows in axial flow compressors covering mathematical model, numerical analysis and experiment p0413 A71-28883
- Discrete tone noise generation by high speed fans and compressor blades, using McCune analysis for linearized three dimensional compressible flow in infinite annulus [AIAA PAPER 71-617] p0483 A71-31555
- Dynamic stress on rotor blades of aircraft engine axial compressor stages with low hub/diameter ratio p0502 A71-33345
- Linear radial loads effect on stress and strain of hyperboloidal rotor disk applied to aircraft engine compressors with two stream flow of working medium p0535 A71-34597
- Pretwisted cantilever airfoil cross section turbine and compressor blades vibration natural frequencies and mode shapes p0541 A71-35282
- Multiple tone generation by axial flow transonic compressors, considering shock waves production and propagation associated with supersonic elements of blading p0558 A71-36497
- Centrifugal blowers optimum blade number for maximum efficiency, discussing design measures for shock and friction loss minimization p0610 A71-38750
- Segmented stator vanes performance in axial flow compressor, noting radiated sound reduction p0611 A71-39093

# CONFIGURATION MANAGEMENT

# SUBJECT INDEX

Abstracts of papers presented at US Air Force materials symposium held at Miami Beach, Florida in May, 1970  
 [AD-718432] p0398 N71-23625  
 Conference on fatigue life in helicopter components [DLR-MITT-70-01] p0455 N71-24385  
 Conference on dynamics and aeroelasticity of space shuttle [NASA-TN-X-2274] p0461 N71-24651  
 Proceedings of conference to train personnel in conducting aircraft noise certification tests [HRC-TR-300-SUPPL-1] p0474 N71-26303  
 Conference on prevention of mechanical failures including bearing failures, spectrographic oil analysis, failure mechanisms of helicopter transmissions, and related problems [AD-721359] p0520 N71-28057  
 Proceedings of conference on mechanical failures prevention [AD-721912] p0529 N71-28592  
 Symposium on unsteady aerodynamic forces, loads, and configurations for aeroelastic analysis of interfering surfaces [AGARD-CP-80-71-PT-2] p0567 N71-29338  
 Conference on NASA research in aircraft safety and operating problems [NASA-SP-270] p0580 N71-30756  
 Conference papers on low level turbulence models to determine influence on aircraft stability and missile trajectories [DLR-MITT-70-12] p0623 N71-31882  
 Conference papers on flight simulation [DLR-MITT-70-29] p0625 N71-31951  
 Actions and recommendations of Ninth Meeting of Airworthiness Committee [DOC-8925] p0675 N71-34020  
 Automatic data processing systems for air traffic control, health services, operations research, management planning, information systems, and reading machines p0722 N71-37742  
**CONFIGURATION MANAGEMENT**  
 Optimization techniques in aircraft configuration design [AD-711410] p0048 N71-11023  
**CONFORMAL MAPPING**  
 Design of two dimensional airfoil profile with prescribed velocity distribution using conformal mapping [SAAB-TN-67] p0638 N71-33037  
**CONFORMAL TRANSFORMATIONS**  
**U CONFORMAL MAPPING**  
**CONGRESS**  
 Wrongful death liability in aviation and admiralty, considering U.S. Congress refusal to enact legislation p0665 A71-42068  
 Congressional hearings on Boeing 727 use of Washington National Airport p0240 N71-17697  
 Authorization hearings on NASA space flight program - Part 4, 1972 p0467 N71-25196  
 Congressional hearings on chartered airline travel p0573 N71-29707  
 Control equipment and engine development for air pollution control from jet aircraft engine emissions p0591 N71-31403  
 Senate hearings on Federal anti-skyjacking program p0592 N71-31511  
 Air piracy resolutions presented to Congress and US and worldwide air piracy statistics p0633 N71-32689  
 Federal funding for SST and Concorde aircraft development in 1971 p0646 N71-33758  
 Convention for suppression of unlawful aircraft seizure and article by article analysis p0717 N71-37590  
**CONICAL BODIES**  
**NT SLENDER CONES**  
 Turbulent base pressure on conical afterbodies in supersonic axisymmetric flow, including initial direction effect [AIAA PAPER 70-555] p0082 A71-14450  
 Hypersonic flow past freely vibrating hemisphere-cylinder-cone, noting Reynolds and Mach numbers dependence and conical stabilizer aperture angle

p0083 A71-14571  
 Conical body laminar boundary layer heat transfer problem in supersonic flow, using quasi-linearization and implicit finite difference method p0099 A71-15487  
 Turbulent heat transfer measurements on blunt cone in nitrogen flow at high Mach number under various angles of attack [AIAA PAPER 71-38] p0151 A71-18499  
 Incompressible hypersonic laminar boundary layer flow over sharp cone, based on asymptotic inner and outer flow field expansion p0191 A71-19892  
 Unsteady boundary layers on sphere or cone moving along axis, determining skin friction angular response p0198 A71-20098  
 Aerodynamic characteristics of conical and pyramidal configurations with various planforms by slender body theory, replacing three dimensional flow by two dimensional flow p0204 A71-20776  
 Three dimensional laminar boundary layer on cone at incidence in supersonic flow evaluated by pressure distribution technique, comparing heat transfer, Pitot probe measurements, etc [AIAA PAPER 70-48] p0264 A71-22088  
 Mean flow measurement of cone laminar supersonic wake p0264 A71-22091  
 Shock wave shape attached to cone moving in ideal gas studied by Pade-Shanks approximation method, considering angle of attack p0266 A71-22405  
 Conical body lift/drag ratio increase by wedge shaped nose, noting applications to space vehicles entering atmosphere above escape velocity p0416 A71-29183  
 Free flight static and dynamic stability tests on lightweight cone shaped models in longshot tunnel at hypersonic speeds, using spark recording p0499 A71-32879  
 Cone-cylinder-cone missile type body in transonic buffeting environment determining static and fluctuating wall pressure distribution [ONERA-TP-942] p0553 A71-36020  
 Dynamic parameters of supersonic flow incident on conical bodies at large angles of attack, considering flow field and entropy distribution p0556 A71-36328  
 Boundary layer transition studies of several pointed bodies of revolution at supersonic speeds [NASA-TN-D-6063] p0053 N71-11520  
 Flexible trailing wire effect on aerodynamic characteristics and radar cross sections of hypervelocity cone [AD-712509] p0103 N71-12205  
 Flight assessment of trailing-cone static pressure probe at subsonic speeds [RAE-TR-69139] p0104 N71-12214  
 Real gas effects on drag and trajectories of nonlifting conical shell during Mars atmospheric entry [NASA-TN-D-6240] p0244 N71-18015  
 Wake flow properties of conical bodies at supersonic speeds and various angles of attack [NASA-TN-X-2139] p0251 N71-18480  
 Wire and probe support interference on hypersonic wakes of magnetically suspended round based conical body [ARC-CP-1133] p0331 N71-20848  
 Numerical method for calculating steady asymmetrical supersonic flow past pointed conical bodies at yaw p0333 N71-21269  
 Numerical analysis of inviscid flow fields about pointed circular cone and conical wing-body configuration at various angles of attack p0386 N71-22667  
 Windage tests of cylindrical and Lundell-conical rotors in ambient air producing Reynolds numbers up to 100,000 for high speed alternators [NASA-TN-X-67809] p0388 N71-23116  
 Pressure distribution near center line of trailing edges of delta wings and conical bodies at high supersonic speeds [ARC-CP-1153] p0635 N71-32868  
 Determination of transonic aerodynamic characteristics of spherically blunted 55 and 60

- degree half-angle cones in ballistic range tests  
[NASA-TN-D-6489] p0641 N71-33244

Supersonic aircraft lateral control equipment

[AD-720740]

p0477 N71-26538

Aircraft structure elasticity effects on control lever deflection and control forces

p0587 N71-31065

Control equipment and engine development for air pollution control from jet aircraft engine emissions

p0591 N71-31403

Device for controlling terminal shock waves in supersonic inlets

[NASA-CASE-LEW-11188-1]

p0674 N71-34017

Analysis of criteria for survivable flight control system using fly-by-wire and integrated actuator package techniques

[AD-727762]

p0720 N71-37616

## CONTROL MOMENT GYROSCOPES

Control system designs for USSR single-rotor helicopters including controllability characteristics, rotors with control gyroscopes, and transfer functions in closed loop systems

[NASA-TT-F-636]

p0329 N71-20719

## CONTROL SIMULATION

Aircraft electronic control systems, considering hydraulic servocontrol, force simulation and reliability models

p0196 A71-20064

Digital simulator for training ATC officers, considering authenticity and working and geographical environments

p0271 A71-22954

Aircraft motion and traffic control at air corridors intersections for minimum flight schedule deviation under random disturbance due to weather, using statistical simulation

p0283 A71-24158

Soviet book on aircraft and rocket engines control automation, discussing nuclear power plant/fuel systems design and control simulation methods

p0355 A71-26403

Analysis of glide-slope information requirements for low visibility aircraft landing approach using Kalman filter-optimal control combination to simulate DC-8 control system

[AD-722655]

p0586 N71-30887

## CONTROL STABILITY

Nonlinear control systems with transport lag, obtaining parameter plane equations for stability analysis

p0202 A71-20369

Optimal control stabilization under continuous small disturbances applied to aircraft stability in horizontal flight under vertical gust loads

p0292 A71-24726

Variable sweep wing aircraft angular motion mathematical model, analyzing inertial moments influence on control dynamics

p0347 A71-25661

Turbine engine fuel control stability on CH-47C helicopter, using flight tests and lag damper simulation

[AHS PREPRINT 560]

p0452 A71-31107

Linear two shaft turbojet model development and conditions for stability, observability, controllability and feedback loop parameters

p0496 A71-32711

Active flutter mode control system synthesis for flight test, showing mass balancing as possible artificial symmetrical wing destabilization

p0697 A71-44106

Aircraft structure elasticity effects on control lever deflection and control forces

p0587 N71-31065

## CONTROL STICKS

Pilot evaluation of movable and rigid cockpit control sticks

[AD-709934]

p0035 N71-10184

Comparison of pilot performance using center stick, dual side stick, and single side stick configuration

[AD-720846]

p0470 N71-25846

p0015 A71-11539

Adhesive/metal interface corrosion resistance tests, discussing salt fog chamber for shear, compression buckling and cleavage stresses  
p0141 A71-17248

High temperature corrosion in aircraft engine components and gas turbines by sulfur in fuels, vanadium pentoxide and NaCl  
p0274 A71-23288

Corrosion resistance of adhesive bonded airframe structure components under outdoor weather and salt spray conditions, discussing test results with Al alloy specimens  
p0278 A71-23690

Fatigue life, fail-safe capability and corrosion resistance of commercial aircraft structures improved through adhesive metal-metal bonding [ASME PAPER 71-DE-27] p0361 A71-27325

Mechanical properties of composites consisting of Al matrix reinforced by boron fibers, considering high temperature creep, corrosion and thermal shock resistivity  
p0436 A71-30473

Medium strength corrosion resistant weldable Al-Mg alloy for aircraft jettisonable tanks, napalm containers and jet shroud pipes fabrication  
p0481 A71-31437

**CORROSION TESTS**

**NT SALT SPRAY TESTS**

Adhesive primers corrosion resistance test methods, noting aircraft design implications  
p0283 A71-24112

Artificial corrosion pits effect on fatigue durability of smooth samples and aircraft duraluminum skin elements  
p0403 A71-27819

Metal coated superalloys evaluation for gas turbine engine components, including corrosion, impact and fatigue tests  
p0423 A71-29635

Fincap communication antennas design and environmental tests for vibration, acceleration, waterproofing, salt corrosion, ice formation and compass safe distance  
p0446 A71-31047

Nondestructive detection of hot corrosion-sulfidation in U.S. Navy aircraft turbine engines  
p0704 A71-45280

**CORRUGATED PLATES**

Application of corrugated core sandwich structures to powerplant components  
p0054 N71-11636

**CORSAIR AIRCRAFT**

**U A-7 AIRCRAFT**

**COSMIC RADIATION**

**U COSMIC RAYS**

**COSMIC RAYS**

Radiological risks of cosmic radiation during high altitude supersonic flights, considering galactic, solar and incident particles in aircraft atmosphere  
p0064 A71-13099

Experimental and theoretical study of biologically important radiation components and dose equivalents due to galactic and solar rays at SST in high atmosphere - summary  
p0584 N71-30779

**COST ANALYSIS**

Aircraft midair collision avoidance, discussing Elimination Range Zero system operation procedures and cost  
p0183 A71-19079

Cost aspects of carbon fiber reinforced composites in aircraft structures, suggesting increased aviation market for carbon fiber  
[PLASTICS INST. PAPER 46] p0206 A71-20929

Resin matrix composite airfoils in gas turbine engines, considering performance, fabrication and cost  
[ASME PAPER 71-GT-47] p0351 A71-25980

Low cost short life gas turbine design based on parametric performance and component selection, outlining turbojet production  
[ASME PAPER 71-GT-69] p0352 A71-25984

Helicopter auxiliary power unit /APU/ life cycle cost computation  
p0357 A71-26679

Thrust measurement of aircraft and rocket propulsion systems, comparing cost and characteristics of mechanical, electrical and hydraulic systems  
p0359 A71-26991

Airline operator evaluation of maintainability, considering costs and investment return  
[SAE PAPER 710432] p0406 A71-28317

Costs-reliability relationships in helicopter development testing and demonstration, emphasizing decision making in program management  
[SAE PAPER 710452] p0407 A71-28330

Aircraft capabilities in intraurban transportation for Detroit metropolitan area, considering vehicle design, fleet size, cost and terminal location  
[AIAA PAPER 71-504] p0422 A71-29548

Advanced composite vs conventional material components in cost comparison for aircraft parts  
p0424 A71-29656

Air transport and travel expansion rate, discussing motivations and cost  
p0430 A71-30159

Circumstances inducing growth in different air transport sectors, discussing transportation cost, aviation capital requirement and business and leisure air travel  
p0431 A71-30160

Aircraft quantitative maintenance cost requirements translation into design criteria, considering airline operations influence on manufacturer  
[SAE PAPER 710437] p0437 A71-30529

Concorde lightweight disk brakes, discussing operating costs, weight and volume factors, design philosophy, structural materials, component life, maintenance and reliability  
p0500 A71-33226

Reliability and maintainability as concepts in life cycle costs applied to airline operations  
p0500 A71-33287

VTOL aircraft gross weight and direct operating costs penalties from additionally installed control power  
[AIAA PAPER 71-768] p0506 A71-34005

Operating costs and runway lengths for V/STOL in city and suburban short haul air transportation  
p0557 A71-36347

Space shuttle avionics system redundancy, calculating costs for individual line replaceable units  
p0558 A71-36479

Third London airport planning, discussing site selection, cost analysis and decision making  
[CASI PAPER 72/1] p0600 A71-37592

Mercury short range passenger aircraft design conception, analyzing cost  
p0607 A71-38242

Central terminal rapid processing and high speed VTOL aircraft effects on airport design, flight time, cost and ATC  
p0614 A71-39394

Airport noise control regulations enforcement feasibility, noting financial burden  
p0663 A71-41796

Adaptive guaranteed cost control for systems with parametric variation, demonstrating system stability and airframe pitch control  
p0697 A71-44111

Statistical data on delays and cost of delays at airline terminals  
p0038 N71-10366

Cost analysis of joint NASA-European space program involving navigation and communication satellites for civil air traffic control  
[ESRO-SP-61] p0115 N71-12756

- Congressional investigation into contract management and development costs of TFX aircraft  
[REPT-91-1496] p0170 N71-15649
- Cost analysis of turbofan nacelle modifications to minimize fan-compressor noise radiation  
[NASA-CR-1716] p0178 N71-16564
- Cost analysis in vertical takeoff aircraft operation for short haul traffic noting influence of airport operation  
p0377 N71-22193
- Flight tests of Concorde prototypes, design modifications, and operational costs of supersonic aircraft  
p0381 N71-22387
- Cost benefit analysis and technology assessment in civil aviation research and development with case histories  
[NASA-CR-1808] p0513 N71-27010
- Commercial aircraft performance and cost analysis data for 1968 and 1969 in US  
p0619 N71-31611

## DATA RETRIEVAL

## SUBJECT INDEX

- UH-1B helicopter flight test noise measurements data reduction and analysis, presenting sound pressure vs frequency and time plots  
p0092 A71-15405
- Observational data characteristics analysis as contributor to knowledge and utilization of all atmospheric physical occurrences  
p0212 A71-21722
- Heat transfer within resonant cavities at subsonic and supersonic flow, discussing wind tunnels, test procedures and data reduction  
[ASME PAPER 71-FE-9]  
p0421 A71-29450
- Circumferential traversing probe technique for intrastage analysis of axial flow compressors, considering mass flow averaging data reduction technique  
[ASME PAPER 71-FE-33]  
p0421 A71-29468
- Aircraft instrumentation and data analysis for clear air turbulence, including orthogonal components and temperature and wind distributions  
p0424 A71-29753
- Corporate aircraft 1970 accident statistics analysis stressing pilot selection, training and supervision  
p0692 A71-43227
- Data reduction techniques for deriving aerodynamic forces and moments in absence of support interference  
[NASA-CR-111844]  
p0388 N71-23122
- Wind tunnel investigation of jets exhausting into cross flow - description and data analysis  
[AD-718122]  
p0458 N71-24492
- Free flight stability tests on half cones in hypervelocity wind tunnels including data reduction program  
[VKI-TN-66]  
p0619 N71-31663
- Test data reduction and prediction techniques for high lift aerodynamic and propulsion system configurations for short takeoff aircraft design - bibliographies  
[AD-724185]  
p0638 N71-33016
- DATA RETRIEVAL**  
Aircraft industry license norms and standards, describing indexing procedures, storage techniques and data recovery operations with computer  
p0561 A71-36810
- DATA SAMPLING**  
Approximate root locus method in S plane for sampled data systems, mapping constant frequency and constant damping ratio loci onto W plane  
p0491 A71-31942
- DATA SMOOTHING**  
Suboptimal fixed point data smoothing algorithm for parameter and initial state estimation of nonlinear dynamic systems  
p0698 A71-44113
- DATA STORAGE**  
Event recorder with constant speed motor which rotates recording disk  
[NASA-CA-2-XLA-01832]  
p0332 N71-21006
- DATA SYSTEMS**  
Air traffic control using collision risk equations, noting data handling automation, airborne collision avoidance devices and geostationary satellites  
p0100 A71-15646
- Integrated flight test data system combining digital airborne data acquisition/recording system with telemetry/microwave link to computerized ground station  
p0433 A71-30318
- Airborne integrated data system capabilities based on flight tests with commercial aircraft  
p0433 A71-30319
- Boeing 747 aircraft integrated data system program for reducing engine maintenance and operating costs  
[AIAA PAPER 71-648]  
p0440 A71-30725
- Approximate root locus method in S plane for sampled data systems, mapping constant frequency and constant damping ratio loci onto W plane  
p0491 A71-31942
- F-15 aircraft integrated data system for flight test program information, discussing development and major elements

# DELTA WINGS CONTD

- Aerodynamic forces and hinge moments of delta cruciform control surface in blunt-nosed canard configuration for subsonic, transonic and supersonic flows
  - p0339 A71-25161
- Thin delta wing in hypersonic inviscid flow at small angles of attack, calculating motion equations and boundary conditions at small perturbations
  - p0362 A71-27330
- Shock interaction effects on flapped delta wing at hypersonic speed, presenting method for estimating reflected expansion wave impingement boundaries and resulting aerodynamic coefficients
  - p0367 A71-27598
- Minimum drag surface shape of thick lifting delta wing integrated with conical fuselage for supersonic cruising speed
  - p0369 A71-27716
- Air flow about low aspect ratio delta wing at large angles of attack, deriving lift coefficient
  - p0404 A71-28282
- Hypersonic flow around delta wing at small angles of attack, using pressure sources method and Fredholm integral equation
  - p0416 A71-29189
- Hypersonic flow pattern past windward side of delta wing with supersonic leading edges, joining potential and vortex regions behind shock wave
  - p0444 A71-30874
- Inviscid supersonic flow field structure over blunt delta wing, determining attack angle effects on shock layer surface pressure distributions and streamline patterns
  - [AIAA PAPER 71-596] p0485 A71-31576
- Flat delta and caret wings aerodynamic performance over incidence angle and Mach number range suitable for lifting reentry
  - p0498 A71-32877
- Rarefaction and angle of attack effects on delta wing in hypersonic flow in wind tunnel
  - p0502 A71-33376
- Two vortex model for downwash variations in supersonic flow past thin delta wing with separation at leading edges
  - p0533 A71-34190
- Pressures, velocities and aerodynamic characteristics of supersonic flow around slender delta wings with forced asymmetry and separation at leading edges
  - p0554 A71-36134
- Supersonic flow past thin delta wings with finite velocities at leading edges, noting wing deformation to avoid corner vortices appearance
  - p0555 A71-36181
- V shaped conical wing in supersonic and hypersonic flow with shock attached to leading edge, investigating complex wave system with time dependent and analytical methods
  - p0556 A71-36339
- Hypersonic lee surface vortex heating alleviation on delta wing by apex alignment with free stream
  - p0604 A71-37895
- Total lift data correlation for thin sharp edged low aspect ratio delta wings at low speeds, noting trailing edge effects in incompressible flow
  - p0615 A71-39398
- Delta wing problem reduction to Laplace equation solution, using perturbation technique to solve Lane equation resulting from elliptic conal coordinates transformation
  - p0616 A71-39498
- Delta wing shock envelope visualization at hypersonic speed, obtaining flow field photographs by vapor screen technique
  - p0660 A71-40973
- Slender two dimensional wedge wings aerodynamic characteristics in hypersonic strong interaction flow, determining wall shear stress and lift drag ratio effects
  - p0702 A71-44621
- Leading edge effect on aerodynamic characteristics of 70 deg swept delta wing
  - [AD-712087] p0046 N71-11007
- Aerodynamic characteristics of large-scale model with lift fan mounted in 5 percent thick triangular wing
  - [NASA-TN-D-7031] p0161 N71-14638
- Aerodynamic performance of shuttle-orbiter configuration with variable delta wing geometry in low turbulence subsonic wind tunnels
  - [NASA-TN-X-2206] p0164 N71-14943
- Avoidance of disrupting effects in dynamic tests on semispan delta wing models in transonic slotted and perforated wind tunnels
  - [ARC-R/M-3636] p0170 N71-15701
- Aerodynamic coefficients, pressure, load and force distributions on cambered delta wings
  - [ARC-CP-1129] p0228 N71-17112
- Aerodynamic heating and structural analyses for radiatively cooled delta wing of hypersonic aircraft
  - [NASA-TN-D-6138] p0245 N71-18025
- Wall pressure and heat transfer distribution on delta wings in rarefied hypersonic flow
  - [REPT-70-9] p0249 N71-18423
- Lift and drag interference characteristics of delta winged half cones with leading edges
  - p0301 N71-19359
- Viscous interacting flow in hypersonic streams, including flow over flaps, corners, delta wings, and wing-body combinations
  - [NASA-TN-X-66914] p0314 N71-19831
- Aerodynamic characteristics of slender delta wing aircraft and response to vertical and lateral gusts during landing approach
  - [RAE-LIB-TRANS-1524] p0333 N71-21223
- Predicting aerodynamic characteristics of arrow, delta, and diamond wing platforms using Prandtl-Glauert transformation
  - [NASA-TN-D-6243] p0372 N71-21973
- Numerical analysis of influence coefficients, natural frequencies, and mode shapes of vibration of triangular inflatable wing
  - p0386 N71-22666
- Analysis of supersonic and hypersonic flow of inviscid ideal gas over conical wings with sharp leading edges and attached shock waves by three dimensional method of characteristics
  - [NASA-CR-1738] p0386 N71-22672
- Angle of incidence effect on delta wing leading-edge vortices with cross flow visualization in hydraulic test tunnel
  - [ARC-R/M-3645] p0457 N71-24482
- Flow measurement of Nonweiler delta wing in hypersonic slip flow
  - [DLR-FB-70-46] p0458 N71-24500
- Oscillatory pitching moment derivatives measurement on delta wings in incompressible flow
  - [ARC-R/M-3628-PT-1-4] p0459 N71-24569
- Measurements of oscillatory pitching moments on round leading edged delta wing in incompressible flow noting vortex flow development
  - p0459 N71-24570
- Measurement of oscillatory pitching moment derivatives on sharp-edged delta wing at vortex breakdown angle of attack
  - p0460 N71-24572
- Buffet response of straight wing and delta wing model of space shuttle launch configuration
  - p0461 N71-24662
- Aerodynamic characteristics of delta wing space shuttle configurations
  - p0473 N71-26062
- Box collocation method for calculating aerodynamic loads on tandem delta wings with oscillations in supersonic flow
  - p0567 N71-29337
- Pressure distribution near center line of trailing edges of delta wings and conical bodies at high supersonic speeds
  - [ARC-CP-1153] p0635 N71-32868
- Pressure distributions on planar delta wings attached to cylindrical bodies in supersonic flow - theoretical results for sonic leading edge, angle of attack case
  - [WRE-TN-HSA-186] p0646 N71-33699
- Low speed wind tunnel measurement of induced drag characteristics of three 60 degree delta wings with different leading edge spanwise distributions
  - [KTB-AERO-TN-57] p0673 N71-34003
- Wind tunnel stability tests of variable dihedral delta wing spacecraft configuration at hypersonic speed

## DIFFERENTIAL EQUATIONS

## NT BURGER EQUATION

## NT PARTIAL DIFFERENTIAL EQUATIONS

## NT VORTICITY EQUATIONS

Critique of Chapman-Kirk iterative method for  
differential equations yielding aerodynamic  
coefficients from free flight data

p0011 A71-10971

Small parameter method in gyrocompass theory,  
deriving differential equations for motion of  
sensitive element of two rotor gyrocompass

p0279 A71-23804

Coefficient determination of flight dynamics  
multivariable systems by means of computer  
simulated aircraft dynamic models

[DLR-PB-70-30]

p0253 N71-18586

Optimization of aeroelastic constraints for aircraft  
design using differential equation idealization  
and finite element approximation

[NASA-CR-117198]

p0322 N71-20139

## DIFFERENTIAL INTERFEROMETRY

Schlieren photography and differential

interferometry for free flight tunnel holography  
[ISL-T-39/69]

p0105 N71-12223

Shadowgraph photography and differential  
interferometry for studying aircraft boom effect  
on building shell

[ISL-T-2/70]

p0108 N71-12247

Differential interferometry and schlieren  
photography for hypersonic aerodynamic hologram  
analysis

[ISL-T-49/69]

p0116 N71-12985

## DIFFERENTIAL OPERATORS

## U DIFFERENTIAL EQUATIONS

## U OPERATORS (MATHEMATICS)

## DIFFERENTIAL PRESSURE

Chord and rotary wing span differential pressure  
distribution effects on high frequency aerodynamic  
noise propagation from helicopters

[AD-721661]

p0528 N71-28507

## DIFFRACTION

## NT PULSE DIFFRACTION

## NT WAVE DIFFRACTION

## DIFFRACTION PATTERNS

Holographic interferometry application to gas  
dynamics, analyzing interferential patterns in  
monochromatic and achromatic light

p0140 A71-17166

Surface strain measurements in turbine blades by  
time average holographic interferometry, reviewing  
resonant modes and holographic fringe patterns

[ASME PAPER 71-GT-84]

p0353 A71-25992

Shock wave diffraction patterns on plane walled  
convex corners in air, nitrogen and carbon dioxide  
at various Mach numbers

p0499 A71-32918

Holographic interferometry fringe patterns

interpretation for small displacements

measurement, considering precision gyro stability

p0541 A71-35286

## DIFFUSERS

Cone shaped diffusers effectiveness, noting inlet  
conditions effect on pressure recovery coefficient

p0136 A71-16750

Holographic interferometry for flow visualization  
within aerodynamic wind tunnels with retrodiffuser  
apparatus

p0480 A71-31276

Conical diffusers outlet flow profile and  
performance, investigating swirling inlet flow  
effects on pressure recovery

p0660 A71-40950

## DIFFUSION

## NT ATMOSPHERIC DIFFUSION

## NT GASEOUS DIFFUSION

## NT MOLECULAR DIFFUSION

## NT THERMAL DIFFUSION

## NT TURBULENT DIFFUSION

## DIFFUSION BONDING

## U DIFFUSION WELDING

## DIFFUSION FLAMES

Supersonic hydrogen diffusion flames ignition aids  
at near-thermal self ignition point, discussing  
catalytically induced prereactions

p0497 A71-32718

Aerodynamic combustion noise generation from  
premixed or diffusion open turbulent flames, using  
fluid mechanics and Lighthill method

p0694 A71-43448

## DIFFUSION THEORY

Dispersion model of turbulent mixing of isothermal  
and nonisothermal slipstreams of air-gasoline

## DOPING (ADDITIVES)

U ADDITIVES

## DOPPLER EFFECT

Laser Doppler velocimetric technique for supersonic flow particle trajectory and density measurements, noting particle lag

[AIAA PAPER 71-287]

p0220 A71-22010

Pulse compression and optical data correlation in side-looking radar, considering Doppler effect

p0496 A71-32650

Vortex laser Doppler velocimeter system for aircraft wake turbulence velocity profile mapping, describing optical arrangements, back and forward scattering modes and prototype design

p0548 A71-35756

Beam direction weight center of signal spectrum and effective antenna centers of airborne Doppler velocimeter in horizontal flight

p0609 A71-38496

Dual scatter laser Doppler velocimeters for transonic wind tunnel measurements and calibration applied to simulated helicopter downwash, high lift wing and jet crossflow

p0652 A71-40399

Laser system for atmospheric wind velocity and turbulence, using Doppler frequency shift undergone by radiation beam scattered by particles suspended in flows

p0653 A71-40490

Wing tip vortex test demonstrating use of Laser Doppler Velocimeter system for measuring gas velocities with high spatial and temporal resolution

[NASA-CR-119804]

p0577 N71-30278

## DOPPLER NAVIGATION

Air navigation techniques history, considering radio, radar, loran Doppler and inertial navigation

p0440 A71-30712

Radio and radar air navigation for civil aviation, discussing Doppler effect, inertia and satellite systems

p0599 A71-37344

Doppler scanning landing microwave system for air-derived azimuth and elevation angle aircraft guidance by frequency coding and reference carrier transmission

p0667 A71-42089

Techniques for aerial time-lapse cloud photographic analysis, Doppler navigation data analysis, and photogrammetric data acquisition

p0715 N71-36990

## DOPPLER RADAR

Blind landing by mobile beams and Doppler systems, superseding heavy infrastructure ILS

p0146 A71-17951

Airborne Doppler radar receiver transmitter failure testing by Versatile Avionics Shop Test computer controlled system

p0412 A71-28778

Aircraft wing tip vortex air motion measurements, utilizing Doppler radar techniques

p0653 A71-40489

Performance characteristics of Bendix type DRA-12 airborne Doppler radar system

[FAA-NA-70-50]

p0039 N71-10394

Cooperative Doppler radar system for avoiding midair collisions

[NASA-CASE-LAR-10403]

p0056 N71-11766

Cost effectiveness of pulse Doppler radar in airborne aircraft of early warning system

p0125 N71-13939

Doppler radar measurements of flow generated by wing tip vortices using reflective chaff dispensed into vortices

[NASA-CR-111877]

p0328 N71-20630

Feasibility and design criteria of laser Doppler system for detecting and mapping turbulence levels and wind or velocity profiles in various applications

[NASA-CR-103105]

p0402 N71-24081

Detecting clear air turbulence using CO2 laser Doppler system

p0581 N71-30763

Digital simulation and implementation techniques for Doppler radar altimeter signal processing

[NASA-CR-1776]

p0712 N71-36548

## DORNIER AIRCRAFT

NT DO-31 AIRCRAFT

Do-132 light five seat tip drive turbine helicopter, discussing applications, flight testing, design and major components

p0004 A71-10465

Do-132 turbine powered helicopter, discussing icing problems solution

p0146 A71-17745

Alpha jet trainer, describing design, configuration, power plants, landing gear maintainability and mission duration

p0479 A71-31209

Rotary wing structural stability of Dornier high temperature gas jet helicopter

p0456 N71-24387

## DOWNWASH

Helicopter and V/STOL aircraft external noise and downwash measurements during simulated jungle rescue mission

p0093 A71-15409

Helicopter downwash velocities, noise and airloads, examining rotor tip modification effects

p0093 A71-15410

Turbulent and laminar jet propagation and mixing in rotor downwash field

[DGLR-70-050]

p0130 A71-15961

Unsteady flow downwash behind finite span slender wing during supersonic motion at finite Strouhal numbers

p0368 A71-27697

Two vortex model for downwash variations in supersonic flow past thin delta wing with separation at leading edges

p0533 A71-34190

Critique of paper on spanwise distribution of induced drag in subsonic flow by vortex lattice method, noting infinities in downwash across all vortex lines

p0599 A71-37297

Helicopter experimental fog clearing by downwash mixing at Greenbrier Valley Airport, Lewisburg, West Virginia

p0612 A71-39206

Numerical calculation of trailing vortex sheet pattern behind unstalled swept wing at low speed, obtaining downwash field p0614 A71-39397

Two dimensional flow over two dimensional finite wing without correction for downwash, assuming known pressure distribution p0651 A71-40173

Subsonic force effect calculations on rectangular wings, using downwash velocity potential method p0702 A71-44613

Analytical and numerical calculations for cylinder-vortex combination in incompressible flow noting pressure distribution and downwash [NLR-TR-69057-U] p0169 N71-15548

Numerical analysis of downwash interference on wings of missile tails p0302 N71-19360

Aircraft wake turbulence with downwash loading of wing span [AD-718024] p0398 N71-23660

Numerical evaluation of downwash integral for wing loading of lifting rectangular planform [NPL-MA-90] p0457 N71-24483

Numerical method for evaluating discontinuous downwash distribution for steady flow over swept and rectangular wings p0569 N71-29349

Survey on different methods for lifting rotor downwash analysis [DLR-MITT-70-23] p0569 N71-29395

Mathematical model for induced velocity distribution of lifting rotor in horizontal flight [DLR-MITT-70-22] p0575 N71-30039

Rotary wing downwash influence on fixed wing flow using magnetic induction vortex model [DLR-FB-70-62] p0575 N71-30040

Computer program for numerical integration of downwash subsonic flow about rectangular planforms, for different aspect ratios [NPL-MA-99] p0708 N71-36405

p0420 A71-29383

Ejection system performance in relation to aircraft performance dependent extreme flight conditions, examining ejection seat design features and trajectories

p0420 A71-29385

Feasibility of using flexible rotor blades for ejection systems

[AD-711642]

p0048 N71-11022

Requirements for ejection seat systems

[RAE-LIB-TRANS-1471]

p0051 N71-11042

Nonflammable polyurethane foam for ejection seat cushions and statistical analysis of its mechanical properties

[AD-723302]

p0621 N71-31775

## EJECTORS

High secondary/primary mass ratio multinozzle jet pump /ejector/ operation feasibility

[AIAA PAPER 70-579]

p0082 A71-14452

High entrainment constant area multiple nozzle ejectors with two mixing tube lengths for boundary layer control, estimating performance with analytical model

[ASME PAPER 71-FE-34]

p0421 A71-29469

Low area ratio ejectors internal flow phenomena synthesis, increasing thrust augmentation by mixing and diffusion

[AIAA PAPER 71-576]

p0484 A71-31566

Performance of auxiliary inlet ejector nozzle with floating inlet doors and floating single hinge trailing edge flaps

[NASA-TM-X-2173]

p0239 N71-17554

Auxiliary inlet ejector nozzle designed for supersonic cruise aircraft

[NASA-TM-X-2182]

p0256 N71-18863

## EKNAN LAYER

## U BOUNDARY LAYER TRANSITION

## ELASTIC BARS

C-5A cargo box side wall deformations, examining square plates center deflections with elastic beams

p0297 A71-24871

## SUBJECT INDEX

## ELASTIC BODIES

Normal shock wave interaction with deformable solid walls, determining explosion or sonic booms effects on elastic structures and protection devices

p0291 A71-24483

Dynamic characteristics of weakly damped elastic body, considering complex natural modes generation for vibration tests in aircraft design

p0502 A71-33403

Determination of unsteady forces during wind tunnel test of elastic model by placing wind tunnel model in feedback circuit of servosystem

[NASA-CR-114287]

p0313 N71-19796

## ELASTIC BUCKLING

Buckling for thin stress walled open sections on elastic foundation with constrained direction reinforcement

p0663 A71-41693

## ELASTIC COLLISIONS

## U ELASTIC SCATTERING

## ELASTIC CONSTANTS

## U ELASTIC PROPERTIES

## ELASTIC DAMPING

Power spectral density analysis of aircraft structural response to taxiing produced random vibrations involving landing gear orifice damping and Coulomb friction

p0355 A71-26311

Dynamic characteristics of weakly damped elastic body, considering complex natural modes generation for vibration tests in aircraft design

p0502 A71-33403

## ELASTIC DEFORMATION

## NT ELASTIC BUCKLING

Elastic, inertial and aerodynamic forces aeroelastic triangle, examining lift changes due to aircraft structure deformation, dynamic flight stability and space shuttle development problems

p0196 A71-20063

Elastic swept wing subsonic aerodynamic characteristics, taking into account aerodynamic load redistribution due to aeroelastic deformations

p0222 A71-22035

## ELASTIC MODULUS

## U MODULUS OF ELASTICITY

## ELASTIC PROPERTIES

## NT AEROELASTICITY

## NT ELASTOPLASTICITY

## NT HYDROELASTICITY

## NT MODULUS OF ELASTICITY

## NT THERMOELASTICITY

## NT VISCOELASTICITY

Rigid and flexible pavement design and construction in Europe, discussing unreinforced and crack reinforced slabs and CBR method

p0022 A71-12167

Aircraft elastic mode control for turbulence /gust/ alleviation, noting riding quality, structural fatigue life and peak loads

p0199 A71-20301

Aircraft continuous elastomechanical system parameters determination by ground vibration tests, using integral equation, phase resonance and separation technique

p0298 A71-24946

Equations of motion for elastic plate foundation system under dynamic load applied to aircraft landing

p0717 N71-37543

## ELASTIC SCATTERING

Two phase supersonic barotropic flow with solid particles around thin profile with allowance for elastic particle collisions

p0362 A71-27450

## ELASTIC SHELLS

Critical speeds for inviscid compressible potential flow past thin elastic cylindrical shells, using long wave approximation

p0291 A71-24565

Estimation of stability of elastic noncircular conical and cylindrical orthogonal shells

[AD-717014]

p0329 N71-20754

## ELASTIC STABILITY

## U DAMPING

## ELASTIC SYSTEMS

Elastic structures stability under randomly fluctuating external loads based on statistical

- methods  
 Nonlinear elastic suspension springs with symmetrically hardened behavior for shock and vibration isolation of aerospace instruments and controls  
 p0499 A71-32988  
 p0538 A71-34890
- ELASTIC WAVES**  
 NT AERODYNAMIC NOISE  
 NT AIRCRAFT NOISE  
 NT COMPRESSION WAVES  
 NT DETONATION WAVES  
 NT ENGINE NOISE  
 NT GRAVITY WAVES  
 NT IONIC WAVES  
 NT JET AIRCRAFT NOISE  
 NT MACH CONES  
 NT NOISE (SOUND)  
 NT NORMAL SHOCK WAVES  
 NT OBLIQUE SHOCK WAVES  
 NT PLASMA WAVES  
 NT RIEMANN WAVES  
 NT ROCKET ENGINE NOISE  
 NT SHOCK WAVES  
 NT SONIC BOOMS  
 NT SOUND WAVES  
 Sonic boom wave pressure history prediction on arbitrarily oriented plane walls by explicit fixed mesh time dependent numerical method  
 [ASME PAPER 70-WA/APH-9] p0078 A71-14153  
 Short rotor blade span supersonic fan for pressure wave forward propagation elimination, obtaining acoustic and aerodynamic characteristics  
 [AIAA PAPER 71-182] p0155 A71-18621  
 Pressure wave distortion effects on combustor acoustic mode instability based on model with burning rate related to Reynolds number  
 p0192 A71-19906  
 Flow lines construction in two dimensional supersonic flow region with rarefaction waves interaction from several disturbance sources  
 p0223 A71-22052
- ELASTICITY**  
 U ELASTIC PROPERTIES
- ELASTODYNAMICS**  
 NT ELASTIC DAMPING
- ELASTOMERS**  
 Flame retardant silicone elastomers for use as aircraft construction materials, describing fabrication techniques, mechanical, aging and weathering properties  
 p0362 A71-27412  
 Utilization of aerospace nonflammable cellulosic elastomeric, fibrous, and composite materials in commercial aircraft refurbishment  
 p0581 A71-30759  
 Flight tests of elastomeric bearings in main rotor of AH-1G helicopter  
 [AD-724192] p0636 A71-32935
- ELASTOPLASTICITY**  
 Service life of pin jointed connections with elastoplastic strains in bore walls  
 p0084 A71-14606  
 Neuber elastoplastic analysis of residual notch stresses for improved cumulative damage predictions applied to aluminum alloy under overload  
 [AIAA PAPER 71-776] p0507 A71-34012
- ELASTOSTATICS**  
 Plane and spatial load transfer and diffusion in linear elastostatics, noting application to aircraft and civil engineering structures and fiber reinforced materials  
 p0148 A71-18222
- ELECTRIC APPLIANCES**  
 U ELECTRIC EQUIPMENT
- ELECTRIC ARCS**  
 Maximum length of arc in altitudes up to 9500 ft in 200 volt ac and dc electric aircraft system  
 [RAE-TR-69259] p0520 A71-28063
- ELECTRIC BATTERIES**  
 NT SILVER ZINC BATTERIES  
 NT STORAGE BATTERIES
- ELECTRIC CELLS**  
 Silver zinc batteries and cells case cover materials and sealing techniques for space missions  
 p0207 A71-21097  
 Zinc-silver oxide batteries underwater and aerial applications, designing medium high rate long life
- cells  
 p0207 A71-21102
- ELECTRIC CHARGE**  
 NT ELECTROSTATIC CHARGE  
 Helicopter charging mechanisms, considering engine and rain precipitation charging  
 p0193 A71-19933  
 Supersonic aircraft electrification measurements using projectile frictional charging in ice-fog cloud  
 p0193 A71-19934
- ELECTRIC CIRCUITS**  
 U CIRCUITS
- ELECTRIC COILS**  
 NT MAGNETIC COILS
- ELECTRIC CONDUCTORS**  
 Secondary currents on conducting cylinder near dipole antenna manifested as radio frequency interference, considering effect on radiation pattern  
 p0012 A71-11167  
 Comparison between silicon-magnesium-aluminum alloy and copper aircraft electric conductors and terminals noting types of tests  
 [TRC-BR-19785] p0397 A71-23547
- ELECTRIC CONTROL**  
 Electrohydraulic thrust control system for supersonic transport aircraft engines, considering reliability, performance and weight  
 [SAE PAPER 700819] p0016 A71-11546  
 Aircraft electric systems control by solid state switching, discussing reliability, service life, versatility and compatibility  
 p0016 A71-11627
- ELECTRIC CORONA**  
 Flight testing devices for discharging static electricity from aircraft without production of radio interference  
 p0247 A71-18114
- ELECTRIC CURRENT**  
 NT ALTERNATING CURRENT  
 NT DIRECT CURRENT  
 NT ELECTRIC ARCS  
 NT ELECTRIC CORONA  
 NT ELECTRIC SPARKS  
 NT GAS DISCHARGES  
 NT LIGHTNING  
 Lightning current transfer tests of p-static discharger for aircraft installations  
 p0194 A71-19935  
 Surge voltages produced by transient currents on signal conductors in shielded cables  
 p0195 A71-19946
- ELECTRIC DISCHARGES**  
 NT ELECTRIC ARCS  
 NT ELECTRIC CORONA  
 NT ELECTRIC SPARKS  
 NT GAS DISCHARGES  
 NT LIGHTNING
- ELECTRIC EQUIPMENT**  
 Soviet handbook of aircraft electrical equipment covering DC and turbine powered generators, lubrication materials, electromagnetic interference countermeasures, etc  
 p0422 A71-29530
- ELECTRIC EQUIPMENT TESTS**  
 Electrical and environmental tests on PCM telemetry system for earth resources aircraft  
 [NASA-CR-108700] p0123 A71-13474
- ELECTRIC FIELDS**  
 Electric and magnetic cross field effects on aerodynamics and thermal regime of gas flame cone  
 [AD-712336] p0058 A71-12075  
 Electric analog for measuring induced drag on nonplanar airfoils  
 [NASA-CASE-XLA-00755] p0121 A71-13410  
 Electric analog for measuring induced drag on nonplanar airfoils  
 [NASA-CASE-XLA-05828] p0121 A71-13411
- ELECTRIC FILTERS**  
 NT DIGITAL FILTERS  
 NT LINEAR FILTERS  
 NT OPTICAL FILTERS
- ELECTRIC GENERATORS**  
 NT AC GENERATORS  
 NT DIRECT POWER GENERATORS  
 NT DYNAMOMETERS  
 NT FUEL CELLS  
 NT THERMOELECTRIC GENERATORS

## NT TURBOGENERATORS

Aircraft DC to AC converters frequency stabilization systems, describing circuit diagrams and operation principles

p0079 A71-14247

Aircraft generator service life improvement and weight minimization by close coupling with drive and heat producing components cooling with oil spray and mist

p0149 A71-18463

Soviet book on asynchronous generators for aircraft covering design and operation

p0275 A71-23420

Design optimization of aircraft starting and generating systems, identifying information required and system analysis methods

[SAE PAPER 710392] p0286 A71-24256

STOL aircraft electric power variable frequency generation and high voltage DC distribution with secondary square wave AC distribution

[SAE PAPER 710444] p0407 A71-28325

Soviet book on airplane and helicopter electrical power supply systems covering storage batteries, DC generators, alternators, voltage regulators, current and frequency control, etc

p0422 A71-29525

Integrated drive generator for aircraft electrical power systems, improving weight, life and reliability

p0549 A71-35781

Formulas for determining flying weight of aircraft electric generator systems

[AD-713762] p0161 N71-14649

## ELECTRIC IGNITION

Dual magneto ignition system for business and small military aircraft, describing development, design and test program

[SAE PAPER 710382] p0285 A71-24247

## ELECTRIC LEADS

## U ELECTRIC WIRE

## ELECTRIC MOTORS

Brushless dc motor design and performance tests

[NASA-CR-102942] p0112 N71-12533

Describing angular position and velocity sensing apparatus

[NASA-CASE-XGS-05680] p0239 N71-17585

Analysis of solid rotors used in high speed induction motors for aerospace applications

p0371 N71-21898

Technology review on electric automobiles, and modified T-33 aircraft system for pyrotechnic hail suppression seeding

[DME/NAE-1970/4/] p0378 N71-22198

## ELECTRIC POTENTIAL

Lightning induced voltages in aircraft wing structures, examining induced voltage across load impedances in electric circuits

p0142 A71-17581

Surge voltages produced by transient currents on signal conductors in shielded cables

p0195 A71-19946

Lightning induced voltages in aircraft electrical circuits

[NASA-TN-X-52906] p0039 N71-10391

## ELECTRIC POWER

Electric power source requirements of USAF aircraft, missile and spacecraft electrical systems

p0063 A71-13036

STOL aircraft electric power variable frequency generation and high voltage DC distribution with secondary square wave AC distribution

[SAE PAPER 710444] p0407 A71-28325

Thyristor power conditioning application to high voltage DC electric power system, presenting SST aircraft sample load profiles

p0548 A71-35770

Aircraft electric power system design with reliability, simplicity, low cost, weight and size, discussing automatic circuit protection and energy power

p0549 A71-35780

Remote power controller as static circuit protection device for aircraft and spacecraft automatically controlled electrical wiring system, discussing performance improvement

p0550 A71-35782

## ELECTRIC POWER CONVERSION

## U ELECTRIC GENERATORS

## ELECTRIC POWER PLANTS

## NT NUCLEAR POWER PLANTS

## ELECTRIC POWER TRANSMISSION

Soviet book on airplane and helicopter electrical power supply systems covering storage batteries, DC generators, alternators, voltage regulators, current and frequency control, etc

p0422 A71-29525

High voltage DC electric power transmission systems with ground return, reducing aircraft wiring weight and energy dissipation

p0549 A71-35771

## ELECTRIC PROPULSION

Soviet monograph on electric space propulsion systems theory covering ion and plasma engines, gas turbine engines, nuclear energy sources, solar cells, etc

p0281 A71-24011

## ELECTRIC RELAYS

Plug-in relay hazards and minimization for aircraft flight safety applications

p0412 A71-28841

## ELECTRIC SPARKS

Streamer discharges effects on integrated aircraft antenna and associated avionics, emphasizing RF interference and component damage

p0608 A71-38462

## ELECTRIC STRAIN GAGES

## U STRAIN GAGES

## ELECTRIC TERMINALS

Comparison between silicon-magnesium-aluminum alloy and copper aircraft electric conductors and terminals noting types of tests

[TRC-BR-19785] p0397 N71-23547

## ELECTRIC WELDING

## NT ELECTRON BEAM WELDING

## NT PLASMA ARC WELDING

## ELECTRIC WIRE

Automated electrical wire harness manufacturing for Boeing 747 aircraft, discussing development of numerical control program

p0652 A71-40441

## ELECTRIC WIRING

## U ELECTRIC WIRE

## U WIRING

## ELECTRICAL BREAKDOWN

## U ELECTRICAL FAULTS

## ELECTRICAL CONDUCTIVITY

## U ELECTRICAL RESISTIVITY

## ELECTRICAL ENERGY

## U ELECTRIC POWER

## ELECTRICAL FAULTS

Jet aircraft crash during instrument approach due to electrical systems failure

[NTSB-AAR-70-22] p0043 N71-10812

Laboratory testing of breakdown on Nike-Cajun VHF quadriloop antenna

p0179 N71-16634

Measurements and analysis of lightning-induced voltages in aircraft electrical circuits

[NASA-CR-1744] p0259 N71-19122

## ELECTRICAL IMPEDANCE

Lightning induced voltages in aircraft wing structures, examining induced voltage across load impedances in electric circuits

p0142 A71-17581

## ELECTRICAL LEADS

## U ELECTRIC CONDUCTORS

## ELECTRICAL MEASUREMENT

Lightning induced voltages in aircraft electrical circuits

[NASA-TN-X-52906] p0039 N71-10391

## ELECTRICAL PROPERTIES

## NT ELECTRICAL IMPEDANCE

## NT ELECTRICAL RESISTIVITY

Electrical and physical nature of microbial membranes implicated in aircraft fuel quantity probe malfunction

[SAE PAPER 710439] p0406 A71-28321

Magnitude of induced voltages and their relation to characteristics of lightning discharge and electrical properties of aircraft electrical systems

p0581 N71-30761

## ELECTRICAL RESISTIVITY

Varying electrical resistivity incompressible fluid flow with Hall effect in presence of thin airfoil

p0075 A71-13903

# SUBJECT INDEX

# ELECTROMAGNETIC SHOCK TUBES

- Electrical resistive incompressible fluid motion  
past thin airfoils in oblique field, showing  
inverse dependence of lift on magnetic Reynolds  
number p0280 A71-23956
- ELECTRICITY**  
NT ALTERNATING CURRENT  
NT STATIC ELECTRICITY
- ELECTRIFICATION**  
Supersonic aircraft electrification measurements  
using projectile frictional charging in ice-fog  
cloud p0193 A71-19934  
Static electrification of aircraft when flying  
through clouds and precipitation

Schedule of AGARD conferences for 1971, and

summaries of 1970 AGARD publications

[AGARD-BUL-71/1]

p0259 N71-19114

## ELECTROMAGNETIC WAVES

## U ELECTROMAGNETIC RADIATION

## ELECTROMAGNETS

## NT SUPERCONDUCTING MAGNETS

Characteristics of magnetoaerodynamic flow around blunt bodies

p0104 N71-12212

## ELECTRON BEAM WELDING

Pulsed laser holographic applications to aerospace components nondestructive testing, inspecting electron beam welds and internal structural flaws

[ASME PAPER 71-GT-74]

p0352 A71-25988

Residual stress measurements and heat treatments for electron beam welding of rotating turbine engine parts

p0055 N71-11644

Modern welding methods in aircraft and aerospace industry

p0055 N71-11650

## ELECTRON BEAMS

Ti-Al-V foils by electron beam vapor deposition, discussing metallurgical characteristics

p0132 A71-16237

Rotational temperature and density measurements in high speed gas flow by electron beam fluorescence technique

[AIAA PAPER 71-605]

p0483 A71-31544

Velocity determination in hypersonic low density wind tunnel based on high energy electron beam produced nitrogen ions time of flight

p0538 A71-34887

## ELECTRON DENSITY (CONCENTRATION)

## NT ELECTRON DENSITY PROFILES

## ELECTRON DENSITY PROFILES

Nonequilibrium electron temperature, concentration and reflection in reentry boundary layers, discussing heat transfer and ionization energy diffusion

[AIAA PAPER 69-82]

p0191 A71-19879

## ELECTRON DISTRIBUTION

## NT ELECTRON DENSITY PROFILES

## ELECTRON ENERGY

Nonequilibrium electron temperature, concentration and reflection in reentry boundary layers, discussing heat transfer and ionization energy diffusion

[AIAA PAPER 69-82]

p0191 A71-19879

## ELECTRON MULTIPLIERS

## U PHOTOMULTIPLIER TUBES

## ELECTRON PROBES

Gas density measurement and flow visualization in hypersonic wind tunnel by electron beam probe, noting isobaric boundary layer application

p0652 A71-40395

## ELECTRON RADIATION

## NT ELECTRON BEAMS

## ELECTRON SWEEPING

## U SWEEP FREQUENCY

## ELECTRON TEMPERATURE

## U ELECTRON ENERGY

## ELECTRON TUBES

## NT CATHODE RAY TUBES

## ELECTRONIC CONTROL

Aircraft flaps and ailerons actuators electronic fly by wire control as alternative to mechanical linkages for maneuverability and reliability in flight

p0009 A71-10825

Aircraft electronic control systems, considering hydraulic servocontrol, force simulation and reliability models

p0196 A71-20064

ATC electronic automation systems development for air safety improvements

p0271 A71-22953

Multiple planar Luneberg lens circular array for airborne electronically scanned X band narrow beam antenna mounted under aircraft nose or fuselage

p0446 A71-31038

High speed electronic phase and frequency scanned linear, static fed and monopulse arrays element and angular error analysis

p0447 A71-31049

Dioscures communication satellite system for air traffic control and navigation, discussing aircraft antenna beam electronic scanning by computerized control

p0537 A71-34681

Aircraft electronic or fly by wire control systems, discussing aircraft design fuel-structure weight reduction cycle and control system redundancy requirements

p0598 A71-37200

[AIAA PAPER 71-959]

## ELECTRONIC COUNTERMEASURES

## NT CHAFF

Electronic warfare technology, discussing airborne platforms, battlefield surveillance, jamming devices, homing and warning systems

p0087 A71-15019

Airborne ECM receiver, determining conditions for detecting victim radar signal before signal reflection from aircraft

p0479 A71-31207

## ELECTRONIC EQUIPMENT

## NT AVALANCHE DIODES

## NT ELECTRONIC MODULES

## NT FIELD EFFECT TRANSISTORS

## NT METAL OXIDE SEMICONDUCTORS

## NT PHOTODIODES

## NT RUBY LASERS

## NT SEMICONDUCTOR DEVICES

## NT SOLID STATE DEVICES

## NT THYRISTORS

## NT TRANSISTOR AMPLIFIERS

Aeronautical electronic equipment, discussing static transformer, radiotelephone sets, angle of approach meter, etc

p0062 A71-13018

Avionics for gliders and touring aircraft, considering safety and VHF radio equipment

p0203 A71-20684

Avionics for gliders and touring aircraft, surveying available electronic equipment for 1971

p0213 A71-21768

Avionics growth, discussing use of digital computers, solid state transducers, integrated circuits, electronic flight instruments, area navigation and collision avoidance systems

p0358 A71-26878

Automatic ATC display systems, discussing electronic flight progress strip for telemetry reproduction

p0607 A71-38300

Integrated system for aircraft control and operation with visualization and manual regulation techniques, emphasizing interconnections with onboard electronic equipment

p0699 A71-44353

Interference prediction model for evaluating expected interactions between avionics equipment on aircraft

p0455 N71-24357

Intrusion detector for parked aircraft using sensing technique to detect human touch

p0619 N71-31651

Operational evaluation of capability of bright radar microwave remoting system to provide useful radar data in satellite control tower

p0646 A71-33788

[FAA-RD-71-48]

## ELECTRONIC EQUIPMENT TESTS

Multiple dialect automatic test language for avionics industry, considering software design

p0063 A71-13077

Automatic RF and microwave test equipment for communication, navigation, radar and tactical systems

p0063 A71-13083

Versatile Avionic Shop Test /VAST/ general purpose digital tester, discussing hardware and software

p0063 A71-13084

Automatic digital test unit for avionics systems

p0063 A71-13085

# SUBJECT INDEX

# EMPLOYMENT

Software cost estimates for automatic test equipment for avionic support analysis p0063 A71-13086

User requirements of Versatile Avionic Shop Test /VAST/ computer controlled automatic test equipment, including documentation, compatibility, assurance plan, etc p0064 A71-13087

STOL navigation equipment and microwave landing instruments test programs, noting data recording and flight operations p0068 A71-13286

VC-10 aircraft ILS electronic equipment reliability tests p0101 A71-15873

Microelectronic circuits reliability in aircraft engine control applications, discussing testing and selection for severe temperature and vibration environments [SAE PAPER 700822] p0209 A71-21369

Airborne Doppler radar receiver transmitter failure testing by Versatile Avionics Shop Test computer controlled system p0412 A71-28778

Computer program for prediction of repair time elements for versatile avionic shop test p0501 A71-33314

Aircraft onboard equipment tests in air navigation aid satellite project, estimating tracking random errors p0559 A71-36509

Tests for determining spectral signatures of integrated high-frequency antenna systems for P-3 aircraft [AD-718054] p0398 N71-23609

Development and testing of VHF omnirange transmitter for aircraft azimuth guidance [FAA-RD-71-65] p0687 N71-35779

**ELECTRONIC LEVELS**  
U ELECTRON ENERGY  
**ELECTRONIC MODULES**  
Low carrier power aircraft antenna module for airborne UHF communications system, considering range/field strength measurements p0446 A71-31046

**ELECTRONIC SWITCHES**  
U SWITCHING CIRCUITS  
**ELECTRONICS**  
Electronics - Conference, Chicago, December 1970 p0202 A71-20401  
Aerospace electronics - IEEE Conference, Dayton, Ohio, May 1971 p0547 A71-35752

**ELECTRONS**  
NT HIGH ENERGY ELECTRONS  
**ELECTROPLATING**  
Hypersonic low density wind tunnel including auxiliary equipment for electroforming and electroplating wind tunnel models [BMW-FB-W-70-51] p0253 N71-18593

**ELECTROSTATIC EFFECT**  
U ELECTRIC CURRENT  
**ELECTROSTATIC CHARGE**  
Static dissipator additives in aviation fuels for eliminating electrostatic charging hazards p0023 A71-12300  
Static discharge hazards for aircraft, discussing causes for static charge build-up, dangers and precautionary methods during refueling operations p0186 A71-19424  
Electrostatic charging noise measurement, reduction and flight test verification p0194 A71-19937  
Electrostatic charge by JP-5 jet fuel at truck fill stand with 30-second relaxation chamber and bottom loading [AD-717347] p0378 N71-22232

**ELECTROSTATIC EROSION**  
U SPARK MACHINING  
**ELECTROSTATIC FIELDS**  
U ELECTRIC FIELDS  
**ELECTROSTATIC PLASMA**  
U PLASMAS (PHYSICS)  
**ELECTROSTATIC SHIELDING**  
Radome lightning protection systems involving electrostatic shield, considering effect on electromagnetic characteristics and radiation patterns of nearby antennas p0608 A71-38450

**ELEMENTARY PARTICLES**  
NT HIGH ENERGY ELECTRONS  
NT LIGHT BEAMS  
**ELEVATORS (CONTROL SURFACES)**  
Automatic gust alleviation system employing inertial sensors and feedback devices with wing flaps and elevators, considering linkage control, noninteracting control and split control p0340 A71-25195  
Sailplane elevator induced maneuvering and horizontal tail surface loads, discussing airworthiness requirements p0418 A71-29256  
Lockheed L-1011 development, discussing flying stabilizer design, direct lift control and autoland system [ATAA PAPER 71-782] p0545 A71-35532  
Aircraft landing lift decay and elevator oscillation analysis [ABC-CP-1119] p0171 N71-15722

**ELEVONS**  
Elevons as longitudinal and lateral control elements on low aspect ratio wings, calculating subsonic and supersonic aerodynamic characteristics p0416 A71-29190  
Supersonic or hypersonic vehicle control system comprising elevons with hinge line sweep and free of adverse aerodynamic cross coupling [NASA-CASE-XLA-08967] p0515 N71-27088

**ELLIPTICAL CYLINDERS**  
Sting-free aerodynamic drag measurement on ellipsoidal cylinders in subsonic wind tunnel at transition Reynolds numbers p0554 A71-36037  
Mathematical models for acoustic scattering by porous elliptic cylinder with nonlinear resistance [NASA-TM-X-67019] p0334 N71-21408

**ELLIPTICITY**  
Elliptical cones at large angle of attack, calculating three-component real gas properties effects on aerodynamic characteristics p0417 A71-29191  
Lifting line equation inversion for twisted wings of elliptic planform with arbitrary spanwise upwash p0671 A71-42838  
Solutions of potential flow for two dimensional compressible flow for quasi-elliptical airfoil profiles noting pressure distribution [NLR-TR-69028-U] p0622 N71-31791

**EMANATION**  
U EMISSION  
**EMBRIITLEMENT**  
Metal embrittlement by gaseous hydrogen, discussing countermeasures against hydrogen metal interaction and cracking p0665 A71-41999

**EMERGENCY LIFE SUSTAINING SYSTEMS**  
Aircraft emergency evacuation illumination standards, considering independent power source, crash survivable installation, operation initiation and exit visibility p0001 A71-10030

**EMISSION**  
NT ELECTROLUMINESCENCE  
NT FLUORESCENCE  
NT PHOTOELECTRIC EFFECT  
NT X RAY FLUORESCENCE  
Stratified charge engine tests to determine exhaust emission characteristics [AD-727745] p0729 N71-38760

**EMISSION SPECTRA**  
Complex noise emission spectra from superposition of continuous component and peaks, calculating level separations due to perfectly reflecting plane p0437 A71-30523

**EMISSOGRAPHS**  
U RECORDING INSTRUMENTS  
**EMOTIONAL FACTORS**  
Short haul STOL aircraft transport system, discussing neighborhood stolport ownership, technical feasibility and economic, emotional, ecological and sociological viability p0071 A71-13618

**EMPLOYMENT**  
Employment opportunities for economists and air transportation analysts with Civil Aeronautics Board p0242 N71-17798

Economic analysis of airport construction in north central Texas region, emphasizing employment and dollar value of purchases p0246 N71-18099

**ENCEPHALITIS**  
Using helicopter for spray dusting forests with DDT for tick borne encephalitis [AD-703998] p0571 N71-29557

**ENERGY ABSORPTION**  
NT ELECTROMAGNETIC ABSORPTION

**ENERGY CONVERSION**  
Aerodynamic noise scattering near Lighthill multiples, considering intense near-field energy conversion into sound waves p0356 A71-26448

**ENERGY CONVERTERS**  
U DIRECT POWER GENERATORS

**ENERGY DISSIPATION**  
Turbulence level effects on aerodynamic losses of axial flow turbomachines, discussing boundary layer of blades p0066 A71-13143  
Secondary losses in plane compressor grid with low aspect vanes, discussing flow characteristics dependence on fins, protruding elements and smoothed junctions p0156 A71-18705  
Centrifugal compressor vaneless diffuser, estimating energy losses with hydrodynamic model p0208 A71-21266  
Radial flow energy losses in rotating cylindrical cascade of inward-flow turbine wheel, determining profile losses and exit blade angle p0222 A71-22044  
Reynolds number effects on centrifugal compressor performance characteristics, discussing power losses in compressor, impeller and diffuser stages and compressor adiabatic efficiency [ASME PAPER 71-GT-25] p0350 A71-25967  
Air bypass behind compressor into variable area exhaust nozzle, obtaining energy losses from gas turbine jet engine indices p0410 A71-28586  
High voltage DC electric power transmission systems with ground return, reducing aircraft wiring weight and energy dissipation p0549 A71-35771  
Simultaneous radar and instrumented aircraft observations in clear air turbulent layer for eddy dissipation rates calculation p0612 A71-39207  
Flutter suppression with dissipated energy reduced to quadratic form for control surfaces [NASA-TN-D-6199] p0388 N71-23091

**ENERGY DISTRIBUTION**  
NT SPECTRAL ENERGY DISTRIBUTION  
High subsonic jet near-field acoustic energy flux distribution calculation from pressure gradient measurements [AIAA PAPER 71-195] p0154 A71-18597  
Energy state approximation and supersonic aircraft minimum fuel fixed range trajectory optimization, noting not convex velocity set p0439 A71-30609

**ENERGY EXCHANGE**  
U ENERGY TRANSFER

**ENERGY LOSSES**  
U ENERGY DISSIPATION

**ENERGY METHODS**  
Three dimensional minimum fuel turns for supersonic aircraft by energy state approximation [AIAA PAPER 71-913] p0596 A71-37163

**ENERGY SOURCES**  
Hot jet aerodynamic parameters from emissions of electromagnetic and acoustic energies by crossed beam IR probing p0436 A71-30520

**ENERGY STORAGE**  
NT HEAT STORAGE

**ENERGY TRANSFER**  
Optimization of slot angle, slot positioning and flow quantity affecting boundary layer control in energy transfer over airfoil profiles p0273 A71-23201

**ENGINE CONTROL**  
NT ROCKET ENGINE CONTROL  
NT TURBOJET ENGINE CONTROL  
Electrohydraulic thrust control system for supersonic transport aircraft engines, considering

reliability, performance and weight [SAE PAPER 700819] p0016 A71-11546  
Concorde aircraft Olympus 593 two-spool turbojet engine, discussing variable nozzle and intake assembly, afterburner and control system p0183 A71-19081  
Aerospace Recommended Practice for gas turbine engine steady state performance presentation for digital computer programs, describing engine type, operating and control characteristics [SAE-ARP-681B] p0187 A71-19647  
Experimental arrangement for delay times in propeller/rpm controller system p0205 A71-20832  
Microelectronic circuits reliability in aircraft engine control applications, discussing testing and selection for severe temperature and vibration environments p0209 A71-21369  
D-30 bypass engine hydraulic control system for Tu-134 aircraft, discussing fuel flow regulator assembly and operation p0270 A71-22947  
Turboprop and turboshaft engine control requirements, showing torque and power dependence on engine speed and control block diagrams p0293 A71-24755  
Twin spool turbojet engine dynamic response, discussing simulator predictions, digital computer control, nozzle area variations and operating trajectories [ASME PAPER 71-GT-14] p0349 A71-25960  
Linear two shaft turbojet model development and conditions for stability, observability, controllability and feedback loop parameters p0496 A71-32711  
Multivariable frequency response methods for feedback control design for aircraft gas turbines, involving digital test bed trials p0611 A71-38989  
Coupled supersonic inlet-engine control using overboard bypass doors and engine speed to control normal shock position [NASA-TN-D-6019] p0117 N71-13080  
Dynamics and control of supersonic propulsion systems p0309 N71-19462  
Supersonic inlet engine control using engine speed as primary variable for controlling normal shock position [NASA-TN-D-6021] p0328 N71-20674

**ENGINE COOLANTS**  
Fan jet first stage turbine blade air cooling, describing design, heat transfer data, efficiency and temperature distribution p0552 A71-35904

**ENGINE DESIGN**  
Jet engine evolution, considering thrust, combustion chamber, fans, high-pressure-ratio compressors and turbine inlet temperature p0013 A71-11181  
RB 211 turbofan engine design, emphasizing modular construction, systems integration, maintainability and noise reduction p0018 A71-11682  
M49 Larzac turbofan engine, describing design, development, performance data, manufacturing techniques, operation and maintenance p0026 A71-12607  
Blade bound vortex system mathematical model for optimum heavily loaded ducted fans, including thrust, power and efficiency design parameters p0027 A71-12677  
Soviet book on aircraft power plant systems and devices covering layout, engine attachment, propellers, control, fuel and oil systems, fire fighting, monitoring, etc p0028 A71-12722  
Tubular gas turbine engine combustor design by combining turbulent flame speed, microvolume burning and stirred reactor models p0029 A71-12852  
Turbomachinery R and D to improve components and engine performance p0074 A71-13824  
Axial flow compressor design emphasizing component efficiency p0074 A71-13825

- High bypass ratio jet engine noise reduction in relation to mission requirements  
[ASME PAPER 70-WA/GT-13] p0076 A71-14121
- High bypass ratio fan engine design for low noise, discussing acoustic treatment, turbine noise and modulation tones  
[ASME PAPER 70-WA/GT-14] p0077 A71-14122
- Composite propulsion systems including Turbo-Ram-Scramjet, Ejector Ramjet, Hyperjet and Bi-liquid Ramjet Rocket  
p0089 A71-15285
- VTOL aircraft engine air particle separator development, examining airframe and engine design  
p0096 A71-15433
- Helicopter turbine engine protection device design guidelines  
p0097 A71-15434
- Book on fixed and rotary winged aircraft air cooled piston engine design, performance and maintenance in business and military operators manual terminology  
p0138 A71-17125
- Soviet book on aircraft gas turbine and internal combustion engines covering structural design schemes, inlet devices, combustion chambers, materials, compressors, etc  
p0203 A71-20674
- Combustor design for minimum exhaust smoke emission from aircraft gas turbine jet engines, considering air pollution  
p0206 A71-20867
- Multistage gas turbine design optimization, using parameter and component analysis with computer calculations  
p0208 A71-21267
- Design point selection on fan characteristic curve of turbofan engines, discussing bypass ratio effect on specific impulse, flight velocity and turbine inlet temperature  
p0222 A71-22042
- Cost reduction concepts in gas turbine engine design and fabrication for general aviation aircraft  
p0268 A71-22811
- Centrifugal compressor fluid dynamics, discussing unresolved problems governing design and performance prediction  
p0284 A71-24216
- High pressure ratio radial outflow compressor analysis, design, construction and testing  
p0284 A71-24217
- Small high pressure ratio single-stage centrifugal compressor design, testing and efficiency  
p0284 A71-24219
- Light aircraft piston engines design and maintenance, discussing engine design features, materials, lubrication, controlled flight operation and maintenance techniques  
[SAE PAPER 710381] p0285 A71-24246
- Inclined engine cold circular jet effects on tail control surfaces aerodynamic characteristics, considering aircraft longitudinal stability  
p0291 A71-24593
- Lift/cruise engine design and thrust vector control influence on VTOL transport aircraft transition characteristics and ground acoustic field  
[DGLR-70-040] p0292 A71-24749
- VTOL lift fan engine design for minimum noise levels, noting silencers application  
p0292 A71-24750
- VTOL heat engine and propulsion system design and performance, citing Pegasus jet lift engine as compromise between takeoff and cruise function  
p0293 A71-24751
- Turbofan VTOL or STOL intercity aircraft, examining high bypass lift engine design  
p0296 A71-24861
- Lightweight high performance regenerative gas turbine designs for aircraft propulsion, comparing various compressor, turbine, combustor and recuperator arrangements  
[ASME PAPER 71-GT-67] p0351 A71-25983
- Low cost short life gas turbine design based on parametric performance and component selection, outlining turbojet production  
[ASME PAPER 71-GT-69] p0352 A71-25984
- Vertical straight lift turbojet engine design and development, presenting component materials properties/weights, endurance tests and performance data  
[ASME PAPER 71-GT-75] p0352 A71-25989
- Supersonic turbine design, presenting performance data for film cooled blunt leading edge rotor blades measured in two dimensional cascade experiments  
[ASME PAPER 71-GT-76] p0352 A71-25990
- Boron-glass-epoxy lightweight composite gear case for aircraft engine reduction gearbox, describing design, molding, machining and testing  
[ASME PAPER 71-GT-85] p0353 A71-25993
- Design and fabrication of Borsic aluminum composite fan blades for supersonic turbofan engines, considering 430 F application without severe vibratory stress  
[ASME PAPER 71-GT-90] p0353 A71-25997
- Convertible fan/shaft engine for V/STOL tactical and transport aircraft, detailing mechanical arrangement, design and performance  
p0353 A71-26054
- Gas field nonuniformity as function of turbine engine combustion chamber design parameters, discussing hot tube circumferential holes total area effect  
p0364 A71-27501
- VTOL propulsion, discussing gas turbine pressure ratio inlet temperature and lifting and high bypass fans  
p0403 A71-27838
- Olympus 593 pure jet twin shaft engine development program for Concorde, discussing engine evolution, design considerations and flight development  
[SAE PAPER 710422] p0405 A71-28309
- High temperature aircraft gas turbine engine design, discussing developments in manufacturing processes, materials, cooling techniques, aerodynamic and mechanical design improvements  
[SAE PAPER 710462] p0408 A71-28335
- STOL aircraft/engine integrated systems for medium distance air transportation, discussing tradeoff factors involving performance, noise, weight and cost  
[SAE PAPER 710469] p0408 A71-28337
- Subsonic and supersonic turbojet aircraft engines development, discussing design, operation, reliability, weight, fuel consumption and cost  
p0428 A71-29811
- Aircraft jet engines technological progress review over past 25 years, emphasizing industry economics considerations  
p0432 A71-30303
- Transport aircraft JT9D high bypass ratio engine development, noting maintainability and stability improvements  
[SAE PAPER 710419] p0437 A71-30527
- Aircraft JT9D engine development for airline operation, discussing construction, condition monitoring, maintenance, noise and smoke reduction  
[SAE PAPER 710434] p0437 A71-30528
- Design interface requirements for optimal aircraft engine condition monitoring system, using parameter, vibration, oil, borescope and radiography analysis  
[SAE PAPER 710447] p0438 A71-30531
- Space shuttle airbreathing propulsion systems requirements and design studies, considering cruise, landing, go-around and ferry capabilities  
[AIAA PAPER 71-662] p0441 A71-30731
- STOL commercial aircraft propulsion systems, considering two stream augmentor wing engine and high bypass ratio three stream engine  
[AIAA PAPER 71-746] p0480 A71-31325
- French SNECMA M56 turbofan engine design for medium capacity airliners, featuring low specific fuel consumption and low noise level  
p0496 A71-32692
- Jet engine combustion chamber design, considering air supply and geometrical criteria  
p0501 A71-33344
- Gas turbine design advances for helicopter powerplants, illustrating by Turbomeca engines  
p0502 A71-33416
- VTOL transport optimal airframe/propulsion systems design, discussing thrust requirements, performance, control, cruise functions, fuel consumption and fan characteristics  
[AIAA PAPER 71-744] p0533 A71-34225

 Supersonic combustion chemistry and mixing of high energy density fuels related to advanced air-breathing engine design, using boron particles [AD-727782] p0727 N71-38530  
 Analysis of gas turbine design and application to aircraft operation with description of components, safety factors, and vibration problems [AD-727188] p0727 N71-38538

## ENGINE FAILURE

Equivalent test results, studying damaging factors in aircraft engine compared with regular tests p0207 A71-21115  
 VTOL propulsion systems safety requirements, considering single and double breakdowns p0293 A71-24752  
 Optimum weight protective system against uncontained rotor failure with radial fragment passage through turbine engine casing [ASME PAPER 71-GT-70] p0352 A71-25985  
 Aircraft accidents due to engine-out simulation, discussing human factors, minimum control speed certification requirements and pilot flight training procedures [AIAA PAPER 71-793] p0508 A71-34025  
 In-flight monitoring of aircraft turbine engine reliability p0692 A71-43233  
 Investigating aircraft crash landing caused by engine failure and aircrew errors [NTSB-AAR-70-17] p0227 N71-17063  
 Effects of turbojet engine unstart on engine operation and characteristics of stall propagation through compressor and inlet system [NASA-TN-X-2192] p0248 N71-18138

**ENGINE INLETS**  
 Twin jet aircraft engine installation effects and exhaust nozzle integration, noting closely spaced inlet interference [ICAS PAPER 70-47] p0067 A71-13148  
 Inlet particle separators for engine erosion prevention, discussing tests of various models for separation efficiency, clogging resistance, pressure loss and flow distortion p0097 A71-15435  
 Gas turbine aircraft engine compressor blades foreign object ingestion control by inlet vortex flow suppression jets, indicating wind tunnel air intake applications p0145 A71-17696  
 Mathematical model of nonstationary intake and exhaust gas motion in two cycle internal combustion engine cylinders p0204 A71-20780  
 Turbocharged diesel engine precompressed inlet air cooling by evaporation cooling, considering water injection effects on centrifugal compressor p0204 A71-20781  
 Air temperature effects on internal combustion engines intake process, using similarity theory p0204 A71-20782  
 Real time remote test site computation and display of complex engine inlet distortion parameters from dynamic pressure signal, using analog computer p0267 A71-22726  
 Engine inlet noise prediction from static test and flyover data as function of time at various observer locations, examining suppression effects on total spectra [SAE PAPER 710386] p0286 A71-24250  
 Supersonic transport inlet-engine-airframe compatibility programs, noting exhaust nozzle installation effects, distortions and noise [AIAA PAPER 68-993] p0295 A71-24854  
 Aircraft propulsion system testing, stressing noise reduction and inlet-engine exhaust system compatibility [SAE PAPER 710450] p0407 A71-28328  
 HF rake probes with high temperature integrated sensor for inflight aircraft engine intake air flow distortion measurements p0433 A71-30321  
 Engine surge pressure transients in mixed-compression supersonic inlet, describing scale wind tunnel model simulation and measurement techniques [AIAA PAPER 71-671] p0441 A71-30735  
 Measuring distortion characteristics at engine face station of axisymmetric inlet [NASA-CR-1644] p0104 N71-12211  
 Coupled supersonic inlet-engine control using overboard bypass doors and engine speed to control normal shock position [NASA-TN-D-6019] p0117 N71-13080  
 Mach 2 slender wing boundary layer effects on Concorde aircraft engine inlets [ARC-CP-1122] p0171 N71-15708

- Ingestion of debris into aircraft engine inlets during takeoff

## ENVIRONMENT MODELS

Random access signaling system application to aircraft control, discussing signal redundancy requirement for access capability optimization based on radio environment model  
p0550 A71-35783

## ENVIRONMENT POLLUTION

## NT AIR POLLUTION

## NT WATER POLLUTION

Commercial SST environmental effects on stratospheric air, water vapor content and earth surface temperature  
p0013 A71-11178

Short haul air transportation technological factors for VTOL, STOL, CTOL and light aircraft, considering operating costs, passenger service and environment impact  
[AIAA PAPER 70-1287]  
p0018 A71-11700

Direct lift V/STOL transport aircraft design, discussing environmental factors in relation to noise, air pollution, jet interference and safety  
p0092 A71-15403

Airborne surveillance for environmental management, discussing earth resources program, aerial sensors for thermal water pollution, crop disease, salinity and geological structure  
p0183 A71-19080

Environment degradation relation to technology, discussing priorities  
[AIAA PAPER 71-1016]  
p0701 A71-44597

Environmental impact of supersonic transport  
p0238 A71-17545

Annotated bibliography on noise pollution-sonic booms  
[AD-722910]  
p0675 A71-34023

## ENVIRONMENT SIMULATION

## NT ACOUSTIC SIMULATION

## NT ALTITUDE SIMULATION

## NT THERMAL SIMULATION

ATC communication environment simulation via mathematical model based on ATC statistics  
p0011 A71-10979

## ENVIRONMENT SIMULATORS

## NT LUNAR GRAVITY SIMULATOR

## ENVIRONMENTAL CONTROL

Lyons-Satolas /France/ International Airport project, discussing layout, facilities and noise control problem  
p0143 A71-17590

Air pollution emissions at Heathrow Airport, London, from aircraft operations, heating installations and road traffic  
p0214 A71-21823

National Air Pollution Control Administration control of aircraft engine pollutant emissions covering measurement, test instrumentation, research, standards and regulations  
p0216 A71-21831

Federal assistance to air transportation, considering airport development-environment conflicts  
p0216 A71-21834

Airport system planning for natural and urban environment compatibility  
p0216 A71-21835

Piper Cherokee aircraft air conditioning system, discussing various operating principles, design criteria, power drain, effects on aircraft performance and weight, system serviceability and control  
[SAE PAPER 710391]  
p0286 A71-24255

Aircraft and airports as air pollution sources, stressing industries understanding of applicable control technology  
p0492 A71-32243

Airport environmental protection, discussing area-wide agency, FAA planning grant program and legal aspects  
p0492 A71-32247

Subscale modeling of aircraft trailing vortices in controllable laboratory environment  
p0653 A71-40488

Environment degradation relation to technology, discussing priorities  
[AIAA PAPER 71-1016]  
p0701 A71-44597

SST operation climatic impact assessment program, considering carbon dioxide, water vapor, contrails, particulates, nitrogen oxides and carbon monoxide

Performance of aircraft environmental control systems under simulated tactical conditions  
[AD-719101]  
p0457 A71-24461

## ENVIRONMENTAL ENGINEERING

Airport system planning from environmental viewpoint, discussing travel market, airport accessibility, airspace utilization and control and land use  
p0017 A71-11642

Reliability and maintenance problems of U.S. Army operational environment, noting inadequate design and test criteria during development  
p0092 A71-15402

Sand and dust effects on military helicopter flight controls and equipment service life, discussing relief program  
p0096 A71-15430

Aircraft and environment - Conference, New York, February 1971, Part 1  
p0213 A71-21811

Aircraft and environment - Conference, Washington, D.C., February 1971, Part 2  
p0492 A71-32240

Aircraft/environment compatibility, emphasizing decision making process for airport planning, site location, development and operation  
p0493 A71-32248

Computing dispersal of atmospheric pollutants near airports by use of mean wind and temperature profiles  
[NASA-CR-111962]  
p0713 A71-36720

## ENVIRONMENTAL TEMPERATURE

## U AMBIENT TEMPERATURE

## ENVIRONMENTAL TESTS

## NT COLD WEATHER TESTS

## NT CORROSION TESTS

## NT HIGH TEMPERATURE TESTS

## NT SALT SPRAY TESTS

Ti alloy hot salt stress corrosion under simulated engine environmental conditions, presenting threshold data based on residual tensile ductility  
p0029 A71-12885

AH-56A Cheyenne compound helicopter icing spray rig tests, discussing ice protection systems design and operating performance  
p0097 A71-15438

Environmental development and testing of OH-58A light observation helicopter for close ground support, noting particle separator and injection seals  
p0097 A71-15439

Supersonic transport fuel tank environments and sealant requirements, describing Boeing laboratory environment approach  
p0275 A71-23424

Concorde environmental testing, considering endurance tests, thermal shock rigs and plant for simulating air supply from compressor stages of aircraft gas turbine engines  
p0276 A71-23583

Corrosion resistance of adhesive bonded airframe structure components under outdoor weather and salt spray conditions, discussing test results with Al alloy specimens  
p0278 A71-23690

Plastics as potting compounds in military aircraft electrical systems, investigating resistance to reversion and hydrolytic stability  
p0283 A71-24115

Pincap communication antennas design and environmental tests for vibration, acceleration, waterproofing, salt corrosion, ice formation and compass safe distance  
p0446 A71-31047

Environmental effects on SST structural materials fatigue, discussing Ti alloys studies involving temperature effects, crack propagation and residual strength  
p0535 A71-34556

Electrical and environmental tests on PCM telemetry system for earth resources aircraft  
[NASA-CR-108700]  
p0123 A71-13474

Environmental tests of VORLOC 2 simplified directional approach system to determine compliance with FAR-Part 171  
[FAA-RD-71-12]  
p0328 A71-20666

Airfield tests of specially formulated marking paints for asphalt pavements

[AD-716755] p0335 N71-21523  
 Test procedures for aircraft defogger/defroster equipment  
 [AD-719109] p0457 N71-24452  
 Development, testing, and utilization of silver iodide pyrotechnic cloud seeding system  
 [ESSA-TM-ERLTM-APCL-5] p0715 N71-36985  
 Environmental and performance tests of voice initiated cockpit control and interrogation system  
 [AD-727574] p0721 N71-37723

 NT HIGH TEMPERATURE ENVIRONMENTS  
 NT MESOSPHERE  
 NT THERMAL ENVIRONMENTS

## EPOCHS

U TIME MEASUREMENT

## EPOXY RESINS

Nonmetallic aircraft construction materials, discussing wood epoxy and polyester resins  
 p0023 A71-12299  
 Carbon fiber reinforced epoxy composites, evaluating application as helicopter tail rotor blade material  
 p0024 A71-12477  
 Carbon fiber-epoxy resin composites in aircraft industry, examining fatigue life, cost, specific moduli and mechanical properties  
 p0024 A71-12488  
 Aluminum reinforced epoxy model making, testing and stress analysis for aircraft structures, including creep, photoelastic coating and strain gage effects  
 p0132 A71-16346  
 High peel strength epoxy and urethane adhesives for aircraft bonding, discussing high temperature curing and honeycomb panel repair  
 p0282 A71-24064  
 Filamentary composites for primary aircraft structural applications, emphasizing boron-epoxy material  
 p0293 A71-24770  
 Boron-epoxy structural skins design for F-14 honeycomb horizontal stabilizer, using computer program  
 p0344 A71-25420  
 Graphite-epoxy composite skins for commercial aircraft flight spoiler, discussing multiangle ply design and fabrication  
 p0362 A71-27413  
 Monograph on fiber-resin composites covering glass, boron and carbon fibers and epoxy matrix materials tensile and thermoelastic properties  
 p0534 A71-34469  
 Boron-epoxy composite wing box beam design, describing preliminary weight estimation from layouts  
 [SAWE PAPER 891] p0551 A71-35815  
 Design, fabrication and tests of boron/epoxy reinforced stringers for CH-54B tail cone  
 [NASA-CR-111929] p0674 N71-34013  
 Structural analysis of tail cone of CH-54B helicopter reinforced with boron/epoxy stringers  
 [NASA-CR-111930] p0674 N71-34014

## EQUATIONS OF MOTION

NT KINEMATIC EQUATIONS

NT NAVIER-STOKES EQUATION

Time vector method extension to equations of motion with real roots, noting applications to aircraft flight control problems  
 p0147 A71-18049

Cavitation flow of fluid with free surface past underwater wing with jet flap, solving equations of motion for thin foil with jet emergent from trailing edge  
 p0197 A71-20086

Aircraft optimum minimum noise takeoff profile, solving by equations of motion system for jet aircraft  
 p0204 A71-20779

Nonlinear aerodynamic moment system for nonaxisymmetric bodies free flight motion analysis, taking into account interactions excluded in classical treatment  
 [AIAA PAPER 71-275] p0219 A71-22000

Small parameter method in gyrocompass theory, deriving differential equations for motion of

sensitive element of two rotor gyrocompass  
 p0279 A71-23804  
 Wing aperiodic motion during change from one frequency to another, using Laplace and Fourier transforms to reduce partial to ordinary differential equation  
 p0289 A71-24353

Thin delta wing in hypersonic inviscid flow at small angles of attack, calculating motion equations and boundary conditions at small perturbations  
 p0362 A71-27330

Plate and acoustic finite elements simulation of window-room system coupled transient response to sonic booms, discussing equations of motion and cavity depth effect  
 p0364 A71-27481

Equation for motion of buoyant free vortices in inviscid fluid subjected to gravity  
 [AIAA PAPER 71-604] p0483 A71-31543

Hingeless rotor stability characteristics at high advance ratios, examining equations of motion and time variant aerodynamic coefficients  
 [AIAA PAPER 71-580] p0484 A71-31569

Computerized solutions of gas turbine engines motion equations, considering Euler, fourth order and fifth order Runge-Kutta, Adams, Bashforth and implicit methods  
 p0561 A71-36809

Natural vibrations of two coaxial rotors with unbalanced disk and different angular velocities, solving equations of motion by energy balance method  
 p0600 A71-37536

Developing mathematical model for tandem rotor helicopter for analysis of automatic approach and landing system  
 [NASA-TM-X-66493] p0106 N71-12225

Determining equations of motion and aerodynamic characteristics for Magnus rotors by flight tests  
 [AD-716345] p0310 N71-19560

Computerized solution of nonlinear differential equations for inertial navigation systems  
 [AD-717058] p0329 N71-20765

Accelerated supersonic motion of plane at finite angle of attack  
 [NASA-TT-P-13525] p0391 N71-23278

Equations of motion for time vector calculus for aircraft lateral stability  
 [ARC-R/M-3631] p0515 N71-27097

Integral equations of motion and momentum for hypervelocity wind tunnel nozzle design  
 [AD-722346] p0574 N71-29906

Notation and nomenclature for equation of motion of aircraft dynamics  
 [ARC-R/M-3562-PT-3] p0635 N71-32875

First order motion of cable towed and tethered bodies for predicting aircraft dynamic stability performance  
 [VKI-TN-68] p0639 N71-33116

Equations of motion for elastic plate foundation system under dynamic load applied to aircraft landing  
 p0717 N71-37543

## EQUILIBRIUM EQUATIONS

Supersonic panel flutter and aerodynamic load stress analysis of finite cylindrical shells based on Galerkin method and aeroelastic equilibrium equations  
 [AD-722447] p0589 N71-31183

## EQUILIBRIUM FLOW

Reactive equilibrium hypersonic gas flow over slender pointed body, neglecting rate chemistry  
 p0272 A71-23054

Equilibrium air boundary layer flows at three dimensional stagnation points, discussing flow characteristics and real gas heat transfer parameters  
 [AIAA PAPER 70-809] p0367 A71-27582

Trailing vortex pair behind aircraft, presenting equilibrium characteristics and effects on safety  
 p0656 A71-40504

Steady state inflated shape and included volume of 24 and 30 gore flat circular, extended skirt, porous ring slot, and porous ribbon parachutes  
 [AD-718808] p0393 N71-23387

Stability of equilibrium state of rotor in pressurized gas bearing  
 [AD-722828] p0589 N71-31213

## EQUILIBRIUM METHODS

Nonlinear panel flutter analyses by perturbation and harmonic balance methods  
[NASA-CR-111907] p0467 N71-25362

## EQUIPMENT SPECIFICATIONS

Flight simulators procurement and commissioning, discussing difficulties due to different aircraft configurations, advantages of equipment and procedures standardization, etc pC001 A71-10015

Aerospace engine starting systems military and industry specifications and standards, considering cartridge pneumatic, electric, gas turbine, hydraulic and mechanical types p0001 A71-10103

Collision avoidance system flight test and evaluation program for airline industry CAS specification p0030 A71-12896

IFR design requirements for STOL navigation equipment from flight tests p0095 A71-15424

Light aircraft engine lubricating oil filter types and model specification, noting dirt holding ratings [SAE PAPER 710383] p0285 A71-24248

Expandable structures for midair pilot rescue device with hot air filled BALLUTE, discussing BALLUTE material development [AIAA PAPER 71-402] p0341 A71-25278

Aircraft industry materials development, discussing innovations in governmental programs management, procurement specifications and Department of Defense contracting procedures p0368 A71-27677

Systems performance/design requirements specifications for CH-46C helicopter digital flight control and landing system [NASA-CR-110889] p0037 N71-10294

Development and characteristics of scanning systems for thermal viewers and infrared detectors for airborne operation [AD-719854] p0466 N71-25053

Tip-turbine lift fan design and specifications [NASA-CR-72974] p0679 N71-34945

Fabrication and field testing of lightweight, recoverable, air-transportable hangar [AD-727051] p0684 N71-35396

Fabrication and field testing of aircraft maintenance hangars and general purpose shelters [AD-727047] p0685 N71-35397

## EQUIVALENT CIRCUITS

Book on fluidic systems design covering analog and digital control, application to aircraft, spacecraft, computers, tracking devices and equivalent circuits p0503 A71-33475

## ERECTION

## U CONSTRUCTION

## ERGONOMICS

## U HUMAN FACTOR ENGINEERING

## EROSION

## NT WATER EROSION

Inlet particle separators for engine erosion prevention, discussing tests of various models for separation efficiency, clogging resistance, pressure loss and flow distortion p0097 A71-15435

Sand and dust erosion on small VTOL gas turbine engines, discussing effects on inlets, compressor housing and blades p0097 A71-15436

Erosion control of soil on air force bases [AD-713644] p0169 N71-15636

## ERROR ANALYSIS

Unsteady supersonic aerodynamic coefficients evaluation to desired kinematic consistency level using finite element method [AIAA PAPER 71-177] p0154 A71-18616

Solid particle impurity effects on hypersonic shock tube flow, determining error in blunt body measurements p0182 A71-18916

Aircraft systems assembly methods, discussing rigidity effects on error redistribution in external and internal force field application p0205 A71-20792

Equation error approach to parameter identification in third order pitch plane dynamics for high

performance aerodynamically controlled aerospace vehicle p0356 A71-26418

Modulation cancellation altimeter error analysis and performance optimization p0362 A71-27437

Measurement errors in testing single stage air driven axial flow compressors and turbines p0409 A71-28582

High speed electronic phase and frequency scanned, linear, static fed and monopulse arrays element and angular error analysis p0447 A71-31049

Statistical analysis of error sources and magnitudes in Boeing 747 weight values obtained by onboard aircraft weighing system and by manual calculations [SAE PAPER 897] p0551 A71-35813

Radio tracking of aircraft by two geostationary satellites, discussing measurement, navigation and position errors p0559 A71-36508

Unified error analysis application to altimeter-aided terrestrial inertial navigation systems [AIAA PAPER 71-901] p0595 A71-37152

Aircraft position errors computation for ATC mathematical surveillance models, estimating collision risk [AIAA PAPER 71-927] p0597 A71-37173

Inertial navigation impact on aircraft safety, discussing error sources and midair collision risks p0666 A71-42079

Combined inertial navigation and VOR/DME systems contribution to area navigation accuracy and efficiency p0666 A71-42080

Correlation system of equations for mathematical expectations and phase coordinate correlation moments for accuracy analysis in flight vehicle dynamics problems p0702 A71-44692

Error analysis for pressure measurements on blowdown supersonic wind tunnel models [NPL-AERO-1306] p0227 N71-17081

## ERROR BAND

## U ACCURACY

## ERROR CORRECTING DEVICES

Stress concentration correcting factors for fillets in landed aircraft structures p0276 A71-23539

Lift correction in perforated two dimensional transonic wind tunnels, considering incidence angle and streamline curvature effects on airfoil models p0298 A71-24953

## ERROR DETECTION CODES

Calculating delivery errors of automatically released bombs caused by onboard computer and attitude/air data sensor errors p0114 N71-12612

Developing high integrity digital flight control of variations in performance of complex systems p0114 N71-12614

## ERRORS

## NT INSTRUMENT ERRORS

## NT PILOT ERROR

## NT POSITION ERRORS

## NT RANDOM ERRORS

## NT VELOCITY ERRORS

## ESCAPE CAPSULES

Stowable aircrew vehicle escape rotoseat autogyro, providing controllable flight for pilot after ejection p0094 A71-15418

## ESCAPE ROCKETS

Tractor rocket actuated Yankee escape system, discussing advantages of pulling action over conventional pushed ejection seat under low speed low altitude conditions p0420 A71-29383

## ESCAPE SYSTEMS

Aerospace Recommended Practice criteria for flight deck crew escape systems applicable to all commercial aircraft propulsion systems, design speeds and payloads [SAE-ARP-808A] p0187 A71-19646

Tractor rocket actuated Yankee escape system, discussing advantages of pulling action over

- conventional pushed ejection seat under low speed  
low altitude conditions p0420 A71-29383
- Ejection system performance in relation to aircraft  
performance dependent extreme flight conditions,  
examining ejection seat design features and  
trajectories p0420 A71-29385
- ESRO SATELLITES**  
Scientific results from ESRO satellites and from  
sounding rocket campaign including aeronautical  
fields, management planning, satellite  
development, and telecommunication - 1969 report  
p0456 N71-24447
- ESTERS**  
NT POLYCARBONATES  
NT URETHANES
- ESTIMATES**  
NT COST ESTIMATES  
Reliability estimation, including failure effect  
analysis of avionic systems p0714 N71-36777
- Manual for development of needs estimates and  
capital improvement programs for airports and  
other intercity terminals for 1970 to 1990  
[OMB-04-S71002] p0723 N71-37824
- ESTIMATING**  
Wind tunnel interference estimation for model design  
applications using chart method  
[NASA-TN-D-6416] p0712 N71-36675
- EUCLIDEAN GEOMETRY**  
NT CHORDS (GEOMETRY)  
NT LOCI  
NT S CURVES  
NT TETRAHEDRONS  
NT TRIANGLES
- EULER-LAGRANGE EQUATION**  
Relation of Eulerian and Lagrangian structure of  
pseudosound pressure and velocity fields in  
turbulent shear flow to aerodynamic noise  
generation [NASA-CR-119359] p0589 N71-31211
- EUROPE**  
Aeronautical projects development and planning in  
European Economic Community, discussing aerospace  
industry organizational problems and role in  
economy p0018 A71-11676
- European subsonic, supersonic, transonic,  
hypervelocity and low density wind tunnel  
characteristics p0227 N71-17099
- Air transport supply on scheduled services in  
Europe-Mediterranean and Southeast Asia regions  
[REPT-1970/1-E] p0247 N71-18112
- European hypersonic wind tunnels for testing  
hypersonic transport aircraft, and space shuttle  
aerodynamic configurations p0250 N71-18452
- EUROPEAN AIRBUS**  
French contribution to air transportation,  
discussing international cooperation on supersonic  
Concorde, medium range airbus and short range  
Mercurie p0496 A71-32688
- European airbus development, discussing basic, long  
range and stretched capacity versions and  
aerodynamic and structural design features  
p0610 A71-38749
- European airbus design and performance, covering  
electrical system, air conditioning, engines and  
flying control circuits p0668 A71-42236
- EUROPEAN SPACE PROGRAMS**  
Air traffic control by satellite, discussing  
CNES-SGAC and ESRO experiments within Dioscures  
project test program p0008 A71-10748
- ESRO part of joint ATC communication experiment for  
L band satellite use, giving voice and data  
transmission and distance measurement techniques  
tests results p0559 A71-36510
- Cost analysis of joint NASA-European space program  
involving navigation and communication satellites  
for civil air traffic control [ESRO-SP-61] p0115 N71-12756
- Geological exploration, development of ultrasonic  
flow detector, review of scientific developments,  
and tactical aircraft in Eastern Europe  
[JPBS-53428] p0575 N71-30033
- EVACUATING (TRANSPORTATION)**  
Aircraft emergency evacuation illumination  
standards, considering independent power source,  
crash survivable installation, operation  
initiation and exit visibility p0001 A71-10030
- EVALUATION**  
Evaluating three component electronic wind tunnel  
balance installed in 3.5 by 5.0 ft subsonic tunnel  
[AD-722571] p0591 N71-31400
- Evaluation of NASTRAN system based on large complex  
airframe analysis p0688 N71-36282
- Evaluating current NASTRAN discrete element models  
for monocoque and semimonocoque structures  
p0688 N71-36290
- EVAPORATION**  
NT PROPELLANT EVAPORATION  
Solutions of aqueous fluorochemical surfactants  
placed on surfaces of liquid hydrocarbons and  
hydrocarbon fuels for suppression of fuel  
evaporation [AD-723189] p0627 N71-32050
- EVAPORATION RATE**  
Benzene evaporation rate determined from flat plate  
film boiling under high temperature air flow with  
application to gas turbine air pollution reduction  
[DLR-FB-70-58] p0374 N71-22072
- EVAPORATIVE COOLING**  
NT FILM COOLING  
NT SWEAT COOLING  
Turbocharged diesel engine precompressed inlet air  
cooling by evaporation cooling, considering water  
injection effects on centrifugal compressor  
p0204 A71-20781
- EVASIVE ACTIONS**  
Efficient evasion strategies for vehicle pursuit-  
evasion games with imperfect information, using  
computer solution p0141 A71-17331
- Midair collisions analysis for civil-military  
integrated ATC air space, discussing near miss  
volume, random heading aircraft density and pilots  
evasive action vs avoidance percentages p0367 A71-27599
- Performance of aircraft environmental control  
systems under simulated tactical conditions  
[AD-719101] p0457 N71-24461
- EWR AIRCRAFT**  
NT VJ-101 AIRCRAFT
- EXCITATION**  
NT ACOUSTIC EXCITATION  
NT SELF EXCITATION
- EXECUTIVE AIRCRAFT**  
U GENERAL AVIATION AIRCRAFT  
U PASSENGER AIRCRAFT
- EXHAUST DIFFUSERS**  
Radial-inflow turbine performance with exit  
diffusers designed for linear static-pressure  
variation [NASA-TN-X-2357] p0631 N71-32466
- EXHAUST FLOW SIMULATION**  
NT FLIGHT SIMULATION  
One dimensional flow models of internal combustion  
engine exhaust silencers in noisy systems  
p0339 A71-25180
- Jet exhaust nacelle subsonic flow simulation  
[ARC-CP-1111] p0228 N71-17113
- EXHAUST GASES**  
Gas turbines air pollution control, discussing  
exhaust composition, combustion chamber design,  
engine efficiency, etc p0009 A71-10820
- Critical nozzle pressure ratio and geometry effects  
on free exhaust gas jets of jet engine models  
[DGLR-70-055] p0130 A71-15966
- Aircraft gas turbine engines nitric oxide emission  
model, describing flow behavior and chemical  
processes [AIAA PAPER 71-123] p0155 A71-18659
- Mathematical model of nonstationary intake and  
exhaust gas motion in two cycle internal  
combustion engine cylinders p0204 A71-20780
- Gas turbine engines emission characteristics,  
discussing methods for pollutants reduction  
p0214 A71-21820

- Commercial supersonic flight, investigating air pollution and alleged climate and weather modification effects due to principal exhaust products p0214 A71-21821
- National Air Pollution Control Administration control of aircraft engine pollutant emissions covering measurement, test instrumentation, research, standards and regulations p0216 A71-21831
- Aircraft engine smoke emission control, discussing Ringelmann chart assessment for various commercial jet aircraft and airport gaseous pollutants p0216 A71-21832
- Standard equipment and procedures for aircraft gas turbine engine exhaust smoke measurement [ASME PAPER 71-GT-88] p0353 A71-25995
- Visible exhaust smoke trails from aircraft jet engines, measuring optical density by photographic photometry [SAE PAPER 710428] p0406 A71-28314
- Chemical kinetic calculation of nitric oxide formation in spark ignition automobile engines and gas turbine combustors p0436 A71-30454
- Dispersal of jet aircraft exhaust emissions near airports and of smoke trails in upper atmosphere, assessing pollutant levels near large urban airports p0492 A71-32244
- Aircraft pollutant emission regulation, discussing low smoke combustors and fuel dumping problem p0492 A71-32246
- Gas turbine engine combustion chamber outlet gas temperature field peripheral nonuniformity, detailing jets disruptive capacity effects in mixing zone p0504 A71-33609
- Stratospheric ozone reduction through catalytic action of nitrogen oxides from SST exhaust, discussing degrading effect on atmospheric radiation shield p0562 A71-36922
- Turbine propulsion system smoking and exhaust gas emission, discussing aircraft and automobile pollution emission p0615 A71-39452
- Operating variables effect on pollutant exhaust from jet aircraft turbine engines, discussing combustor design techniques for emissions reduction p0695 A71-43600

# FAILURE MODES

# SUBJECT INDEX

Reliability estimation, including failure effect analysis of avionic systems p0714 N71-36777

**FAILURE MODES**

Sailplane fatigue testing determining load spectra fail safe structures and damage calculation p0020 A71-11949

Helicopter power transmission failure modes, presenting field experiences correlation with conventional design stress analysis and bench test data [SAE PAPER 710454] p0408 A71-28331

DC 10 dispatch reliability, discussing failure mode/analysis and flight officers training/evaluation standardization lists for abnormal operation identification p0500 A71-33297

Aircraft parts lubrication friction and wear problems, discussing failure modes, solid and liquid lubricants, component damage and lubrication systems p0660 A71-40902

Random errors in aluminum alloy fatigue tests and failure modes [ARC-CP-1123] p0231 N71-17330

Proceedings of conference on mechanical failures prevention [AD-721912] p0529 N71-28592

**FAIRCHILD MILITARY AIRCRAFT**

**U MILITARY AIRCRAFT**

**FAIRCHILD-HILLER AIRCRAFT**

**NT XC-142 AIRCRAFT**

**FAIRINGS**

Device and method for calculating optimal fairings for aircraft antennas [JPERS-52608] p0333 N71-21258

**FAN IN WING AIRCRAFT**

STOL commercial aircraft propulsion systems, considering two stream augmentor wing engine and high bypass ratio three stream engine [AIAA PAPER 71-746] p0480 A71-31325

Aerodynamic characteristics of large-scale model with lift fan mounted in 5 percent thick triangular wing [NASA-TM-D-7031] p0161 N71-14638

Cross flow wind tunnel performance tests of 15 in. wing installed lift fan with coaxial drive turbine for VTOL transport aircraft [NASA-TM-X-67854] p0518 N71-27707

**FANLIFT DEVICES**

**U LIPT FANS**

**FANS**

Large low-speed fan for low noise production, testing performance on suppression effects of acoustic treatment and exhaust jet noise [ASME PAPER 70-WA/GT-15] p0077 A71-14123

Short rotor blade span supersonic fan for pressure wave forward propagation elimination, obtaining acoustic and aerodynamic characteristics [AIAA PAPER 71-182] p0155 A71-18621

Axial flow fan noise, investigating louvers effects on sound field p0357 A71-26704

Soundproofing of air inlets and fan exhausts with reference to absorbent systems with resonant cavities, technologies, environmental conditions and material fatigue p0488 A71-31880

**FAR FIELDS**

Far field sound radiated from steady loading of isolated subsonic rotor, noting dependence on spatial uniformity of flow entering rotor p0140 A71-17160

Aerodynamic sound radiation from point force in accelerative circular motion, obtaining closed form for overall far field radiation p0140 A71-17162

Far field sonic boom pressure profiles simulation by methane-oxygen mixture detonation in balloons [AIAA PAPER 71-186] p0155 A71-18625

Near field flow pattern of inclined slender body of revolution, using Whitham far field theory of supersonic flow [AIAA PAPER 71-626] p0483 A71-31554

Turbomachinery rotor and stator row aerodynamic interaction, describing discrete tone noise generation from far field measurements p0491 A71-32134

Subsonic turbulent jets acoustic emission, calculating noise intensity in far field for various Mach numbers p0533 A71-34213

Sound radiation from subsonically rotating annular disk source, calculating far field pressure and efficiency p0603 A71-37845

Transonic flows about two dimensional airfoils, calculating far field boundary conditions with coordinate transformation p0702 A71-44620

Jet noise contribution to far field sound from 1.83 meter diameter fan determined for two simulated nacelle configurations [NASA-TM-X-67825] p0402 N71-24009

**PASTENERS**

**NT BOLTS**

**NT NUTS (PASTENERS)**

**NT PINS**

**NT RIVETS**

Ultrasonic wrench for applying vibratory energy to mechanical fasteners [NASA-CASE-MPS-20586] p0240 N71-17686

**FATIGUE (BIOLOGY)**

**NT FLIGHT FATIGUE**

In-flight study of work/rest cycle effects on double crew performance and fatigue in flying transport missions p0664 A71-41829

**FATIGUE (MATERIALS)**

**NT METAL FATIGUE**

**NT THERMAL FATIGUE**

Cyclic thermal cracking and fatigue analysis in large steam turbine rotors with three dimensional temperature and triaxial stress computation [ASME PAPER 70-PWR-1] p0198 A71-20198

Strain level counter monitoring aircraft structural fatigue, describing system components consisting of sensors in critical structure areas and indicator unit with visual display p0267 A71-22725

Wing structure fatigue substantiation procedures under fail-safe concept for general aviation aircraft [SAE PAPER 710404] p0287 A71-24264

Total fatigue damage estimates from ground and flight loads on fixed-wing light aircraft subjected to agricultural operations [LTR-ST.422] p0106 N71-12233

Panel flutter and divergence as structural aeroelastic problems leading to fatigue failure [NASA-CR-111821] p0120 N71-13405

Analysis of aircraft wheel failures to determine cause of fatigue fracture and establishment of qualification tests [NRC-11694] p0316 N71-19857

Cumulative frequency distributions determined by extreme value analysis used for fatigue analysis and interpretation of c.g. vertical acceleration and gust velocity measured on transport aircraft [AGARD-R-579-71] p0466 N71-25080

Fatigue and fracture mechanics of airframes and materials including structural design and stress analysis techniques [AD-719756] p0466 N71-25092

Experimental investigation on effect of spot welded or adhesively bonded thermocouples and fatigue behavior of two titanium alloys suitable for use in high speed airplanes p0531 N71-28891

General fatigue prediction method based on Neuber notch stresses and strains for aluminum alloy airframes [AD-723631] p0627 N71-32025

Modal analysis of response and fatigue of aluminum aircraft panels modal response p0688 N71-36273

**FATIGUE LIFE**

Ni base superalloys fatigue strength improvement for gas turbine engine components, discussing homogeneous deformation distribution, grain size control, etc p0002 A71-10166

Aircraft structure fatigue life improvement via material stress coining inside and around holes and slots p0003 A71-10170

- LAMS flight control systems for turbulence induced fatigue damage reduction in B-52 and C-5A aircraft, using mathematical models  
p0017 A71-11660
- Gas turbine engine Ni alloys heat resistance, examining fatigue life and creep properties at various temperatures and test durations  
p0136 A71-16754
- Aerodynamic heating effects on fatigue and creep properties of supersonic aircraft alloys at high temperatures, considering deformation mechanisms interaction  
p0273 A71-23204
- Aircraft structural fatigue life in-flight monitoring, describing sensor installation on aircraft fin structure and measurement results  
p0280 A71-23938
- Wing structure fatigue substantiation procedures under fail-safe concept for general aviation aircraft  
[SAE PAPER 710404] p0287 A71-24264
- Fatigue failure probabilistic model under variable amplitude loading, considering relation between safety factor and fatigue failure probability  
p0346 A71-25492
- Passenger aircraft structures accelerated testing for safety and fatigue durability under operational conditions, describing tests, planning and evaluation  
p0358 A71-26946
- Fatigue life, fail-safe capability and corrosion resistance of commercial aircraft structures improved through adhesive metal-metal bonding [ASME PAPER 71-DE-27] p0361 A71-27325
- Artificial corrosion pits effect on fatigue durability of smooth samples and aircraft duraluminum skin elements  
p0403 A71-27819
- Aircraft design and fatigue life monitoring, investigating effects of gust velocity frequency distribution in patches of atmospheric turbulence  
p0428 A71-29789
- Aircraft structures fatigue properties, discussing stresses, life estimates, safety factors and descriptive curves  
p0501 A71-33343
- Program parameters effects on fatigue life of turbine blade heat resistant alloys at high temperatures under cyclic loading  
p0502 A71-33407
- Probabilistic approach to prolonged lifetime design and static strength of structures of monocoque and multispar wings, using fatigue characteristics of individual elements  
p0504 A71-33604
- Atmospheric turbulence prediction, discussing gust sensitive aircraft design for structural overload and fatigue failure decreases  
[AIAA PAPER 71-775] p0507 A71-34011
- Fatigue crack initiation and growth and residual strength of F-100 wing, comparing service failure data with full scale fatigue test results  
p0539 A71-35159
- Helicopter rotor blades fail-safe design, presenting criteria for fatigue loaded structures residual strength and life based on crack propagation rate methods  
p0540 A71-35163
- Aircraft structural panels under cyclic static loads, examining fatigue life with probability theory, statistics and regression analysis  
p0542 A71-35312
- Gas turbine engine steels and Ni alloys heat resistance, examining fatigue life and creep properties at various temperatures and test durations  
p0543 A71-35453
- Cumulative frequency distributions of aircraft landing gear loads in determining fatigue life [RAE-LIB-TRANS-1462] p0036 N71-10273
- Electron fractography for high strength steel to determine fatigue life of military aircraft parts [NLR-TR-69043-U] p0119 N71-13364
- Scatter factor in statistical aircraft fatigue life estimation  
[ARL/SM-350] p0165 N71-15154
- Aluminum alloy stress cycles and fatigue life of airframe materials  
[FB-78-1969] p0238 N71-17524
- Elevated temperature effects on fatigue life of tensile stressed titanium alloys, aluminum alloys, and stainless steels  
[NASA-TN-D-6145] p0374 N71-22076
- Conference on fatigue life in helicopter components [DLR-MITT-70-01] p0455 N71-24385
- Fatigue life of helicopter rotary wings under vibrational stresses  
p0455 N71-24386
- Variability of aluminum alloy aircraft structure fatigue life under symmetric and asymmetric loads [ARL/SM-REPORT-329] p0717 N71-37524
- FATIGUE TESTING MACHINES**
- Gas flame heater for heat resistant samples under fatigue tests, simulating gas turbine engine operating conditions  
p0001 A71-10041
- Aircraft structures fatigue testing device using programmed control of electrical inputs to electrodynamic vibration stand, noting load cycle effects and damage accumulation  
p0004 A71-10409
- FATIGUE TESTS**
- Airplane materials mechanical properties degradation due to fatigue, discussing breaking strain of Al alloy  
p0015 A71-11395
- Sailplane fatigue testing determining load spectra fail safe structures and damage calculation  
p0020 A71-11949
- Laboratory facilities for DC-10 structural test program using fatigue test machines and computer controlled servo loading systems  
[SAE PAPER 700829] p0072 A71-13724
- Concorde thermal fatigue test installation, controlling temperature by transfer temperature variation in single heat exchanger block  
p0276 A71-23580
- Wing structure fatigue substantiation procedures under fail-safe concept for general aviation aircraft  
[SAE PAPER 710404] p0287 A71-24264
- Al alloys one step fatigue tests under combined high temperature and structural vibration conditions  
p0294 A71-24821
- Nonstationary stress modeling in aircraft structures using random pulse generator applied to jet landing gear break strut fatigue test  
p0298 A71-24954
- Aircraft wing fatigue test procedures for gust, maneuver, ground-air-ground, taxi and landing impact loads  
[SAE PAPER 710403] p0300 A71-25133
- Structure service life and storage failure probability calculation with current load measurements and laboratory fatigue testing  
p0418 A71-29231
- Structural fatigue in aircraft design, discussing twin engine transport tests, crack propagation rate, residual strength, etc  
p0421 A71-29434
- Metal coated superalloys evaluation for gas turbine engine components, including corrosion, impact and fatigue tests  
p0423 A71-29635
- Pisa University Aeronautical Institute activities /1960-1970/, considering supersonic and subsonic flow research, thin stiffened shells fatigue under compressive or tensile loads, etc  
p0444 A71-30822
- Thermal ground testing of Concorde and Veras, considering static and fatigue testing in heat environment  
p0558 A71-36464
- Random loading parameters adjustment in fatigue tests of welded aircraft structures  
p0663 A71-41692
- Random errors in aluminum alloy fatigue tests and failure modes  
[AIRC-CP-1123] p0231 N71-17330
- Analysis of aircraft wheel failures to determine cause of fatigue fracture and establishment of qualification tests  
[NRC-11694] p0316 N71-19857
- Fatigue test equipment for evaluating Focker aircraft wing  
[NLR-TR-70008-L] p0389 N71-23157
- Design data for regeneratively cooled panels from low cycle fatigue evaluation of Hastelloy X and

Inconel 625 sheet and sandwich panel specimens

**FEEDBACK CIRCUITS**  
Determination of unsteady forces during wind tunnel test of elastic model by placing wind tunnel model in feedback circuit of servosystem  
[NASA-CR-114287] p0313 N71-19796

**FEEDBACK CONTROL**  
Aircraft manual flight control analysis using continuous mathematical pilot model for closed loop digital simulation p0019 A71-11787

C-5 military transport stability augmentation for pitch and yaw inertia at low speed, using pilot evaluation on cockpit simulator p0028 A71-12684

Aircraft longitudinal control during landing approach, investigating back side operation characteristics by closed loop system analysis regarding pilot and aircraft as elements p0133 A71-16388

Constrained gain problem optimality conditions, presenting algorithm for optimal gains and application to aircraft control problems p0295 A71-24859

Automatic gust alleviation system employing inertial sensors and feedback devices with wing flaps and elevators, considering linkage control, noninteracting control and split control p0340 A71-25195

Quasi-optimal proportional navigation, deriving feedback guidance laws for interceptor aerodynamically controlled missiles p0355 A71-26409

Wind tunnel model trajectory simulation system with closed loop control by digital computer, describing instrumentation, system servoamplifiers and testing procedures p0434 A71-30334

VTOL aircraft minimum climb-to-cruise time transition optimal open loop and suboptimal closed loop control synthesis p0444 A71-30799

Potential benefits accruing to air superiority fighters by integrating automatic feedback control system technology into design, using F-4 as baseline configuration  
[AIAA PAPER 71-764] p0505 A71-34002

Soviet book on radio control of various flight vehicles covering closed loop synthesis, missile guidance, spacecraft trajectory correction and air traffic control p0543 A71-35403

Discrete time digital flight control systems design resulting in closed loop aircraft response characteristics approximation to prescribed flying quality specifications p0597 A71-37196

USAF total in-flight simulator model-following feedback control system, discussing conceptual design and flight test results  
[AIAA PAPER 71-961] p0598 A71-37202

Multivariable frequency response methods for feedback control design for aircraft gas turbines, involving digital test bed trials p0611 A71-38989

Stability augmentation system for aircraft elastic modes control, discussing active flutter

suppression technology p0697 A71-44107

Active feedback wing/store flutter control for fighter aircraft, using computer programs based on frequency and time domains for linear analysis p0697 A71-44109

Adaptive guaranteed cost control for systems with parametric variation, demonstrating system stability and airframe pitch control p0697 A71-44114

Automatic flight control systems, discussing pilot as systems manager or retained in control loop p0699 A71-44454

Investigating nonlinear digital control methods for attitude stabilization of VTOL aircraft p0114 N71-12615

Improved feedback control of distributed parameter systems for lunar landing vehicle simulator  
[NASA-CR-116482] p0231 N71-17345

Minimizing performance criterion to analyze ability of automatically controlled aircraft to maintain accurate flight path control during landing approach  
[NASA-TN-D-6230] p0255 N71-18761

Optimization design procedures for development of stability augmentation systems  
[AD-717168] p0328 N71-20617

Control system designs for USSR single-rotor helicopters including controllability characteristics, rotors with control gyroscopes, and transfer functions in closed loop systems  
[NASA-TT-P-636] p0329 N71-20719

Normal shock control systems for supersonic mixed compression inlet using feedback loops  
[NASA-TN-D-6382] p0573 N71-29745

Computerized simulation of aerodynamic loads and dynamic responses for aircraft control system design based on optimal and feedback control theories  
[AD-722652] p0625 N71-31933

**FIRE EXTINGUISHERS**

Airplane interior materials ignition and fire extinguishing foam  
[FAA-RD-70-81] p0179 N71-16818

**FIRE FIGHTING**

Soviet book on aircraft power plant systems and devices covering layout, engine attachment, propellers, control, fuel and oil systems, fire fighting, monitoring, etc  
p0028 A71-12722

Aerial land rover for special needs of developing countries as passenger and freight aircraft, crop spraying and dusting, aerial survey and fire fighting  
p0658 A71-40701

Airport crash fire fighting equipment requirements and rescue operations  
p0694 A71-43389

Surveying crash fire and rescue equipment at North American and Canadian airports  
p0246 N71-18101

Survey conducted to develop minimum requirements for airport fire fighting and rescue services  
[FAA-AS-71-1] p0307 N71-19426

**FIRE PREVENTION**

Aircraft fire hazard reduction, discussing early detection, extinguishing equipment and emergency landing survival  
p0004 A71-10399

Cargo aircraft crew safety and survival, describing restraint, escape, flight deck interior doors, fire and smoke hazards and personnel environmental protection  
[SAE-ARP-1139] p0187 A71-19643

Concorde power plant fire protection system, describing prototype engine bay overheat detection system and additional UV optical fire detection system  
p0432 A71-30300

Fire protection tests in small fuselage mounted turbojet engine and nacelle installation  
[FAA-NA-70-41] p0048 N71-11018

Jet engine combustion chamber burn-through fire and methods for controlling damage  
[FAA-RD-70-68] p0237 N71-17483

Design, development, and flight testing of fire suppressant void filler foam kits for lower hemisphere of fuel tanks in various tactical army aircraft  
[AD-719711] p0518 N71-27679

Demonstration and evaluation of crash-resistant bladder fuel tank system in full-scale aircraft wing assembly  
[FAA-NA-71-34] p0627 N71-32077

Simulated JP-4 jet fuel fire tests of high temperature cabin pressure sealant and insulating plastics and rubbers  
[FAA-NA-71-22] p0726 N71-38149

**FIREPROOFING**

Flame retardant silicone elastomers for use as aircraft construction materials, describing fabrication techniques, mechanical, aging and weathering properties  
p0362 A71-27412

**FIREWORKS****U PYROTECHNICS****FIRING (IGNITING)**

Optimal firing temperature schedule during gas turbine loading for minimal thermal fatigue of hot gas path components, considering hollow stationary airfoils  
[ASME PAPER 70-WA/GT-2] p0076 A71-14116

**FISHTAILING****U YAW****FISSION PRODUCTS**

Studying aircraft accidents to determine impact angle and speed criteria for designing nuclear airplane fission product containment vessel  
[NASA-TM-X-2245] p0468 N71-25411

**FIXED POINTS (MATHEMATICS)**

Suboptimal fixed point data smoothing algorithm for  
p0591 N71-31376

parameter and initial state estimation of nonlinear dynamic systems  
p0698 A71-44113

**FIXED WINGS**

Book on fixed and rotary winged aircraft air cooled piston engine design, performance and maintenance in business and military operators manual terminology  
p0138 A71-17125

Canadian R and D on fixed wing civil STOL aircraft, discussing augmentor wing concept using jet powered lift augmentor system  
p0503 A71-33470

Augmentor wing high-lift aerodynamics, discussing results of wind tunnel tests and simulation studies  
[CASI PAPER 72/20] p0602 A71-37606

Design of supersonic aircraft with novel fixed, swept wing planform  
[NASA-CASE-XLA-04451] p0108 N71-12243

Wind tunnel tests to determine effects of wing dihedral angle on aerodynamic characteristics of highly swept fixed-wing configuration  
[NASA-TM-X-2261] p0384 N71-22622

Computerized simulation of helicopter tactical maneuvers in three body, three dimensional environment including fixed wing and rotary wing aerodynamic forces  
[AD-721527] p0528 N71-28409

Rotary wing downwash influence on fixed wing flow using magnetic induction vortex model  
[DLR-PB-70-62] p0575 N71-30040

Fixed wing aircraft employing free fall and circling-line techniques in rescue of personnel and retrieval of equipment  
[AD-727007] p0683 N71-35228

**FIXED-WING AIRCRAFT****U AIRCRAFT CONFIGURATIONS****U FIXED WINGS****FIXTURES**

Airport lighting facilities in Japan, considering fixtures, marker and obstruction lights and apron floodlight  
p0201 A71-20355

**FLAME HOLDERS**

Afterburning flame stabilization in turbofan engines  
[NASA-TT-P-13657] p0578 N71-30350

**FLAME INTERACTION****U CHEMICAL REACTIONS****FLAME STABILITY**

Aerodynamic flame stabilization by secondary air jets obliquely directed toward combustion chamber main flow, comparing with mechanical devices characteristics  
p0497 A71-32719

Afterburning flame stabilization in turbofan engines  
[NASA-TT-P-13657] p0578 N71-30350

**FLAME TEMPERATURE**

Annular vaporizing combustion chamber with film cooling, determining flame temperature under supersonic flight conditions  
p0411 A71-28749

**FLAMEOUT**

Investigation of helicopter jet engine flameout due to ingestion of snow and ice  
[NRC-11893] p0371 N71-21927

**FLAMES****NT DIFFUSION FLAMES****NT PREMIXED FLAMES****FLAMMABILITY**

Crash fire hazard evaluation of jet fuels  
[FAA-NA-70-64] p0180 N71-16864

Fuel tank vapor space characteristics for simulated helicopter fuel tank and evaluation of existing potential hazard from vibration environment  
[AD-875901] p0329 N71-20702

Tests of jet engine fuels to determine effects of sloshing and vibration in aircraft fuel tanks on flammability hazards  
[AD-718091] p0400 N71-23805

Small scale impact tests of aircraft type fuels for gas turbines to determine burning, misting, and splatter characteristics  
[FAA-NA-71-12] p0628 N71-32087

**FLAP CONTROL****U AIRCRAFT CONTROL****U FLAPS (CONTROL SURFACES)****FLAPPING**

Comparative vertical turbulence and loss restrictive  
p0628 N71-32087

- stochastic models for threshold crossing rotor blade flapping vibrations at low lift high advance ratio  
[AIAA PAPER 71-389] p0343 A71-25351
- FLAPPING HINGES**  
Rigid rotor hub flapping stiffness tailoring for controllability, considering length and fatigue/structural strength p0487 A71-31601  
Low speed wind tunnel stability tests and flutter analysis of flapped rotary wings [NAL-TN-18] p0519 N71-27756
- FLAPS (CONTROL SURFACES)**  
NT JET FLAPS  
NT LEADING EDGE SLATS  
NT TRAILING-EDGE FLAPS  
NT WING FLAPS  
Cambered and symmetric wing profiles and flap configurations, discussing wind tunnel tests at moderate Reynolds numbers p0021 A71-11950  
Airfoil profiles with flaps at medium Reynolds numbers, determining performance characteristics in wind tunnel tests p0088 A71-15025  
Performance characteristics of horizontal and vertical stabilizers at medium Reynolds number from wind tunnel measurements, considering air foil and flap effects p0149 A71-18249  
Variable camber flap automatic control equipment for glider, considering combinations of mechanical, electrical and electronic approaches p0149 A71-18250  
Multicomponent plane flap mechanism with transmission angles diverging minimally from ninety degrees, discussing synthesis by least squares method p0185 A71-19361  
Multielement flap mechanism design, considering drive angles which deflect least from 90 degrees p0267 A71-22652  
Flap induced flow deflection effects in hypersonic shock tunnel, obtaining turbulent heating, skin friction and pressure data [AIAA PAPER 71-598] p0482 A71-31540  
Externally blown flap powered transport high lift wind tunnel model visual flow field investigation with multiple filament smoke streamlines [AIAA PAPER 71-577] p0484 A71-31567  
Flap span length effects on boundary layer separation, giving streamwise pressure distributions p0660 A71-40967  
Sailplane circling cross-country speed increase by variable geometry in high lift flap form for better compromise between cruise and climb performance p0698 A71-44342  
Evaluation of geared flap control system for tilting V/STOL aircraft [AD-712645] p0107 N71-12236  
Viscous interacting flow in hypersonic streams, including flow over flaps; corners, delta wings, and wing-body combinations [NASA-TN-X-66914] p0314 N71-19831  
Flaps and leading edge modifications for improved aerodynamic control stability of military aircraft p0395 N71-23422  
Direct lift control system having flaps with slots adjacent to their leading edge and particularly adapted for lightweight aircraft [NASA-CASE-LAR-10249-1] p0473 N71-26110  
Heating rate and efficiency of flaps at hypersonic speeds [SC-T-71-3016] p0518 N71-27674  
Pressure measurements of harmonically oscillating sweptback wing with two flaps in incompressible flow [DLR-FB-70-47] p0570 N71-29433  
Potential flow solution for STOL wing propulsion system presenting flow fields, pressure distribution, and lift coefficient for externally blown flap, high-lift configuration [NASA-TN-D-6394] p0573 N71-29774  
Aerodynamic characteristics of twin jet, swept wing fighter aircraft model with leading edge Kreuger flaps at subsonic speeds [NASA-TN-Y-2325] p0710 N71-36426
- FLARED BODIES**  
Flare induced laminar boundary layer/shock wave interactions on axisymmetric bodies at zero incidence in supersonic flow under adiabatic conditions p0701 A71-44604  
Nose bluntness effect on aerodynamic characteristics of flared body in supersonic wind tunnel [NAL-TR-221] p0375 N71-22160
- FLASH LAMPS**  
Canadian Forces experiments on aircraft flashing lights covering warning signals, navigation and anticollision displays and autokinetic phenomenon p0661 A71-41491  
Aircraft flash light designs, discussing tandem oscillating lights, fixed lamp rotating reflectors and lamps, xenon flashtube, quartz-iodine lamp and flash frequencies p0661 A71-41494  
Aircraft anticollision flashing lights, discussing current practices within national and international air traffic regulations regarding flash frequency, color and light sources p0661 A71-41499
- FLASH POINT**  
Liquid fuel pool ignition at superflash and subflash temperatures involving adjacent heat source, cross wind and fluid motion p0185 A71-19245
- FLASH TUBES**  
U FLASH LAMPS
- FLAT PLATES**  
Flutter analysis of plates with inplane boundary support flexibility exposed to transverse pressure loading or buckled by uniform thermal expansion p0011 A71-10940  
Boundary layer separation at free streamline attachment to sharp trailing edge of flat plate, deducing terminal velocity profile for two dimensional flow p0023 A71-12376  
Three dimensional incompressible wake behind blunt obstacle at leading edge of flat plate compared with mathematical model by Oseen linearization [AIAA PAPER 69-747] p0069 A71-13434  
Compressible turbulent boundary layer skin friction measurements on adiabatic flat plate, discussing drag balance calibration [ASME PAPER 70-WA/FE-26] p0077 A71-14134  
Discrete vortex formation above perforated flat plate in wind tunnel, examining unsteady boundary layer p0083 A71-14568  
Monte Carlo simulation for studying rarefied hypersonic gas flow about slender cones and flat plates [AIAA PAPER 69-651] p0133 A71-16562  
Incompressible turbulent boundary layer flow over steadily rotating flat plate blade, discussing centrifugal pumping and shear stress p0134 A71-16581  
Supersonic flow field around flat plate at various angles of attack, comparing Brieden and Lighthill approximations p0135 A71-16713  
Flat plate wake displacement sources in potential flow, considering high Reynolds numbers outside boundary layer p0137 A71-16960  
Seaplane step /flat plate/ ricochet off ideal incompressible fluid surface, determining free surface shape by accounting for trailing vortices effects p0185 A71-19355  
Viscosity effects on three dimensional supersonic flow around circular half cones on flat plate, examining turbulent boundary layer separation p0190 A71-19743  
Heavy fluid flow past partially cavitating flat plate with cavity closed by fictitious plate, considering lifting force under gravity p0197 A71-20087  
Twin vortex development in unsteady separated flow past thin flat plate, using flow visualization p0266 A71-22582  
Supersonic turbulent boundary layer density profile over flat plate at single Reynolds number, using Mach-Zender interferometer p0287 A71-24270

- C-5A cargo box side wall deformations, examining square plates center deflections with elastic beams  
p0297 A71-24871
- Mean and fluctuating forces on flat plates normal to turbulent flow, giving power spectral density measurements of drag fluctuating component  
p0299 A71-25085
- Uniform surface blowing effects on hypersonic boundary layer with viscous interaction, calculating heat transfer on flat plate and slender wedge  
p0299 A71-25096
- Weight minimization of semiinfinite flat sandwich panel at constant dynamic pressure in supersonic flow subject to flutter constraint, using finite element model  
[AIAA PAPER 71-330] p0342 A71-25310
- Flat plate trailing edge problem solution consistent with second order boundary layer theory, establishing laminar wake evolution nature and upstream influence  
p0345 A71-25469
- Pressure orifices inclination in low density flow from experiments with cooled flat plate model in hypersonic low density wind tunnel  
p0346 A71-25490
- Hypersonic wakes of two dimensional slender wedges and flat plate, testing stability in transition region in wind tunnel  
p0366 A71-27561
- Asymptotic limiting viscous flow pattern and drag on flat plate with stationary separation zones at large Reynolds numbers  
p0417 A71-29204
- Skin friction drag and velocity profile measurements on flat plate in two phase circular pipe flow in subsonic wind tunnel for gas-solid media, using photographic technique  
[ASME PAPER 71-FE-32] p0421 A71-29467
- Turbulent skin friction and heat transfer prediction on flat plates and wind tunnel walls at supersonic and hypersonic Mach numbers, using Van Driest theory  
p0429 A71-29868
- Aeroelastic stability of flat plates and shells, considering panel flutter  
p0499 A71-32987
- Detachment prediction in turbulent incompressible plane flows on thick bodies applied to wall with disconnections and flat plate normal to wind  
p0533 A71-34189
- Flow visualization and hot-wire measurements, showing vortex shedding association with turbulent air jet issuing from flat plate into cross wind  
p0536 A71-34659
- Two dimensional laminar incompressible fluid flow past flat plate at various angles of attack, studying vortex shedding characteristics  
p0556 A71-36311
- Boundary layer disturbances influence on three dimensional hypersonic flow about infinite triangular flat plate, investigating pressure effects on heat transfer and friction coefficients  
p0657 A71-40681
- Vortex shedding from blunt trailing edge of flat plate spanning wind tunnel under oscillating flap and acoustic resonance excitations  
p0699 A71-44558
- Surface heat transfer rates measured on flat plates in hypervelocity shock tunnel  
[NASA-CR-1692] p0044 A71-10867
- Wall pressure, hypersonic forces and hypersonic heat transfer for flat plates in low density flow  
[REPT-70-4] p0119 A71-13401
- Hypersonic boundary layer transition and hypersonic heat transfer on cylindrical shells, cones and flat plates  
[REPT-1104/70] p0120 A71-13408
- Flat plate and expansion corner models in hypersonic wind tunnel  
[AD-714074] p0176 A71-16290
- Turbulent wakes of flat and rotationally symmetrical bodies noting width development  
p0251 A71-18472
- Sound field effects on flat plate heat transfer in turbulent boundary layer  
[REPT-70-8] p0253 A71-18572
- Nonuniform flow field sonic boom reduction device using slit jet impinging on inclined flat plate  
[AD-717193] p0335 A71-21623
- Supersonic combustion, fuel injection, and recirculation in hydrogen hypersonic external combustion at flat plates and bodies of revolution  
[DLR-FB-70-64] p0374 A71-22129
- Comparison of flat plate sharp and blunt edge effects on heat transfer in supersonic flow and heat transfer coefficient dependence on Reynolds number  
[AD-717825] p0375 A71-22156
- Separated flow over flat plate with blunted fin at zero angle of attack  
[AD-717717] p0378 A71-22300
- Fabrication and tests of CO2 flat plate models in He hypersonic wind tunnel  
[SC-CR-69-3215] p0390 A71-23228
- Interference phenomenon of subsonic turbulent jet exhausts from flat plate in low speed cross flow  
[AD-718798] p0392 A71-23314
- Low speed wind tunnel test of four ft diameter circular plate model to determine surface static pressure distributions for jet decay characteristics of cross flow  
[AD-720232] p0476 A71-26516
- Low speed wind tunnel test of four ft diameter circular plate model with three exhausting jets  
[AD-720233] p0476 A71-26517
- Notch sensitivity of flat plates used as structural members in aircraft wings tested on load testing machine  
[TB-89] p0580 A71-30675
- Turbulent boundary layer over flat plate and compression corner models studied in hypersonic gun tunnel  
[IC/71/11] p0580 A71-30747
- Comparison of finite element computer programs for analysis of clamped flat plate and built-up wing vibration frequencies  
p0688 A71-36293
- FLAT SURFACES**  
Gas flow near flat surface fitted with fins in herring bone pattern in nuclear gas-graphite power reactors  
[CEA-N-1329] p0128 A71-14410
- FLATNESS**  
Planar and nonplanar dynamic stability coefficient using biplanar wind tunnel, free flight system  
p0588 A71-31107
- FLAW DETECTION**  
**U NONDESTRUCTIVE TESTS**
- FLAWS**  
**U DEFECTS**
- FLEXIBILITY**  
Helicopter rotor stall characteristics, investigating blade flexibility, unsteady aerodynamics and variable inflow effects  
[AHS PREPRINT 520] p0449 A71-31086
- Analytical investigation of effects of blade flexibility, unsteady aerodynamics, and variable inflow on helicopter rotor stall characteristics  
[NASA-CR-1769] p0707 A71-36404
- FLEXIBLE BODIES**  
LANS flight control systems for gust load alleviation and structural mode stabilization on large flexible aircraft, using aerodynamic surfaces  
p0017 A71-11659
- Flexible aircraft to atmospheric turbulence transfer functions, discussing in-flight measurements  
[ONERA-TP-894] p0147 A71-18021
- Validity range of response prediction methods for large flexible aircraft to continuous atmospheric turbulence, discussing power spectral densities and fatigue life  
[AIAA PAPER 71-342] p0342 A71-25321
- Computer program for aerodynamic forces on flexible plate undergoing transient motion in shear flow, applying to panel flutter  
p0366 A71-27559
- Aerodynamic control surfaces optimal location for flexible aircraft disturbed by random wind gusts, using matrix minimum principle and calculus of variations  
p0610 A71-38713
- Transient and steady state flexible rotor dynamics analysis  
[ASME PAPER 71-VIBR-92] p0651 A71-40325

- Random process theory method for estimating response of flexible airplanes to atmospheric turbulence  
p0463 N71-24708
- Computer program for calculating effects of swash-plate stiffness on helicopter rotor system dynamics and stability  
[NASA-CR-1818] p0633 N71-32797
- Mathematical models for calculating flexible swash-plate effects on vibratory and mechanical stability characteristics of helicopter rotor systems  
[NASA-CR-1817] p0642 N71-33393
- FLEXIBLE WINGS**
- NT PARAWINGS**
- Aerodynamic decelerator technology, emphasizing ribbon parachutes and flexible wings  
p0144 A71-17692
- Flexible ram air inflated keel and leading edge parawing design optimization for increased stability and reliability, introducing semirigid member concept  
[AIAA PAPER 71-986] p0700 A71-44582
- Flexible rotor balancing by exact point-speed influence coefficient method  
[NASA-CR-72774] p0033 N71-10021
- Low-speed wind tunnel tests of series of twin-keel all-flexible parawings  
[NASA-TN-D-5936] p0033 N71-10052
- Feasibility of using flexible rotor blades for ejection systems  
[AD-711642] p0048 N71-11022
- Development and characteristics of control system for flexible wings  
[NASA-CASE-XLA-06958] p0051 N71-11038
- Determining deployment characteristics of all-flexible parawings by free flight tests  
[NASA-TN-X-2307] p0641 N71-33239
- Calculations of aerodynamic properties of flexible wing grid using Reynolds number  
[NT-21] p0673 N71-34006
- FLEXING**
- Torsional-flexural stability of stiffened Ti panels for application to supersonic transport, using small deflection energy methods  
[AIAA PAPER 71-338] p0342 A71-25317
- FLEXURE**
- U FLEXING**
- FLIGHT**
- Flow meter for measuring stagnation pressure in boundary layer around high speed flight vehicle  
[NASA-CASE-XPR-02007] p0463 N71-24692
- High altitude flight test of reefed 12.2-meter-diameter disk-gap-band parachute with deployment at 2.58 Mach number  
[NASA-TN-D-6469] p0676 N71-34026
- FLIGHT ALTITUDE**
- Man machine considerations in all-weather low level navigation system design, noting off-course error reduction by command information display to pilot  
p0007 A71-10515
- Jet transport aircraft design for safety under air turbulence conditions, considering cruise altitude limitations and pitch and g excursion reduction by special autopilot mode  
p0427 A71-29777
- Frequency modulated radio altimeters, discussing problems of altitude measurement independent of airplane motions in pitch and roll and immunity to fog effects  
p0491 A71-31918
- Altitude, bank angle and thrust program for minimizing time required by supersonic aircraft to turn through specified heading angle and reach required energy  
[AIAA PAPER 71-796] p0508 A71-34021
- Experimental and theoretical study of biologically important radiation components and dose equivalents due to galactic and solar rays at SST in high atmosphere - summary  
p0584 N71-30779
- FLIGHT CHARACTERISTICS**
- Aircraft flying qualities research program, discussing navy test pilot evaluations and longitudinal handling characteristics for simulated carrier landing task  
[AIAA PAPER 69-897] p0027 A71-12678
- Acrostar acrobatic aircraft design and performance  
p0062 A71-13016
- Clear air turbulence effects on flight and structural response of aircraft, using gust loads model  
p0065 A71-13136
- Airfoil profiles with flaps at medium Reynolds numbers, determining performance characteristics in wind tunnel tests  
p0088 A71-15025
- Tilt-rotor VTOL aircraft design, discussing ground proximity effects on blade bending moments and flying qualities.  
p0092 A71-15404
- Rotorcraft ideal height-velocity boundary and critical decision point height prediction, discussing pilots optimal control under emergency conditions  
p0094 A71-15414
- Air transportation systems ride vibration environments in relation to human comfort  
p0095 A71-15421
- Hovering and low speed flight capabilities of tilt wing VTOL aircraft in terminal area under near-zero visibility instrument landing conditions  
[AIAA PAPER 71-7] p0150 A71-18481
- Design objectives for subsonic, transonic and supersonic civil transport flying characteristics based on MIL-F-8785, considering aircraft control  
[SAE-ARP-842B] p0187 A71-19645
- Turbulent/total flight mile ratio in high altitude clear air turbulence /HICAT/ program  
p0201 A71-20314
- Flight testing of Diamant 18 glider, discussing aircraft behavior at low and high flight speed, stall, spin, stability and control characteristics, design and construction  
p0203 A71-20686
- Noise reduction at source, flight methods adjustments and airport compatible land use for jet noise abatement  
p0214 A71-21815
- Land use strategies and noise reduction by source control and flight procedures for noise exposed areas minimization  
p0214 A71-21818
- Flight time, path and fuel consumption in climb at constant radius turn, variable or constant velocity and constant engine power, deriving approximate simple formulas  
p0223 A71-22050
- Concorde airworthiness requirements and Air Registration Board participation in flight test program, considering supersonic flight characteristics  
p0276 A71-23579
- Soviet book on aircraft flight with incomplete and asymmetrical thrust covering probabilistic characteristics, stability, landing and takeoff with partial engine failures, etc  
p0281 A71-24013
- PAA flying and handling qualities program, discussing development of optimum and minimum acceptable flight characteristics criteria for new civilian and military aircraft designs  
[SAE PAPER 710372] p0285 A71-24241
- Light general aviation airplanes flying qualities in-flight simulation, considering longitudinal short period frequency and damping, pitch control sensitivity and lift curve slope  
[SAE PAPER 710373] p0285 A71-24242
- Light aircraft longitudinal stability control systems, discussing downspring and bobweight effects on flight characteristics  
[SAE PAPER 710388] p0286 A71-24252
- Wind gradient effect on flight characteristics during aircraft landing approach, particularly path deviation  
p0340 A71-25194
- Cruising flight range as function of supersonic/subsonic transport fuselage geometrical parameters  
p0364 A71-27494
- Aircraft flight characteristics dependence on angle of attack, roll and pitch  
p0415 A71-29043
- Flight characteristics under atmospheric turbulence conditions, analyzing analog trace records of airspeed, normal acceleration, altitude, air temperature, control surface and flight attitude parameters

- Forward flight performance of coaxial rigid rotor in NASA wind tunnel, comparing to aerodynamic stability with conventional rotors  
[AHS PREPRINT 524] p0426 A71-29771
- STOL aircraft flight characteristics in proximity to ground, comparing analytical results with wind tunnel test data  
[AIAA PAPER 71-579] p0450 A71-31090
- Concorde flight characteristics, discussing performance flight test data relationship to design  
p0493 A71-32281
- Plying qualities military specification, discussing longitudinal static stability, transonic flight relaxation, control forces in maneuvering flight, lateral-directional oscillations, etc  
[AIAA PAPER 71-766] p0496 A71-32690
- Civil V/STOL aircraft projects, discussing design, lift fan engines, weights, flight performance, noise levels, safety and comfort standards  
p0509 A71-34101
- High speed aircraft maneuvers stability determination by constant angular pitching/rotation velocity, angle of attack and flight speed, using Liapunov method  
p0555 A71-36176
- Flight dynamics for aircraft noise reduction, gust effects decrease and dynamic stability of parachute load systems  
p0561 A71-36752
- Flight investigation of turbulence effects on aircraft longitudinal flying qualities, evaluating pilot ratings for ILS approach task  
[AIAA PAPER 71-905] p0595 A71-37156
- Discrete time digital flight control systems design resulting in closed loop aircraft response characteristics approximation to prescribed flying quality specifications  
[AIAA PAPER 71-955] p0597 A71-37196
- Soviet book on practical aerodynamics of aircraft with turboprop engines covering piloting, forces and moments, stability, controllability, takeoff, landing, etc  
p0609 A71-38534
- Tilt-fold-propotor VTOL aircraft stability and control, emphasizing pylon tilt and rotor stop-fold effects on flying qualities  
p0610 A71-38652
- Vortex wakes transport and decay for various aircraft types, flight modes and meteorological conditions  
p0655 A71-40499
- Atmospheric wind, temperature, turbulence, hydrometeors, ozone, cosmic radiation and radio activity effects on commercial SST Concorde flight  
p0659 A71-40829
- Variable stability aircraft lateral directional flying qualities, investigating turbulence effects  
p0670 A71-42833
- Synoptic meteorological conditions for clear air turbulence and turbulence effects on aircraft flight characteristics  
[DLR-FB-70-29] p0230 N71-17145
- Flight characteristics of jet-flap STOL transport aircraft during approach and landing  
[NASA-TN-D-6225] p0236 N71-17433
- Minimizing drag and increasing performance of optimum shapes at hypersonic flight  
p0463 N71-24704
- Aircraft design, flight characteristics, and atmospheric effects on sonic boom during supersonic and hypersonic flight  
p0585 N71-30787
- Synoptic meteorological conditions for clear air turbulence and turbulence effects on aircraft flight characteristics  
[BHWG-PBWT-70-9] p0622 N71-31781
- Synoptic meteorological conditions for clear air turbulence and turbulence effects on aircraft flight characteristics  
p0623 N71-31885
- Characteristics of air motion with respect to ground and analysis of dynamics of aircraft in turbulent air  
[NASA-TT-P-600] p0633 N71-32719
- Development of method for determining angle of pitch, flight path angle, and angle of attack for aircraft during steady or nonsteady flight
- [VTH-156] p0647 N71-33926
- Aerodynamic and flight characteristics of supersonic aircraft and spacecraft motion in planetary gravitational fields  
[AD-726580] p0683 N71-35224
- Flight dynamics and calculation of flight trajectories of various aircraft and spacecraft  
[AD-727474] p0718 N71-37602
- FLIGHT CONDITIONS**
- Soviet book on meteorological conditions and supersonic aircraft flight covering atmospheric composition and structure, temperature distribution, wind effects, etc  
p0029 A71-12840
- VFR flying under bad weather conditions, discussing flight through and above cloud layers, need for radiotelephone communication and ground radar support  
p0213 A71-21767
- Flight characteristics under atmospheric turbulence conditions, analyzing analog trace records of airspeed, normal acceleration, altitude, air temperature, control surface and flight attitude parameters  
p0426 A71-29771
- Automatic flight control accommodation to dynamic characteristics variations of airframe, providing uniform response for all flight conditions  
p0599 A71-37296
- Influence of environmental factors in aircraft carrier landings and accidents  
p0325 N71-20369
- FLIGHT CONTROL**
- NT AUTOMATIC FLIGHT CONTROL
- NT AUTOMATIC LANDING CONTROL
- NT FLY BY WIRE CONTROL
- NT POINTING CONTROL SYSTEMS
- NT THRUST VECTOR CONTROL
- LAMS flight control systems for gust load alleviation and structural mode stabilization on large flexible aircraft, using aerodynamic surfaces  
p0017 A71-11659
- LAMS flight control systems for turbulence induced fatigue damage reduction in B-52 and C-5A aircraft, using mathematical models  
p0017 A71-11660
- Model performance index /Pi/ providing criterion for approximating one dynamic flight control system by another based on geometrical representation of linear autonomous systems  
[AIAA PAPER 69-885] p0027 A71-12682
- Flight control systems influence on military aircraft design and performance, discussing static stability, ride quality, flutter margin and maneuver load controls  
[AIAA PAPER 69-767] p0027 A71-12683
- Army avionics technology transfer to civil aviation, discussing communication systems, flight control and landing aids  
p0087 A71-15017
- Time vector method extension to equations of motion with real roots, noting applications to aircraft flight control problems  
p0147 A71-18049
- ATC automated systems, discussing National Airspace System En Route Stage A and Advanced Radar Terminal System  
[AIAA PAPER 71-244] p0188 A71-19719
- Late model F-4 air superiority aircraft and electronic flight control systems protection against lightning discharges damage to electric and electronic systems  
p0194 A71-19940
- VOR/DME ground station oriented aircraft area navigation horizontal guidance capability, discussing digital input/output flight control  
p0207 A71-21166
- Experimental flight mechanics in terms of data processing quality, discussing subsystems control  
p0280 A71-23928
- Constant attitude light aircraft flight control system, describing design studies for minimum pilot command requirements  
[SAE PAPER 710393] p0286 A71-24257
- Six degree of freedom hybrid digital computer program for complex flight control and associated mode logic design and training  
p0348 A71-25852

- Military aircraft flight test establishments, discussing airframe, engine, flight control and weapons delivery systems tests work flow integration requirements p0355 A71-26315
- Area navigation facility, discussing control and display and navigation standards p0358 A71-26879
- Hydraulically powered duplex input servos for flight control system of VFW-Pokker V/STOL fighter aircraft p0358 A71-26884
- L-1011 aircraft flying stabilizer, discussing choice of longitudinal flight control systems [SAE PAPER 710426] p0405 A71-28312
- VTOL aircraft minimum climb-to-cruise time transition optimal open loop and suboptimal closed loop control synthesis p0444 A71-30799
- Heavy lift helicopter flight control system design, emphasizing fly by wire electrical analog [AHS PREPRINT 503] p0448 A71-31079
- Concorde flight simulator at Toulouse, discussing flight control system, air navigation and certification p0488 A71-31881
- Control configured vehicle design longitudinal requirements due to application of relaxed static stability and maneuver load control [AIAA PAPER 71-786] p0507 A71-34016
- Discrete time digital flight control systems design resulting in closed loop aircraft response characteristics approximation to prescribed flying quality specifications [AIAA PAPER 71-955] p0597 A71-37196
- Power by wire actuators and fly by wire flight controls, discussing systems configuration, reliability, economy and durability p0612 A71-39150
- Aircraft wake turbulence relation to CAT, discussing flight control loss, jumbo jets trailing vortex wakes breakup and detection and safe aircraft spacing p0658 A71-40704
- Minimal time climb velocity optimization for stratospheric and tropospheric jet aircraft flights p0664 A71-41972
- Commercial ATC, considering VFR, flight control and inertial navigation p0666 A71-42078
- Microwave scanning beam guidance receiver design for aircraft landing aid, discussing time sharing and flight control p0668 A71-42091
- Minimum order state vector reconstruction linear filters for constant plants optimal control, applying to aircraft flight multiple control-point problem p0696 A71-44077
- Stability augmentation system for aircraft elastic modes control, discussing active flutter suppression technology p0697 A71-44107
- Technology developments in rotor, drive, flight controls and cargo handling systems of heavy lift helicopter system, noting military and commercial applications [AIAA PAPER 71-994] p0704 A71-45296
- STOL aircraft flight control problems, discussing Mach trim, artificial feel, stability, feedback system responses and lateral/directional laws [AIAA PAPER 71-993] p0704 A71-45297
- Pilot evaluation of movable and rigid cockpit control sticks [AD-709934] p0035 N71-10184
- Flight control software package for digital flight control and landing system of CH-46C helicopter [NASA-CR-110905] p0036 N71-10283
- Systems performance/design requirements specifications for CH-46C helicopter digital flight control and landing system [NASA-CR-110889] p0037 N71-10294
- Systems analysis of flight control and guidance of CH-46C helicopter [NASA-CR-111024] p0037 N71-10297
- Flight simulation for evaluating proposed stabilization system to ensure helicopter hovering precision during cargo loading
- [AD-710948] p0042 N71-10564
- Reliability of aircraft primary control [NASA-TT-P-12709] p0121 N71-13412
- Methods for determining instantaneous values of aircraft parameters with inertial navigation systems [NASA-TT-P-614] p0126 N71-14055
- M2-P2 lifting body flight control system [NASA-TM-X-1809] p0157 N71-14526
- Simulator study of lunar flying platform control by pilot body motion [NASA-TN-D-6016] p0164 N71-14981
- Functional requirements for ground-based trainers, helicopter response characteristics [AD-714954] p0244 N71-18018
- Flight tests to determine reliability of X-15 self adaptive flight control system [NASA-TN-D-6208] p0249 N71-18422
- Optimal control of rotational and transversal motions of flight vehicles based on torsional and flexural deformations [AD-716517] p0312 N71-19696
- Flight simulator and airframe test stand for evaluating operational performance of aircraft flight control system p0393 N71-23413
- Aerodynamic characteristics affecting stability and controllability of supersonic aircraft [AD-718474] p0397 N71-23538
- Jet vertical takeoff aircraft piloted cockpit simulator for controlling aircraft flight performance [ARC-R/M-3647] p0466 N71-25065
- Complexity of supersonic aircraft systems for stability and controllability [AD-721027] p0517 N71-27354
- Effectiveness of attitude feedback and translational velocity feedback flight control system assessed for ability to provide positional stability and reduce pilot error at hover [AD-721728] p0522 N71-28274
- Development of aircraft control system with high performance electrically controlled and mechanically operated hydraulic valves for precise flight operation [NASA-CASE-XAC-00048] p0532 N71-29128
- Theory of controllability for parabolic and second order hyperbolic systems and for hereditary differential systems applied to stabilization of high speed aircraft in gust load disturbances [AD-722072] p0570 N71-29430

## FLIGHT CREWS

- Aircraft compartment glare minimization for flight crew visibility conditions and visual performance improvement p0001 A71-10028
- Cargo aircraft crew safety and survival, describing restraint, escape, flight deck interior doors, fire and smoke hazards and personnel environmental protection [SAE-ARP-1139] p0187 A71-19643
- Operational preparation and commissioning of IL-62 long distance jet aircraft, considering flight crew and maintenance personnel training at U.S.S.R. plant p0340 A71-25256
- Flight and operation of IL-62 long distance jet aircraft, considering flight crew composition and training, passenger and cargo handling and refueling

- DC 10 flight crew individualized ground training program, emphasizing hands-on equipment and instruction hardware [SAE PAPER 710472] p0341 A71-25260
- In-flight study of work/rest cycle effects on double crew performance and fatigue in flying transport missions p0439 A71-30538
- Sonar detection of submarines by helicopter and protection of flight crew hearing [AD-711910] p0664 A71-41829
- Cockpit geometry evaluation program results and techniques with computer input and output samples of flight crew anthropometry [AD-716395] p0109 N71-12400
- Analysis of flight crew duties and operations during flight of Dc-8 aircraft with recommended changes to improve safety [NAL-TR-215] p0314 N71-19817
- FLIGHT FATIGUE** p0645 N71-33585
- Sleep related fatigue in pilot performance and flight safety, considering sleep lack and disruption and irregular duty patterns p0657 A71-40590
- FLIGHT HAZARDS**
- Radiological risks of cosmic radiation during high altitude supersonic flights, considering galactic, solar and incident particles in aircraft atmosphere p0064 A71-13099
- Lightning hazards for helicopters, discussing components vulnerability and protective design requirements p0093 A71-15412
- Materials and structural design development by high velocity impact testing due to transport and subsonic military aircraft susceptibility to bird collision damage p0423 A71-29642
- Epidemiology statistics of USAF spatial disorientation aircraft accidents, noting pilot training, flight environment and indoctrination remedy programs p0651 A71-40359
- Physiological factors in fatal aircraft accidents, discussing pilot incapacitation and transient functional disturbances p0664 A71-41834
- Report of transport aircraft accident and probable causes [NTSB-AAR-71-4] p0259 N71-19040
- Human factors and control system failures in jet upsets during turbulence encounters p0395 N71-23424
- Whistling swan as potential hazard to aircraft during migration periods along Eastern flyway [AD-720889] p0516 N71-27220
- Evaluation of lightning hazards to jet aircraft including possibility of fuel tank explosions [AD-724092] p0637 N71-33006
- FLIGHT INSTRUMENTS**
- NT APPROACH INDICATORS
- NT ATTITUDE INDICATORS
- NT AUTOMATIC PILOTS
- NT FLIGHT TEST INSTRUMENTS
- NT GYRO HORIZONS
- NT RADIO ALTIMETERS
- Man machine considerations in all-weather low level navigation system design, noting off-course error reduction by command information display to pilot p0007 A71-10515
- Three axis flight director for precise helicopter control, deflected slipstream STOL or VTOL attitude and power under low ceiling and visibility landing p0096 A71-15428
- Navy pilots performance improvement through symbolic flight displays p0278 A71-23675
- Turn rate gyro installation angle and airspeed effects on instrument reliability, presenting in-flight investigation results relative to turn rate information usefulness under various flight conditions [SAE PAPER 710380] p0285 A71-24245
- Onboard area navigation systems in ATC environment, discussing route structure and flight instruments [SAE PAPER 710455] p0408 A71-28332
- Frequency modulated radio altimeters, discussing problems of altitude measurement independent of airplane motions in pitch and roll and immunity to fog effects p0491 A71-31918
- Pressure altimeter, airspeed and vertical velocity instruments, discussing selection, installation, pilot verification, error identification, repair and use p0694 A71-43385
- Feasibility of utilizing color cathode ray tubes for aircraft crew station displays [AD-717655] p0376 N71-22174
- Holographic imagery for aviation and space flight [JPRS-53420] p0579 N71-30361
- Tests to determine effectiveness of two linear rate-field displays for use as flight instruments [AD-726643] p0683 N71-35229
- FLIGHT LOAD RECORDERS**
- Boeing 747 flight loads measurements, describing aircraft instrumentation with strain gages and pressure pickups p0073 A71-13766
- Bonded and weldable strain gages for aircraft flight loads measurements at high temperatures, discussing installation, calibration and performance tests p0074 A71-13781
- Aircraft structural fatigue life in-flight monitoring, describing sensor installation on aircraft fin structure and measurement results p0280 A71-23938
- Aircraft flight load measurements in high temperature environment, determining optimal strain gage installation and calibration p0440 A71-30681
- FLIGHT MECHANICS**
- Glider flight mechanics for turning flight, discussing relationships between turning radius, flight speed, sink rate and aerodynamic characteristics p0213 A71-21770
- Experimental flight mechanics in terms of data processing quality, discussing subsystems control p0280 A71-23928
- Aircraft integrated command and control system, discussing vertical, aerodynamic and horizontal situations, flight mechanics, power setting, telecommunications, etc p0488 A71-31878
- Correlation system of equations for mathematical expectations and phase coordinate correlation moments for accuracy analysis in flight vehicle dynamics problems p0702 A71-44692
- Flight dynamics of noise optimal flight profiles for V/STOL aircraft, minimization of gust effects on aircraft and nonlinear dynamic stability of parachute-load systems p0702 A71-44761
- Engineering analysis on flight mechanics for simulating pilot behavior in aircraft p0174 N71-16068
- Accident investigations, flight control systems, and operational recordings for improved aircraft flight mechanics [AGARD-CP-76-71] p0393 N71-23410
- Operational flight data analysis for improved aviation safety levels p0393 N71-23411
- Onboard data acquisition for improved aircraft design and operational flight safety p0393 N71-23412
- Design modifications on short takeoff Bronco aircraft resulting from combat operations tests p0394 N71-23416
- Landing accidents investigations for Hawker Siddeley 748 aircrafts with performance measurements on rough surfaces p0394 N71-23417
- Safety measures to eliminate aircraft trailing vortex hazards [NASA-TN-X-67125] p0394 N71-23418
- Flight mechanics problems in accident investigations for VJ-101 aircraft p0395 N71-23428
- FLIGHT OPTIMIZATION**
- Flight range and optimum angle of attack under wind conditions of constant velocity and direction,

# FLIGHT PATHS

# SUBJECT INDEX

considering fuel consumption for given distance  
p0149 A71-18325

Supersonic airplane minimum time turns at constant  
altitude, determining thrust, bank angle and angle  
of attack programs with optimal control theory  
p0221 A71-22032

Optimal stochastic control and gust alleviation for  
jet aircraft response for flight through turbulent  
upwash field  
p0297 A71-24870

Aircraft performance and optimal energy flight path  
control in combat environment  
p0602 A71-37724

**FLIGHT PATHS**

**NT GLIDE PATHS**

Missiles and aircraft trajectories computation time  
reduced via time sharing and hybridization  
p0020 A71-11794

Aircraft propulsive thrust moment effect on phugoid  
motion, examining angle of attack and flight path  
variations with resulting instability  
p0068 A71-13340

Optimum flight paths for V/STOL aircraft operating  
in short haul transportation near city centers  
p0098 A71-15443

Frequency and amplitude during longitudinal control  
surface pumping by pilots in precise flight path  
handling for aircraft design  
[AIAA PAPER 70-567] p0145 A71-17699

Aircraft navigation system requiring computer and  
display for approach guidance to circular orbit  
over fixed ground area  
[AIAA PAPER 69-986] p0200 A71-20305

Noise abatement power cutback takeoff procedures,  
maximum altitude approaches and preferential  
runway systems for noise relief  
p0213 A71-21813

Supersonic airplane minimum time turns at constant  
altitude, determining thrust, bank angle and angle  
of attack programs with optimal control theory  
p0221 A71-22032

Cut-off Mach number of sonic bang propagation on  
ground for flight track in relation to atmospheric  
parameters  
p0276 A71-23577

Engine inlet noise prediction from static test and  
flyover data as function of time at various  
observer locations, examining suppression effects  
on total spectra  
[SAE PAPER 710386] p0286 A71-24250

Flight path optimization with multiple time scales,  
discussing decoupling of high order three  
dimensional aircraft flight problem into several  
low order problems  
p0295 A71-24858

Wind gradient effect on flight characteristics  
during aircraft landing approach, particularly  
path deviation  
p0340 A71-25194

Supersonic flight path curvature effects on local  
shock wave production, considering no boom zone  
and ground rules  
p0354 A71-26310

V/STOL aircraft flight path and attitude controls in  
turbulence, discussing design based on state  
variable methods of control theory  
p0426 A71-29776

STOL aircraft guidance capability with onboard  
digital computer, maintaining time of arrival  
envelope at way points along complex flight paths  
[AIAA PAPER 71-770] p0545 A71-35528

Omega navigation application to general aviation  
aircraft, presenting diurnal course shift to  
overcome deficiencies  
p0548 A71-35767

Dynamic positioning stationkeeping and stability  
criteria for formation flight systems extended to  
helicopter and V/STOL transports  
p0552 A71-35923

Cost effective high speed projectile trajectory  
plotting system for gunnery range instrumentation,  
applying to aircraft path recording during  
automatic landing control  
p0560 A71-36613

Jet aircraft flyover noise measurement, determining  
average intrusion level in residential communities  
under approach and departure corridors  
p0600 A71-37497

Sonic boomless transonic transports design,  
performance, economics and airline routes at Mach  
1.2 and 0.98  
[CASI PAPER 72/8] p0601 A71-37598

Aircraft lateral dynamics effect on positioning  
accuracy along straight flight path, using Loran C  
data  
p0610 A71-38864

Analytical model for air navigation and ATC system  
design, demonstrating system parameters effects on  
lateral separation standards for parallel flight  
lanes  
p0667 A71-42083

Prop rotor and lift fan VTOL aircraft ground noise  
level reduction, using flight trajectory  
management  
[AIAA PAPER 71-991] p0704 A71-45295

Behavior of attitude gyro and gyro horizon during  
looping flight  
p0119 N71-13281

Optimization techniques for aircraft multiple flight  
paths  
[AD-713136] p0168 N71-15392

Relaxation in scaling parameters effect on free  
flight path of wind tunnel model with forced  
ejection  
[ARL/A-322] p0306 N71-19391

High intensity xenon flashtube lights for high  
intensity xenon flashtube lights for during  
daytime and nighttime flights  
[AD-718639] p0462 N71-24669

Approach guidance system for side-firing tactical  
aircraft  
[AD-722412] p0573 N71-29708

Statistical analysis of Navy and Marine aircraft  
activity and airspace usage in Feb. and Mar. 1970  
as part of National Airspace Utilization System  
[AD-722698] p0576 N71-30174

Application of two dimensional collision geometry to  
collision avoidance warning techniques for  
military aircraft operations  
[AD-723977] p0635 N71-32931

Summary of instrument flight rule off-airway routes  
for commercial and military aviation in US and  
overseas areas  
p0678 N71-34592

**FLIGHT PERFORMANCE**

**U FLIGHT CHARACTERISTICS**

**FLIGHT PLANS**

Commercial V/STOL aircraft area navigation system  
requirements, discussing airborne computer, flight  
plan data storage and control subsystems and  
horizontal orientation display  
p0283 A71-24150

Tu-154 responsibilities of three-man crews,  
considering flight plan, refueling, cargo loading  
and unloading  
p0340 A71-25258

French ATC, discussing automatic coordinator  
systems, computer utilization and flight plan data  
processing  
p0435 A71-30382

Northern Hemisphere temperature field atlas for SST  
flight planning  
[AD-712017] p0050 N71-11031

**FLIGHT RECORDERS**

Civil aircraft accident and maintenance recording  
regulations and systems, discussing airborne  
equipment  
p0073 A71-13735

Flight characteristics under atmospheric turbulence  
conditions, analyzing analog trace records of  
airspeed, normal acceleration, altitude, air  
temperature, control surface and flight attitude  
parameters  
p0426 A71-29771

Concorde 002 aircraft equipment for flight data  
recording and processing  
[RSS/ES-13] p0331 N71-20857

Jet transport aircraft airspeed control and  
controllability data obtained by flight recorders  
[ARC-CP-1135] p0331 N71-20902

Event recorder with constant speed motor which  
rotates recording disk  
[NASA-CASE-XLA-01832] p0332 N71-21006

Onboard data acquisition for improved aircraft  
design and operational flight safety  
p0393 N71-23412

- Analysis of 79,000 hours data obtained from NASA V-C/VGH flight recorders installed on 734 general aircraft engaged in eight types of operations p0584 N71-30782
- Performance evaluation of automatic flight progress strip cutter and loader used in air traffic control facility [ACTEU-330] p0726 N71-38215
- FLIGHT RULES**
- NT INSTRUMENT FLIGHT RULES
- Sonic boom implications and decision on acceptability with alternative policies of complete barring, controlled corridors and overflight limitations [CASI PAPER 72/4] p0601 A71-37595
- FLIGHT SAFETY**
- Avionics system maximizing pilot chances of surviving mission and destroying selected target by removing mental limitations p0006 A71-10506
- ATC system improvement by procedural changes, applying probability concepts to flight safety p0018 A71-11699
- General aviation safety and effectiveness enhancement through electronic technology applications, discussing airspace control system based on beacon transponder, LF-VLP area navigation and vertical radar p0141 A71-17228
- Aerospace Recommended Practice criteria for flight deck crew escape systems applicable to all commercial aircraft propulsion systems, design speeds and payloads [SAE-ARP-808A] p0187 A71-19646
- Jet aircraft airworthiness standards, discussing airline fleet maintenance resources, inspection systems and future requirements p0354 A71-26308
- ATC system safety problems from user standpoint, considering requirements by pupil, test and airline pilots and light, private, business, taxi and military aircraft p0542 A71-35372
- Sleep related fatigue in pilot performance and flight safety, considering sleep lack and disruption and irregular duty patterns p0657 A71-40590
- Aircraft ditching and flying personnel survival, stressing passenger briefing and crew jacket equipment with VHF transceiver for rescue operations coordination p0692 A71-43229
- Preliminary report of aircraft accident of DC-8 at Anchorage, Alaska [SB-71-5] p0173 N71-16059

U FLIGHT
- FLYING BEDSTEAD AIRCRAFT**  
U FLYING PLATFORMS
- FLYING PERSONNEL**  
NT AIRCRAFT PILOTS  
NT FLIGHT CREWS

## NT PILOTS (PERSONNEL)

## NT TEST PILOTS

Hyperventilation syndrome in flying personnel, discussing symptoms of paresthesia and extremities contraction, psychoemotional causes and control mechanism

p0662 A71-41569

## FLYING PLATFORM STABILITY

## U AERODYNAMIC STABILITY

## U FLYING PLATFORMS

## FLYING PLATFORMS

Geomagnetic components measurement from moving platforms, discussing coordinate system stabilization methods for errorless time averaging of measurements

p0140 A71-17194

Geomagnetic components measurement from moving platforms, discussing coordinate system stabilization methods for errorless time averaging of measurements

p0404 A71-28249

Radio controlled small aircraft as measurement platform for meteorological sensors, discussing development and performance from field tests

p0542 A71-35334

Construction and operation of body-motion controlled five-degree-of-freedom simulation of jet-supported lunar flying machine

[NASA-TN-D-6001]

p0115 N71-12736

Design and development of lunar escape system simulator for investigation of lunar escape problems and simplified manual guidance and control for lunar escape vehicles

[NASA-TN-D-6111]

p0384 N71-22590

Evaluation of in-flight simulation of flying platform using helicopter with variable stability and maneuverability

p0626 N71-31957

## FLYING QUALITIES

## U FLIGHT CHARACTERISTICS

## FOAMS

Jet noise reduction by foam injection, developing mathematical model for foam behavior in sound field

[AIAA PAPER 71-734]

p0480 A71-31327

Acoustical properties of liquid base foams and application for jet noise reduction

[NASA-CR-1695]

p0259 N71-19139

Design, development, and flight testing of fire suppressant void filler foam kits for lower hemisphere of fuel tanks in various tactical army aircraft

[AD-719711]

p0518 N71-27679

Polyisocyanurate foam and intumescent paint for thermal protection of aircraft passengers in ground accident fires

p0581 N71-30758

## FOCUSING

Sonic boom near field behavior, discussing N wave focusing

[AIAA PAPER 71-185]

p0155 A71-18624

Approximate solutions for diffracted and focusing wave front expansions in sonic boom shock wave propagation

p0524 N71-28370

## FOG

Airport runway mechanical fog dispersal, using trailer mounted rotating wire mesh sieves

p0086 A71-14983

Soviet book on fog, cloud and humidity measuring instruments, discussing artificial fog formation and natural fog dispersion problems

p0199 A71-20298

Fog removal by high power carbon dioxide lasers, evaluating possibility of clearing airport runways

[AIAA PAPER 69-670]

p0200 A71-20308

Meteorological observations for terminal weather modification in aviation, noting airport fog dispersal

p0212 A71-21732

Fog clearance from airport runways, discussing available techniques, economic aspects and importance for military operations

p0361 A71-27247

Supercooled fog dissipation by liquid propane, determining effectiveness in providing operational support to aircraft landing and takeoff

p0503 A71-33536

Fog dissipation programs by commercial and military agencies

p0557 A71-36450

Helicopter experimental fog clearing by downwash mixing at Greenbrier Valley Airport, Lewisburg, West Virginia

p0612 A71-39206

Fog formation and dispersal by velocity field induced by helicopter trailing vortices, presenting dynamic model with droplet depletion, evaporation and condensation

p0657 A71-40510

Describing techniques and equipment used by air weather services for fog dissipation

[AD-712392]

p0116 N71-12997

Wettability of microfog streams of high temperature lubricants on static metal surface

[NASA-CR-72743]

p0163 N71-14817

Fog modification over airports using helicopters

[AD-716818]

p0330 N71-20806

## FOILS (MATERIALS)

## NT METAL FOILS

## POKKER AIRCRAFT

## NT P-28 TRANSPORT AIRCRAFT

Hydraulically powered duplex input servos for flight control system of VFW-Pokker V/STOL fighter aircraft

p0358 A71-26884

Fatigue test equipment for evaluating Pocke

aircraft wing

[NLR-TR-70008-1]

p0389 N71-23157

## POKKER BOND TESTERS

## U ADHESION TESTS

## POKKER P 28 AIRCRAFT

## U P-28 TRANSPORT AIRCRAFT

## FOLDING STRUCTURES

## NT SAILWINGS

Folding sidewall aircraft tires design, construction and flight tests, noting advantages and disadvantages

p0703 A71-44975

Development and characteristics of variable sweep wing control system for supersonic aircraft

[NASA-CASE-XLA-03659]

p0051 N71-11041

## FORCE DISTRIBUTION

Lifting and side force distributions acting on body in transonic flow

p0078 A71-14232

Elastic, inertial and aerodynamic forces aeroelastic triangle, examining lift changes due to aircraft structure deformation, dynamic flight stability and space shuttle development problems

p0196 A71-20063

Aircraft systems assembly methods, discussing rigidity effects on error redistribution in external and internal force field application

p0205 A71-20792

Steady nonrotational flow around rectilinear profile in finite width uniform current in linear theory, calculating fluid exerted forces

p0279 A71-23822

Mean and fluctuating forces on flat plates normal to turbulent flow, giving power spectral density measurements of drag fluctuating component

p0299 A71-25085

High lift wing characteristics with/without additional devices, emphasizing lift control and load distribution

p0364 A71-27476

Wind tunnel test models and force measuring balances design, fabrication, inspection and calibration

p0481 A71-31440

Fluctuating aerodynamic force measurement on stationary circular cylinder spanning wind tunnel, using direct method without support interference

p0652 A71-40393

Spanwise lift distribution over wings and wake formation in thin airfoils of finite aspect ratio in linear subsonic potential flow

p0654 A71-40495

Control surfaces and direct jet force flutter suppression system shown to increase flutter speed of wing

p0697 A71-44108

Oscillating flow effects on pressure force normal to symmetrical airfoil chord

[AD-711830]

p0046 N71-11011

Aerodynamic coefficients, pressure, load and force distributions on cambered delta wings

- [ARC-CP-1129] p0228 N71-17112  
Lift force distribution calculation technique for wings with jet flaps including rectangular and swept wing examples  
[NASA-TT-P-13714] p0586 N71-30852  
Spanwise integration of kernel functions for calculating wing lift distributions in subsonic flow  
p0640 N71-33219  
Computer program for calculating lifting force distributions on symmetrical and cambered wings in subsonic flow based on numerical integration and lifting surface theory  
p0640 N71-33220
- FORCE FIELDS**

# SUBJECT INDEX

# FREQUENCY DISTRIBUTION

Equation for motion of buoyant free vortices in inviscid fluid subjected to gravity  
[AIAA PAPER 71-604] p0483 A71-31543

Low speed testing of VTOL models in wind tunnels, describing method for estimating free air approach velocity and angle of attack p0498 A71-32724

aerodynamic free vortex loading on two dimensional wing at zero incidence at low speeds in incompressible flow p0503 A71-33420

Noise generation due to inlet free stream turbulence incident on isolated stators and rotors, using flat plate cascade blade row model p0559 A71-36498

Near wake streamline configuration in symmetry plane of slender cone in hypersonic flow at free stream Mach number 7 p0561 A71-36754

Modified asymptotic perturbation expansion method application to free flow rotation effect on boundary layer for hypersonic flow about blunt body p0615 A71-39483

Free vortices from slender wings, controlling strength, position, core stability and thickness on basis of one dimensional flow model p0654 A71-40492

Shock wave diffraction at symmetric lenticular wing profile with free stream critical Mach number of 0.87, using Godunov difference scheme p0657 A71-40679

Blunt and hemispherical base axisymmetric bodies in Mach 4 free stream, investigating turbulent near wakes generation p0660 A71-40999

Numerical analysis of plane steady transonic flows past lifting airfoils with free-stream Mach numbers less than unity [D180-12958-1] N71-34275

**FREE JETS**

Critical nozzle pressure ratio and geometry effects on free exhaust gas jets of jet engine models [DGLR-70-055] p0130 A71-15966

Aerodynamic sound generation by turbulent circular free jets, presenting solution to inhomogeneous acoustical wave equation by Lighthill p0142 A71-17421

Aeroacoustic phenomena in free turbulent gas jets, discussing structure, noise-turbulence correlations and acoustic field generation at subsonic/critical velocities p0277 A71-23607

Flow field properties of impinging free jets from circular convergent nozzle, measuring velocity, surface pressure and momentum flux p0292 A71-24616

Curvature effects on laminar and turbulent free jet boundary between irrotational flow and stagnant fluid, discussing pressure effects p0346 A71-25482

**FREE MOLECULAR FLOW**

Spheres drag coefficient at hypersonic Mach numbers for near free molecular flow p0011 A71-10969

Photoelectric, bolometric and photographic recording assembly for measurement of light pressure and aerodynamic forces on complex shape body in free molecular flow p0415 A71-29155

Aerodynamic characteristics similarity and variation in hypersonic flow transition region from free molecular flow to solid medium p0416 A71-29172

Shock tunnel drag measurements on sharp slender cones in near free molecule hypersonic flow in air and He p0604 A71-37897

**FREE OSCILLATIONS**

**U FREE VIBRATION**

**FREE RADICALS**

Temperature and radical concentration measurements for high temperature flowing gas streams in rig simulating conditions in ramjet combustion chamber and nozzle p0411 A71-28758

**FREE STREAM EFFECTS**

**U FREE FLOW**

**FREE STREAMS**

**U FREE FLOW**

**FREE VIBRATION**

Nonlinear partial differential equation solution for natural free-free vibrations of beam structures [ASME PAPER 70-WA/APM-55] p0078 A71-14172

Gas flow past straight airfoil, analyzing damped natural oscillations p0083 A71-14561

Integrally stiffened five bay panel, calculating free vibration and random response to jet noise excitation p0482 A71-31532

Natural vibrations of two coaxial rotors with unbalanced disk and different angular velocities, solving equations of motion by energy balance method p0600 A71-37536

Finite element method for free vibrations and random response of integrally-stiffened panel [LR-544] p0402 N71-24298

Computation of uncoupled vibrations of rotary wings using transfer matrix method [DLR-FB-70-63] p0570 N71-29543

**FREIGHT**

**U CARGO**

**FREIGHT COSTS**

Air freight economics and growth forecast, discussing rates, cost and technological aspects p0664 A71-41840

**FRENCH SPACE PROGRAMS**

Project DIOSCURES for global sea and air traffic control using synchronous satellites for ground-air-ground communications p0056 N71-11768

Policies for participation of French aerospace industry in space programs p0058 N71-12069

**FREON**

Supersonic cylindrical freon compressor with low blade height for elementary compression and flow visualization aerodynamic and thermodynamic tests p0544 A71-35467

**FREQUENCIES**

**NT AUDIO FREQUENCIES**

**NT BROADBAND**

**NT C BAND**

**NT HIGH FREQUENCIES**

**NT RESONANT FREQUENCIES**

**NT SUPERHIGH FREQUENCIES**

**NT SWEEP FREQUENCY**

**NT ULTRAHIGH FREQUENCIES**

**NT VERY HIGH FREQUENCIES**

**FREQUENCY ASSIGNMENT**

Minimum channel requirements for ILS localizer frequency assignment, 1970-1975 [AD-714111] p0175 N71-16198

Survey of very high and ultrahigh frequency utilization in US aeronautics for communication satellite frequency assignment [NASA-TM-X-65527] p0471 N71-25920

Third order-two signal intermodulation products for 242 frequencies between 225 and 400 MHz as used in FAA frequency assignment processes [ECAC-PR-70-018] p0571 N71-29551

Third order-two signal intermodulation products for 360 frequencies between 118 and 136 MHz when 50 kHz channel spacing is used as in FAA frequency assignment processes [ECAC-PR-70-016] p0571 N71-29552

Third order-two signal intermodulation products within 118-136 MHz band with 50 kHz spacing [ECAC-PR-70-015] p0571 N71-29554

**FREQUENCY CONTROL**

Air traffic control radar separation by pulse repetition frequency discrimination for double and triple stagger configurations p0133 A71-16347

**FREQUENCY CONVERSION**

**U FREQUENCY CONVERTERS**

**FREQUENCY DISTRIBUTION**

Aircraft design and fatigue life monitoring, investigating effects of gust velocity frequency distribution in patches of atmospheric turbulence p0428 A71-29789

- Jet turbulence orderly structure enhancement, control and relation to noise, studying response to periodic surging of frequency and amplitude  
p0606 A71-38204
- Discrete frequency sound radiation from rotating periodic sources covering rotor blade noise in near field and from disk loading asymmetries  
p0609 A71-38466
- Cumulative frequency distributions determined by extreme value analysis used for fatigue analysis and interpretation of c.g. vertical acceleration and gust velocity measured on transport aircraft [AGARD-R-579-71]  
p0466 N71-25080
- FREQUENCY MODULATION**  
Frequency modulated radio altimeters, discussing problems of altitude measurement independent of airplane motions in pitch and roll and immunity to fog effects  
p0491 A71-31918
- FREQUENCY RANGES**  
Airborne communications with AN/ARC-154 transceiver in single radio, discussing extended frequency coverage, multimode operation, navigation and input/output provisions  
p0548 A71-35758
- FREQUENCY REGULATION**  
**U FREQUENCY CONTROL**  
**FREQUENCY RESPONSE**  
Rapid hybrid frequency response method for aircraft flight flutter testing based on hybrid computing system  
p0003 A71-10228
- Aircraft fuselage internal noise and structural frequency response due to random excitation, using transfer matrix analysis  
[ASME PAPER 70-WA/DE-9]  
p0077 A71-14143
- Periodically supported and damped closed circular beam structure, determining frequency response matrix  
p0221 A71-22026
- Frequency response of five component strain gage oscillating balance for dynamic wind tunnel stability testing  
p0434 A71-30333
- Power spectrum method for determining gust frequency response functions in dynamic aircraft design  
p0390 N71-23211
- FREQUENCY SCANNING**  
High speed electronic phase and frequency scanned linear, static fed and monopulse arrays element and angular error analysis  
p0447 A71-31049
- Doppler scanning landing microwave system for air-derived azimuth and elevation angle aircraft guidance by frequency coding and reference carrier transmission  
p0667 A71-42089
- FREQUENCY SHIFT**  
Laser system for atmospheric wind velocity and turbulence, using Doppler frequency shift undergone by radiation beam scattered by particles suspended in flows  
p0653 A71-40490
- FREQUENCY STABILITY**  
Aircraft DC to AC converters frequency stabilization systems, describing circuit diagrams and operation principles  
p0079 A71-14247
- FREQUENCY SYNCHRONIZATION**  
ATA Collision Avoidance System based on time and frequency synchronization via ground stations or other aircraft  
p0030 A71-12895
- FREQUENCY TRANSLATION**  
**U FREQUENCY CONVERTERS**  
**FRICTION**  
**NT AERODYNAMIC DRAG**  
**NT FLOW RESISTANCE**  
**NT FRICTION DRAG**  
**NT SKIN FRICTION**  
**NT SLIDING FRICTION**  
**NT SUPERSONIC DRAG**  
**NT VISCOUS DRAG**  
Lubrication by boundary, elastohydrodynamic, and fluid films, wear due to fretting, erosion, scuffing, and pitting, and friction in aircraft  
[NASA-TN-X-67872]  
p0588 N71-31134
- FRICTION DRAG**  
**NT AERODYNAMIC DRAG**
- NT SUPERSONIC DRAG**  
**NT VISCOUS DRAG**  
Heat transfer and friction drag calculation for turbulent boundary layer of gas with temperature dependent physical properties  
p0020 A71-11884
- Skin friction drag and velocity profile measurements on flat plate in two phase circular pipe flow in subsonic wind tunnel for gas-solid media, using photographic technique  
[ASME PAPER 71-FE-32]  
p0421 A71-29467
- Turbulent skin friction drag for tapered wings as function of root chord Reynolds number  
p0671 A71-42839
- FRICTION FACTOR**  
Test time and contact stresses effect on jet fuels antiwear properties under rolling friction  
p0025 A71-12570
- Friction factor for low Reynolds number turbulent flow in large aspect ratio rectangular ducts, comparing Blasius and Prandtl relations  
[ASME PAPER 71-FE-A]  
p0420 A71-29378
- Aircraft parts damage by corrosive friction forces, hot gases and intercrystalline attack, noting worn universal joint and blade grain boundary damage  
p0700 A71-44574
- FRICTION LOSS COEFFICIENT**  
**U FRICTION FACTOR**  
**FRICTION MEASUREMENT**  
Compressible turbulent boundary layer skin friction measurements on adiabatic flat plate, discussing drag balance calibration  
[ASME PAPER 70-WA/FE-26]  
p0077 A71-14134
- FRICTION PRESSURE DROP**  
**U SKIN FRICTION**  
**FRINGE PATTERNS**  
**U DIFFRACTION PATTERNS**  
**FROST**  
Low speed aerodynamic characteristics of airfoil profiles including effects of upper surface roughness simulating hoar frost  
[NPL-AERO-1308]  
p0047 N71-11016
- FROUDE NUMBER**  
Three dimensional surface planing at high Froude number with small angle of attack  
[AD-717067]  
p0335 N71-21600
- FUEL CELLS**  
Aircraft self sealing fuel tank and fuel cell systems damage control, considering chemical, precompressed foam and swellable elastomer seal concepts  
p0282 A71-24079
- FUEL COMBUSTION**  
Jet engine liquid fuel wall layer combustion stimulation by repeated oxidizer injection into supersonic section of nozzle  
p0080 A71-14256
- Dispersion model of turbulent mixing of isothermal and nonisothermal slipstreams of air-gasoline combustion products in nozzles  
p0100 A71-15622
- Luminometer numbers of hydrocarbons and reactive fuels as function of molecular weight and structure  
p0150 A71-18471
- Liquid fuel pool ignition at superflash and subflash temperatures involving adjacent heat source, cross wind and fluid motion  
p0185 A71-19245
- Kerosene type fuels for aircraft gas turbine engines, discussing combustion problems, smoke emission reduction and bacterial or fungal contamination  
p0411 A71-28754
- Swirl-can modular turbojet combustor burning natural gas fuel  
[NASA-TN-D-7020]  
p0109 N71-12421
- Combustion characteristics of gas turbine aircraft engines  
[AD-727175]  
p0717 N71-37387
- FUEL CONSUMPTION**  
Aircraft propulsion, discussing piston, turbojet, turboprop and turbofan engines in terms of thrust to weight ratio, specific fuel consumption and propulsive efficiency  
p0085 A71-14977
- High pressure ratio centrifugal compressors for small gas turbine engines, investigating power and specific fuel consumption variation with pressure

- and temperature p0284 A71-24218
- Light aircraft standard fuel flight evaluation, discussing compatibility with grades 80/87 and 100/130 certified engines and comparative operational fuel consumption [SAE PAPER 710369] p0284 A71-24239
- Jet-supported VTOL aircraft fuel-time-optimal landing control, using mathematical model, Pontryagin maximum principle and analog computer solution p0419 A71-29281
- Subsonic and supersonic turbojet aircraft engines development, discussing design, operation, reliability, weight, fuel consumption and cost p0428 A71-29811
- French SNECMA M56 turbofan engine design for medium capacity airliners, featuring low specific fuel consumption and low noise level p0496 A71-32692
- Turbojet engines thrust and fuel economy improvement by gas-air jet mixing, discussing efficiency increase and noise reduction p0497 A71-32717
- Air transport propulsion systems economics, considering first cost, specific weight, fuel consumption and maintenance effect on direct operating cost p0503 A71-33469
- Three dimensional minimum fuel turns for supersonic aircraft by energy state approximation [AIAA PAPER 71-913] p0596 A71-37163
- Fuel consumption and propulsive and thermodynamic efficiency comparisons for ships, hydrofoil craft, helicopters, jet aircraft, and ground effect machines [NPL-HOVERCRAFT-12] p0230 N71-17161
- Kalman linear least squares filtering applied to estimation of fuel quantity and rate for fighter aircraft [AD-717640] p0371 N71-21922
- FUEL CONTAMINATION**
- Aircraft fuel tank nitrogen inerting, fire and explosion suppression for foreign particle contamination, sludge and lacquering reduction [ASME PAPER 71-GT-45] p0351 A71-25978
- Polyurethane foam effects on fuel contamination during installation for fuel system fire and explosion protection [ASME PAPER 71-GT-54] p0351 A71-25981
- Microbiological contamination of jet aircraft fuel tanks in tropical regions, considering maintenance [SAE PAPER 710438] p0406 A71-28320
- Kerosene type fuels for aircraft gas turbine engines, discussing combustion problems, smoke emission reduction and bacterial or fungal contamination p0411 A71-28754
- Development of radiotracer method for detecting contribution of selected components to storage instability of jet engine fuels [BM-RI-7493] p0327 N71-20505
- FUEL CONTROL**
- Fluidic fuel control valve for uniform fuel distribution to gas turbine annular combustor, providing sufficient pressure drop at low fuel flow rates [ASME PAPER 71-GT-44] p0351 A71-25977
- Energy state approximation and supersonic aircraft minimum fuel fixed range trajectory optimization, noting not convex velocity set p0439 A71-30609
- Turbine engine fuel control stability on CH-47C helicopter, using flight tests and lag damper simulation [AHS PREPRINT 560] p0452 A71-31107
- FUEL CORROSION**
- Jet fuel soluble corrosion inhibitors evaluation by potentiostatic polarization methods p0081 A71-14323
- Jet fuels thermal stability and corrosive properties during prolonged storage p0186 A71-19492
- Antiwear properties of jet fuels as function of dissolved oxygen, resin and heteroorganic compound content and temperature, considering antioxidant additives p0504 A71-33579
- Soviet monograph on carbon deposits in jet engines covering distribution, formation, fuel properties, reduction and removal and harmful effects in gas turbines p0659 A71-40871
- Microbiological fuel corrosion by bacteria and fungi in fuel tanks [AD-712103] p0056 N71-11848
- FUEL ECONOMY**
- U FUEL CONSUMPTION**
- FUEL FLOW**
- Optimal gas temperature in bypass and turbojet engines afterburners ensuring minimum fuel flow rate dependence on thrust augmentation p0504 A71-33607
- Air flow velocity, altitude, fuel-air ratio, fuel flow velocity, and pressure effects on fuel temperature before and after prevaporization in ramjet engines [NASA-TT-P-13605] p0402 N71-24053
- FUEL FLOW REGULATORS**
- D-30 bypass engine hydraulic control system for Tu-134 aircraft, discussing fuel flow regulator assembly and operation p0270 A71-22947
- Propulsion system and fuel regulator design effect on thrust change during air ejection for VTOL aircraft stabilization in hovering flight p0293 A71-24753
- Fluidic fuel control valve for uniform fuel distribution to gas turbine annular combustor, providing sufficient pressure drop at low fuel flow rates [ASME PAPER 71-GT-44] p0351 A71-25977
- FUEL GAGES**
- Electrical and physical nature of microbial membranes implicated in aircraft fuel quantity probe malfunction [SAE PAPER 710439] p0406 A71-28321
- FUEL INJECTION**
- Internal mixing scheme for continuous fuel injection in Wankel engine via swirl nozzle during intake-compression cycle p0025 A71-12559
- Supersonic combustion ramjet engine with liquid fuel injection, considering atomization process and ignition criteria p0133 A71-16531
- Low pressure drop fuel liquid injectors for jet engine combustors, using gas turbine vaporizer design [ASME PAPER 71-GT-38] p0350 A71-25972
- Gas dynamics of fan jets at various injection angles [AD-714790] p0245 N71-18034
- Supersonic combustion, fuel injection, and recirculation in hydrogen hypersonic external combustion at flat plates and bodies of revolution [DLR-FB-70-64] p0374 N71-22129
- Gas-air mixture requirements for turbine and injection burner combustion efficiencies [AD-719834] p0467 N71-25359
- FUEL PUMPS**
- Concorde aircraft fuel system and fuel pumps, considering center of gravity and center of pressure relationship to maintain trim p0276 A71-23581
- High speed vane type main engine fuel pump for small gas turbine engines [ASME PAPER 71-GT-24] p0349 A71-25966
- FUEL SYSTEMS**
- NT AIRCRAFT FUEL SYSTEMS**
- Fluidic pressure ratio control for vertical takeoff aircraft lift engine fuel system, describing breadboard circuit, test bed and flight standard p0203 A71-20587
- Soviet book on aircraft and rocket engines control automation, discussing nuclear power plant/fuel systems design and control simulation methods p0355 A71-26403
- Material, design and operating principles of rotary seals used in gas ducts, bearing elements and fuel systems of aircraft gas turbine engines p0604 A71-38015
- Evaluation of fuel flowmeter instrumentation conducted during flight tests [AD-719280] p0457 N71-24479
- Use of air-assist fuel nozzle to reduce exhaust emissions from gas turbine combustor at simulated idle conditions - J-57 engine

- [NASA-TN-D-6404] p0591 N71-31456  
Design criteria for crashworthy aircraft fuel systems for military aircraft  
[AD-723988] p0637 N71-32992
- FUEL TANKS**
- NT WING TANKS**
- Supersonic transport fuel tank environments and sealant requirements, describing Boeing laboratory environment approach p0275 A71-23424
- Aircraft self sealing fuel tank and fuel cell systems damage control, considering chemical, precompressed foam and swellable elastomer seal concepts p0282 A71-24079
- Fluorosilicone sealants for aircraft fuel containment, discussing resistance to heat, jet fuel, moisture and heat aging p0282 A71-24080
- Long term exposure effects on high temperature resistant supersonic aircraft fuel tank sealants p0282 A71-24081
- Accelerated testing of jet fuel containment sealant, using reduced pressure and hybrid fluorocarbon silicone p0282 A71-24083
- Automated fueling for Kennedy jet airport, using computer controlled underground bulk storage-satellite tank pipeline system p0288 A71-24300
- Variable geometry external fuel tanks for high performance aircraft with drag reduction upon fuel transfer p0341 A71-25271  
[AIAA PAPER 71-395]

- Gas generator with high thrust-weight ratio, discussing thermodynamic cycles, mass flow rates and combustion chamber  
p0496 A71-32571
- Validating gas generator method of calculating jet engine thrust, and evaluation of XB-70-1 engine performance at ground static conditions  
[NASA-TN-D-7028] p0122 N71-13419
- Gas generators as vertical takeoff aircraft energy sources to operate lift fans or helicopter rotary wings  
p0377 N71-22194
- Two variations of gas generator method to calculate thrust of afterburning turbofan engines installed in F-111A aircraft  
[NASA-TN-D-6297] p0384 N71-22614
- Helicopter payload capability indicator in terms of gas generator speed  
[AD-723436] p0620 N71-31723
- GAS INJECTION**
- Heat exchange in dissociating partly ionized gas flow over critical point on permeable surface with injection into laminar boundary layer  
p0073 A71-13748
- Air, helium and carbon dioxide injection effect on turbulent boundary layer thermodynamic behavior by wind tunnel experiments  
p0100 A71-15615
- Boundary layer flow with large mass injection rate, presenting numerical method with rapid convergence for increasing blowing parameter  
p0265 A71-22108

- Hypersonic flow interaction with transverse jet, discussing experimental investigation of Reynolds number, jet pressure ratio and mass flux effects  
p0270 A71-22944
- Air and carbon dioxide intensive injection effect on turbulent boundary layer of subsonic channel air flow  
p0290 A71-24378
- Heat and mass transfer in supersonic laminar boundary layers with light gas injection, deriving approximate solution for binary mixture flow with variable fluid properties  
p0299 A71-25097
- Gas turbine engine combustion chamber start-up and burning performance, considering air injection and propellant atomization  
p0414 A71-28968
- Gas turbine engine startup igniter with modified propellant atomizer enhanced by air injection  
p0414 A71-28969
- Air injection into turbulent boundary layer flow through porous plate, examining heat transfer and shielding efficiency  
p0500 A71-33035
- Air injection into trailing vortex core, noting jet flow effect on circumferential velocity  
p0598 A71-37291
- Windward injection into supersonic stream at angle of attack, minimizing vortex disruption  
p0670 A71-42787
- Two dimensional, supersonic mixing of hydrogen injected from wall slot into airstream  
[NASA-CR-1793] p0321 A71-20127
- Jet to free-stream dynamic pressure ratio effects on penetration and mixing of hydrogen injected normal to supersonic airstreams  
[NASA-TN-D-6114] p0324 A71-20195
- Mixing of hydrogen downstream from multiple injectors normal to supersonic jet flow, for supersonic combustion on ramjet engines  
[L-7896] A71-34274
- GAS IONIZATION**  
NT ATMOSPHERIC IONIZATION
- Gas ionization in supersonic wake at throat, transition and breakthrough points in hyperballistic firing tunnel for atmospheric reentry study  
p0065 A71-13131
- Stationary longitudinal turbulent flow of air with equilibrium ionization and dissociation around plate, calculating heat exchange and frictional drag  
p0217 A71-21922
- GAS JETS**
- Parallel nonuniform supersonic flow of two coaxial gas jets past sphere  
p0083 A71-14562
- Axisymmetric supersonic overexpanded ideal gas jet calculation, using finite difference method based on buildup principle  
p0083 A71-14573
- Two link approximation of Chaplygin function by coupling to integral equations, applying to ideal gas jet separation flow past symmetrical arc  
p0197 A71-20084
- Ideal gas jet sonic flow past wedge according to Kirchhoff scheme, testing sine series solution for convergence  
p0197 A71-20085
- Aeroacoustic phenomena in free turbulent gas jets, discussing structure, noise-turbulence correlations and acoustic field generation at subsonic/critical velocities  
p0277 A71-23607
- Shock standoff distance and Mach disk diameter measurements in underexpanded sonic jets, using nitrogen dioxide-tetroxide working fluid  
p0538 A71-34895
- Turbulence measurement in subsonic wind tunnel gas jet flows containing dust particles, using Doppler difference laser velocimeter  
p0652 A71-40397
- Electric and magnetic cross field effects on aerodynamics and thermal regime of gas flame cone  
[AD-712336] p0058 A71-12075
- Combustion physics of gas jet in turbulent wake behind stabilizer  
[AD-721026] p0519 A71-27987
- Noise reduction in turbulent axisymmetric gas jet by repeated air injection method applied to supersonic transport aircraft  
[NASA-TT-F-13667] p0522 A71-28222
- Jet penetration into Mach 2 airstream using sweptback injectors at angle of attack  
[NASA-TM-X-2319] p0575 A71-29920
- GAS LASERS**  
NT CARBON DIOXIDE LASERS
- High temperature aerodynamics with electromagnetic radiation, considering thermally radiating shock layers, electric arc driven wind tunnels and gas dynamic lasers  
p0361 A71-27277
- GAS LUBRICANTS**
- Design and performance of gas-film and oil-film lubricated self sealing mainshaft seals for gas turbine engines  
[NASA-CR-72737] p0057 A71-12035
- Design of self-acting gas-film seal for turboshaft of gas turbine engine  
p0057 A71-12036
- Computerized sealing dam design analysis for gas film seal of turboshaft  
p0058 A71-12039
- Analysis and tests of self-acting mainshaft seals to provide gas film lubrication for advanced gas turbine engines  
[NASA-CR-72987] p0725 A71-38022
- GAS LUBRICATED BEARINGS**  
U GAS BEARINGS
- GAS MIXTURES**  
NT DETONABLE GAS MIXTURES
- Inviscid binary gas mixture steady supersonic two dimensional flow past convex corner, taking into account spontaneous condensation  
p0082 A71-14559
- Binary gas mixture rarefied hypersonic flow structure near blunt body, investigating diffusive effects on recovery temperature dependence  
p0099 A71-15488
- German monograph on ignition and combustion processes in rapidly flowing gas mixtures covering supersonic flow, ramjet parameters, flow heating, etc  
p0137 A71-16900
- Irreversibility control in two gas flows mixture, discussing jet engines thrust increase by air-exhaust gases admixture  
p0148 A71-18051
- Detonation processes in gases, considering Zeldovich-Doering-Neumann model and reaction kinetics  
p0599 A71-37457
- Air and jet fuel-air mixtures, calculating temperature dependent laminar and turbulent heat transfer parameters and transport properties  
[ASME PAPER 71-HT-41] p0604 A71-38002
- GAS PIPES**
- Material, design and operating principles of rotary seals used in gas ducts, bearing elements and fuel systems of aircraft gas turbine engines  
p0604 A71-38015
- GAS PRESSURE**
- Fluidic cabin pressure automatic control systems for military and civil aircraft, discussing design, operation and performance  
p0432 A71-30308
- GAS STREAMS**
- Breakup mechanism of liquid sheets and jets in supersonic gas stream, using spark photomicrographs and high speed movies  
p0345 A71-25471
- Temperature and radical concentration measurements for high temperature flowing gas streams in rig simulating conditions in ramjet combustion chamber and nozzle  
p0411 A71-28758
- GAS TEMPERATURE**
- Gas temperature measurement in aircraft combustion chambers, using calorimetric probe  
p0411 A71-28757
- Optimal gas temperature in bypass and turbojet engines afterburners ensuring minimum fuel flow rate dependence on thrust augmentation  
p0504 A71-33607
- Gas turbine engine combustion chamber outlet gas temperature field peripheral nonuniformity, detailing jets disruptive capacity effects in

- mixing zone  
p0504 A71-33609

- Ni base superalloys fatigue strength improvement for gas turbine engine components, discussing homogeneous deformation distribution, grain size control, etc  
p0002 A71-10166
- Computerized analysis of seal temperature, elastic displacements and seal force balance in iterative design method for gas turbine mainshaft seals  
p0004 A71-10479
- Gas turbines air pollution control, discussing exhaust composition, combustion chamber design, engine efficiency, etc  
p0009 A71-10820
- Tubular gas turbine engine combustor design by combining turbulent flame speed, microvolume burning and stirred reactor models  
p0029 A71-12852
- Niobium alloys for gas turbine blades, examining working temperatures, protective coatings and ductility  
p0031 A71-12939
- Automatic antisurge control of axial compressor using partial gas recycling bypass method  
p0069 A71-13370
- High temperature tests of gas turbine engine with transpiration air cooled blades, discussing blade design, fabrication, ductility and oxidation resistance  
[ASME PAPER 70-WA/GT-1]  
p0076 A71-14115
- Nozzle system elements size relation to passage cross section in full size two cascade and miniaturized gas turbine engine power plant  
p0080 A71-14258
- Gas turbine engines nozzles flow passage cross sections area measurement, using gas flowmeter, pipes system and vacuum pump  
p0080 A71-14260
- Sand and dust erosion on small VTOL gas turbine engines, discussing effects on inlets, compressor housing and blades  
p0097 A71-15436
- Soviet book on aircraft gas turbine engine assembly covering organization, specified accuracy, automatic systems, mechanization problems, quality control, etc  
p0098 A71-15449
- Aircraft turbine engines with elevated gas inlet temperatures  
p0101 A71-15670
- Gas turbine engines materials and components equivalent service life estimation  
p0136 A71-16753
- Gas turbine engine Ni alloys heat resistance, examining fatigue life and creep properties at various temperatures and test durations  
p0136 A71-16754
- Gas turbine engine nozzle guide vanes under pulsed thermal operation, discussing service life evaluation and increase  
p0136 A71-16756
- Aircraft gas turbine engine components equivalent testing by shortening testing time required to increase service life  
p0136 A71-16761
- Helicopter gas turbine engine health indication using instrument panel for correcting gas temperature and producer speed  
p0144 A71-17690
- Injection film cooling effect on surface heat transfer downstream of flush nontangential injection holes and slots in turbine applications  
[AIAA PAPER 69-523]  
p0145 A71-17695
- Gas turbine aircraft engine compressor blades foreign object ingestion control by inlet vortex flow suppression jets, indicating wind tunnel air intake applications  
p0145 A71-17696
- Small gas turbines for helicopters and fixed wing aircraft, discussing designs, materials, lubrication, etc  
p0148 A71-18052
- Aircraft gas turbine engines nitric oxide emission model, describing flow behavior and chemical processes  
[AIAA PAPER 71-123]  
p0155 A71-18659
- Aerospace Recommended Practice for gas turbine engine steady state performance presentation for digital computer programs, describing engine type, operating and control characteristics  
[SAE-ARP-681B]  
p0187 A71-19647
- Soviet book on aircraft gas turbine and internal combustion engines covering structural design schemes, inlet devices, combustion chambers, materials, compressors, etc  
p0203 A71-20674
- Gas dynamic test stand for cyclic thermal load testing of gas turbine engine materials and components at variable heating and cooling rates and mechanical loads  
p0206 A71-20839
- Combustor design for minimum exhaust smoke emission from aircraft gas turbine jet engines, considering air pollution  
p0206 A71-20867
- Book on aircraft gas turbine engine technology covering combustion chambers, exhaust systems, lubricating oils, thrust augmentation, inlet ducts and overhaul procedures  
p0210 A71-21625
- Aircraft turbine engines strength and gas dynamic characteristics improved by vibration decrease using elastic elements  
p0212 A71-21710
- Gas turbine engines emission characteristics, discussing methods for pollutants reduction  
p0214 A71-21820
- Probabilistic estimate of aerodynamic imbalance of aircraft gas turbine rotors due to production errors in compressor blade angle  
p0222 A71-22045
- Cost reduction concepts in gas turbine engine design and fabrication for general aviation aircraft  
p0268 A71-22811
- High temperature corrosion in aircraft engine components and gas turbines by sulfur in fuels, vanadium pentoxide and NaCl  
p0274 A71-23288
- High temperature steel and alloys metallurgical processes for stationary and aircraft gas turbine engine components, discussing production-quality control-research interrelationship  
p0274 A71-23301
- Concorde environmental testing, considering endurance tests, thermal shock rigs and plant for simulating air supply from compressor stages of aircraft gas turbine engines  
p0276 A71-23583
- High pressure ratio centrifugal compressors for small gas turbine engines, investigating power and specific fuel consumption variation with pressure and temperature  
p0284 A71-24218
- High speed vane type main engine fuel pump for small gas turbine engines  
[ASME PAPER 71-GT-24]  
p0349 A71-25966
- Jet fuel starter, describing small gas turbine for starter, providing sufficient pressurized gas flow to rotate main engine  
[ASME PAPER 71-GT-43]  
p0351 A71-25976
- Metal matrix composite fabrication procedures for gas turbine engine fan blades, stressing diffusion bonding process susceptibility to blades volume producibility  
[ASME PAPER 71-GT-46]  
p0351 A71-25979
- Resin matrix composite airfoils in gas turbine engines, considering performance, fabrication and cost  
[ASME PAPER 71-GT-47]  
p0351 A71-25980
- Lightweight high performance regenerative gas turbine designs for aircraft propulsion, comparing various compressor, turbine, combustor and recuperator arrangements  
[ASME PAPER 71-GT-67]  
p0351 A71-25983

- Gas turbine engine combustor stability dynamic model, representing premixing and combustion chambers as Helmholtz resonators for stability criteria derivation  
[ASME PAPER 71-GT-73] p0352 A71-25987
- Aircraft gas turbine condition analysis instrumentation used for status diagnosis of naval turbine engines, discussing sensor and electronic data interpretation progress  
[ASME PAPER 71-GT-86] p0353 A71-25994
- Gas field nonuniformity as function of turbine engine combustion chamber design parameters, discussing hot tube circumferential holes total area effect  
p0364 A71-27501
- VTOL propulsion, discussing gas turbine pressure ratio inlet temperature and lifting and high bypass fans  
p0403 A71-27838
- Commercial aircraft powerplant development, discussing engine and components test programs and techniques  
[SAE PAPER 710449] p0407 A71-28327
- Silicide coated Nb alloys for gas turbine engine components operating at temperatures above 2000 F  
[SAE PAPER 710460] p0408 A71-28334
- High temperature aircraft gas turbine engine design, discussing developments in manufacturing processes, materials, cooling techniques, aerodynamic and mechanical design improvements  
[SAE PAPER 710462] p0408 A71-28335
- Air bypass behind compressor into variable area exhaust nozzle, obtaining energy losses from gas turbine jet engine indices  
p0410 A71-28586
- Diffusion and thermal mechanism ignition theories, applying to altitude relighting of gas turbine engine combustors  
p0410 A71-28745
- Kerosene type fuels for aircraft gas turbine engines, discussing combustion problems, smoke emission reduction and bacterial or fungal contamination  
p0411 A71-28754
- Soviet papers on combustion processes in turbulent and laminar flows of kerosene and gasoline mixtures, stressing gas turbine engines problems  
p0414 A71-28954
- Gas turbine engine combustion chamber start-up and burning performance, considering air injection and propellant atomization  
p0414 A71-28968
- Gas turbine engine startup igniter with modified propellant atomizer enhanced by air injection  
p0414 A71-28969
- Carbon deposition rates in gas turbine engine combustion chambers with airstream-mechanical propellant atomization  
p0414 A71-28970
- Optimal penetration effect on peripheral gas flow temperature field at outlet of turbine combustion chamber with circular flame tubes  
p0414 A71-28971
- Gas turbine engine combustion chamber outlet, noting gas flow temperature field peripheral nonuniformity  
p0415 A71-28972
- Gas turbine auxiliary power unit accessories, discussing high energy igniters, cables and connectors, thermocouples and speed and temperature monitoring equipment  
p0418 A71-29262
- Metal coated superalloys evaluation for gas turbine engine components, including corrosion, impact and fatigue tests  
p0423 A71-29635
- Chemical kinetic calculation of nitric oxide formation in spark ignition automobile engines and gas turbine combustors  
p0436 A71-30454
- Aircraft JT9D engine development for airline operation, discussing construction, condition monitoring, maintenance, noise and smoke reduction  
[SAE PAPER 710434] p0437 A71-30528
- Gas turbine engine condition analysis by digital computer and fault isolation techniques  
[SAE PAPER 710448] p0438 A71-30532
- Turbopropulsion systems thrust augmentor combustion instability, discussing physical causes due to various pressure oscillation modes  
[AIAA PAPER 71-697] p0441 A71-30756
- Jet engines nitric oxide air pollutant emission formation, developing gas turbine combustor models  
[AIAA PAPER 71-712] p0493 A71-32289
- Flight mission severity in cumulative damage /low cycle fatigue and creep stress rupture/ not detected by usual nondestructive testing in aircraft gas turbine industry  
p0501 A71-33298
- Gas turbine design advances for helicopter powerplants, illustrating by Turbomeca engines  
p0502 A71-33416
- Swirling flow in gas turbine engine combustion chamber forward part, considering air flow characteristics behind blade swirler  
p0504 A71-33506
- Gas turbine engine combustion chamber outlet gas temperature field peripheral nonuniformity, detailing jets disruptive capacity effects in mixing zone  
p0504 A71-33609
- Soviet book on subsonic gas turbine passenger planes power supply systems covering Boeing 747, short haul aircraft, DC-10, L-1011, etc  
p0534 A71-34472
- Gas turbine with high velocity combustor, pure impulse compressor and turbine and isothermal burner  
p0535 A71-34590
- Gas turbine engines materials and components equivalent service life estimation  
p0543 A71-35452
- Gas turbine engine steels and Ni alloys heat resistance, examining fatigue life and creep properties at various temperatures and test durations  
p0543 A71-35453
- Gas turbine engine nozzle guide vanes under pulsed thermal operation, discussing service life evaluation and increase  
p0544 A71-35455
- Aircraft gas turbine engine components equivalent testing by shortening testing time required to increase service life  
p0544 A71-35460
- Three micron absolute main oil filter for aircraft gas turbine lubrication system, discussing indicator system and bench and engine tests  
p0544 A71-35488
- Propulsion systems trends for 1980s, discussing environmental noise levels, stoichiometric gas turbine engines for military aircraft, high bypass ratio engines for V/STOL aircraft, etc  
p0546 A71-35625
- Computerized solutions of gas turbine engines motion equations, considering Euler, fourth order and fifth order Runge-Kutta, Adams, Bashforth and implicit methods  
p0561 A71-36809
- Material, design and operating principles of rotary seals used in gas ducts, bearing elements and fuel systems of aircraft gas turbine engines  
p0604 A71-38015
- Vacuum brazing for nozzle guide vanes repair in aircraft gas turbine engines, noting economic advantages  
p0607 A71-38313

**NT XENON**
- GASOLINE**  
Book on aviation fuels covering gasoline and turbine fuel properties, handling problems and future fuels  
p0081 A71-14298
- Gasoline icing inhibitors for aircraft carburetors and fuel systems  
[LR-536] p0121 N71-13414
- GAUSSMETERS**  
**U MAGNETOMETERS**
- GC-130 AIRCRAFT**  
**U C-130 AIRCRAFT**
- GEARS**  
Power train systems gear induced noise analysis, using in-flight vibration and noise measurements for comparison with calculated noise spectra

- [ASME PAPER 70-WA/DGP-1] p0077 A71-14137  
Aircraft gear pumps bearing elements design for increasing service life
- p0205 A71-20793  
VTOL aircraft gear systems, discussing bearings, shaft connection, Ti alloy components, etc
- p0271 A71-22963  
Reduction gearbox reliability problems from development and service experience with PT6A turboprop engine
- [SAE PAPER 710433] p0406 A71-28318  
Precision forging of spiral bevel gears for Army helicopters
- [AD-715419] p0256 N71-18920
- GELLED PROPELLANTS**  
Fuel tests to determine feasibility of gelled methane for use in jet engine
- [NASA-CR-72876] p0469 N71-25772  
Chemical and physical properties of aircraft fuels gelled with hydrocarbon resins
- [FAA-NA-71-17] p0627 N71-32078  
Determination of physical and chemical properties of fuels gelled with carbohydrate resins to evaluate effectiveness in reducing aircraft fire hazards
- [FAA-NA-71-18] p0716 N71-37369
- GENERAL AVIATION AIRCRAFT**  
**NT YAK 40 AIRCRAFT**  
General aviation safety and effectiveness enhancement through electronic technology applications, discussing airspace control system based on beacon transponder, LF-VLP area navigation and vertical radar
- p0141 A71-17228  
Metro commuter aircraft specifications, performance and CAB certification problems
- p0142 A71-17573  
Book on general aviation future and economic impact covering fleet size and distribution, aircraft types, passenger and cargo profiles, etc
- p0144 A71-17678  
Avionics for gliders and touring aircraft, considering safety and VHF radio equipment
- p0203 A71-20684  
Avionics for gliders and touring aircraft, surveying available electronic equipment for 1971
- p0213 A71-21768  
Cessna Citation twin turboprop business aircraft design, performance characteristics, communications, navigation and automatic flight control equipment and flight evaluation
- p0265 A71-22112  
Cost reduction concepts in gas turbine engine design and fabrication for general aviation aircraft
- p0268 A71-22811  
FAA flying and handling qualities program, discussing development of optimum and minimum acceptable flight characteristics criteria for new civilian and military aircraft designs
- [SAE PAPER 710372] p0285 A71-24241  
Light general aviation airplanes flying qualities in-flight simulation, considering longitudinal short period frequency and damping, pitch control sensitivity and lift curve slope
- [SAE PAPER 710373] p0285 A71-24242  
Executive jet landing approach lateral-directional handling under IFR ILS simulated conditions, investigating Dutch roll control power effect on crosswind component
- [SAE PAPER 710374] p0285 A71-24243  
NASA aerodynamic research applicable to business aircraft concerning wind tunnel and flight tests, STOL performance and high speed cruise technology
- [SAE PAPER 710378] p0285 A71-24244  
Business jet aircraft noise certification, discussing test programs and cost reduction
- [SAE PAPER 710384] p0286 A71-24249  
General aviation aircraft accidents involving seat belt and shoulder harness restrained occupants, discussing vertical force effects on survivability and injuries in severe crashes
- [SAE PAPER 710399] p0287 A71-24261  
Wing structure fatigue substantiation procedures under fail-safe concept for general aviation aircraft
- [SAE PAPER 710404] p0287 A71-24264  
U.S. General Aviation safety record, discussing National Transportation Safety Board and accident/injury prevention
- [SAE PAPER 710397] p0300 A71-25132
- Lateral-directional handling qualities and roll control power requirements for executive jet and military class II airplanes in landing approach flight phase
- [AIAA PAPER 71-771] p0506 A71-34007  
Omega navigation application to general aviation aircraft, presenting diurnal course shift to overcome deficiencies
- p0548 A71-35767  
Aerial land rover for special needs of developing countries as passenger and freight aircraft, crop spraying and dusting, aerial survey and fire fighting
- p0658 A71-40701  
Corporate aircraft 1970 accident statistics analysis stressing pilot selection, training and supervision
- p0692 A71-43227  
Corporate aircraft safety - Conference, San Antonio, May 1970
- p0693 A71-43379  
General aviation aircraft altimeter errors, tolerances and static system tests
- p0694 A71-43386  
Corporate aircraft pilot ground and flight phase training, errors and accidents
- p0694 A71-43388  
FAA statistical handbook of aviation 1958-1968
- p0038 N71-10372  
General aviation airport planning for east central Florida
- [PB-191239] p0128 N71-14494  
US general aviation and supplemental air carrier accident statistical tables for 1969
- [NTSB-BA-70-6] p0237 N71-17475  
Midair collision hazards, incidents, and recommendations for safe aircraft operations
- p0246 N71-18103  
Investigation of angle of attack information display for pilots to increase efficiency of general aviation aircraft operation
- [NASA-TN-D-6210] p0250 N71-18442  
Development and characteristics of low cost engines for general aviation aircraft
- p0308 N71-19458  
Benefits and problems of using head-up displays in commercial and general aviation aircraft
- [NASA-CR-117135] p0313 N71-19752  
Analysis of equipment, crew training, and operations involved in use of fixed wing aircraft for aeromedical transportation
- [FAA-AH-71-18] p0628 N71-32080  
Statistical compilation of annual aircraft accident data of US general aviation for 1969
- [NTSB-ARG-71-1] p0630 N71-32454  
Analysis of general aviation during year 1969 noting growth of aircraft operating, accident data, analysis of accidents, and injuries resulting from accidents
- p0634 N71-32854  
Sensitivity analysis of advance propeller configurations designed for general aviation aircraft of 1980 time period
- [NASA-CR-114289] p0680 N71-35206  
Potential impact of advanced technology in 1985 on four types of general aviation aircraft including STOL V/STOL, and helicopters
- [NASA-CR-114339] p0681 N71-35210  
Influence of advanced technology and design philosophies on general aviation aircraft for 1985
- [NASA-CR-114338] p0682 N71-35217  
Aircraft accident briefs for 1969 including date, location, aircraft data, injuries, flight purpose, and pilot data
- [NTSB-BA-71-2] p0711 N71-36433
- GENERAL DYNAMICS AIRCRAFT**  
NT C-131 AIRCRAFT  
NT CV-440 AIRCRAFT  
NT CV-990 AIRCRAFT  
NT F-106 AIRCRAFT  
NT F-111 AIRCRAFT
- GENERAL DYNAMICS MILITARY AIRCRAFT**  
U MILITARY AIRCRAFT
- GEOCENTRIC COORDINATES**  
Control, navigation and guidance review, considering application of earth reference coordinates for aircraft, missiles and spacecraft
- p0440 A71-30710

# GEODETIC COORDINATES

# SUBJECT INDEX

## GEODETIC COORDINATES

Laser altimeter-range finder techniques applied to geodetic measurements and mapping  
[NASA-TN-X-66489] p0109 N71-12425

## GEODETIC SURVEYS

Airport geodetic control stations, discussing obstruction charting program p0365 A71-27537

## GEOLOGY

Geological exploration, development of ultrasonic flow detector, review of scientific developments, and tactical aircraft in Eastern Europe  
[JPRS-53428] p0575 N71-30033  
Quantity and quality of geodetic information transmitted by space photography compared with low altitude aerial photography  
[IR-USGS-229] p0725 N71-38013

## GEOMAGNETIC ANOMALIES

## U MAGNETIC ANOMALIES

## GEOMAGNETIC EFFECTS

## U MAGNETIC EFFECTS

## GEOMAGNETIC FIELD

## U GEOMAGNETISM

## GEOMAGNETISM

Geomagnetic components measurement from moving platforms, discussing coordinate system stabilization methods for errorless time averaging of measurements p0140 A71-17194

Geomagnetic components measurement from moving platforms, discussing coordinate system stabilization methods for errorless time averaging of measurements p0404 A71-28249

## GEOMETRY

## NT CHORDS (GEOMETRY)

## NT CURVES (GEOMETRY)

## NT FIXED POINTS (MATHEMATICS)

## NT FLOW GEOMETRY

## NT LOCI

## NT NOZZLE GEOMETRY

## NT S CURVES

## NT TETRAHEDRONS

## NT TRIANGLES

## NT VECTOR ANALYSIS

## NT VORTICITY

British Aircraft Corporation Numerical Master Geometry system using parameter surface mathematics and digital computer p0279 A71-23759

## GERDIEN ARC HEATERS

## U HEATING EQUIPMENT

## GERMANY

West German parachute research, discussing stretching/filling shock, fabric material properties and static stability p0494 A71-32373

Historical development, limits, and future trends in rocket technology  
[NASA-TT-F-13436] p0109 N71-12416

## GLANDS (SEALS)

Material, design and operating principles of rotary seals used in gas ducts, bearing elements and fuel systems of aircraft gas turbine engines p0604 A71-38015

Sealing dam analysis for design of shaft face seal with self-acting lift augmentation for advanced gas turbine engines  
[NASA-TN-D-7006] p0053 N71-11579

## GLARE

Aircraft compartment glare minimization for flight crew visibility conditions and visual performance improvement p0001 A71-10028

## GLASS

## NT GLASS FIBERS

Structural response and acoustic transmission characteristics of glass pane and standard wood frame construction wall panels subjected to sonic booms  
[NASA-CR-111925] p0631 N71-32488

## GLASS FIBERS

Filament winding manufacturing methods using unidirectional glass reinforcements for design and fabrication of aircraft wing structure  
[SME PAPER EM-70-406] p0202 A71-20546

Glass fiber reinforced plastics aerospace applications covering radomes, dielectric panels, aircraft ducting, secondary structures,

furnishings, mouldings and tooling

p0347 A71-25652

Glass fiber rotor blades design with longitudinal pressure tappings for cascade wind tunnel and turbomachinery flow research applications p0355 A71-26316

Design and fabrication of plane and trapezoidal fiber glass wings with laminar profiles  
[AD-716526] p0311 N71-19574

## GLAUERT COEFFICIENT

## U AERODYNAMIC FORCES

## U MACH NUMBER

## GLIDE ANGLES

## U GLIDE PATHS

## GLIDE LANDINGS

Application of IFR with unpowered, low lift drag ratio landing approaches p0033 N71-10110

Test and evaluation of aircraft glide slope landing system operating at ultrahigh frequency  
[FAA-WA-71-15] p0628 N71-32085

## GLIDE PATHS

Maximum stagnation temperature on swept wing leading edge for equilibrium glide entry of space shuttle p0182 A71-18902

Light aircraft spoilers to minimize landing risk, discussing spoiler/dive brake area effects on glide path angular control  
[SAE PAPER 710387] p0286 A71-24251

Aircraft approach and landing under low altitude wind shear conditions, discussing flying hazards and glide path correction procedures p0355 A71-26364

Quasi-stationary gliding trajectories of aircraft in planetary atmosphere during constant control of attack and bank angles p0416 A71-29185

Visual approach slope indicator system for

long-bodied aircraft

[FAA-RD-70-76] p0056 N71-11905

Analysis of glide-slope information requirements for low visibility aircraft landing approach using Kalman filter-optimal control combination to simulate DC-8 control system p0586 N71-30887

Pilot transition from conventional visual cross pointer display to aural glide slope cues  
[FAA-AM-71-24] p0721 N71-37682

## GLIDE SLOPES

## U GLIDE PATHS

## GLIDERS

## NT FLEXIBLE WINGS

## NT HL-10 REENTRY VEHICLE

## NT HYPERSONIC GLIDERS

## NT PARAGLIDERS

## NT PARAWINGS

Sailplane fatigue testing determining load spectra fail safe structures and damage calculation p0020 A71-11949

Standard-Cirrus glider flight test performance, noting cockpit design and instrumentation p0062 A71-13019

Trailing edge flap automatic control for glider performance improvement p0063 A71-13020

Elfe S-3 glider flight test, pointing out imperfections in cockpit and wing design p0131 A71-16128

Balloon and glider vertical speed indicators, considering barometric devices and electric variometer p0148 A71-18248

Variable camber flap automatic control equipment for glider, considering combinations of mechanical, electrical and electronic approaches p0149 A71-18250

Avionics for gliders and touring aircraft, considering safety and VHF radio equipment p0203 A71-20684

Glider flight in thermal air currents, discussing aircraft behavior, pilot sensory perceptions and reactions and use of variometers for ascent rate determination p0203 A71-20685

Flight testing of Diamant 18 glider, discussing aircraft behavior at low and high flight speed, stall, spin, stability and control characteristics, design and construction p0203 A71-20686

Avionics for gliders and touring aircraft, surveying available electronic equipment for 1971 p0213 A71-21768

Motorized glider equipped with Wankel engine for self powered takeoff, describing prototype design and flight test data p0213 A71-21769

Glider flight mechanics for turning flight, discussing relationships between turning radius, flight speed, sink rate and aerodynamic characteristics p0213 A71-21770

In-flight profile drag measurement of gliders with total and static pressure sensors in boundary layer wake, using moments method p0278 A71-23667

Rigid towed and free flight glider, considering loads and turbulent atmosphere effects p0278 A71-23669

Sailplanes tail load static derivation for instantaneous unchecked longitudinal maneuver, considering aperiodic response p0356 A71-26486

Sailplanes control, deriving incremental aerodynamic load on horizontal tail produced by instantaneous elevator deflection p0356 A71-26487

Sailplane elevator induced maneuvering and horizontal tail surface loads, discussing airworthiness requirements p0418 A71-29256

Wind tunnel tests of geometrically compatible airfoils for variable chord sailplane p0418 A71-29257

Two dimensional wind tunnel tests on airfoil fastened between tunnel walls, investigating variable chord concept applicability in sailplane design p0494 A71-32294

High lift device application to high performance competition gliders, considering merit of design for conflicting climb/cruise requirements p0691 A71-43089

Sailplane circling cross-country speed increase by variable geometry in high lift flap form for better compromise between cruise and climb performance p0698 A71-44342

Optimum lift coefficient and aspect ratio determined analytically as conditions for construction of gliders with lift drag ratio of 100 [RAE-LIB-TRANS-1565] p0520 N71-28010

**GLIDING**

Gliding guided ribbon parachute for transonic speed deployment, investigating turn capability, opening reliability, structural integrity and effective drag p0296 A71-24868

World championship gliding team medicophysiological problems during competition at Marfa, Texas, discussing climatic adaptation, nutrition, hypoxia and pilots general physical and psychomotor conditions p0662 A71-41576

Lift and drag characteristics of HL-10 lifting body during subsonic gliding flight [NASA-TN-D-6263] p0256 N71-18867

Surface heat transfer rates measured on flat plates in hypervelocity shock tunnel  
[NASA-CR-1692] p0044 N71-10867  
Theoretical analysis and measurement of single-phase pressure losses and heat transfer for helical flow in tube  
[NASA-TN-D-6097] p0104 N71-12213  
Investigating flow field in near wake behind rearward facing step in supersonic flow and heat transfer distribution along reattachment surface downstream of step  
p0105 N71-12216  
Flat plate pressure distribution and heat transfer in conical hypersonic flow  
[VKI-TN-56] p0119 N71-13236  
Using thin-wall technique for describing fast mechanically operated model-injection system for heat transfer measurements  
[NPL-AERO-1300] p0126 N71-14087  
Free boundary value problems of heat flow around aerodynamic bodies  
[AD-714621] p0172 N71-15963  
Heat transfer prediction for turbine blade design  
p0232 N71-17374  
Heat transfer and heat flux measuring sensors for gas turbine engines  
p0232 N71-17377  
Wall pressure and heat transfer distribution on delta wings in rarefied hypersonic flow  
[REPT-70-9] p0249 N71-18423  
Sound field effects on flat plate heat transfer in turbulent boundary layer  
[REPT-70-8] p0253 N71-18572  
Resonant cavity heat transfer in turbulent, subsonic and supersonic speeds including resonance effects  
p0327 N71-20540  
Aerodynamic and heat transfer performance of air cooled nozzle cascade for high temperature turbine  
[NAL-TR-231-PT-1] p0641 N71-33304
- HEAT TRANSFER COEFFICIENTS**  
Lifting body leeward surface maximum heat transfer coefficient in hypersonic flow, considering Reynolds number, incidence and shape effects  
p0099 A71-15486  
Air and jet fuel-air mixtures, calculating temperature dependent laminar and turbulent heat transfer parameters and transport properties  
[ASME PAPER 71-HT-41] p0604 A71-38002  
Heat transfer and exchange measurements on fixed turbine blades in high temperature combustion chamber  
p0232 N71-17378  
Heat transfer in air cooling and sweat cooling techniques for high temperature gas turbine engine components  
p0233 N71-17383  
Effective heat transfer coefficients in film cooling systems of gas turbine surfaces  
p0234 N71-17395

Heat transfer in liquid metal cooled gas turbine blades  
p0235 N71-17398

Comparison of flat plate sharp and blunt edge effects on heat transfer in supersonic flow and heat transfer coefficient dependence on Reynolds number  
[AD-717825] p0375 N71-22156

Conference on high temperature turbines detailing effect of film cooling on blade profile loss  
[NASA-TM-X-67123] p0387 N71-22699

**HEAT TRANSMISSION**  
NT AERODYNAMIC HEAT TRANSFER  
NT CONDUCTIVE HEAT TRANSFER  
NT CONVECTIVE HEAT TRANSFER  
NT HEAT TRANSFER  
NT HYPERSONIC HEAT TRANSFER  
NT SUPERSONIC HEAT TRANSFER  
NT TURBULENT HEAT TRANSFER

Heat flowmeter for measuring vertical takeoff aircraft exhaust thermal insulation dissipation  
[DLR-MITT-71-07] p0624 N71-31929

**HEAT TREATMENT**  
NT STRESS RELIEVING

Alloy and heat treatment effect on Ti bondability for adhesive bonded aircraft structure, using annealed and aged Ti-6Al-4V and Ti-6Al-6V-2Sn alloys for testing  
p0282 A71-24093

Vacuum heat treatment of brazed and diffusion bonded jet engine components near melting temperature  
p0403 A71-28145

Soviet book on aircraft materials science and treatment covering steel/cast iron processing, metallography, heat/thermochemical conditioning, surface protection and corrosion prevention  
p0422 A71-29529

**HEATERS**  
Heater and nozzle design of ONERA/S4MA hypersonic wind tunnel for supersonic combustion ramjet tests  
[ONERA-TP-924] p0553 A71-36017

**HEATING**  
NT AERODYNAMIC HEATING  
NT KINETIC HEATING  
NT RESISTANCE HEATING  
NT SHOCK HEATING

Heating rate and efficiency of flaps at hypersonic speeds  
[SC-T-71-3016] p0518 N71-27674

**HEATING EQUIPMENT**  
NT VACUUM FURNACES  
NT VAPORIZERS

Gas flame heater for heat resistant samples under fatigue tests, simulating gas turbine engine operating conditions  
p0001 A71-10041

High speed wind tunnels air heating system optimization, considering pebble bed air heater for intermittent operations  
p0611 A71-39086

Procedures for evaluating effectiveness of self propelled and portable ground servicing units for Army aircraft  
[AD-719102] p0457 N71-24459

**HEAVING**  
Edge jet Hovercraft dynamic stability in heaving motion, deriving two dimensional mathematical model  
[ASME PAPER 70-APM-QQQ] p0072 A71-13712

**HEAVY ELEMENTS**  
NT PLUTONIUM

**HELICAL FLOW**  
Flutter analysis of rotating thin cylindrical shell with outer surface exposed to inviscid helical air flowfield  
p0263 A71-22078

Primary/secondary flow density ratio effect on rotary jet flow induction, describing experimental results with 1/7-1/1 density ratios  
p0295 A71-24853

Theoretical analysis and measurement of single-phase pressure losses and heat transfer for helical flow in tube  
[NASA-TN-D-6097] p0104 N71-12213

**HELICAL WINDINGS**  
Wind tunnel aerodynamic stability tests on chimneys with pipes and helical winding stabilizers  
[NPL-AERO-1310] p0231 N71-17334

**HELICOPTER ATTITUDE INDICATORS**

U ATTITUDE INDICATORS

U HELICOPTERS

**HELICOPTER CONTROL**

Airborne radar as helicopter approach aid

p0095 A71-15425

Three axis flight director for precise helicopter control, deflected slipstream STOL or VTOL attitude and power under low ceiling and visibility landing  
p0096 A71-15428

Sand and dust effects on military helicopter flight controls and equipment service life, discussing relief program  
p0096 A71-15430

Airborne variable stability helicopter flight simulator for V/STOL aircraft design  
p0137 A71-16954

Single rotor helicopter directional stability in rectilinear flight with constant angle of side slip  
p0149 A71-18307

Helicopter longitudinal stability in forward flight and hover modes under attitude, height and speed constraints, noting need for cyclic pitch control due to instabilities  
p0186 A71-19421

Helicopter handling under ASW flight conditions, discussing sea state effect on low altitude hover stability  
p0420 A71-29384

Rotor blade stall induced helicopter control loads, combining unsteady aerodynamics with aeroelastic rotor analysis  
[AHS PREPRINT 513] p0449 A71-31084

AN/ASN-86 inertial navigation system consisting of inertial platform, digital computer and control indicator  
[AHS PREPRINT 533] p0450 A71-31094

Electromechanical control system synthesis for compound hingeless rotor helicopter, using root locus method with transfer functions from airframe motion linear model  
[AHS PREPRINT 536] p0451 A71-31096

Heavy lift helicopters IFR hover capability with slung load, discussing sensors controls and displays  
[AHS PREPRINT 540] p0451 A71-31097

Hingeless rotor helicopter stability and control characteristics, considering induced flow field, flapwise bending modes and blade-fuselage dynamic coupling  
[AHS PREPRINT 541] p0451 A71-31098

Handling qualities and control sensitivity of high performance helicopters, considering pitch and collective control  
[AHS PREPRINT 542] p0451 A71-31099

Fail-safe helicopter rotor control design, discussing damage tolerant components, redundant system, failure warning and maintenance  
[AHS PREPRINT 550] p0452 A71-31102

High performance UH-1 compound helicopter high speed flight research, considering rotor loads, stability, control and flying qualities  
[AHS PREPRINT 570] p0453 A71-31111

AH-56A compound helicopter rigid rotor stability and handling qualities, using flight, whirl tower and wind tunnel tests  
[AHS PREPRINT 574] p0453 A71-31115

Helicopter automatic flight control equipment, discussing autopilot stabilizer, localization system, ground approach guidance coupler and flight director  
p0490 A71-31916

Large crane heavy lift helicopter stability and controllability, considering effects of slung loads, performance improvement, automatic flight control and physical size  
p0609 A71-38651

Tilt-fold-proprotor VTOL aircraft stability and control, emphasizing pylon tilt and rotor stop-fold effects on flying qualities  
p0610 A71-38652

Model following technique for optimal control applied to hovering motion of CH-3 helicopter  
p0611 A71-39000

Helicopter optimal autorotation landing parameters for touchdown at zero speed, including rotor rpm drop due to flow separation on blades

- p0692 A71-43090  
Control system designs for USSR single-rotor helicopters including controllability characteristics, rotors with control gyroscopes, and transfer functions in closed loop systems [NASA-TT-F-636] p0329 N71-20719  
Helicopter gyro displacement measurements at differing flying conditions [FOA-2-C-2356-49-/72/] p0477 N71-26567  
Handbook of analytical methods and stability data for determining dynamic stability and control characteristics of generalized single-rotor compound helicopter configurations [AD-722250] p0523 N71-28338  
Analysis of problems and requirements for nonvisual formation flight of helicopters [AD-727635] p0720 N71-37610  
**HELICOPTER DESIGN**  
NACA/NASA rotating wing aircraft research history during 1955-1970 period, discussing wind tunnel research p0015 A71-11377  
Carbon fiber reinforced epoxy composites, evaluating application as helicopter tail rotor blade material p0024 A71-12477  
NACA/NASA rotary wing aircraft research, considering rotor loads and configurations, ground resonance, blade flutter and flapping, motion equations and VTOL p0088 A71-15171  
WG.13 Lynx battlefield helicopter design and performance p0091 A71-15394  
Helicopter downwash velocities, noise and airloads, examining rotor tip modification effects p0093 A71-15410  
Lightning hazards for helicopters, discussing components vulnerability and protective design requirements p0093 A71-15412  
Helicopter fuselage design for crashworthiness under specific conditions p0094 A71-15416  
Helicopters safe antitorque control, describing Fenestron ducted fan design p0094 A71-15417  
Helicopter design for cabin noise level reduction p0095 A71-15423  
Helicopter structural damage due to icing, discussing secondary effects on tail rotor, horizontal tail and engine from ice shed by main rotor p0096 A71-15432  
Environmental development and testing of OH-58A light observation helicopter for close ground support, noting particle separator and injection seals p0097 A71-15439  
Military helicopter design and weaknesses correction, considering man/machine combat survivability and operational accidents reduction p0098 A71-15447  
Do 132 turbine powered helicopter, discussing icing problems solution p0146 A71-17745  
Aerodynamic synthesis of helicopter rotor under hover and vertical ascent conditions, using nonlinear vortex approach p0189 A71-19740  
Materials and construction techniques in lightning protection for aircraft and helicopters p0193 A71-19930  
Lightning and static electricity effects on helicopter design, considering rotor protection, cargo hook operation and passive dischargers for radio interference reduction p0194 A71-19938  
Helicopter vibrational behavior prediction in flight with known aerodynamic loads, using branch modes method p0277 A71-23606  
Stability analysis and design optimization with dynamics and aeroelastics constraints for helicopter rotor blade minimum weight with bending torsion flutter and favorable frequency placements [AIAA PAPER 71-388] p0344 A71-25352  
Helicopter auxiliary power unit /APU/ life cycle cost computation p0357 A71-26679  
Costs-reliability relationships in helicopter development testing and demonstration, emphasizing decision making in program management [SAE PAPER 710452] p0407 A71-28330  
Helicopter design for use as crane and for carrying external loads p0409 A71-28489  
Helicopter component surface finish smoothness and residual stress requirements, using abrasive grinding belt machines with gear link mechanisms p0413 A71-28943  
Soviet book on helicopter design covering aerodynamic properties, power plants, control systems, fatigue minimization and strength analysis p0430 A71-29944  
Westland WG 13 Lynx helicopter, discussing design features, performance characteristics and civil and military applications p0432 A71-30301  
Soviet Mil V-12 heavy lift helicopter for civil and military missions, noting turbine engines, rotor configuration, cargo hold and navigation system p0436 A71-30420  
Advancing Blade Concept helicopter lifting rotor development, discussing full scale analysis, design, fabrication and wind tunnel tests [AHS PREPRINT 504] p0448 A71-31080  
High rotor advance ratio from multiblade general coordinates method in linear analysis of lifting rotor dynamic stability and gust ratio [AHS PREPRINT 512] p0449 A71-31083  
Optimal turbofan engine and reaction drive rotor combinations for helicopter design [AHS PREPRINT 561] p0452 A71-31108  
Strain gage torque meter as primary power indicating instrument in helicopter transmission systems, providing advantages for helicopter designer and operator [AHS PREPRINT 563] p0453 A71-31110  
French helicopters design and performance, considering Alouette 2 and 3 and military versions p0496 A71-32694  
Lynx military helicopter design high reliability and low maintenance demands p0503 A71-33457  
Helicopter rotor blades fail-safe design, presenting criteria for fatigue loaded structures residual strength and life based on crack propagation rate methods p0540 A71-35163  
Analytical weight determination of articulated shaft driven helicopter main rotor blades, presenting computer program [SAE PAPER 893] p0552 A71-35826  
Tilt-fold-prop rotor VTOL aircraft stability and control, emphasizing pylon tilt and rotor stop-fold effects on flying qualities p0610 A71-38652  
Mil Mi-12 Soviet giant rigid rotor helicopter with 30,000 kg load or 250 passenger capacity p0613 A71-39375  
Agusta helicopter design and testing criteria, discussing four-blade rotor, fuselage and radio navigation equipment p0668 A71-42224  
Heavy load transportation Mi 12 helicopter design and performance, noting gas turbine rigid shaft connection p0691 A71-42926  
Technology developments in rotor, drive, flight controls and cargo handling systems of heavy lift helicopter system, noting military and commercial applications [AIAA PAPER 71-994] p0704 A71-45296  
Design criteria for optimal hoverable helicopter in hot weather climate [AD-717025] p0337 N71-21707  
Fatigue life of helicopter rotary wings under vibrational stresses p0455 N71-24386  
Dynamic tests of helicopter components p0456 N71-24388  
**HELICOPTER ENGINES**  
Helicopter turbine engine protection device design guidelines p0097 A71-15434

- U SLENDER WINGS**

## HIGH EFFICIENCY

## U EFFICIENCY

## HIGH ENERGY ELECTRONS

Velocity determination in hypersonic low density wind tunnel based on high energy electron beam produced nitrogen ions time of flight  
p0538 A71-34887

## HIGH FREQUENCIES

Performance and cost design tradeoff between HF and synchronous meteorological satellite data collection systems, considering platform transmitting power and SNR  
p0445 A71-30900

Compact, self contained, symmetrical antenna for airborne use at high frequencies with capability to function in two independent modes for both transmission and reception  
[AD-722736] p0574 N71-29895

## HIGH LIFT DEVICES

## U LIFT DEVICES

## HIGH MELTING COMPOUNDS

## U REFRACTORY MATERIALS

## HIGH PASS FILTERS

Third order correlations in grid turbulence, investigating high pass filtering effect at small cut-off frequencies  
p0088 A71-15027

## HIGH PRESSURE

Large volume high pressure gas uniform electrical discharges, applying to laser amplifier  
[AIAA PAPER 71-65] p0152 A71-18524

Pressure regulator design and construction, using high pressure fluidic proportional chain  
p0202 A71-20580

Hypersonic test facility for studying ablation in models under high pressure and high temperature  
[NASA-CASE-XLA-00378] p0172 N71-15925

## HIGH RESOLUTION

Visual flight simulation devices, considering high resolution photographic films and digital memories  
p0421 A71-29483

## HIGH SENSITIVITY

## U SENSITIVITY

## HIGH SPEED

High velocity metal working, discussing airfoil forging, ausforming of bearing race blanks, tooling, etc  
[SME PAPER MF-70-228] p0014 A71-11267

High speed tracked air cushion vehicles dynamic interactions with guideways, considering model of lumped double-sprung vehicle masses traveling in tandem along simply supported beams  
[AIAA PAPER 71-386] p0343 A71-25350

Development and characteristics of high speed ground transportation system  
[PB-193144] p0115 N71-12760

Flight test evaluation of military aircraft low altitude high speed performance  
p0394 N71-23421

Flow meter for measuring stagnation pressure in boundary layer around high speed flight vehicle  
[NASA-CASE-XPR-02007] p0463 N71-24692

Short-term creep properties of OT-4 alloy in high speed air flows under aerodynamic vibrations  
[NASA-TT-P-13658] p0530 N71-28832

Use of aerodynamic lift for application to high speed ground transportation by two dimensional airfoils  
[PB-197242] p0573 N71-29762

Moving long cylindrical model for aerobreaking tests at high speed in drop wire facility  
p0588 N71-31109

Analysis of technology for high speed ground transportation  
[PB-198015] p0621 N71-31766

## HIGH SPEED CAMERAS

High speed photographic assembly with turbine drive for continuous recording and frame photography  
p0297 A71-24872

## HIGH SPEED FLIGHT

## U FLIGHT

## U HIGH SPEED

## HIGH SPEED TRANSPORTATION

## U RAPID TRANSIT SYSTEMS

## HIGH STRENGTH

High strength polyimide resin composites, discussing commercial and aerospace applications, chemistry, void content, volatiles and moisture absorption  
p0024 A71-12487

## HIGH STRENGTH ALLOYS

## WT HIGH STRENGTH STEELS

Al-Zn-Mg-Cu type high strength Al alloys mechanical properties evaluation by fracture mechanics methods  
p0015 A71-11540

Problems in riveting and welding of high strength aluminum aircraft alloys  
[AD-717053] p0331 N71-20924

Tungsten reinforced oxidation resistant columbium alloys with operating temperature above 2000 F for use in gas turbine engines  
[AD-717969] p0398 N71-23673

## HIGH STRENGTH STEELS

Metallic coating effects on aircraft high strength steel fatigue, considering chromium plating, shot peening and plasma spraying  
[NACE PAPER 23] p0269 A71-22889

Ultrahigh tensile steels for landing gear and other aircraft design applications, discussing composition, mechanical properties, quality requirements, manufacture and testing  
p0272 A71-22996

Optical holographic interferometry for radial microcracks detection from bolt holes in high strength aircraft steel  
[ASME PAPER 71-NET-C] p0361 A71-27312

Low alloy high strength steels undetected fabrication originated anomalies, causing brittle behavior and crack propagation susceptibility  
[SME PAPER EM-71-706] p0494 A71-32435

Electron fractography for high strength steel to determine fatigue life of military aircraft parts  
[NLR-TR-69043-U] p0119 N71-13364

## HIGH TEMPERATURE

Hypersonic test facility for studying ablation in models under high pressure and high temperature  
[NASA-CASE-XLA-00378] p0172 N71-15925

Application of free flight ranges to high temperature gas dynamics  
p0385 N71-22633

High total temperature sensing probe using fluid oscillator concept for X-15 hypersonic aircraft  
[NASA-CR-116772] p0391 N71-23250

Aerodynamic and heat transfer performance of air cooled nozzle cascade for high temperature turbine  
[NAL-TR-231-PT-1] p0641 N71-33304

Velocity pulsations of high temperature hypersonic flow based on interrelation of total stagnation pressure pulsations and longitudinal velocity pulsations  
[AD-726605] p0685 N71-35421

Thermally resistant polymers for fuel tank sealants of advanced high speed aircraft  
[NASA-CR-119940] p0686 N71-35546

## HIGH TEMPERATURE AIR

High temperature aerodynamics with electromagnetic radiation, considering thermally radiating shock layers, electric arc driven wind tunnels and gas dynamic lasers  
p0361 A71-27277

## HIGH TEMPERATURE ALLOYS

## U HEAT RESISTANT ALLOYS

## HIGH TEMPERATURE ENVIRONMENTS

Engine vibration high temperature transducer, discussing piezoelectric materials properties and design considerations relative to temperature, pressure, acoustic noise, humidity environment  
p0030 A71-12911

German monograph on high energy propellant-oxidizer systems changes of state under high temperature conditions with chemical relaxation taken into account  
p0138 A71-17106

High temperature corrosion in aircraft engine components and gas turbines by sulfur in fuels, vanadium pentoxide and NaCl  
p0274 A71-23288

High temperature oxidation protective coatings behavior, emphasizing jet engine applications  
p0274 A71-23296

TI alloys structural high temperature applications in fighter aircraft, considering fabrication and assembly methods  
p0275 A71-23427

Aircraft flight load measurements in high temperature environment, determining optimal strain gage installation and calibration  
p0440 A71-30681

## HOLDERS

## NT FLAME HOLDERS

## HOLE DISTRIBUTION (MECHANICS)

Interaction between supersonic flow and transverse sonic or supersonic jet blown perpendicular to main stream through circular hole in wall

p0083 A71-14572

Assembling accuracy of three dimensional joints using assembly holes in aircraft construction

p0085 A71-14609

## HOLOGRAPHY

Holographic interferometry application to gas dynamics, analyzing interferential patterns in monochromatic and achromatic light

p0140 A71-17166

Schlieren system conversion to holographic visualization in operational wind tunnels and test facilities

p0268 A71-22788

Asymmetric three dimensional aerodynamic density fields from holographic interferograms, applying to supersonic flow from free jet

p0347 A71-25802

Pulsed laser holographic applications to aerospace components nondestructive testing, inspecting electron beam welds and internal structural flaws [ASME PAPER 71-GT-74]

p0352 A71-25988

Surface strain measurements in turbine blades by time average holographic interferometry, reviewing resonant modes and holographic fringe patterns [ASME PAPER 71-GT-84]

p0353 A71-25992

Optical holographic interferometry for radial microcracks detection from bolt holes in high strength aircraft steel [ASME PAPER 71-MET-C]

p0361 A71-27312

Holographic techniques, optical data processing and laser properties for aerospace instrumentation

p0434 A71-30329

Holographic recording of optical inhomogeneities in gas flow in hypersonic wind tunnels, using Mach-Zehnder interferometer and schlieren apparatus

p0479 A71-31274

Holographic interferometry for flow visualization within aerodynamic wind tunnels with retrodiffuser apparatus

p0480 A71-31276

Optical techniques for holographic NDT inspection speeds increase in laminate structures flaw detectability

p0487 A71-31815

Holography applications in aeronautics and astronautics, discussing advantages of three dimensional information in aircraft navigation, space missions and astronomic experiments

p0495 A71-32528

Holographic interferometry fringe patterns interpretation for small displacements measurement, considering precision gyro stability

p0541 A71-35286

Holographic display for blind landing system with variable image perspective over wide field of view, using collimated or cylindrical laser beam

p0554 A71-36061

Holographic interferometry for study of transparent media

[ONERA-TP-851] p0039 N71-10407

Retrodiffusion interferometric holography in wind tunnels including displacement and deformation of deflectors

[ONERA-TP-852] p0053 N71-11510

Schlieren photography and differential interferometry for free flight tunnel holography [ISL-T-39/69]

p0105 N71-12223

Investigating possibilities and limitations of applying holographic techniques to aerospace technology

[NASA-SP-248] p0115 N71-12776

Investigating air flow in noisy wind tunnels using holographic flow visualization system

p0115 N71-12795

Differential interferometry and schlieren photography for hypersonic aerodynamic hologram analysis

[ISL-T-49/69] p0116 N71-12985

Q-switched ruby laser holography with optical equipment to compensate for spatial and temporal incoherence for contouring, aerodynamic visualization, and nondestructive testing

[NASA-CR-114291]

p0334 N71-21320

Interferometric holographic analysis of density fields around half-angle conical bodies in supersonic wind tunnels with 10 deg angle of attack

[AD-721543]

p0528 N71-28411

Holographic imagery for aviation and space flight [JPSS-53420]

p0579 N71-30361

## HOLOMORPHISM

## U ANALYTIC FUNCTIONS

## HOMING DEVICES

Theoretical principles of radio direction finding and operation of radio direction finders

[AD-714509]

p0178 N71-16616

## HONEYCOMB STRUCTURES

High peel strength epoxy and urethane adhesives for aircraft bonding, discussing high temperature curing and honeycomb panel repair

p0282 A71-24064

Variable weight composite materials for aircraft optimal adhesive bonding structural designs, discussing C-5A tow weight saving Ti honeycomb applications

p0282 A71-24084

Boron-epoxy structural skins design for F-14 honeycomb horizontal stabilizer, using computer program

p0344 A71-25420

## HORIZONTAL PINS

## U PINS

## HORIZONTAL FLIGHT

Forward horizontal speed influence on aerodynamic characteristics of air cushion vehicle with circular nozzles and cylindrically or conically shaped curtains

p0025 A71-12551

Optimum automatic flight control techniques in horizontal guidance of aircraft at terminal

p0200 A71-20306

Optimal control stabilization under continuous small disturbances applied to aircraft stability in horizontal flight under vertical gust loads

p0292 A71-24726

Longitudinal stability of plate-like load towed beneath helicopter in horizontal forward flight

p0698 A71-44346

Tu-134 aerodynamic characteristics during takeoff, climb, horizontal flight, landing stability and maneuverability, and strength under various loads [AD-727196]

p0720 N71-37612

## HORIZONTAL STABILIZERS

## U STABILIZERS (FLUID DYNAMICS)

## HORIZONTAL TAIL SURFACES

Aft vs canard horizontal tail locations for fighter/attack configuration at sub and supersonic speeds, observing lift coefficient, L/D and longitudinal stability

[AIAA PAPER 71-8] p0150 A71-18482

Supersonic flow separation around cross shaped horizontal tail plane with subsonic leading edge, obtaining pressure distribution and aerodynamic characteristics

p0277 A71-23608

Sailplane elevator induced maneuvering and horizontal tail surface loads, discussing airworthiness requirements

p0418 A71-29256

Development and characteristics of translating horizontal tail assembly for supersonic aircraft [NASA-CASE-XLA-08801-1]

p0051 N71-11043

Lift, aerodynamic drag and pitching moment study of transport aircraft horizontal tail surfaces in low speed wind tunnels

[ARC-R/M-3642] p0170 N71-15702

Wind tunnel tests with jet simulation of tailplane interference on European airbus models

p0304 N71-19374

Computer programs for calculating airforce coefficients of wing-horizontal tail and fin-horizontal tail oscillating in subsonic flow

p0568 N71-29342

## HORIZONTAL TAILS

 NT RADOMES  
**HOVERCRAFT**  
 U GROUND EFFECT MACHINES  
**HOVERING**  
 Army rotorcraft hot day standard design hover criterion, developing analytical models for hovering aircraft, cost, climatology and environmental features  
 p0096 A71-15431  
 V/STOL spray generation tests concerning pilot visibility impairment in low altitude overwater hover  
 p0098 A71-15444  
 Hovering and low speed flight capabilities of tilt wing VTOL aircraft in terminal area under near-zero visibility instrument landing conditions  
 [AIAA PAPER 71-7] p0150 A71-18481  
 Boundary layer discontinuity on helicopter rotor blade in hovering using flow visualization  
 [AIAA PAPER 69-197] p0200 A71-20307  
 Army rotorcraft performance data, discussing hovering and forward flight performance out of ground and level flight power requirements and drag and compressibility effects  
 [AHS PREPRINT 500] p0448 A71-31076  
 Heavy lift helicopters IFR hover capability with slung load, discussing sensors controls and displays  
 [AHS PREPRINT 540] p0451 A71-31097  
 German VAK 191B combat VTOL aircraft development program, describing prototype ground tests, autopilot preoptimization and hover flight tests  
 p0662 A71-41517  
 Helicopter, tilt wing and jet lift hovering aircraft outflow measurements to determine suitability as rescue vehicles  
 [AIAA PAPER 71-992] p0700 A71-44586  
 Blade root cutout effects on hover performance of helicopter rotors with rotor thrust and torque characteristics and wake pattern analysis  
 [AD-711396] p0049 N71-11030  
 Hovering type flying vehicle design and principle mechanisms for manned or unmanned use  
 [NASA-CASE-MSC-12111-1] p0051 N71-11039  
 Hovering performance tests of jet-flapped rotors and comparison of predicted and actual results  
 [NAL-TR-211] p0467 N71-25396  
 Effectiveness of attitude feedback and translational velocity feedback flight control system assessed for ability to provide positional stability and reduce pilot error at hover  
 [AD-721728] p0522 N71-28274
- Acoustic measurements of helicopter rotor noise at hover  
 [AD-721312] p0522 N71-28275  
 Model for predicting pilot rating of VTOL aircraft in hover mode  
 [AD-724144] p0637 N71-32981  
 Calculation of turbulent compressible boundary layer on helicopter rotors for range of hover conditions using two different analytical methods  
 [AD-723989] p0642 N71-33312
- HOVERING STABILITY**  
 Aircraft ultrasonic altitude and vertical velocity sensor for low flight, discussing VTOL aircraft automatic hovering control and time lag  
 p0016 A71-11624  
 Attitude and velocity control for VTOL aircraft takeoff and landing operations in hovering flight, discussing simulation devices and testing operations  
 [DGLR-70-073] p0129 A71-15948  
 Tip vortex effects on rotor blade flutter in hovering flight, discussing compressibility and oscillation frequency  
 p0134 A71-16564  
 Helicopter longitudinal stability in forward flight and hover modes under attitude, height and speed constraints, noting need for cyclic pitch control due to instabilities  
 p0186 A71-19421  
 Propulsion system and fuel regulator design effect on thrust change during air ejection for VTOL aircraft stabilization in hovering flight  
 p0293 A71-24753  
 Helicopter handling under ASW flight conditions, discussing sea state effect on low altitude hover stability  
 p0420 A71-29384  
 Model following technique for optimal control applied to hovering motion of CH-3 helicopter  
 p0611 A71-39000  
 Flight simulation for evaluating proposed stabilization system to ensure helicopter hovering precision during cargo loading  
 [AD-710948] p0042 N71-10564  
 VTOL display and control system for deceleration to instrument hover  
 [NASA-TN-D-6108] p0178 N71-16584  
 Design criteria for optimal hoverable helicopter in hot weather climate  
 [AD-717025] p0337 N71-21707  
 Flight simulation of hovering vertical takeoff aircraft with various attitude and speed controls  
 p0626 N71-31955  
 Evaluation of in-flight simulation of flying platform using helicopter with variable stability and maneuverability  
 p0626 N71-31957

**HUMAN BEHAVIOR**  
 Sonic boom effects on human physiology and behavior and structures, based on theoretical studies and simulators  
 p0213 A71-21812  
 Aircraft noise reduction criteria, examining noise measurements relation to human behavior and physical measures connection to subjective judgments  
 p0488 A71-31879

## HUMAN BODY

Simulator study of lunar flying platform control by pilot body motion  
[NASA-TN-D-6016] p0164 N71-14981

## HUMAN ENGINEERING

## U HUMAN FACTORS ENGINEERING

## HUMAN FACTORS ENGINEERING

Role of man in navigation - Conference, Colorado Springs, July 1970

p0005 A71-10501  
Man role in future navigation from SAC viewpoint, considering relationships to mission and machine

p0006 A71-10502  
Navigator role in Military Airlift Command /MAC/ as navigator, weather analyst, fuel manager and flight planner

p0006 A71-10504  
Electronic control indicator for human pilot capability enhancement using color coded cathode ray display, presenting information from seven different instruments

p0008 A71-10750  
Fiber optic faceplates for contrast enhancement under high ambient light conditions for commercial and military cockpits, eliminating ghost, halo and direct sunlight problems

p0184 A71-19175  
Aerospace Recommended Practice criteria for flight deck crew escape systems applicable to all commercial aircraft propulsion systems, design speeds and payloads

p0187 A71-19646  
[SAE-ARP-808A]  
Aircraft accidents due to engine-out simulation, discussing human factors, minimum control speed certification requirements and pilot flight training procedures

p0508 A71-34025  
[AIAA PAPER 71-793]  
ATC system safety problems from user standpoint, considering requirements by pupil, test and airline pilots and light, private, business, taxi and military aircraft

p0542 A71-35372  
Air safety standards and objectives, discussing human factors as accident causes, piloting aids and management

p0614 A71-39395  
Human factors in aircraft simulation  
[AGARD-CP-79-70] p0173 N71-16060

Human factors in Concorde cockpit simulation  
p0174 N71-16065

Technical and human engineering requirements for simulating pilot flight

p0174 N71-16066  
Human factors in developing a piloted simulation program for evaluating aircraft handling aspects  
[NASA-TM-X-66583] p0175 N71-16069

Cockpit geometry evaluation program results and techniques with computer input and output samples of flight crew anthropometry  
[AD-716395] p0314 N71-19817

Transfer functions in modelling human pilot and dynamic structural aircraft responses  
[AGARD-R-580-71] p0390 N71-23210

Human factors and safety requirements in aircraft design

p0395 N71-23423  
Human factors and control system failures in jet upsets during turbulence encounters

p0395 N71-23424  
Flying safety factors in close to ground operational design of XH-51 helicopter

p0396 N71-23430  
Identification and control of aeromedical factors associated with aircraft noise and acoustic measurements during C-141 operational missions

[AD-718097] p0399 N71-23748  
Analysis of aircraft structures which cause majority of injuries in aircraft accidents and recommendations for structural improvement to reduce accident severity

[FAA-AM-71-3] p0630 N71-32447  
Mechanics of free piston engine, aspects of human factors engineering, and compressible boundary layer studies at high Reynolds numbers

[DHE/NAE-1971/1] p0632 N71-32620

## HUMAN PATHOLOGY

Sick and injured transportation aboard regular airliners, considering pathological and psychological contraindications

## HUMAN PERFORMANCE

## NT OPERATOR PERFORMANCE

## NT PILOT PERFORMANCE

Aircraft compartment glare minimization for flight crew visibility conditions and visual performance improvement

p0001 A71-10028  
Manned aircraft crew long range navigation, discussing sensor, information processing and display systems for future commercial and military missions

p0201 A71-20343  
Attitudes and motivational factors in job performance of terminal area air traffic control personnel  
[FAA-AM-71-30] p0715 N71-37041

## HUMAN REACTIONS

Human subjective responses to approaching and receding aircraft sounds during flight over stationary observer

p0003 A71-10345  
Community reactions to aircraft noise, discussing short term interim alleviation measures in airport operations and runway usage scheduling

p0214 A71-21819  
Pilot subjective evaluation of XB-70 aircraft response to atmospheric turbulence in comparison with measured accelerations

p0426 A71-29774  
Air and land transportation noise sources and measurement, noise level scales, and individual and community responses - conference  
[PB-191117] p0037 N71-10349

Community physical, psychological, and social reactions to aircraft noise around 7 US international airports

[NASA-CR-111316] p0050 N71-11032  
Community reactions to aircraft and airport noise from physical, psychological, and social aspects

[NASA-CR-1761] p0532 N71-29023  
Literature survey and bibliography on noise pollution including sources, effects, and control  
[AD-724344] p0642 N71-33315

## HUMAN TOLERANCES

Helicopter pilot and passenger comfort/vibration tolerance criteria

p0095 A71-15420  
Air transportation systems ride vibration environments in relation to human comfort

p0095 A71-15421  
Survey on acoustics technology emphasizing noise reduction and human tolerances

[NASA-SP-5093] p0128 N71-14307  
Comparison test to evaluate perceived noise level for STOL and other aircraft sounds

[WR-70-9] p0587 N71-31075  
Analysis of aircraft structures which cause majority of injuries in aircraft accidents and recommendations for structural improvement to reduce accident severity

[FAA-AM-71-3] p0630 N71-32447  
Relations between aircraft and road traffic noise and noise tolerance in communities

[TT-7102] p0675 N71-34019

## HUMIDITY

Effect of atmospheric humidity on characteristics of turbofan engine  
[AD-715232] p0241 N71-17728

## HUMIDITY MEASUREMENT

Soviet book on fog, cloud and humidity measuring instruments, discussing artificial fog formation and natural fog dispersion problems

p0199 A71-20298

## HUNTER F-2 AIRCRAFT

## U F-2 AIRCRAFT

## HUNTING H-126 AIRCRAFT

## U H-126 AIRCRAFT

## HYBRID COMPUTERS

Missiles and aircraft trajectories computation time reduced via time sharing and hybridization  
p0020 A71-11794

Complex real time hybrid computer simulator for captive two blade rotor platform dynamic problem solving

p0348 A71-25847  
Six degree of freedom hybrid digital computer program for complex flight control and associated mode logic design and training

HYDRAULIC ACTUATORS p0348 A71-25852  
 U ACTUATORS  
 U HYDRAULIC EQUIPMENT  
 HYDRAULIC CONTROL  
 Electrohydraulic thrust control system for  
 supersonic transport aircraft engines, considering  
 reliability, performance and weight  
 [SAE PAPER 700819] p0016 A71-11546  
 Aircraft electronic control systems, considering  
 hydraulic servocontrol, force simulation and  
 reliability models p0196 A71-20064  
 HYDRAULIC EQUIPMENT  
 NT AIRCRAFT HYDRAULIC SYSTEMS  
 Third Chance flight control system, discussing  
 aircraft control capability with backup hydraulic  
 system after loss of dual main hydraulic systems  
 due to combat damage p0420 A71-29382  
 Thrust measurement of aircraft propulsion systems,  
 considering hydraulic piston device, edge  
 clearance, oil quantity and calibration p0428 A71-29860  
 Development of aircraft control system with high  
 performance electrically controlled and  
 mechanically operated hydraulic valves for precise  
 flight operation p0532 N71-29128  
 Analytical procedures for predicting coupled fluid  
 structural responses of aircraft hydraulic systems p0688 N71-36276  
 Hydraulic power and actuation requirements of  
 survivable flight control system utilizing fly by  
 wire control for F-4 aircraft p0719 N71-37608  
 [AD-727763]  
 HYDRAULIC FLUIDS  
 Soviet book on aviation fuels, lubrication materials  
 and special fluids covering compositions,  
 physicochemical properties, filtration, etc p0014 A71-11320  
 Performance testing of fluorosilicone hydraulic  
 fluid in high temperature supersonic aircraft  
 piston pumps p0359 A71-27040  
 Characteristics of hydraulic systems and application  
 to aircraft systems p0571 N71-29562  
 [AD-701974]  
 HYDRAULIC HEATING SOURCES  
 U HEAT SOURCES

- Inflatable restraint collar for large balloons with heavy loads using winch driven cable launching  
p0020 A71-11821
- Flexible ram air inflated keel and leading edge parawing design optimization for increased stability and reliability, introducing semirigid member concept  
[AIAA PAPER 71-986] p0700 A71-44582
- Method for arranging filamentary, load bearing material to approximate stress condition in gas envelope of free floating balloon for maximizing structural efficiency

- [AD-713188] p0163 N71-14811  
Design and characteristics of double hull dirigible  
airship
- [JPRS-52330] p0260 N71-19217  
Design, fabrication and static testing of attached  
inflatable decelerator models for supersonic wind  
tunnel evaluation
- [NASA-CR-111831] p0383 N71-22538  
Numerical analysis of influence coefficients,  
natural frequencies, and mode shapes of vibration  
of triangular inflatable wing
- p0386 N71-22666  
Steady state inflated shape and included volume of  
24 and 30 gore flat circular, extended skirt,  
porous ring slot, and porous ribbon parachutes  
[AD-718808] p0393 N71-23387  
Design, fabrication, and static testing of wind  
tunnel models of first-stage Attached Inflatable  
Decelerator canopies for supersonic vehicles  
[NASA-CR-111934] p0680 N71-35205  
Design, development, and performance requirements  
for large rigid airships for freight and cargo  
transportation
- [REPT-5] p0710 N71-36425
- INFLATING**  
Inflation of initially spherical balloon of elastic  
rubber-like material, discussing tensile  
instability
- p0345 A71-25445  
Free-body tests of flat circular parachutes and  
determination of aerodynamic drag coefficients  
during partial inflation
- [NASA-TN-D-6423] p0642 N71-33395
- INFLUENCE COEFFICIENT**  
Influence coefficients for aircraft engine gas/air  
ducts parameter deviations, using statistical  
analysis
- p0080 A71-14257  
Wake model and computer program to compute  
geometries, flows and velocity influence  
coefficients for helicopter blade load  
calculations
- [AHS PREPRINT 523] p0450 A71-31089  
Flexible rotor balancing by exact point-speed  
influence coefficient method
- [NASA-CR-72774] p0033 N71-10021
- INFORMATION SYSTEMS**  
**NT MANAGEMENT INFORMATION SYSTEMS**  
Integrated project information and simulation system  
for management of aerospace vehicle development,  
discussing simulation models application
- [AIAA PAPER 71-238] p0188 A71-19714  
Three-phase time-ordered functional organization for  
ground based collision avoidance, discussing  
information flow, display capability and dynamic  
simulation model
- [AIAA PAPER 71-240] p0188 A71-19716  
Development program for multiple access real time  
tactical information distribution system,  
designing and constructing tactical air control  
system test facility
- [AIAA PAPER 71-243] p0188 A71-19718  
Manned aircraft crew long range navigation,  
discussing sensor, information processing and  
display systems for future commercial and military  
missions
- p0201 A71-20343  
Observational data characteristics analysis as  
contributor to knowledge and utilization of all  
atmospheric physical occurrences
- p0212 A71-21722  
ATC data automation, discussing flight plant  
processing system /PPPS/, radar data processing  
system /RDPS/ and signal automatic control system  
/SATCO/
- p0495 A71-32523
- INFORMATION TRANSMISSION**  
**U DATA TRANSMISSION**  
**INFRARED ASTRONOMY**  
StarLifter borne large aperture astronomical  
telescope for IR and submillimeter observations,  
discussing design and operation
- p0612 A71-39173
- INFRARED DETECTORS**  
Airborne equipment for CAT detection ahead of  
aircraft, considering pulsed Doppler laser and IR  
detectors
- p0425 A71-29765
- Development and characteristics of scanning systems  
for thermal viewers and infrared detectors for  
airborne operation
- [AD-719854] p0466 N71-25053  
Aircraft mounted infrared detectors for remote  
measurements of optical cloud properties
- p0467 N71-25260  
Airborne infrared radiometer measurement of ocean  
water surface temperatures
- [AD-726512] p0686 N71-35494
- INFRARED HORIZON SCANNERS**  
**U INFRARED SCANNERS**  
**INFRARED INSPECTION**  
Traversing Infrared Inspection System for C-5  
aircraft fail-safe strap panels of bonded Ti-Al  
laminates, discussing design and application
- [ASME PAPER 71-DE-37] p0361 A71-27327  
Infrared and thermal evaluation of tactical aircraft  
phased array radar antenna design with cooling air  
distribution for steady state operating  
temperature maintenance
- p0652 A71-40434
- INFRARED INSTRUMENTS**

**NT INFRARED SCANNERS**  
Development and characteristics of scanning systems  
for thermal viewers and infrared detectors for  
airborne operation
- [AD-719854] p0466 N71-25053
- INFRARED RADIATION**  
Closed cycle refrigeration system for cryogenic  
cooling of IR illuminator in helicopter mounted  
U.S. Army NVASS Night Vision System for night  
reconnaissance
- p0613 A71-39275
- INFRARED SCANNERS**  
**NT MULTISPECTRAL BAND SCANNERS**  
Airborne IR linescan equipment for commercial aerial  
survey, discussing operational principle,  
temperature sensitivity, data processing and  
individual system components specifications
- p0668 A71-42151  
Calculations of clear column radiances using  
infrared temperature profile radiometer  
measurements taken by Convair-990 over partly  
cloudy areas
- [NOAA-TM-NESS-28] p0337 N71-21842
- INFRASONIC FREQUENCIES**  
Aerodynamic infrasound, considering atmospheric  
pressure variations in seconds to minutes period  
range
- p0297 A71-24915
- INGESTION (ENGINES)**  
Gas turbine aircraft engine compressor blades  
foreign object ingestion control by inlet vortex  
flow suppression jets, indicating wind tunnel air  
intake applications
- p0145 A71-17696  
F 101 30,000 lb thrust augmented turbofan engine for  
B-1 bomber, considering maintainability and bird  
ingestion tolerance
- p0600 A71-37491  
Ingestion of debris into aircraft engine inlets  
during takeoff
- [ARC-CP-1114] p0227 N71-17084  
Investigation of helicopter jet engine flameout due  
to ingestion of snow and ice
- [NRC-11893] p0371 N71-21927  
Exhaust gas ingestion and recirculating flow field  
characteristics of small scale vertical take off  
engine pod
- [NASA-CR-1774] p0468 N71-25397  
Model tests of concepts to reduce hot gas ingestion  
in VTOL lift engines in low and cross wind  
conditions - graphs
- [NASA-CR-1863] p0630 N71-32370
- INHIBITORS**  
Jet fuel soluble corrosion inhibitors evaluation by  
potentiostatic polarization methods
- p0081 A71-14323

## INJECTION CARBURETORS

U CARBURETORS

U FUEL INJECTION

## INJECTORS

NT VORTEX INJECTORS

Low pressure drop fuel liquid injectors for jet engine combustors, using gas turbine vaporizer design

[ASME PAPER 71-GT-38] p0350 A71-25972

Mixing of hydrogen downstream from multiple injectors normal to supersonic jet flow, for supersonic combustion on ramjet engines

[L-7896] N71-34274

## INJURIES

NT CRASH INJURIES

NT NOISE INJURIES

U.S. General Aviation safety record, discussing National Transportation Safety Board and accident/injury prevention

[SAE PAPER 710397] p0300 A71-25132

Summary and statistical analysis of aircraft accidents

[NTSB-AAS-70-1] p0042 N71-10674

Statistical, cause/factor and injury tables, accident rates, and briefs of accidents involving US carriers in 1969

[NTSB-ARC-71-1] p0711 N71-36437

## INLET FLOW

Engine/compressor test inlet flow field simulation, considering ramp angle, screen location and diffuser length effects

p0030 A71-12909

Cone shaped diffusers effectiveness, noting inlet conditions effect on pressure recovery coefficient

p0136 A71-16750

Inlet turbulence interaction with rotor potential flow as noise source in axial flow fans, developing expression for sound power radiated

p0140 A71-17163

Gas turbine aircraft engine compressor blades foreign object ingestion control by inlet vortex flow suppression jets, indicating wind tunnel air intake applications

p0145 A71-17696

High performance fighter aircraft engine pressure ratio and turbine inlet temperature measurement, using fluidic sensors

p0203 A71-20586

Air temperature effects on internal combustion engines intake process, using similarity theory

p0204 A71-20782

Optimal lining impedance for jet engine inlet duct, yielding discrete frequency, flow velocity and geometry on basis of minimum radiated power

p0211 A71-21661

Turbulent flow in initial section of convergent axisymmetric nozzle based on logarithmic velocity law

p0266 A71-22409

Compressor surge effect on mixed compression inlet flow from numerical solution of one dimensional unsteady inviscid flow equations in variable area duct

[AIAA PAPER 69-484] p0295 A71-24855

Three dimensional boundary layer flow and velocity profiles in mixed diffuser with equal angle walls

[ASME PAPER 71-GT-40] p0350 A71-25973

Noise generation due to inlet free stream turbulence incident on isolated stators and rotors, using flat plate cascade blade row model

p0559 A71-36498

Conical diffusers outlet flow profile and performance, investigating swirling inlet flow effects on pressure recovery

p0660 A71-40950

Inlet conditions for centrifugal compressor impeller covering pressure, temperature and velocity measurements on quasi-three dimensional model

p0665 A71-42035

Reingestion characteristics and inlet flow distortion of V/STOL fighter powered by J-85 engine

[NASA-TN-D-7014] p0122 N71-13420

Inlet flow distortion testing of high Mach number transonic fan stages - Vol. 1

[NASA-CR-72786-VOL-1] p0163 N71-14863

Tabular data derived from inlet flow distortion tests of high Mach number transonic fan stages - Vol. 2

[NASA-CR-72786-VOL-2] p0164 N71-14864

Two dimensional thin airfoil theory with strong

inlet flow on upper surface

[AD-714076] p0175 N71-16261

High entrance temperatures for improved performance of turbogenerators and gas turbine engines

p0231 N71-17373

Interference effect between oscillating and

distorted inlet flow on compressor stall

p0303 N71-19370

Quasi-three dimensional surface velocities and

choking flow for turbomachine blade rows

calculated by FORTRAN program

[NASA-TN-D-6177] p0389 N71-23126

Test description and results for high Mach number transonic fan stages to determine range and distortion tolerance for various rotor tip casing treatment configurations

[NASA-CR-82862] p0468 N71-25460

Tabulations of blade element and circumferential distortion flow data in tests of high Mach number transonic fan stages with various rotor tip casing treatment configurations

[NASA-CR-82867] p0468 N71-25461

Design and characteristics of supersonic inlet

controls for minimizing inlet unstarts

[NASA-TN-D-6408] p0576 N71-30072

Velocity profile control tests of diffuser wall

bleed to control combustor inlet airflow

distribution

[NASA-TN-D-6435] p0586 N71-30817

## INLET NOZZLES

Aircraft turbine engines with elevated gas inlet

temperatures

p0101 A71-15670

Supersonic propulsion system inlet, engine and exhaust nozzle in wind tunnel and flight tests, discussing boundary layer effects on performance

p0695 A71-43599

Auxiliary inlet ejector nozzle designed for

supersonic cruise aircraft

[NASA-TN-X-2182] p0256 N71-18863

Flight test investigation of effects of variable geometry plug nozzles installed on F-106B aircraft

[NASA-TN-X-2295] p0578 N71-30283

## INLET PRESSURE

Pitot type intake inlet additive drag in terms of

capture area ratio, static and total pressure

coefficients

p0028 A71-12688

Engine surge pressure transients in mixed-

compression supersonic inlet, describing scale

wind tunnel model simulation and measurement

techniques

[AIAA PAPER 71-671] p0441 A71-30735

## INLETS (DEVICES)

U INTAKE SYSTEMS

## INORGANIC COMPOUNDS

NT AMMONIA

## INSECTICIDES

NT DICHLORODIPHENYLTRICHLOROETHANE

NT URETHANES

## INSECTS

NT BEES

## INSENSITIVITY

U SENSITIVITY

## INSPECTION

NT INFRARED INSPECTION

Airport certification and safety inspection

procedures and minimum safety standards

[SAE PAPER 710413] p0404 A71-28305

Determination of inspection intervals and nature of inspections for safe and economical operation of aircraft structures

[PPA-120] p0382 N71-22431

Fatigue crack length relationship with aircraft inspection intervals and structural reinforcement, high strength materials, and aircraft usage

effects p0584 N71-30783

## INSTALLATION

U INSTALLING

## INSTALLING

Aircraft flight load measurements in high

temperature environment, determining optimal

strain gage installation and calibration

p0440 A71-30681

## INSTRUCTIONS

U EDUCATION

## INSTRUMENT APPROACH

Cockpit simulator motion effects on ILS approach pilot guidance errors, using Erdmann model [DGLR-70-071] p0129 A71-15956

Aircraft ILS landing approaches, discussing approach area and surface and obstruction clearance surface and limit p0659 A71-40891

Jet aircraft crash during instrument approach due to electrical systems failure [NTSB-AAR-70-22] p0043 N71-10812

Learn jet crash during instrument approach due to descent below path profile [NTSB-AAR-70-21] p0043 N71-10813

VTOL display and control system for deceleration to instrument hover [NASA-TN-D-6108] p0178 N71-16584

Index of standard instrument approach procedures for domestic and foreign airports p0391 N71-23233

Operational performance of Hawker Siddeley aircraft automatic flight approach and landing control system p0393 N71-23414

Mathematical perturbation models of aircraft ILS approach and landing [VTH-159] p0570 N71-29496

Terminal area studies with XC-142, XV-5, Do-31, and P 1127 aircraft to develop powered lift control techniques for instrument approach p0583 N71-30774

**INSTRUMENT COMPENSATION**

Low resistance nozzles for complete power compensation in rate of climb indicators p0003 A71-10350

**INSTRUMENT ERRORS**

Noncircular cross section static pressure probes theoretically insensitive to pitch, yaw and Mach number, testing performance p0073 A71-13730

Aircraft radio compass navigation errors due to loop antenna inclinations during maneuvering p0205 A71-20787

Static pressure port errors in hypersonic turbulent flow, using approximate shear layer momentum balance for pressure increase derivation [AIAA PAPER 71-270] p0219 A71-21996

High temperature dynamic strain gage test equipment for evaluating precision, life and environmental limitations p0267 A71-22719

Turn rate gyro installation angle and airspeed effects on instrument reliability, presenting in-flight investigation results relative to turn rate information usefulness under various flight conditions [SAE PAPER 710380] p0285 A71-24245

Modulation cancellation altimeter error analysis and performance optimization p0362 A71-27437

Aircraft barometric altimeter errors caused by atmospheric temperature deviations from International Standard Atmosphere p0433 A71-30323

Fan-produced sound pressure fluctuation in very low speed subsonic wind tunnel test stream, noting resulting anemometer calibration errors p0437 A71-30526

Rotor asymmetry effect on errors of two degrees of freedom gyro mounted on dynamic platform p0546 A71-35608

Mass and center of gravity determining system model, describing equipment, operation principle, calibration data and techniques accuracy and errors [SAE PAPER 879] p0551 A71-35824

Unaided, integrated and differential OMEGA radio navigation configurations, comparing accuracy and suitability for airways system operations p0667 A71-42082

Pressure altimeter, airspeed and vertical velocity instruments, discussing selection, installation, pilot verification, error identification, repair and use p0694 A71-43385

General aviation aircraft altimeter errors, tolerances and static system tests p0694 A71-43386

Behavior of attitude gyro and gyro horizon during looping flight p0119 N71-13281

Statistical analysis of gyrocompass mode of A-6A inertial navigation system [RH-511] p0578 N71-30315

## INSTRUMENT FLIGHT RULES

Maximum throughput-rate capacity for runway and final approach path airspace involving multiple IFR landings p0029 A71-12893

ATA Collision Avoidance System based on time and frequency synchronization via ground stations or other aircraft p0030 A71-12895

IFR design requirements for STOL navigation equipment from flight tests p0095 A71-15424

VTOL aircraft IFR airworthiness, noting necessity of higher safety levels for metropolitan air transit systems p0095 A71-15426

VTOL handling qualities criteria for civil IFR qualifications, taking into account pilot abilities p0096 A71-15427

ATC automation program for en route and terminal centers, discussing combined nationwide system features, IFR volume and video digitizer data links p0210 A71-21659

Light aircraft qualification for icing conditions from flight test data, considering increase in instrument rated pilots and IFR flying activity [SAE PAPER 710394] p0287 A71-24258

Heavy lift helicopters IFR hover capability with slung load, discussing sensors controls and displays [AHS PREPRINT 540] p0451 A71-31097

Application of IFR with unpowered, low lift drag ratio landing approaches p0033 N71-10110

Environmental tests of VORLOC 2 simplified directional approach system to determine compliance with FAR-Part 171 [FAA-RD-71-12] p0328 N71-20666

Flight simulator evaluation of aircraft instrument departure procedure [FAA-PS-600-2] p0572 N71-29635

Effects of aircraft system noise and signal fading on pilot performance during IFR approach based on computerized simulation of XV-5 aircraft and UH-1 helicopter [AD-724336] p0638 N71-33076

Summary of instrument flight rule off-airway routes for commercial and military aviation in US and overseas areas p0678 N71-34592

## INSTRUMENT LANDING SYSTEMS

**NT AUTOMATIC LANDING CONTROL**

STOL navigation equipment and microwave landing instruments test programs, noting data recording and flight operations p0068 A71-13286

VC-10 aircraft ILS electronic equipment reliability tests p0101 A71-15873

Cockpit simulator motion effects on ILS approach pilot guidance errors, using Erdmann model [DGLR-70-071] p0129 A71-15956

Blind landing by mobile beams and Doppler systems, superseding heavy infrastructure ILS p0146 A71-17951

Hovering and low speed flight capabilities of tilt wing VTOL aircraft in terminal area under near-zero visibility instrument landing conditions [AIAA PAPER 71-7] p0150 A71-18481

Aircraft automatic landing improvement through use of space diversity ILS receiving system p0181 A71-18830

Structures electromagnetic scattering and multipath transmission effects on aircraft instrument landing system localizer signals, using computer program p0181 A71-18831

Aircraft final approach and landing aids, describing ILS, VHF omnidirectional radio range, distance measuring equipment and satellite systems for air navigation

Kalman filter application as observer of observable signals derivatives, using gain matrix to minimize variance estimate for instrument landing systems p0182 A71-19014

Microwave and modular solid state ILS designs, discussing accelerated progress, international standard and present system life expectancy p0209 A71-21343

Combined inertial and instrument landing aircraft navigation systems with reduced cross runway position and velocity errors, using optimal linear estimation p0280 A71-23943

Handling qualities of V/STOL research vehicles during steep terminal area approaches, discussing powered lift fan VTOL aircraft limitations and instrument landing approach p0439 A71-30606

Performance category III all-weather capability ILS landing equipment standards, discussing high directivity antennas and transmission and control system redundancy techniques for reliability p0451 A71-31101

C band SYDAC system compatible with conventional ILS, considering transmission sensitivity to ground reflection and lateral obstacles p0490 A71-31909

SYDAC ILS systems flight tests p0490 A71-31910

Aircraft ILS signal reception system, obtaining category III reliability performance by circuit redundancy and automatic incoming information surveillance p0490 A71-31911

DC 10 flight test program improvement using data acquisition/processing with real time monitoring, instrument landing and laser tracking p0490 A71-31912

Automatic landing systems using inertial navigation derived translational state information, discussing evaluation by simulation of transport aircraft operating with conventional instrument landing system p0508 A71-34018

Air navigation and traffic control systems with application to Western Europe and Atlantic area, noting requirements for ILS successor p0508 A71-34020

Holographic display for blind landing system with variable image perspective over wide field of view, using collimated or cylindrical laser beam p0553 A71-35998

Concorde aircraft navigation system comprising triple inertial systems, dual VOR/DME, dual ILS and dual ADF p0554 A71-36061

All-weather operations, including pilot role, instrument landing systems and guidance aids p0601 A71-37599

Aircraft ILS landing approaches, discussing approach area and surface and obstruction clearance surface and limit p0601 A71-37601

Doppler scanning landing microwave system for air-derived azimuth and elevation angle aircraft guidance by frequency coding and reference carrier transmission p0659 A71-40891

Scanning microwave landing guidance system coordinates choice, discussing signal format, antennas planar or conical beams and V/STOL application p0667 A71-42089

Aeronautical radio navigation aids photo-optical calibration, describing photogrammetric procedure and ground equipment for checking out airport ILS systems p0667 A71-42090

Application of IFR with unpowered, low lift drag ratio landing approaches p0695 A71-43587

Program effectiveness and facility criteria for ILS investment decisions p0033 A71-10110

Evaluation of systems, procedures, and instrumentation for air traffic control p0038 A71-10355

[AD-711662] p0043 A71-10737

Advanced ILS and automatic landing systems for conventional and V/STOL aircraft - conference [AGARD-CP-59-70] p0109 A71-12426

Psychological and procedural aspects to ILS approaches and landings in visibilities less than 1200 feet p0110 A71-12429

Automatic landing system optimization using inertial navigation data and modern control theory [NASA-CR-111575] p0110 A71-12431

Past and projected development of VHF ILS p0112 A71-12447

Minimum channel requirements for ILS localizer frequency assignment, 1970-1975 p0175 A71-16198

Fixed base simulation evaluation of one fully automatic and six manual low visibility landing systems for helicopters p0325 A71-20305

Microwave landing guidance systems initial concept validation tests in RTCA signal format [AD-717183] p0334 A71-21368

Radio frequency interference monitoring for instrument landing system in automatic landing [RAE-TR-70076] p0393 A71-23356

Landing systems signal reflection interference on correlation protected instrument landing system beams p0393 A71-23361

Mathematical perturbation models of aircraft ILS approach and landing [VTN-159] p0570 A71-29496

Systems analysis of aircraft, aircraft guidance and control systems, and atmospheric turbulence for low visibility instrument landing system requirements p0576 A71-30173

Minimum variance estimates of signal derivatives with application to case of aircraft descent rate in instrument landing systems p0577 A71-30241

Flight tests to determine handling qualities of general aviation aircraft during ILS approaches in turbulent air p0583 A71-30771

Analysis of glide-slope information requirements for low visibility aircraft landing approach using Kalman filter-optimal control combination to simulate DC-8 control system p0586 A71-30887

Motion cues and pilot error in simulated instrument landing system approach p0626 A71-31953

Test and evaluation of aircraft glide slope landing system operating at ultrahigh frequency [FAA-NA-71-15] p0628 A71-32085

Effect of turbulence and aircraft performance on ILS approach task and longitudinal stability [NASA-CR-1821] p0642 A71-33325

All weather landing system design, development, and field and flight testing p0686 A71-35777

## INSTRUMENTAL ANALYSIS

## U AUTOMATION

## INSULATION

## NT THERMAL INSULATION

## INTAKE SYSTEMS

## NT AIR INTAKES

## NT CONICAL INLETS

## NT ENGINE INLETS

## NT HYPERSONIC INLETS

## NT INTERNAL COMPRESSION INLETS

## NT SUPERSONIC INLETS

Inlet particle separators for engine erosion prevention, discussing tests of various models for separation efficiency, clogging resistance, pressure loss and flow distortion p0097 A71-15435

Axissymmetric inlet design for turbofanjet powered hypersonic cruise vehicle, examining effects of spillage and cowl drags on air flow characteristics p0509 A71-34149

Shortening transition liner to decrease overall length of ram induction combustor [NASA-TN-D-7021] p0109 A71-12422

Wind tunnel tests of mixed compression axisymmetric inlet system at Mach numbers 0.6 to 3.5 [NASA-TN-D-6078] p0116 A71-13024

Static tests to determine effects of throat inlet concepts on forward-radiated fan noise of 707-320B/C airplanes  
[NASA-CR-1715] p0236 N71-17426

Effect of various diffuser designs on performance of experimental turbojet combustor insensitive to radial distortion of inlet airflow  
[NASA-TM-X-2216] p0253 N71-18561

Aerodynamic flow field interference effects on supersonic intakes  
p0303 N71-19372

Design and characteristics of supersonic cruise inlets  
p0309 N71-19460

## INTEGRAL EQUATIONS

## NT FREDHOLM EQUATIONS

## NT SINGULAR INTEGRAL EQUATIONS

Lifting surface in unsteady subsonic flow, describing integral equation calculation method including kernel logarithmic singularity  
p0012 A71-11020

Transonic supercritical flow past arbitrary airfoils, using integral relations method  
[AIAA PAPER 71-98] p0152 A71-18553

Unsteady motion of finite span wing in ideal incompressible liquid near solid surface by integral operator method in potential acceleration space  
p0156 A71-18701

Two link approximation of Chaplygin function by coupling to integral equations, applying to ideal gas jet separation flow past symmetrical arc  
p0197 A71-20084

Transonic flow theory and experiment, considering hodograph method, integral equation method, parabolic method and method of characteristics  
p0599 A71-37454

Lifting line theory extension to low aspect ratio wings, proposing formulation for Prandtl integral equation  
p0669 A71-42288

Lifting rectangular thin airfoil in symmetrical incompressible steady uniform orthogonal flow at small angle of attack, deriving Weissinger integral equation  
p0695 A71-43487

Integral equations of motion and momentum for hypervelocity wind tunnel nozzle design  
[AD-722346] p0574 N71-29906

## INTEGRAL FUNCTIONS

## U ENTIRE FUNCTIONS

## INTEGRAL TRANSFORMATIONS

Direct and inverse application of Dorodnitsyn technique to incompressible transonic flow over symmetric Joukowski airfoil sections  
[NAL-TR-220T] p0313 N71-19750

Numerical evaluation of downwash integral for wing loading of lifting rectangular planform  
[NPL-MA-90] p0457 N71-24483

## INTEGRATED CIRCUITS

## NT LARGE SCALE INTEGRATION

Interface IC circuits for driving high voltage transistor switches from low level logic inputs, noting avionics application  
p0413 A71-28910

## INTEGRATION (REAL VARIABLES)

## U MEASURE AND INTEGRATION

## INTEGRODIFFERENTIAL EQUATIONS

## U DIFFERENTIAL EQUATIONS

## U INTEGRAL EQUATIONS

## INTELLIGIBILITY

## NT SPEECH RECOGNITION

Speech intelligibility prediction in time varying aircraft noise based on test score relationship to articulation index for steady state noise  
p0616 A71-39766

Time varying aircraft noise effect on speech intelligibility, discussing test for relation to articulation index  
p0658 A71-40709

## INTENSIFICATION

## U AMPLIFICATION

## INTERCEPTOR AIRCRAFT

## U FIGHTER AIRCRAFT

## INTERFACE STABILITY

Turbulent wakes flow entrainment mechanism, investigating turbulence spreading near interface between laminar and turbulent regions  
p0538 A71-34899

## INTERFACES

## NT FLUID BOUNDARIES

## NT GAS-SOLID INTERFACES

## NT JET BOUNDARIES

## NT LIQUID-SOLID INTERFACES

## INTERFACIAL STRAIN

## U INTERFACIAL TENSION

## INTERFACIAL TENSION

Initially spherical liquid droplet transient response under surface tension accelerated by external gas flow  
[AIAA PAPER 71-393] p0344 A71-25355

## INTERFERENCE

Rocket/launcher aerodynamic interference effects investigation by wind tunnel simulation, determining interference coefficients for rockets ballistic dispersion calculations  
[AIAA PAPER 71-269] p0218 A71-21995

Transonic wind tunnel wall interference effects experimental determination, investigating porous and slotted walls  
[AIAA PAPER 71-292] p0220 A71-22013

Corrections for subsonic wall interference effects in two dimensional perforated wall wind tunnel  
[LTH-HA-5] p0648 N71-33992

## INTERFERENCE DRAG

Jet interference effects on aircraft static stability with ejector afterbody, noting wind tunnel methods of drag minimization and measurement  
[DGLR-70-048] p0129 A71-15953

Interference analysis of wing with overlapping multipropellers in uniform velocity stream confined in elliptical cross section cylinder  
[AIAA PAPER 71-614] p0486 A71-31583

Interference loading linear prediction on aircraft stores at supersonic speeds, considering flow field due to jet fighter bomber  
p0598 A71-37290

Wind tunnel study of aerodynamic interference drag caused by fan jet engine wake of subsonic transport  
[NASA-TN-D-6067] p0045 N71-11004

Aerodynamic interference characteristics of airframe-propulsion systems of transport and military aircraft  
[AGARD-CP-71-71] p0301 N71-19353

Wind tunnel vortex flow study on body of revolution with or without wings  
p0301 N71-19355

Optimization of interferences between aircraft components in supersonic flow  
p0301 N71-19356

Finite element computer program for estimating airplane aerodynamic interference  
[NASA-TM-X-66884] p0301 N71-19357

Lift and drag interference characteristics of delta winged half cones with leading edges  
p0301 N71-19359

Numerical analysis of downwash interference on wings of missile tails  
p0302 N71-19360

Calculation methods for wing-body interference drag on supersonic aircraft in stationary or nonstationary flow  
p0302 N71-19362

Interference flow field of fin-flat plate configuration in supersonic turbulent boundary layer channel  
p0302 N71-19365

Flight and wind tunnel evaluations of flow field effects on performance of supersonic underwing exhaust nozzle at transonic speeds  
[NASA-TM-X-66887] p0302 N71-19366

Aircraft afterbody and engine nozzle interferences at subsonic, transonic, and supersonic speeds  
[NASA-TM-X-66888] p0303 N71-19368

Interference effect between oscillating and distorted inlet flow on compressor stall  
p0303 N71-19370

Wind tunnel surveys of flow fields about wing fuselage store configuration inlets of transonic and supersonic aircrafts  
[NASA-TM-X-66885] p0303 N71-19371

Aerodynamic flow field interference effects on supersonic intakes  
p0303 N71-19372

Wind tunnel tests with jet simulation of tailplane interference on European airbus models

German monograph on commercial jet aircraft maintenance systems covering changes and adaptations for performance improvement

p0002 A71-10114

Steep approach to landing for jet transport aircraft noise abatement, using ground based equipment and onboard TV display

p0014 A71-11311

Twin jet aircraft engine installation effects and exhaust nozzle integration, noting closely spaced inlet interference

[ICAS PAPER 70-47] p0067 A71-13148

STOL future performance and safety level, considering current jet aircraft fatal accident record and proportional perpetuation, airworthiness and operational considerations

p0070 A71-13568

Aircraft engine smoke emission control, discussing Ringelmann chart assessment for various commercial jet aircraft and airport gaseous pollutants

p0216 A71-21832

Cessna Citation twin turboprop business aircraft design, performance characteristics, communications, navigation and automatic flight control equipment and flight evaluation

p0265 A71-22112

Optimal stochastic control and gust alleviation for jet aircraft response for flight through turbulent upwash field

p0297 A71-24870

Jet aircraft airworthiness standards, discussing airline fleet maintenance resources, inspection systems and future requirements

p0354 A71-26308

Microbiological contamination of jet aircraft fuel tanks in tropical regions, considering maintenance

[SAE PAPER 710438] p0406 A71-28320

En route turbojet aircraft flight speed control, assessing impact on ATC procedures

p0413 A71-28884

Dassault Mercure short range twin jet aircraft capable of using powerful engine

p0419 A71-29276

Jet-supported VTOL aircraft fuel-time-optimal landing control, using mathematical model, Pontryagin maximum principle and analog computer solution

p0419 A71-29281

Integrated short-haul interurban transportation system, considering combination of conventional jet aircraft, STOL aircraft and high-speed ground transportation

[AIAA PAPER 71-508] p0422 A71-29550

Atmospheric turbulence effect on turbine powered transport aircraft, discussing gust accelerations, avoidance, detection, forecasting and pilot control

- p0424 A71-29750  
Jet transport aircraft stability and controllability under atmospheric turbulence conditions, discussing longitudinal and lateral-directional characteristics with particular attention to unstable spiral mode
- p0426 A71-29772  
Jet transport aircraft design for safety under air turbulence conditions, considering cruise altitude limitations and pitch and g excursion reduction by special autopilot mode
- p0427 A71-29777  
Wind tunnel force test program design for jet aircraft configurations, including propulsion system simulation
- p0439 A71-30605  
Alpha jet trainer, describing design, configuration, power plants, landing gear maintainability and mission duration
- p0479 A71-31209  
Dispersal of jet aircraft exhaust emissions near airports and of smoke trails in upper atmosphere, assessing pollutant levels near large urban airports
- p0492 A71-32244  
Jumbo jet trailing vortex mathematical model for studying effect on penetrating aircraft
- p0547 A71-35754  
Large jet transport aircraft trailing vortices, studying velocity fields, core diameters and logarithmic variations of circulation
- p0548 A71-35755  
Administrative techniques of cost/weight tradeoff program for jet transport airplane
- p0550 A71-35812  
[SAWE PAPER 899]  
Variable geometry B-1A bomber aircraft, discussing size, payloads, speed, altitude range and runway takeoff
- p0600 A71-37516  
Single seater turbojet aircraft landing via automatic band switch for ARK-5 and ARK-10 radio compass
- p0604 A71-38017  
Peak velocity vectors in transverse plane of jet transport aircraft wake, measuring tip vortices core size
- p0654 A71-40491  
Flight tests for hazard evaluation to other aircraft from wake turbulence generated by large jet transport airplanes
- p0656 A71-40506  
Minimal time climb velocity optimization for stratospheric and tropospheric jet aircraft flights
- p0664 A71-41972  
Fluid amplifiers theory and use as temperature and pressure sensors, discussing applications in chemical and ammunition industries and jet aircraft control
- p0691 A71-42921  
[IEEE PAPER 70-TP-120-IGA]  
Jet aircraft fuel additives covering functions and applications

## JET AIRSTREAMS

## SUBJECT INDEX

Acoustic measurements of deflected jet VTOL aircraft  
[AD-715939] p0310 N71-19549

Air transportation system noise propagation and  
reduction p0336 N71-21638

Development and description of basic descriptors  
used to analyze jet engine noise, aircraft noise,  
and noise level of airports p0372 N71-21980

Noise characteristics of circular double jet issuing  
from 3 cm and 6 cm diameter nozzles compared with  
those of single jet p0382 N71-22469

Determination of low speed jet noise from fan engine  
for simulated nacelle configuration [NASA-TN-D-6314] p0389 N71-23134

Identification and control of aeromedical factors  
associated with aircraft noise and acoustic  
measurements during C-141 operational missions  
[AD-718097] p0399 N71-23748

Jet noise contribution to far field sound from 1.83  
meter diameter fan determined for two simulated  
nacelle configurations [NASA-TN-X-67825] p0402 N71-24009

Analytic functions and fluid mechanics for noise  
propagation in supersonic jet exhaust flow  
[NASA-CR-1848] p0514 N71-27028

Parametric turbofan engine study for Mach 0.98  
transport with low takeoff and approach noise  
levels using supercritical wing [NASA-TN-X-67865] p0531 N71-29011

Probable impact of future supersonic transport  
aircraft operations on noise environment around  
seven airports in US [AD-722365] p0574 N71-29777

Jet aircraft noise sources and reduction from gas  
turbine engines including jet exhausts, fans, lift  
devices, and unducted rotors p0585 N71-30785

Plug nozzle configuration for jet noise suppression  
[AD-722851] p0620 N71-31698

Noise exposure from supersonic transport operations  
and estimates of changes in noise levels  
[AD-722366] p0622 N71-31793

Noise attenuation by injection of evaporating  
droplets into subsonic duct flow [NASA-CR-111905] p0644 N71-33560

Reduction of jet exhaust noise at airports p0689 N71-36388

Test time and contact stresses effect on jet fuels  
antiwear properties under rolling friction p0025 A71-12570

Jet engine liquid fuel wall layer combustion  
stimulation by repeated oxidizer injection into  
supersonic section of nozzle p0080 A71-14256

Jet fuel soluble corrosion inhibitors evaluation by  
potentiostatic polarization methods p0081 A71-14323

Soviet book on automotive and jet aircraft engine  
fuel chemical stabilizers under storage, transit  
and operational conditions, examining additives in  
relation to stability ratings p0142 A71-17433

Jet fuels thermal stability and corrosive properties  
during prolonged storage p0186 A71-19492

Device for jet fuels antiwear properties measurement  
under rolling friction p0186 A71-19493

Long term exposure effects on high temperature  
resistant supersonic aircraft fuel tank sealants  
p0282 A71-24081

Automated fueling for Kennedy jet airport, using  
computer controlled underground bulk storage-  
satellite tank pipeline system p0288 A71-24300

Jet fuel starter, describing small gas turbine for  
starter, providing sufficient pressurized gas flow  
to rotate main engine [ASME PAPER 71-GT-43] p0351 A71-25976

Jet fuels deoxygenation effects on steels antiwear  
properties and critical loading under vibrational  
and gliding friction p0368 A71-27662

Airport jet fuel delivery system salt driers for  
reducing water content below saturation,  
lengthening filter life and improving downstream  
system components performance [SAE PAPER 710440] p0406 A71-28322

Jet fuel dissolved oxygen concentration effects on  
plunger antiwear properties p0487 A71-31677

Jet fuel antiwear properties relation to viscosity  
and adsorption tar and mercaptans content p0487 A71-31678

Antiwear properties of jet fuels as function of  
dissolved oxygen, resin and heteroorganic compound  
content and temperature, considering antioxidant  
additives p0504 A71-33579

Antiwear property assessment of piston engine and  
aviation jet fuels under point contact conditions,  
recommending ball and cylinder test technique p0534 A71-34447

Air and jet fuel-air mixtures, calculating  
temperature dependent laminar and turbulent heat  
transfer parameters and transport properties  
[ASME PAPER 71-HT-41] p0604 A71-38002

Soviet monograph on carbon deposits in jet engines  
covering distribution, formation, fuel properties,  
reduction and removal and harmful effects in gas  
turbines p0659 A71-40871

Jet aircraft fuel additives covering functions and  
applications p0704 A71-45325

Performance of reducing electrode for neutralizing  
electrically charged hydrocarbon fuel flow  
[AD-712368] p0056 N71-11876

Corrosion inhibitor effects on water coalescing  
characteristics of DOD type filter/coalescer  
elements [AD-712999] p0116 N71-13070

Crash fire hazard evaluation of jet fuels  
[FAA-NA-70-64] p0180 N71-16864

Development of radiotracer method for detecting  
contribution of selected components to storage  
instability of jet engine fuels [BM-RI-7493] p0327 N71-20505

Conversion of experimental turbojet combustor from  
ASTM A-1 fuel to natural gas fuel [NASA-TN-X-2241] p0327 N71-20533

Tests of jet engine fuels to determine effects of  
sloshing and vibration in aircraft fuel tanks on  
flammability hazards [AD-718091] p0400 N71-23805

Performance of simplex and dual orifice fuel nozzles  
with ambient and heated fuel in annular turbojet  
combustor [NASA-TN-D-6355] p0520 N71-28041

Effects of corrosion inhibitors and anti-icer  
inhibitor combinations on coalescing properties of  
filter coalescer elements used to decontaminate  
jet engine fuels [AD-722311] p0529 N71-28577

**LAME FUNCTIONS**

Lame equation perturbation solution and applications  
 to problems involving elliptic cones or infinite  
 sectors p0615 A71-39497

Delta wing problem reduction to Laplace equation  
 solution, using perturbation technique to solve  
 Lame equation resulting from elliptic conal  
 coordinates transformation p0616 A71-39498

**LAMINAR BOUNDARY LAYER**

Supersonic laminar boundary layer structure near  
 convex corners for large turning angles  
 p0004 A71-10461

Three dimensional attached compressible laminar  
 boundary layer on slender cones in hypersonic  
 flight at high angles of attack derived by  
 numerical integration p0010 A71-10926

Minimum suction rate preventing laminar boundary  
 layer separation from curvilinear porous surface  
 in jet flow p0025 A71-12553

Two dimensional axisymmetric laminar boundary layer  
 on blown wing and body of revolution, using  
 sixth-order polynomial for velocity distribution  
 p0025 A71-12554

Laminar-turbulent boundary layer transition point on  
 wing, using hot-wire anemometer and oscilloscope  
 p0025 A71-12555

Leading edge bluntness and boundary layer  
 displacement effects on attached and separated  
 laminar boundary layers in high temperature  
 hypersonic flow over compression corner  
 [AIAA PAPER 68-68] p0070 A71-13437

Laminar boundary layer on spinning bodies of  
 revolution in oncoming stream, using implicit  
 finite difference technique  
 [AIAA PAPER 70-1377] p0072 A71-13660

Heat exchange in dissociating partly ionized gas  
 flow over critical point on permeable surface with  
 injection into laminar boundary layer p0073 A71-13748

Conical body laminar boundary layer heat transfer  
 problem in supersonic flow, using quasi-  
 linearization and implicit finite difference  
 method p0099 A71-15487

Slender cone hypersonic laminar three dimensional  
 boundary layer separation at angle of attack,  
 proposing helical vortex model  
 [AIAA PAPER 71-129] p0153 A71-18573

Dissociating airflow over two dimensional blunt  
 body, determining laminar boundary layer chemical  
 reaction suppression effects on heat exchange  
 p0190 A71-19748

Reacting and nonreacting gases laminar boundary  
 layer flows over two dimensional and axisymmetric  
 bodies at zero lift, comparing numerical methods  
 p0190 A71-19860

Incompressible hypersonic laminar boundary layer  
 flow over sharp cone, based on asymptotic inner  
 and outer flow field expansion p0191 A71-19892

Three dimensional laminar boundary layer on cone at  
 incidence in supersonic flow evaluated by pressure  
 distribution technique, comparing heat transfer,

- Pitot probe measurements, etc  
[AIAA PAPER 70-48] p0264 A71-22088

LATERAL CONTROL

Inertial aircraft lateral guidance system limitations in stochastic gust environment, comparing configurations using aileron or differential spoilers

p0151 A71-18489

Executive jet landing approach lateral-directional handling under IFR ILS simulated conditions, investigating Dutch roll control power effect on crosswind component

p0285 A71-24243

Wing design criteria imposed by high speed requirement for short takeoff aircraft, considering thin sweptback wing with small aspect ratio for lateral control

p0363 A71-27471

Elevons as longitudinal and lateral control elements on low aspect ratio wings, calculating subsonic and supersonic aerodynamic characteristics

p0416 A71-29190

Performance limitation of simplified radio-inertial lateral control guidance system subject to stochastic gusts for automatic landing

p0597 A71-37198

Low speed lateral stability and control flight tests on Avro 707 aircraft

p0227 A71-17083

In-flight determination of lateral-directional dynamics for landing approach [AD-715317]

p0242 A71-17792

Roll-control effectiveness of spoiler configurations on aircraft model with variable sweep wings at supersonic speeds

p0321 A71-20126

Supersonic aircraft lateral control equipment [AD-720740]

p0477 A71-26538

Supersonic or hypersonic vehicle control system comprising elevons with hinge line sweep and free of adverse aerodynamic cross coupling

p0515 A71-27088

LATERAL OSCILLATION

Lateral vibration effects on heaving airfoil blunt trailing edge vortex shedding flows, examining base cavity damping by flow visualization

p0143 A71-17621

Twin turboprop STOL aircraft lateral directional oscillation traced to rudder vibration due to aerodynamic hinge moments interaction with friction

p0508 A71-34019

Lateral oscillations and low speed and lateral stability of free flight lifting bodies [ARC-R-3641]

p0171 A71-15705

LATERAL STABILITY

Aircraft lateral dynamics effect on positioning accuracy along straight flight path, using Loran C data

p0610 A71-38864

Variable stability aircraft lateral directional flying qualities, investigating turbulence effects

p0670 A71-42833

## M

## M WINGS

U VARIABLE SWEEP WINGS

## M-2 LIFTING BODY

NT M-2F2 LIFTING BODY

## M-2F2 LIFTING BODY

M2-F2 lifting body flight control system

[NASA-TN-X-1809] p0157 N71-14526

Vertical tail loads and control surface hinge moment measurements on M2-F2 lifting body at subsonic speeds

[NASA-TN-X-1712] p0165 N71-15003

Convective heat transfer characteristics of M2 and M2-F2 lifting entry vehicles

[NASA-TN-X-1691] p0229 N71-17131

HL-10 and M-2F2 lifting body flight tests

[NASA-TN-X-66712] p0249 N71-18428

Analysis of coupled roll-spiral-mode, pilot induced oscillation occurring with M-2F2 lifting body

[NASA-TN-D-6496] p0642 N71-33307

## M-2F3 LIFTING BODY

Transonic wind tunnel tests of vertical fin loads and rudder hinge moments on M2-F3 lifting body scale model at Mach 0.50 to 1.30

[NASA-TN-X-2286] p0460 N71-24581

## MACH CONES

Mach cones reflection at thin wing subsonic leading edges in supersonic flow, considering axial disturbance velocity and pressure distributions

p0277 A71-23616

Shock standoff distance and Mach disk diameter measurements in underexpanded sonic jets, using nitrogen dioxide-tetroxide working fluid

p0538 A71-34895

## MACH NUMBER

Blunt body problem with detached shock, considering methods of lines and integral relations agreement for wide range of Mach numbers

p0082 A71-14449

Steady two dimensional ideal gas flow past blunt body at incident infinite Mach number, obtaining gas dynamic variable asymptotic expansions as kappa approaches infinity

p0100 A71-15553

Turbulent boundary layer separation at low supersonic Mach numbers based on blowdown wind tunnel tests

p0134 A71-16582

Mach disk in underexpanded exhaust plume predicted by dividing flow field into subregions

[AIAA PAPER 70-231] p0264 A71-22097

Cut-off Mach number of sonic bang propagation on ground for flight track in relation to atmospheric parameters

p0276 A71-23577

Unsteady low Mach number flow calculation by singular perturbation method with matched asymptotic expansions, considering application to aerodynamic noise

p0280 A71-23936

Triple point trajectory of shock-shock Mach reflection off plane wall, comparing to Whitham theory

p0354 A71-26192

Altimeter-airspeed and Mach number pressure transducer with diaphragm free of temperature and vibration effects

p0433 A71-30322

Mach number effects on axial flow transonic compressor characteristics, using empirical corrections based on measured three dimensional grid characteristics

p0497 A71-32715

Shock wave diffraction patterns on plane walled convex corners in air, nitrogen and carbon dioxide at various Mach numbers

p0499 A71-32918

Two dimensional supersonic variable area nozzle geometry calculation as function of Mach number

p0696 A71-44071

Wind tunnel tests of mixed compression axisymmetric inlet system at Mach numbers 0.6 to 3.5

[NASA-TN-D-6078] p0116 N71-13024

Knudsen flow and Mach number effects on hypersonic and supersonic wakes of cylindrical bodies and spheres

[REPT-69-7] p0120 N71-13403

Parametric engine study for Mach 0.98 commercial air transport with supercritical wing

[NASA-TN-X-52961] p0254 N71-18733

Numerical analysis of plane steady transonic flows past lifting airfoils with free-stream Mach numbers less than unity

[D180-12958-1] N71-34275

Comparison of blockage corrections in porous tunnel wall to closed wall tunnel at subsonic Mach numbers

[ARA-19] p0724 N71-37853

## MACHINE LEARNING

U LEARNING MACHINES

## MACHINE LIFE

U SERVICE LIFE

## MACHINE ORIENTED LANGUAGES

NT FORTRAN

Multiple dialect automatic test language for avionics industry, considering software design

p0063 A71-13077

Abbreviated test language for avionic systems, discussing program organization, statement formats, vocabulary and syntax diagrams

p0659 A71-40812

## MACHINE STORAGE

U COMPUTER STORAGE DEVICES

## MACHINE TOOLS

NT GRINDING MACHINES

Moire effect analysis of stress and strain of machine parts and structural elements

[AD-717826] p0376 N71-22168

## MACHINERY

Precipitation detector and mechanism for stopping and restarting machinery at initiation and cessation of rain

[NASA-CASE-XLA-02619] p0475 N71-26334

## MACHINING

NT ELECTROCHEMICAL MACHINING

NT MILLING (MACHINING)

NT SPARK MACHINING

Concorde airframe structures, discussing numerically controlled machining of aluminum alloy integral units

p0146 A71-17954

Aircraft engines and stationary gas turbines high precision components, discussing die forging and machining combined with joining processes

p0274 A71-23299

## MAGNESIUM

Combustion of large magnesium particles during pressure change in ambient medium within range from 100 to 760 mm Hg

[NASA-TT-F-13503] p0327 N71-20531

## MAGNESIUM ALLOYS

Medium strength corrosion resistant weldable Al-Mg alloy for aircraft jettisonable tanks, napalm containers and jet shroud pipes fabrication

p0481 A71-31437

Comparison between silicon-magnesium-aluminum alloy and copper aircraft electric conductors and terminals noting types of tests

[TRC-BR-19785] p0397 N71-23547

## MAGNETIC ABSORPTION

U ELECTROMAGNETIC ABSORPTION

## MAGNETIC ANOMALIES

Aircraft permanent magnetic fields strength variation, observing magnetic anomaly detection equipment performance degradation

p0691 A71-42923

## MAGNETIC COILS

Gyrocompass strapdown three coil synchro sensor magnetometer in conjunction with vertical gyro, eliminating azimuth detector inertial platforms

p0201 A71-20340

## MAGNETIC EFFECTS

Electrical resistive incompressible fluid motion past thin airfoils in oblique field, showing inverse dependence of lift on magnetic Reynolds number

p0280 A71-23956

## MAGNETIC FIELD INTENSITY

U MAGNETIC FLUX

## MAGNETIC FIELDS

NT GEOMAGNETISM
